Napoleon

A History Written for

CHAPTER IX.

THE BATTLE OF THE NILE—THE SYRIAN CAMPAIGN.

ON August first (1798), ten days after the battle of the Pyramids, Lord Nelson with his splendid fleet, having learned that the French had landed in Egypt, came upon thirteen French ships of the line and four frigates under Admiral Brueys in the Bay of Aboukir, and after a terrible battle, which raged from six o'clock that evening until noon of the next day, gained a complete victory. This is known in history as the Battle of the Nile. Four French ships alone escaped. Admiral Brueys and five thousand brave French sailors were killed, and Napoleon was practically made a prisoner in Egypt with his thirty thousand men.

It was the great general's first reverse, and it was sudden and terrible. All Europe outside of republican France rejoiced, and every monarch settled himself more firmly on his throne. Nelson was overwhelmed with titles and presents. He was made Baron of the Nile and given a pension of ten thousand dollars a year. Every king and prince of Europe hastened to show him favor. Then followed new and more powerful combinations against France. With Bonaparte beyond seas and unable to return, now was the time to crush republicanism and seat the Bourbons on their hereditary throne.

But what of Napoleon? Does he act the prisoner? Does he rail at fate? Not a word or gesture betrays fear or discouragement. He writes to one of his generals: "We must die in this country or get out of it greater than the ancients. This will oblige us to do greater things than we intended. We must hold ourselves in readiness. We will at least bequeath to Egypt a heritage of greatness." Then this imperturbable, sphinx-like man takes his pen and writes to the widow of the brave Brueys: "I feel warmly for your grief. We feel, in such a situation, that there is nothing which yet binds us to life, that it were far better to die. But when, after such just and unavoidable throes, we press our children to our hearts, tears and more tender sentiments arise, and life becomes bearable for their sakes. Yes, madame! They will open the fountains of your heart. You will watch their childhood, educate their youth. You will speak to them of their father, of your present grief, and of the loss which they and the Republic have sustained in his death," etc. And yet there are those who say that Napoleon had no heart!

Napoleon was still master of Egypt, and he was a master infinitely wiser and better than any she had ever known. He drove the Mamelukes into the fastnesses of upper Egypt; he inspected routes for new canals and opened up old ones; he built fortifications and organized a government; he ransacked the monuments, and started Egypt on a career of progress, traces of which are even now felt in that ancient land.

Now, England, Russia, Turkey, Austria, Sardinia, Naples crouched like panthers to spring at the signal upon unhappy France. A great fleet was to land an army of the allies on the coast of Egypt. Another overwhelming force was to go against Napoleon by the way of Syria and the desert. A vast army was to come from India by way of the Red Sea. At the same time all Europe was to pour its armies across the Alps and, retaking the territory Napoleon had won, drive the French out of Italy. The Mamelukes, thus encouraged, sprang into activity again. Every Frenchman in Egypt seemed doomed to die.

Then the genius of Napoleon shone out. A revolt in Cairo was put down with a speed and a thoroughness that caused all Egypt to hold its breath in awe. In January, (1799), hearing that a Syrian army had invaded Egypt on the east and had captured El Arish, Napoleon, at the head of but ten thousand of his men, suddenly appeared before this desert fortress at the midnight hour, after a five days' march of awful suffering in which men, crazed by heat and thirst, broke their muskets and prayed for death. The fight that followed was sharp and decisive: Napoleon was again victor with two thousand bloodthirsty Arabs as his prisoners. To keep them was out of the question, so they were allowed to go on the promise that they would nevermore bear arms against him. But no sooner were they out of sight than they made straight for Jaffa, where they joined the forces of "Achmet, the butcher" and were afterwards found in the front rank of the infidels pouring hot shot into the French columns. Napoleon then pressed on to Gaza where he won another battle, then on to Jaffa, which he reached March third.

The horizon was now black with tokens of disaster to the daring leader and his devoted band. The warships of England, Russia and Turkey hovered along the coast capturing or destroying supplies

NAPOLÉON BONAPARTE, FIRST CONSUL.

and reinforcements sent to him from Egypt, and landing armies under skilled European leaders with artillery and all the munitions of war.

