# The P R E F A C E.

**M**Y Profession obliging me to be conversant with *Mathematical Books*, (the Printing whereof, and *Music*, have been my chiefest Employment) I have observed two Things, many times the Cause why Books of this Nature appear abroad not so correct as they should be; either, 1. Because they are too much hastened from the Press, and not Time enough allowed for the strict and deliberate Examination of them; which in all Books ought to be done, especially in these, for as much as one false Figure in a *Mathematical Book*, may prove a greater Fault than a whole Word mistaken in Books of another Kind. Or, 2. Because Persons take Tables upon Trust without trying them, and with them transcribe their Errors, if not increase them. Both these I have carefully avoided, so that I have Reason to believe (and I think I may say it without Vanity) there never were Tables more exactly printed than in this Book.

The *Perpetual Almanack* was the ingenious Invention of that Improver of Arts, and Encourager of Artists, Sir SAMUEL MORELAND.

In the former Editions of this Book, I only inserted the first three Tables for finding the *Day of the Month*; but in this, I have added five other Tables, for finding the *Moveable Feasts* and *Terms* for any Year past, present, or to come.

I have also in this Edition added Directions relating to the Purchasing and Measuring Land, the *Principal Fairs in England and Wales*, a Table of the *Sun's Place*. Monthly Directions relating to *Gardening*. The Reduction of *English Money*, with the *Weight and Value* of divers Foreign *Gold and Silver Coins*; enlarged the Table for ready casting up of *Money*, as likewise those for *Interest, Rebate, and Annuities*; and whereas, in the former Impressions the Parts of a *Penny* were expressed in *Decimal Fractions*, I have reduced them into *Fartbings*, which though they cannot be so exact, yet are more easy to be understood, and do not differ from the Truth half a *Kartbing*; as also a Table for the casting up of *Portugal Money*, now current here, likewise, for *Guineas and half Guineas*. The Roads which were very deficient, are now compleat, and put in a better Method than any yet extant, the *County and Hundred, Latb, Ward or Wapentake*, being added, whereby may be seen through what *Counties* each Road lies, and through what *Divisions* of such *Counties*; and lastly, I have added a Catalogue of all the *Counties, Cities, Corporations, and Brough Towns* in *England and Wales*, with the Number of *Knights, Citizens, and Burgeesses*, chosen to serve in Parliament,

To conclude, you will find nothing in this Book but what is very useful; according to the Truth of which, you may approve or dislike the Endeavours of,

Your Servant,

John Playford.

N. B. This Preface was wrote before the Alteration of the Style took place.

The even Hundreds are to be found at the Top of the Table, having their Dominical Letters over them, as 1700, 2100, have C; 1800, 2200, E, &c. The Parts of every Hundred are to be found in the Side, and have their Dominical Letters against them, as 1, 29, 57, 85, have B, D, F, or G; 2, 30, 58, 86, A, C, E, or F, according to which Century of Years they belong; and so for the rest. To find the Dominical Letters for even Hundreds and Parts, the Rule is; Seek the Hundreds in the Top, and the Parts in the Side, and in the Angle of Meeting is the Dominical Letter or Letters; so the Dominical Letter for 1753 is G, for 1754 F, 1755 E, 1756 DC, it being Leap-Year; D being used till February 25, and C all the rest of the Year.

A TABLE shewing, by the Help of the Dominical Letter, what Day of the Week any Month of the Year begins for ever.

Having, by the last Table, found the Dominical Letter for any Year you desire, underneath it in this Table you have the Day of the Week each Month begins on throughout the Year; as the Dominical Letter for 1763, being found to be B, under B you find *Satur. Tuesd. &c.* find against them on the left Side *Jan. Feb. &c.* which shews the first of *January* is on a *Saturday*, the first of *February* on a *Tuesday*, &c. If it be Leap-Year, and has two Dominical Letters, you must use the first Letter only for *January* and *February*, and for the other Months the second Letter. As the Dominical Letters for 1764, A G, A shews only that *January* begins on *Sunday*, and *February* on *Wednesday*, but G shews the Beginnings of all the rest; the Figures with each Month shew the Number of Days, but in Leap-Year, *February* has 29 Days.

