THE  
**COINAGES**  
of the World,  
ANCIENT and MODERN.

This work is intended to give correct information on a subject of which no educated person can afford to be ignorant; and yet, till the publication of this volume, it has been impossible to obtain a general knowledge of the coinages of the world without reading through dozens of heavy quartos, at great loss of time.

By the aid of this book any one can at once determine the nationality of any coin they may possess and obtain much interesting information concerning the cause which led to its issue. It is well filled with beautifully executed representative coins of every people, age and country, and is the only comprehensive book on the subject ever published.

Revised List of all  
Postage Stamps &  
Stamp'd Envelopes.

This is the only work of the kind ever published in America, and is destined to become the standard of all English-speaking stamp collectors. It contains an accurate list of every postage stamp ever issued, minutely describing every variety of color, paper and water-mark, together with all the minor details concerning the different dies of the same stamp. It is fully illustrated with about fifteen hundred engravings, and besides being the latest, is the most accurate work of the kind ever printed. Numerous notes explain every doubtful point in philately, and give many interesting details concerning the causes which led to the issue or suppression of noted stamps.

Mr. Coster's valuable monograph on the United States locals is added entire, forming together a work which no collector can afford to be without. It is not a price list or a dealer's advertisement in any sense of the word. 8vo., 400 pages, cloth, \$2.50