With his usual confidence Napoleon summoned Jaffa to surrender. The reply was the head of the messenger elevated on a pole set on the wall of the city. Maddened to frenzy, the French soldiers, having previously made a breach in the wall, poured through the opening like so many demons of the under world. Jaffa became a pandemonium of horror. Napoleon tried to stop it; his aides, coming upon the scene of butchery, ordered the carnage to cease and with two thousand prisoners, many of whom were the Arabs whom he had liberated at El Arish, came before him. The army cried for the blood of the treacherous infidels. Napoleon hesitated. His own troops were on short rations; they refused to divide with such prisoners. Napoleon still hesitated. To free these men again was to see them again arming themselves against his men, his "children," as he fondly called them. A council of generals was called one day to decide the question; it adjourned to the next, then to the next, and then by unanimous vote the prisoners were condemned to death; and so, on the sandhills near the coast, drawn up in small squares, they received the awful reward of their treachery. Napoleon by this act brought upon himself the name of a bloodthirsty savage and was accounted by Englishmen as no better than the infidels who knew no mercy. Yet Sir Walter Scott says of this act, "We do not view it as the indulgence of an innate love of cruelty." Arguments have been piled high by friends and foes of Napoleon blaming and excusing. Space does not permit our entering into the controversy. We can only say war is war; and to the man who is sent to conquer or to kill, the end oftentimes seems to justify the means. In his account of the event later, Napoleon says that under the same circumstances he would again do the same, "and so," says he, "would Wellington, or any general."

"On to Acre" was now the word. This town was the most important military post in Syria and was defended by Achmet the butcher, supported by Colonel Philippeaux, a French royalist engineer and a former schoolmate of Napoleon, and, most important of all, by Sir Sidney Smith, an English admiral, who had just arrived with several English ships after capturing, a few days before, forty four heavy siege guns that were being sent from Egypt to strengthen the French.

Napoleon sent a messenger calling upon Achmet to make peace. The infidel killed the messenger, and then Napoleon issued an address to the people of Syria showing that he had been provoked to war, and calling upon them to remain quiet in their homes, promising them his favor when peace should come.

Plague now broke out in the French army. Before it the stern soldiers of France quailed as they had not before cannons' mouths. The sick were abandoned by their comrades and even by their physicians. Napoleon, fearless here as ever, walked amid them,

Bonaparte

Boys by the Editor

pressed their sores, encouraged them, and inspired them with even greater love for him.

The assault on Acre began. Win, and Napoleon was master of Syria and with a word he could change the face of the world!

An army of thirty thousand Turks, among them twelve thousand of the best horsemen in the world, was marching against him. With six thousand of his eight thousand available troops he went to meet them. At the foot of Mt. Tabor was then fought one of the most awful battles of history, and, astonishing to relate, Napoleon won it with six thousand men over an army of thirty thousand. Kleber, Murat (whom Napoleon said in battle was the bravest man in the world) and Napoleon himself divide the credit for the generalship displayed, and every French soldier won the name of hero.

Napoleon then returned to the siege of Acre. Sir Sidney Smith conducted the defense. Not counting on the extent of the French soldiers' loyalty to their leader, he caused circulars to be thrown over the walls, offering the free transportation to France of any French soldier deserting his commander. Not one accepted the offer. Napoleon said of Sir Sidney, "He has gone mad." Sir Sidney replied by a challenge to a duel. Napoleon said if he would send Marlborough from his grave he would meet him, but that if Sir Sidney must fight he would send a French grenadier to meet him.

For sixty days the siege had gone on. Three thousand Frenchmen had lost their lives and the hospitals were full. At this time thirty English and Turkish ships of the line arrived, the latter bringing twelve thousand fresh troops. Napoleon resolved to attack before they could be landed, and under the cover of night began the assault. The conflict was terrific, and in the end, which soon came, Napoleon, at the age of twenty nine, met the first real disappointment of his world-conquering ambition. Crushed and beaten, he withdrew his shattered columns and began the long, terrible march back across the desert to Egypt. In his address to his troops he recalls to their minds that they, a handful of men, had maintained a war for three months in the heart of Syria, had taken forty pieces of cannon, fifty stands of colors, six thousand prisoners, and captured or destroyed Gaza, Jaffa and Acre. "Soldiers! We have yet a toilsome and a perilous task to perform. After having, by this campaign, secured ourselves from attack from the east, it will perhaps be necessary to repel efforts which may be made from the west."

In twenty five days the French army, or rather its surviving remnant, reached Egypt and entered Cairo in great pomp. Much of the way Napoleon had proceeded on foot, that the sick and wounded, of whom there were twelve hundred, might have conveyance. One day he saw an officer in full health riding a horse and refusing to give it to a sick comrade. Napoleon was so aroused that he struck the fellow from his horse with the hilt of his sword. Even the artillery pieces were left in the sand that the horses might be used by the hospital corps.