Having, by the two former Tables, found what Day of the Week the Month begins, this Table readily shews the Day of the Month. Example, The first of February, 1763, is on a Tuesday, and I would know what Day of the Month the third Friday in that Month is? I seek for the Square in this Table that begins with Tuesday, and in that Square look for Friday, and against it I find 4, 11, 18, 25; which are all the Fridays in that Month, the third answering the Question, being the 18th Day of the Month. Again, What Day of the Week is the 16th of April, 1764. By G the Dominical Letter for the latter Part of the Year, I find in the preceding Table that April begins on Sunday, and looking in that Square in this Table, I find the 16th Day Monday.

The Prime by the Table is found after the same Manner as the Dominical Letter; the even Hundreds are to be sought for at the Top, and the Parts on the Side of the Table; and when the Number of Years sought consists of Hundreds and Parts, then the Angle of Meeting shews the Prime. Example, What is the Prime for the Year 1763? I seek for 1700 at the Top, which I find in Page 5; underneath which, and against 63, I have 16 the Prime desired. But without the Table, this is the Rule: Divide the Year of our Lord by 19, and to the Remainder after Division add 1, and the Sum is the Prime for that Year. So 1764, divided by 19, leave 16, to which adding 1 makes 17, the Prime for 1764: And in the Table under 1700, and against 64; you will find the Prime for that Year to be 17, as before.

Having found the Dominical Letter and Prime for any Year you desire, seek for the Prime in the Square next the Dominical Letter, and in a straight Line to the Right Hand, under *From Christmas to Shrove Sunday*, you have the Weeks and Days from *Christmas to Shrove Sunday*; and under *Shrove Sunday*, the Day of the Month *Shrove Sunday* happens on; and in the last Column (under the Title *Easter Day*) you have the Time of *Easter*. Example, For 1763 the Dominical Letter is B, and Prime 16; I seek for 16 against B, and in that Line find 7 Weeks 1 Day, the Time between *Christmas* and *Shrove Sunday*, and that *Shrove Sunday* is on *February 13*, and *Easter Day* on *April 3*, for that Year. If, in the Bissextile Years, *Shrove Sunday* shall fall in *February*, as it will always do if *Easter Day* falls upon, or before, the 18th of *April*, then the former of the Dominical Letters for that Year is to be used for finding *Shrove Sunday*; but if *Easter Day* (which is always to be found by the letter of the two Letters) falls after the 18th of *April*, then *Shrove Sunday* falls in *March*, and is to be found by the same Letter.

N. B. When the Dominical Letters are DC, and the Golden Numbers 1, 9, 12, or 17, *Shrove Sunday* will fall on the 29th Day of *February*.

This Table is but a Continuation of the former, and after the same Method shews Rogation Sunday, Ascension Day, Whitsunday, Trinity and Advent Sunday. Example: For 1763, B being the Dominical Letter, and 16 the Prime, shews Rogation Sunday is on May 8; Ascension Day, May 12; Whitsunday, May 22, &c. Again, 1764, the Sunday Letters (it being Leap-Year) are AG, but the former serving only till February 25, I take G, and seek for the Golden Number 17 against it; and guiding my Eye to the Right Hand, find Rogation Sunday to be on May 27, Ascension Day on May 31, Whitsunday on June 10, &c. In the same Manner, by the next Table, you may find the Moveable Terms for ever. Example: In 1764, Easter Term begins May 9, and ends June 4; and Trinity begins June 22, and ends July 11.

Having found the Dominical Letter and Prime for any Year you desire, seek for the Prime in the Square next the Dominical Letter, and in a straight Line to the Right Hand, under *From Christmas to Shrove Sunday*, you have the Weeks and Days from *Christmas to Shrove Sunday*; and under *Shrove Sunday*, the Day of the Month *Shrove Sunday* happens on; and in the last Column (under the Title *Easter Day*) you have the Time of *Easter*. Example, For 1743 the Dominical Letter is B, and Prime 15; I seek for 15 against B, and in that Line find 7 Weeks 1 Day, the Time between *Christmas* and *Shrove Sunday*, and that *Shrove Sunday* is on *February 13*, and *Easter Day* on *April 3*, for that Year. For 1744, Dominical Letters AG, and Prime 16. A shews only 6 Weeks from *Christmas*, and that *Shrove Sunday* is *February 5*; and G that *Easter Day* is *March 25*.

