

# Collector's Cabinet.

**ALWAYS** be very particular in sending to us, to write your name plainly, and be sure you give your Post Office address every time. We have over one hundred letters that we can not reply to nor send the articles ordered, simply because the writers were so heedless as to neglect either to sign their names or to give their Post Office address.

Collectors are quite apt to go where their attention is called, and, if they find goods as they are represented, will invariably purchase them there in preference to spending their time in seeking elsewhere; intending purchasers will find it to their interest to consult us.

In sending money by post, Register the letter or send Post Office Order, otherwise we will not be responsible in case of their loss. All amounts of \$2 and upwards may be Registered at our expense.

*Color Charts Now Ready, 80c. Every Collector should possess a Copy. [80c.]*

in the office of the Librarian of Congress, at Washington.

# A COLOR CHART

DESIGNED TO ILLUSTRATE AND IDENTIFY THE COLORS  
OF POSTAGE STAMPS.

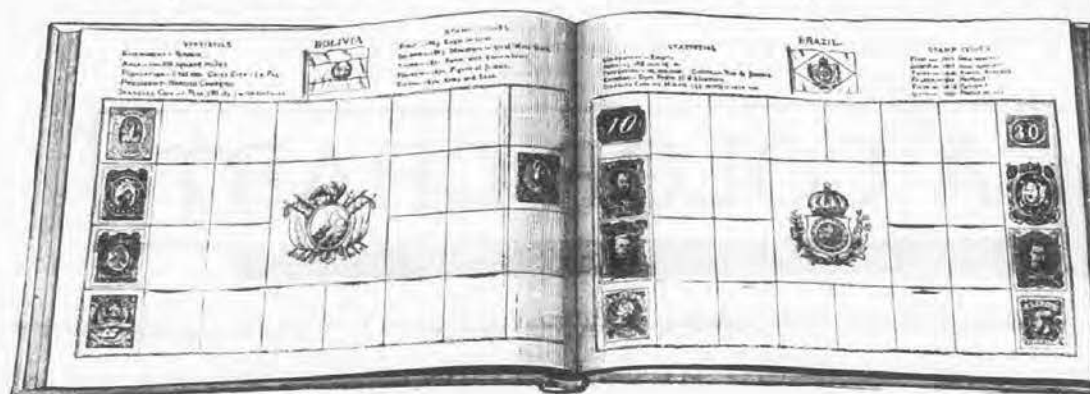

The object of this Chart is to present a standard, by comparison with which the color of any particular stamp can be readily and accurately described, and it seems probable that it will become a standard all over the world, in the same manner that the Metric scale has been adopted, universally, to measure the size of stamps, cards and envelopes.

In 1878 the National Philatetical Society suggested the idea of a Color Chart which would represent the various colors used in printing Postage Stamps, but for want of sufficient support, it was not at that time undertaken. In 1880 the French Society prepared a report, after careful investigation, stating that in their belief "it was unadvisable and impossible to prepare such work with any degree of accuracy." In 1881 Mr. W. F. SMITH was induced to unite with the National Philatetical Society, and was unanimously elected Secretary, which office he filled for two years, and under whose able management the "National Philatelist" was placed at the head of American Philatetical Journals. Through long connection with the American Bank Note Co., and his thorough knowledge of colors, he at once took an active interest in the Color Chart, and prepared the design from which they have been printed, at the same time keeping a watchful eye over every branch of the work until the National Philatetical Society now have the pleasure of presenting the Color Chart embracing 150 colors or 900 distinct tints in which Postage Stamps are printed, with the endorsements of the Dresden, London, Paris and Vienna Philatetical Societies.