Napoleon found the army he had left in Egypt in great discontent. They had been absent from home a year, and for the six months last past not a ship had been able to reach them from France. There, too, a great army of English, Turks and Russians was preparing to invade Egypt by way of the sea. One day in July (1799) this fleet appeared in the Bay of Aboukir. It was said that eighteen thousand Turks had landed, and that the Mamelukes were gathering in upper Egypt. At four o'clock of the

morning after receiving the news, the French army of only eight thousand men was in motion. By one of those incredible marches for which Napoleon was famous, the main division of six thousand in five days came within sight of the Turks. Two thousand under Kleber had not yet arrived; but Napoleon acted at once. It was six thousand travel-worn veterans against eighteen thousand well provisioned, well groomed Turks, led by English and French officers, entrenched and ready, and protected by the fleet in the harbor. "This battle," said Napoleon to Murat, "will decide the fate of the world."

The battle began at daybreak. By four o'clock of the afternoon victory perched upon the banners of Napoleon, after a battle which history records as one of the fiercest ever fought. Only two thousand prisoners were taken; few escaped, so that nearly sixteen thousand of the enemy were killed. Sir Sidney Smith, who was present and had chosen the Turkish position and directed to a great extent the movements of the allied forces, barely escaped alive to his ship. Thus the loss of Admiral Bruëys and the French fleet of the year before in these same waters was mercilessly avenged.

After the battle Kleber came up with his two thousand men and, learning the glorious news of the day, threw his arms about Napoleon and cried, "Let me embrace you, General. You are as great as the universe."

Napoleon now returned to Cairo, but not before receiving a bundle of papers from the English ships, giving the first news he had received from France in nearly a year. He now learned that France was in confusion. Universal war had been declared against her. Treaties had been broken. Austria had invaded Italy and regained her territories there. On every side armies were massing to sweep upon France and, crushing republicanism, seat the Bourbons again on the throne. It was now France against Europe; republicanism against monarchy.

In a moment the mind of this wonderful man was made up. He would return to France. She had more need of him now than ever. Perhaps he dreamed that it was greater to be master of France than to be master of Egypt—where, indeed, he was little more than a prisoner, though a conqueror.

So having given directions for the government of the country and marked out lines of reform and progress for those who were to remain, but keeping his intended departure a secret from all, he took a small party and proceeded to Alexandria. From here with eight companions who were still ignorant of his intentions, he made his way to the coast. When night fell they found themselves embarking in a fishing boat and being rowed in the direction of two frigates and two smaller boats that rode at anchor a short distance out. Napoleon then told his companions they were bound for France and their joy was beyond measure. After fifty days of anxiety, during which they several times barely escaped capture, the little fleet weighed anchor October ninth (1799) in the harbor of Frejus and Napoleon was once more on the soil of France.

CHAPTER X.

NAPOLÉON IN PARIS—THE REVOLUTION OF 1799—THE CONSULATE.

In reality Napoleon is a general leaving his post without orders, and subject to punishment; in appearance he is a prince and a conqueror returning to spread his trophies before the eyes of his subjects and accept their homage. In five days he was in Paris, having been accompanied on his journey by the huzzahs of the people. The trembling Directory received him with a great show of joy. A public dinner and reception followed and after that Napoleon disappeared from public view, avoiding notice, and assuming the habits and garb of a retired gentleman and student; but not for long. France had again become a threatening volcano, and the presence of Napoleon in Paris did not cause the earth to grow more solid.

Events now follow one another with startling rapidity, for France is rushing on with the speed of a hurricane to another revolution. The principal actors in the turbulent days at hand are Sieyès at the head of the Moderates, Barras at the head of the Democrats, both members of the Directory, Lucien (Napoleon's brother), and Talleyrand. Both the

