## Preface to Second Edition.

**I**T is with great pleasure that we present the Second Edition of our Catalogue of Stamped Envelopes, Wrappers, Letter Sheets and Postal Cards of the United States. The kind manner in which our first attempt in this direction was received gave the publishers much encouragement in undertaking the monumental task of a new edition.

Necessarily many defects existed as is invariably the case in the first issue of any catalogue of this nature. The fixing of accurate prices might be considered the most difficult task of all, and even now after two more years of experience many figures quoted are possibly a little vague, a number of varieties not having been in the market for years, thus compelling the compilers to guess as nearly as possible. However, all figures quoted should be understood to be the lowest net selling prices, regardless of size of order.

We have also in the present edition adhered to our policy of ignoring all "bidders" or "factory" samples, Centennial specially made, and "specimen" varieties, as it is our desire to make the collecting of entire envelopes as simple as possible.

The comparative numbers of the National Philatelic Society's publication have been maintained, and in many cases made more complete. It was frequently necessary to insert two numbers as more advanced collectors were apt to be misled by a reference to one N. P. S. number only.

Our stock is kept according to this book, thus, should anyone desire special minor varieties they should state so when ordering, otherwise such specimens will be supplied as may be on hand.

All measurements have been expressed in millimeters as this system seems to be gaining ground and deserves encouragement. 100 mm. are equal to 3 15-16 inches.

We are indebted to Mr. George Toppan and his valuable lists for many corrections and other kind friends for their assistance on the present edition. The numbers adopted by us in the First Edition have been maintained, as many have arranged their collections according to same.

Should any of our friends or customers discover errors or omissions of any kind, we would be grateful to have our attention called to them in order that they may be corrected in future editions.

# Eleventh Issue.

Plimpton & Morgan, 1887-89.

Sizes, shapes and watermark the same as the 1886 issue, No. 7.

Dies of 1 cent, 2 cents, 4 cents and 5 cents are new. 30 cents and 90 cents are the old Plimpton dies. There is only one die of each, except 2 cents, which has two dies. Figure of value under the bust of each of the values 1 cent to 5 cents is the distinctive feature. In the 2-cent rejected Die one (or A) the lower corner of the bust points between the third and fourth tooth of the frame. In Die B it points to the second tooth of the frame.

## Fourteenth Issue.

### HOLYOKE SERIES.

James Purcell, Contractor and Manufacturer, 1894-95.

Dies—Same as preceding, except new die (B) of 5 cent blue. Coat collar turned up to chin is the marked peculiarity.

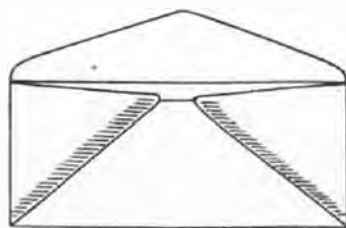

Sizes and shapes same as appear in 1890 and 1893 issues. Numbers are used again instead of letters: Note, No. 1; Full Letter, No. 2; Commercial, No. 3; Legal, No. 13; Small Legal, No. 14; Extra Official, No. 9.

The marked peculiarity of the shapes of this issue is that the left flap overlaps the right. In the official sizes the sides are gummed over the bottom, same as in the Reay issue.

Watermarked U. S., P. O. D. in letter U, 94 in letter S—No. 12. There are several minor varieties of this watermark.

There are a great variety of shades in 2 cent green, varying from a light yellow green to a very dark green.

The manila and amber manila paper used is wove only.

## HARTFORD SERIES.

Same Contractor, 1895-97.

Same dies used except 5 cents, of which First or Die A (Grant) is used again. New make of Envelopes, the right flaps overlaying the left. In the official sizes the bottom is gummed over the sides.

Note.—Holyoke paper was at first used and can be distinguished by the poorly shaped watermark. Later the Company manufactured its own paper and produced a more symmetrical watermark, which is somewhat smaller. In order to avoid unnecessary complications we shall catalogue but one series.

A variety of shades of the 2 cent green exist also in this series.