This Table is but a Continuation of the former, and after the same Method shews Rogation Sunday, Ascension Day, Whitsunday, Trinity and Advent Sunday. Example: For 1743, B being the Dominical Letter, and 15 the Prime, shews Rogation Sunday is on May 8; Ascension Day, May 12; Whitsunday, May 29, &c. Again, 1744, the Sunday Letters (it being Leap-Year) are AG, but the former serving only till February 25, I take G, and seek for the Golden Number 16 against it; and guiding my Eye to the Right Hand, find Rogation Sunday to be on April 29, Ascension Day on May 3, Whitsunday on May 13, &c. In the same Manner, by the next Table, you may find the Moveable Terms for ever. Example: In 1744, Easter Term begins April 11, and ends May 7; and Trinity begins May 25, and ends June 13.

To find the Sun's Place for any Day in any other Year.

For the first after Bissextile, till the End of *February*, add 46' to the Sun's Place on the same Day in the Bissextile Year; and after *February*, for the rest of the Year subtract 14 $\frac{1}{2}$ , and the Result in both Cases will be his Place for the Day required. Example, Let the Sun's Place on the 10th of *February* 1765, (being the first Year after Bissextile) be required. The Sun's Place on the 10th of *February* in the Bissextile Year 1764, is  $\text{---} 21^{\circ}$ , 39', to which add 46', according to the former Part of the Rule, and it makes  $\text{---} 21^{\circ}$ , 5', the Place of the Sun sought, on the 10th of *February* 1765. Again, if the Sun's Place should be required for the 25th of *March* in the same Year 1765. From his Place for the same Day 1764,  $\text{---} 5^{\circ}$ , 20', subtract 14,

according to the latter Part of the Rule, and the Remainder  $5^{\circ}, 6'$ , is the Answer sought. For any Day in the second Year after Bissextile, it is only subtracting  $14\frac{1}{2}$  from the same Day in the first; and in the third Year, subtracting  $14\frac{1}{2}$  from the same Day in the second, and you will have the Sun's Place at any Time desired. And to continue the Sun's Place for the Bissextile Years, if  $1', 49''$  is added to the Sun's Place in the preceding, it will give his Place on the same Day in the following Bissextile Year. But, to prevent Fractions, add  $2'$  for the first following Loop-Year,  $3'$  for the second,  $5'$  for the third,  $7'$  for the fourth, and  $9'$  for the fifth. And, by this Method and the foregoing Rules, the Sun's Place may be found tolerably exact for a long Time.

*Directions relating to the Purchasing and Measuring of Land.*

First, see the Land which thou intend'st to buy,  
Within the Seller's Title clear doth lie :

And that no Woman to it doth lay Claim,  
By Dow'ry, Jointure, or some other Name,  
That may it 'cumber. Know if bound or free  
The Tenure stand, and that from each Feoffee  
It be releas'd ; That the Seller be so old,  
That he may lawful sell, thou lawful hold :  
Have special Care that it not mortgag'd be,  
Nor be entailed on Posterity.

Then if it stand in Statute bound or no,  
Be well advis'd what Quit-Rent out must go,  
What Custom Service hath been done of old,  
By those who formerly the same did hold ;  
And if a wedded Woman put to Sale,  
Deal not with her unless she brings her Male ;  
For she doth under Covert Baron go,  
Altho' sometimes some traffic so (we know).  
Thy Bargain being made, and all this done,  
Have special Care to let thy Charter run  
To thee, thy Heirs, Executors, Assigns,  
For that beyond thy Life securely binds. [vent  
These Things foreknown and done you may pre-  
Those Things rash Buyers many Times repent.  
And yet when you have done all that you can,  
If you'll be sure, deal with an honest Man.

*Note: That for the measuring of Land, it is measured by the Pole, Perch, or Rod, which is usually 16 Feet and a half long ; and, according to the Statute, 4 Poles in Breadth and 40 Poles in Length make an Acre, from which is made this Table following.*

By the foregoing *Regal Table*, may easily be found the Year of each King's Reign corresponding to the Year of our Lord, always remembering to begin the Year of our Lord on *January 1*, and adding 11 Days to reduce it to the New Style.