Moderates and the Democrats sought the support of Napoleon. He chose the Moderates and selected as his chief confidants (we had almost said conspirators) Lucien, Talleyrand and Sieyès. Lucien was president of the Council of Five Hundred (corresponding to our House of Representatives), and Sieyès and his party held a majority in the Council of Ancients (corresponding to our Senate). Napoleon now believed that if France was to be saved to a republican form of government and preserved from destruction at the hands of England and her allies, it must be through himself. Once convinced of this, his plan of action was like to his plan of battle—no hesitation, no delays, no counting the cost, no fear. With the friendship of Sieyès and his party and of his brother Lucien, he could count on powerful support in both legislative branches. He knew how he stood with the army and the people. Three regiments of dragoons asked for the honor of being reviewed by him, and forty officers of the National Guard asked leave to call upon and congratulate him, as did also the officers of the garrison of Paris. Napoleon appointed a day—the tenth of November (1799) and the time six in the morning. At the appointed hour the dragoons were drawn up at the Champs-Élysées and Napoleon's residence was filled with a great concourse of officers. The Council of Ancients met at seven o'clock the same morning in the Tuilleries. Its president, who was in the secret,

three out of the five members of the Directory not in the secret were astounded, and Moulins proposed to send a part of the directoral guard to arrest Napoleon, but the guard laughed at him. Barras sent his secretary to protest, and Napoleon sent him back word: "What have you done for that fair France which I left you so prosperous? For peace, I find war; for the wealth of Italy, taxation and misery. Where are the 100,000 brave French whom I knew—where are the companions of my glory. They are dead." Then the Directors resigned their offices and the Directory was no more.

The Council of Five Hundred, which met at ten o'clock of the same morning were indignant over their place of meeting being moved to St. Cloud, but they were helpless and adjourned with cries of "Vive la République." Calling to their aid the mob of Paris, they repaired to St. Cloud, whereupon Napoleon sent to watch and overawe them a strong body of soldiers under the command of Murat. At two o'clock of the following day the two legislative bodies met in their new quarters watched by the mob of Paris, who in turn were under the eagle eye of Murat and his men. A tumultuous debate at once began in the Council of Ancients, when suddenly Napoleon appeared among them, supported by armed men who stood just without the doors. In a short impassioned address he called on them for support in the name of Liberty and Equality. Shouts arose on all sides, "Vive Bonaparte." He then rode to the Council of Five Hundred, where the opposition to him was overwhelming in numbers. Shouts of "Down with the dictator" rang in his ears. He entered accompanied by four grenadiers, and alone strode to the center. A fierce outcry arose and many rushed towards him with murderous intent. The grenadiers sprang to the rescue and not without wounds bore him away. He then addressed the soldiers and was answered with "Vive Bonaparte." The Council was now in an uproar. Lucien Bonaparte, its president, indignantly left the chamber and mounting a horse, cried out in the presence of Napoleon and his officers: "General Bonaparte, and you soldiers of France, the president of the Council of Five Hundred announces to you that factious men with daggers interrupt the deliberations of the Senate. He authorizes you to employ force. The Assembly of Five Hundred is dissolved." "Forward, grenadiers," was the order, and with bayonets at charge the soldiers cleared the hall. Napoleon had become another Cromwell.

The friendly members of the Five Hundred and of the Ancients now met in separate bodies and adjourned for three months, but not before placing the whole authority of the State in a provisional consulate—the consuls being Napoleon Bonaparte, Sieyès and Ducos. Thus was accomplished one of the greatest revolutions of history and without the shedding of blood. From that moment, scarcely a month after landing on the coast of France, Napoleon Bonaparte was the ruler of France. To be sure, he was but one of three consuls in the supreme command, but of the three Napoleon at once showed himself to be the real master of France—and he not yet thirty years of age!

(To be continued.)

Napoleon had become another Cromwell.

declared that the salvation of the State demanded urgent measures and proposed two decrees: That the meetings of the two legislative bodies be at once transferred from Paris to St. Cloud, some miles from Paris; and that Napoleon should be put in command of the troops in and about Paris. The Council agreed, and a messenger sped away to announce the decrees to Napoleon in the midst of his martial company. Instantly mounting his horse, the general rode to the Tuilleries and addressing the Council said: "You are the wisdom of the Nation. I come, surrounded by the generals of the Republic, to promise you their support. Let us not lose time in looking for precedents. Nothing in history resembled the close of the eighteenth century—nothing in the eighteenth century resembled this moment. Your wisdom has devised the necessary measure; our arms shall put it in execution."

The soldiers received the news with joy; the

It is a great mistake to set up our own standard of right and wrong and judge people accordingly; to measure the enjoyment of others by our own; to expect uniformity of opinion in this world; to look for judgment and experience in youth; to endeavor to mold all dispositions alike; to look for perfection in our own actions; to worry ourselves and others with what cannot be remedied; not to yield all immaterial matters; not to alleviate all that needs alleviation as far as lies in our power; not to make allowances for the infirmities of others; to consider everything impossible that we cannot perform; to believe only what our finite minds can grasp; to expect to be able to understand everything. And the last and greatest mistake of all is to live for time alone, when any moment may launch us into eternity.

