THE BOSTON STAMP BOOK

MAY NOT BE THE BEST ON EARTH

As some of its subscribers have said it is. In fact, I think they are a little over-zealous, but I am confident the paper is worth

50 CENTS A YEAR.

I should like to send you a sample copy, if you have not seen the paper, and let you see for yourself how good it is.

PUBLISHERS' PREFACE.

Plate number collecting, so far as the United States stamps are concerned, is not a new thing. For many years some of our largest collectors have been adding plate number strips to their collections, but during the past two years it has become a very popular branch of Philately. Since the Bureau of Engraving and Printing, of Washington, D. C., has taken the contract for printing the adhesive postage stamps, the collecting of their plate numbers and imprints has become a regular fad with the collectors of U. S. stamps. The present catalogue and reference list is the first of its kind that has yet been published. The prices quoted by us are thought to be a fair reflex of the present market values of plate numbers, the demand at present exceeding the supply; especially is this so regarding those stamps issued prior to 1890. The publishers do not claim that this book is absolutely correct, and would be obliged to correspondents who would call their attention to any errors that may exist. We have taken every precaution to make this reference list as accurate as possible.

While it is known that at least two plate numbers of the three cent 1861 scarlet exist, we do not chronicle it, or the two cent green Navy, both of which we consider freaks and not intended for postage. We believe that all of the grilled stamps were issued from all the plates of those not grilled, still we have only chronicled those that we know exist. Many of the plate numbers of the second, third and fourth issues are practically unattainable. Those plates issued since 1879 are all attainable. The plate numbers of the 1851-60 issues were printed on the sides of the sheets, and those issues up to 1894 were printed on the top and bottom of the sheets. Most of the Bureau sheets show the plates on top, bottom, right and left sides. Some people collect all positions, but as all plate imprints are identically the same, we think one imprint and plate number of each ought to be sufficient. Our prices may be in some instances low, but they are the prices at which we now sell any we have in stock, and parties in ordering will please give location of strip they desire, whether top, bottom, etc., and the same will be filled as we can furnish. We intend carrying a very large and varied stock of plate numbers (all of which, we need not add, are unused), but it is not possible to have all the plates priced in stock at all times. We intend, about January 1, 1897, to issue another edition of this catalogue, which will contain all information (as this one does) of the plate number issues up to the day of going to press. We desire to thank many friends for kindnesses in assisting us in compiling this catalogue, as well as the officials of the Bureau of Engraving and Printing, for information and courtesies shown.