*Example.*

I have a Deed bearing Date the 17th of *May* in the Two and Twentieth Year of the Reign of King *Charles* the Second, but the Year of our Lord is omitted; I desire to know in what Year of our Lord the Deed was made?

I find by this Table, that King *Charles* the Second began his Reign the 30th of *January* 1648; from whence I conclude that the 17th of *May*, in the first Year of his Reign, must be in the Year of our Lord 1648, which proves by Consequence, that the 17th of *May*, in the Two and Twentieth Year of his Reign, must be in the Year of our Lord 1670.

Directions what is to be done each Month  
in the *Orchard, Kitchen, and Flower  
Gardens.*

## J A N U A R Y.

*Orchard and Kitchen-Garden.*

**B**ARE the Roots of your Fruit Trees, and if the Weather be open, lay good Dung to them. Gather your Cyons for Grafts, before the Buds sprout, and cleanse your Trees from Mofs. Plant Quicksets. Transplant young Fruit Trees, and prune the old towards the Decrease of the Moon. Set young and prune your old Vines. Begin to nail and trim your Wall-Fruit Set Beans and Pease. Sow Lettuce, Chervile, Spinach, Radish, and other Sallading in hot Beds. Turn up your Bee hives, and sprinkle them with a little warm and sweet Wort.

*Flower-Garden.*

**P**RESERVE your best Gilliflowers, Auricula's, early Anemonies, and Ranunculus's, from too much Wet, Frost, or Snow; as likewise your Carnations, and such Seeds as are liable either to be washed away, or over-chilled, by covering them, and striking off the Snow where it lies too thick. About the Middle of this Month, if you plant your Anemomy Roots and Ranunculus's, they will be secure without covering. Keep your Conservatory, where your Greens and nice Plants are housed, close shut, except to let in the Sun; and if it freezes extremely, keep a small Fire of Charcoal therein. Set up Traps for Vermin; and, towards the End of the Month, earth up with fresh and light Mould the Roots of such Auricula's as have been uncovered by the Frost.

**B**E G I N to graft Apples, some Pears, Plums, Cherries, &c. Cover the Roots of those Fruit Trees the last Month left bare, and prune such of your Fruit Trees and Vines as could not be done then; for this Month is most proper to bind, plash, nail, and dress, because less subject to Frost. Be still cleansing your Trees from Moss, and take off the Webbs of Caterpillars from the Tops of Twigs, Plants, Vines, Hops, &c. Set all Sorts of Kernels and stony Seeds. Still keep close your Conservatory, watering the Roots of your Orange and Lemon Trees, &c. with Water, wherein has been Sheeps Dung steeped in the Air or Sun, for two or three Days, taking Care not to wet the Leaves, lest you destroy your Plants.

*Flower-Garden.*

Transplant such fibrous Roots as you had not finished in *March*; as Violets, Hepatica, Primroses, &c. Shelter your seeding Auricula's from the Sun. Take out your *Indian* Tuberoses, parting the Off-sets carefully, lest you break their Fangs; then put them in natural (not forced) Earth, placing a Layer of rich Mould beneath, and about them natural Earth, to nourish the Fibres, but not to touch the Bulbs; then plunge your Pot in a hot Bed moderately warm, and give them no Water 'till they spring; then set them under a South Wall; in dry Weather water them freely, and expect an incomparable Flower in *August*. Set out Flos Cardinalis. Slip and set Marums. Water Anemonies, Ranunculus's, and Plants in Pots, once in two or three Days, if Drowth requires it. Preserve your best Tulips, Ranunculus's, Anemonies, and Auricula's, from Storms of Rain or Hail, and the parching Rays of the Sun. Lay Gilliflowers, which will take root in six Weeks, and be ready to transplant into a light loamy Earth; you may plant six or seven in a Pot; but be careful to keep them from too much Rain. Slips of Myrtle, set in a cool and moist Place, do now frequently take Root. *Interest of Money for Days.*

**T**O find the Interest of any Sum of Money, for any Number of Days, at any Rate of Interest; the Rule is,

Multiply the Principal by the Rate, and the Product by the Number of Days, and it gives a Dividend; which divided by 36500 (the common Divisor for all Rates), answers the Question.