Fourteen Mistakes.

An English paper gives a list of what it terms "the fourteen mistakes of life." While there are undoubtedly other mistakes than those mentioned, the list is a fairly comprehensive one.

COUNT RUMFORD'S BIRTHPLACE

STANDISH HOME

THE ALDEN HOUSE

ROYALL HOUSE

THE OLD MILL
AND
POWDER
HOUSE

OLD WHIPPLE HOUSE

American Landmarks

—Morris Wade

ALL over beautiful New England one may find quaint old houses each with a history worth knowing. Some of these houses were built long before any one now living was on the earth. Some of them are more than two hundred years old and they are rich in associations. Could they be given the power of speech they could tell strange tales of all that has transpired within their walls. Some of them have had much to do with our American history, and men and women make long journeys to see them on that account. Some have been the birthplaces of noted men and women, and others have been the last earthly homes of men and of women whose influence will never die.

One of the most interesting of these old houses is the old Standish home in Duxbury, near Plymouth, Massachusetts. This ancient cottage was built in the year 1666, the great chimney in the center of the house still bearing that date. You may remember that the first house built by Miles Standish was destroyed by fire, but much of the material in it was saved and was used in erecting the little house now standing in Duxbury. The house was built by Alexander Standish, the son of Miles Standish, and it is known that some of the doors, door-sills and other parts of the house came from the house in which Miles Standish lived for twenty five years. Near by one may see the site of the original house in which Miles Standish died in the year 1656. There are door latches in the house that no doubt once yielded to the touch of the hands of Miles Standish, Bradford, Brewster and others of that brave and noble little band of Pilgrims who were the first to tread "the wild New England shore."

Another house of great interest to the tourist who fares toward Duxbury is the John Alden house. All bright schoolboys and schoolgirls must know the old story of how, after the death of his first wife, Captain Miles Standish very soon began to pay court to pretty Priscilla Mullins, a daughter of Mr. William Mullins. We all know the amusing story of how Miles Standish, who could be so brave and fearless in war, was strangely faint-hearted when it came to making love to Priscilla. We know how he finally concluded to send his young friend, John Alden, to ask Mr. Mullins if Captain Standish might pay court to his pretty daughter. Mr. Mullins, so the story goes, did not object, but he wisely suggested that his daughter herself be consulted and she was called into the room. When the faithful messenger had stated the object of his errand Priscilla, we are told in the earliest published account of the incident, "listened with respectful attention, and at last, after

THE OLD CORNER
BOOK STORE"TEA PARTY" HOUSE
BOSTONROGER WILLIAMS' CHURCH
SALEM

a considerable pause, fixing her eyes upon him, with an open and pleasant countenance, said: "Prithee, John, why do you not speak for yourself?"

This suggested an entirely new line of thought to John Alden, and the result was that he married Priscilla himself. Whether this pretty and romantic tale is true or false in all its details we do not know, but the fact remains that John and Priscilla were married, and the Alden house you will find in Duxbury was built by their grandson about two hundred and fifty years ago. An interesting fact in connection with this old landmark is that the house has never been out of the Alden family, and it is now occupied by a descendant of John Alden, and the little girl you will see in the picture is named, so I am told, Priscilla Alden.

If one visits another old New England town one will find a great many very interesting old houses. This old town is Salem, on which there rests the dark stain of the witchcraft delusion. One may see in Salem what is called the "Witch House," because it is the house in which some of the persons accused of witchcraft were tried for that of which it was absolutely impossible that they could have been guilty. It was also the home of Roger Williams. Near by is Gallows Hill, on which so many of these poor unfortunates were executed. It is a sorrowful part of our American history, and one on which we do not like to dwell. Down on narrow and quaint Union street, in Salem, is the house in which one of the greatest novelists America ever produced, Hawthorne, was born. Like all of the old-time houses in Salem it has the enormous central chimney in which there are bricks enough to build a dozen chimneys like those built in the modern house. One may also see in Salem the house in which Hawthorne wrote "The Scarlet Letter," and the custom house in which he was employed.

Another most interesting building in Salem is the tiny meetinghouse built in 1634, it being the first meetinghouse or church in Salem. The outside of the building is new, but the interior is just as it was when Roger Williams preached in it. There is now a large church on the spot on which the little meetinghouse stood, and this tablet on the wall of the church gives the following account of the little church:

Here Stood from 1634 until 1673
THE FIRST MEETINGHOUSE
Erected in Salem.

