Post Towns

The type references given to the numeral cancellations are those quoted in the Jamaica Handbook and reprinted on page 3 of this catalogue. The following extract from the handbook shows that certain numbers were changed from one office to another ; in order to preserve some continuity in each office, we have put the pines under the original office and the CC issues under the new office when the change was made about the end of 1862. Collectors must understand that pine issues might have been used in either of the two offices that used the same number.

"The numbers from "A27" to "A78" inclusive were only in general use on British stamps for little over a year, namely, from the 1 March 1859 till about the end of May 1860 ; hence the reason why they are so difficult to obtain.

"During the interregnum the postmasters laid aside their obliterators until stamps reappeared with the Colonial issue in November 1860, when they were again used by the same offices.

"On the closure of three post offices, some numbers had to be re-allotted about 1 November 1862 (if not on that day).

"Accordingly, all the post towns using the numbers from "A38" to "A59" inclusive, were moved down the list one place or more, an effort being made to keep the list in alphabetical sequence as three new post offices had to be included.

"The numbers from "A38" to "A69" inclusive were therefore used at a different office after November 1862 from what they had been before that date."

Dear Sirs,

I feel I must send you a line to tell you how pleased I was yesterday with the efficient and kindly way the Stamp Sale was conducted.

This was my first experience of a Stamp Auction, and I now look forward to coming to others in the future.

I succeeded in getting some nice stamps at very reasonable prices, and I was much impressed by the fair way the excellent Auctioneer conducted the sale.

I should like to tender to the Auctioneer, and also to his most helpful assistants, my sincere thanks.

Yours faithfully,

T. J. KIRKLAND