Example 1. *What is the Interest of 500 l. at 5 per Cent. for 200 Days?*

The Principal 500

The Rate 5

- I. What an Annuity, Rent, or Pension, forborne any of those Numbers of Years, amounts to.
- II. What an Annuity, to continue any of those Numbers of Years, is worth in ready Money.
- III. What Annuity any Sum of Money will purchase, to continue any of the abovesaid Numbers of Years.

*Note,* That you have two Years instead of one Year purposely set down in the *Forbearance of Annuities*, because the Annuity is not due till the End of one Year, and therefore cannot be considered as forborne that Time.

**T**HESE Tables are so plain in themselves, that they need no Examples to illustrate them; but because Questions only of the particular Years mentioned at the Top of each Column can be resolved by them, I shall in the next Page insert a Table, whereby you may try any Number in the foregoing Tables, and answer any Question belonging either to *Forbearance*, *Discompt*, or *Purchase of Annuities* (as also to the *Rebate of Money*) at 5 per Cent. Compound Interest, for any Number of Years not exceeding 40. To do which, this is the Rule:

*Multiply that Number in the Tables which stands right against the Number of the Years proposed, and in the Column to which the Question belongs, whether for Forbearance, Discompt, or Purchase of Annuities, (or Rebate of Money) by the Annuity to be forborne, discompted, or purchased, or by the Sum to be rebated, and the Product will be the Answer in Pounds and Decimal Parts.*

One Example will be sufficient to explain the whole Table, which shall be this.

*If 500 l. Annuity be forborne 21 Years, what will it amount to?*

|   |   |              |

And after this Manner are all Questions belonging to the following Table resolved.

To find the foregoing Fraction .3625 by this Table you must do thus: Seek for the *Decimal Fraction* in the Table that is nearest to it, (since you cannot at once find all the Figures) which is .35; against which on the Left-Hand you have the Value of it, *viz.* 7*s.* subtract this from .3625; and there will remain .0125, which being found in the Table, against it stands 3*d.* which added to 7*s.* gives 7*s.* 3*d.* for the Value of .3625 of a Pound.

And thus you may find the Value of any *Fraction* of a Pound by this Table.

I. *Note*, That for every Letter or Parcel, from any of the above-mentioned Places to *London*, you are to pay one Penny each at the Receiving-House; and nothing at *London*: But from *London* to the abovesaid Places, the Messengers are allowed to take for each Letter or Parcel, not exceeding a Pound, one Penny, and no more.

II. And considering divers of these Places are remote, It is desired you to put your Letters and Parcels before Six of the Clock over Night, at the Receiving Houses, from whence they will be Collected and brought into their proper Offices; because divers of the Country Messengers go on their Walks by Six of the Clock next Morning, and thereby will gain a Day's Time in the Delivery: But for those Places that are nearer, Letters are Collected and Delivered two or three Times a Day.

III. And it is further Notified, that all General Post-Letters, both Foreign and Domestic, are convey'd from the abovesaid Offices, directed to the Towns abovementioned, every Day at Twelve o'Clock. And Answers thereto being put into the Receiving-Houses in the Country-Towns, will next Night be safely put into the General Post-Office.

## DIRECTIONS.

**N**OTE, that by these *small Tables* is effected *all* that can be performed by those larger, which are calculated from Day to Day throughout the Year, and that to a *larger Sum* than any yet extant; no *Tables* hitherto published exceeding *Ten Thousand Pounds* for one Year, and these extending to above *Twenty-five Thousand*; as appears manifestly, because if you multiply 25000 by 365 Days, the Product will amount to but 9,125,000, and these *Tables* are calculated up to *Ten Millions*.

The Use whereof may be understood by observing this Rule:

Always to multiply the Sum by the *Number of Days*, or the *Number of Days* by the *Sum*; and the *Interest* of the *Product* may be found in these *Tables*, as is apparent by an Example, *viz.*

To find the Interest of 5654*l.* for 154 Days, at the Rate of 6 *per Cent. per Ann.* multiply as before directed, and the Product will be 8 Hundred and 70 Thousand 7 Hundred and 16 Pounds: And that Sum for One Day required the same Interest as 5654*l.* doth for 154 Days, which will appear by the *Tables*.