No structure was built earlier for congregational worship by a church formed in America. It was occupied for secular as well as righteous uses. In it preached in succession

- I. Roger Williams: II. Hugh Peters:
- III. Edward Norris: IV. John Higginson.

It was enlarged in 1639,

and was last used for worship in 1670.

The first Church in Salem, gathered July and August, 1629, has had no place of worship but this spot.

There is a tiny gallery in the church and everything is of the roughest description. Hundreds of visitors go to Salem every year to see this quaint little building so carefully enclosed within the outer building which is a kind of a case for it.

I wonder how many of THE AMERICAN BOY readers are familiar with the interesting history of Count Rumford. Those who are will be interested in seeing the picture of the house in which he was born in 1753 in Woburn, a short distance from Salem. His real name was Benjamin Thompson, and he was but an ordinary country boy in his youth, but before he had reached middle age he had attained great distinction as a scientist, mathematician, philosopher and administrator of public affairs. His fame had extended to foreign lands. He had a very active mind and wonderful natural gifts, and it is said that when he was but fourteen years of age he was so far advanced in algebra, geometry, astronomy and the higher mathematics that he could calculate a solar eclipse within a few minutes of accuracy. He was one of the most studious of boys. Indeed, he cared only for his studies and was always making experiments of some kind. He attended scientific lectures at Harvard College walking to and from the college, a distance of nine miles each day. When he was nineteen he began teaching school in New Hampshire to earn money to increase his small income. He was not yet twenty years of age when he was married to a widow about fifteen years older than himself. His wife was a lady of fortune with a good position in society, and his marriage brought young Thompson into association with people of importance. He came to the notice of Governor Wentworth and was made a major in a Provincial regiment before he was twenty one years of age. Although he declared himself to be a Patriot there was reason for thinking that he was really in sympathy with the Royalists, and this suspicion grew so strong that he had to leave his fine new home and go into hiding. When the war broke out he sailed for England with dispatches for General Howe, and there was no longer any doubt that he was in sympathy with the Royalists. When he reached England the brilliant young American immediately began to attract attention not only because of his handsome per-

sonal appearance but because of his attainments so remarkable in one of his years. Positions of honor and importance were given to him and he finally returned to America as a lieutenant colonel in the British army. He returned to England at the close of the war and was retired on half pay. Soon after this he entered the service of Bavaria in both a civic and a military capacity. King George had knighted him as Sir William Thompson, and for eleven years he filled positions of the highest importance and trust in Bavaria. He became the most prominent citizen in Munich. His philanthropic work was so wise and so great that once when he was very ill in Munich the poor of the city marched in procession to the great cathedral and offered prayers for his recovery. The title of count was given to him in the year 1791, and he manifested his affection for his native land by taking the name of Rumford, which was the name of the American town in which, as he said, he had received "the first favors of fortune."

Although a traitor to his own country and even to his own wife, whom he never saw after he left America the first time, Count Rumford did a great work for humanity and in the world of science and invention. He was the inventor of many useful things and he published many books on scientific topics. He instituted the "Rumford Medal" for the advancement of knowledge of light and heat and of their practical application. This medal is still awarded by the American Academy of Arts and Sciences in Boston and the name of Count Rumford is highly honored in the scientific world. He died at Auteuil in 1814. The full history of this poor American boy is one of great interest, and many strangers

belonging to the province. In September of the year 1774 it was raided by General Gage, who took two hundred and fifty barrels of powder from it, thereby causing such fierce indignation that public meetings were held on Cambridge common to express the resentment of the citizens, some of the people coming armed, and it is said that this was the first time that the provincials had assembled in arms to oppose the forces of the king. Washington visited the old mill more than once, and it is an interesting relic of the war of the Revolution. There is a pretty and romantic story connected with the old mill, but there is no space for it here.

The old Royall house, known as Hobgoblin Hall, was at one time one of the finest old estates in New England. It is in Medford, a town near Boston, and it was successively the headquarters of Generals Lee, Stark and Sullivan. Isaac Royall, the builder of the fine old mansion, came to America in the year 1737 from Antigua, and he soon afterward built the house that now bears his name. He died soon after the house was built, and the property with its surrounding five hundred acres of ground and its slaves became the property of his son, who was also named Isaac. It was by far the finest private residence in that part of the country. Isaac Royall the second was a Tory. He was in Boston when the battle of Lexington was fought and was never again able to get back to his home. His wife and children were permitted to join him in Boston and they soon sailed for England, where he died in 1781. His property had been confiscated, and he had suffered great losses in America so that there was a good deal of surprise when it was known that he had left by will two thousand acres of land in Worcester County, Massachusetts, to endow a law professorship to bear his name at Harvard College. The large town of Royalston in Massachusetts was named for him. The house was named Hobgoblin Hall for some reason not very apparent to those who have tried to investigate the matter. It is now uninhabited and is fast falling into decay.

The Governor Cradock house at Medford, a few miles from Boston, is another venerable mansion with a history worth recording. It is said that it is the oldest building in New England, if not in the United States, retaining its original form. The residents of Medford speak of the ancient house as the Old Fort, and there is proof that when this house was built it was intended to be a place of defense as well as a residence. For more than one hundred and fifty years it was surrounded by a stout palisade, beyond which the savage or any other enemy would have found it difficult to pass. The house was built by Matthew Cradock, a man of importance in the colonies, in the year 1634, so that it is now two hundred and sixty five years old. Regarding the antiquity of the house one historian says: "When this house was built, Charles I. reigned in Old England and Cromwell had not yet begun his great career. Peter the Great was not then born; and the house was waxing in years when that prodigy of his age, Frederick the Great, appeared on the stage to show Europe how the part of a monarch should be played. We seem to be speaking of some recent event—of to-day—when Louis XVI. suffered by the ax of the guillotine, and when Napoleon's sun rose in splendor to set in darkness." It is said that the old house was more than once surrounded by hostile Indians, who failed to make any impression on its good stout walls, and that more than one Indian met his death from balls fired from within the house. It is true that—

"For once, for fear of Indian beating,
Our grandsires bore their guns to meeting,
Each man equipped on Sunday morn,
With Psalm-book, shot, and powder-horn;
And looked in form, as all must grant,
Like the ancient, true church-militant;
Or fierce, like modern deep divines,
Who fight with quills, like porcupines."

A very quaint and rare type of the architecture of nearly three hundred years ago is the old Whipple house in Ipswich, near Salem. Like the Cradock house, it was evidently built for a garrison as well as for a private house, for the lower walls are of brick and stone behind the outer clapboarding. It has the tiny window panes, the immense central chimney, the very low ceilings and the rear roof sloping almost to the ground. Like its many other ancient New England buildings it could tell stirring tales of long ago.

The old "Tea Party House," built in 1635, is the house in which the rebellious colonists met in Boston to discuss their plans for throwing the tea into the harbor, an event that forms one of the most interesting tales in the annals of our country. Hundreds of visitors go every year to the wharf where the throwing of the tea overboard occurred. If my AMERICAN BOY readers ever have the opportunity they should not fail to see some of these old buildings, the full history of which they will find to be intensely interesting. It gives one increased pride in our country and increased respect for our forefathers to tread the paths they trod and to see some of the homes that sheltered them in the days of stress and strain when it cost something to be a true American.

**FAMOUS

The following named story writers will
be represented in

The American Boy
For ~~the~~ 1903

**KIRK MUNROE J. L. HARBOUR
EDWARD S. ELLIS
HEZEKIAH BUTTERWORTH
WM. MURRAY GRAYDON
GABRIELLE E. JACKSON
WILL H. LISENBEE**

and others equally well-known

go to see the humble home in which he first saw the light of day.

At the corner of School and Washington streets in Boston stands the oldest brick house in the business part of the city, and one of historical interest because it was built in the year 1712 on the site of the home of Anne Hutchinson, so famous in the early religious history of the country. She lived here at the time of her banishment for her strong and outspoken religious convictions. Her husband became the possessor of the ground on which this old house stands as early as the year 1635. The house is now widely known as the Old Corner Bookstore, and it is more closely associated with the literary development of America than any other public building in Boston. The most famous writers of our own land and many of the highest reputation from other lands have visited the Old Corner Bookstore when they have been in this country. A curious and interesting structure in one of the near by suburbs of Boston is the Old Powder House in Somerville. It has long been an object of great regard to the antiquarian, and it is interesting as an illustration of the kinds of mills the early settlers used, for the old tower-like house was a grist mill. It was built about the year 1703 by a man named John Mallet. Its walls are two feet thick, the outer wall being of stone and the inner one of bricks. In its original state the old mill had three floors or lofts about six feet apart, supported by stout hewn timbers. It is about thirty feet high with a diameter of fifteen feet at the base. The farmers for miles around brought their grain to be ground at this curious old windmill. In 1774 the mill became the property of the province of Massachusetts Bay in New England, and it was converted into a powder magazine for the storing of the powder

The Regeneration of "Bobbie"—Bernie Babcock

IF HE had been a fuzzy little dog, a consequential rooster, or even one of those male non-entities that view the world through an eyeglass and suck a cane handle, the name might have seemed appropriate; but to call a tawny, bronzed, six foot man "Bobbie" seemed incongruous.