Which Sums being added, sheweth, That 870716*l.* Principal for 1 Day at 6 per Cent. requireth — *l.* 143 : 2 : 7  $\frac{532}{1000}$ , which is the true Interest of 5654*l.* for 154 Days.

And whereas there is a Difference in the common Way of computing Quarterly Interest by 3, 6, and 9 Months, and by single Days, the same may be thus rectified, allowing each a true Proportion of the Year, being Three Hundred Sixty Five Days, *viz.* 3 *Mon.* 91 Days and  $\frac{1}{4}$ , 6 *Mon.* 182 Days  $\frac{1}{2}$ , 9 *Mon.* 273  $\frac{3}{4}$ . To either of which, if you add the remaining Days that exceed 3, 6, or 9 *Months*, and multiply the Sum by the Number of Days, and add  $\frac{1}{4}$ ,  $\frac{1}{2}$ , or  $\frac{3}{4}$ , of the principal Sum, for  $\frac{1}{4}$ ,  $\frac{1}{2}$ , or  $\frac{3}{4}$ , of a Day, to the said Product of whole Days, the Interest being found in these Tables, as before directed, will agree with the common, though uncertain Way of reckoning, by 3, 6, or 9 *Months*; by Reason they differ, One from the Other, 3 Days in 3 *Months*; one 3 *Months* containing but 89, and others 92 Days.

By which the Quarterly Interest of all Sums of Money may expeditiously be found at the following Rates, *viz.*

1, 2, 3, 4, 5, 6, 7, 8, 9, and 10,  
*per Cent. per Annum.*

The Rule is, Multiply the Sum proposed, by the Interest in the Table, under the Time, and against the Rate required; and divide the Product by 100, with cutting off two Figures to the Right-hand, and you have the Interest in Shillings: Then multiply the Remainder of the Shillings by 12, and divide the Product by 100, it will give you the Pence; and

M m

the.

the Remainder of them multiplied by 4, and divided by 100, will give you the Farthings.

*Example.*

172 Pounds for 9 Months, at 6 per Cent. per Annum.

Multiply 172 the Principal,  
by 90 the Interest in Shill.

|           |     |    |

By which it appears, the Interest is 154 Shillings, 9 Pence, two Farthings, and  $\frac{4}{100}$  of a Farthing.

or,  $l. 7 : 14 : 9 \frac{1}{4} \frac{2}{5}$ .

Quarterly Interest may also be found in this Book, by proportioning the Time truly thus, reckoning,

|                            |   |       |   |           |

| 91 Days and $\frac{1}{4}$  | } | to be | { | 3 Months. |
| 182 Days and $\frac{1}{2}$ |   |       |   | 6 Months. |
| 273 Days and $\frac{3}{4}$ |   |       |   | 9 Months. |

Which are truly Quarterly Proportions of a Year, viz.  $\frac{1}{4}$ ,  $\frac{1}{2}$ , and  $\frac{3}{4}$  of 365 Days.

To either of them add the Days that exceed 3, 6, or 9, Months, and proceed as directed in the Beginning of this Book, you will have the Interest of the Quarters, and Days, at one Operation, which the true Number of Days, taken as they fall, will differ from, by Reason three Months contain sometimes but 89, and at other Times 92 Days.

A Scheme

A Scheme of the Proportions the several Counties in *England* paid to the *Land-Tax* in 1693, and to the *Subsidies* in 1697, compared with the Number of Members they send to Parliament.

In this Scheme the Proportions are thus considered, *viz.* that as the whole Kingdom sends 513 Members to Parliament, so the whole of each Tax is divided into 513 equal Parts; and the

1<sup>st</sup> Column shewing the Names of the County; the

2<sup>d</sup> Shews how many of the 513 Parts each County paid to the *Land-Tax* in 1693.

3<sup>d</sup> How many of the 513 Parts each County paid to the *Subsidies* in 1697; and

4<sup>th</sup> How many of the 513 Members each County sends to Parliament.