Yet nobody in Coal Hill camp thought of calling him by any more dignified name; indeed no more dignified name seemed necessary to signify importance, for the satellites of lesser muscle and fewer curses that circulated around him, were numerous and admiring.

As Coal Hill camp was situated some miles from the nearest town, the miners were left to depend on their own exertions for recreation and amusement, and nothing seemed to give them more pleasure than to torment that occasional preacher who was so brave as to attempt to hold services in the log meetinghouse near the camp, and so effective was the leadership of the Goliath Bobbie in this direction, that not one of the many ministers who had held services in the camp had tried a second time.

After the door of the meetinghouse had been for some time closed, the miners gathered eagerly around it one afternoon to read from a paper fastened to the door that there would be services in the building "Saturday night, Sunday morning, Sunday afternoon and Sunday night."

"I'll bet he's one of them blamed missionaries," one of the men said, scanning the notice carefully.

"Got his gall with him," another observed, holding up four fingers significantly.

"Saturday night," another repeated, and as this was Bobbie the men listened for further remarks; but he only said as he spat at the notice, "What man remembers the time when one of that sort was game to hold forth in this camp on Lord's day," and, inspired by recollections of former similar attempts, the men laughed heartily.

Before the hour for service on Saturday night, Bobbie, with his satellites, had arrived at the place of worship where they sat in a conspicuous place watching the door, meantime drinking and laughing in anticipation of the evening's sport.

When the preacher, an unusually tall and slender young man, appeared, a brief silence fell over the company while each man sized him up; then the hush was broken by the remark, "Looks like a regular carpet sweeper, hey?"

"Steeple scraper," another corrected, and a laugh followed.

Ignoring these remarks the minister proceeded to hand out some hymn books inviting every one present to join in the singing.

The tune was well chosen, but from the beginning it was evident that the preacher was no singer, and unfortunately he pitched his tune altogether too low.

"Get a stepladder," one of the miners suggested.

"Better boost him," Bobbie said, and another boisterous laugh followed.

"My friends," the minister said quietly, when the noise had subsided, "I do not intend to keep you late tonight, for this is Saturday. But I wish to read you a few verses about a man who wished to enter the kingdom of heaven and who went to a wonderful prophet at night to inquire the way;" and then he read, adapting the story of Nicodemus to the understanding of his hearers.

"Now, this matter of being born again is what I will try to explain to you," he proceeded, "for every man hopes some time to enter the kingdom of God. This fact of being born again we call regeneration. Regeneration is being born again—being re-created spiritually—being made over—"

Up to this point fairly good order had been preserved, but Bobbie and his satellites had been drinking and were not in a mood to remain long quiet.

"Have you been made over?" one of them interrogated.

"I have," the minister responded kindly.

"You're a sort of second-hand article, then—second-hand stuff worked over and the Maker run short of stuff," and the speaker pointed at the preacher's slender body.

"Run long," some one suggested, and the joke called for another outburst of laughter.

When quiet again reigned, the preacher said: "My friends, the gospel is as free as the air around Coal Hill, and you are welcome to stay in this house—indeed, I hope you will; but there are those present who wish to hear what I have to say and it is right they should. I must ask you, therefore, to keep order. Now, as I was saying, regeneration is being recreated—changed—"

"Made over," one of the men called; "made over same as breeches is made over for kids."

sudden motion made by the minister, for Bobbie had let his fist fly, and the blow was narrowly averted.

"Put me out," Bobbie continued to demand, in tones thundering with rage.

"God willing, I will. Open the door!" the minister called, whipping off his coat, and the fight was on.

By this time excitement had reached a high pitch. Women climbed onto the benches, men hurriedly pocketed their bottles and pipes, while Bobbie was cursing with all his breath and spending his force hitting empty air, for the minister proved a splendid dodger.

In the beginning, the satellites who had circulated around Bobbie admiringly, cheered him lustily, but when, with one well-directed blow, the minister struck the Goliath to the floor, a number of the satellites who owed Bobbie old grudges began to cheer for the minister, and the mingled calls, "Don't let the carpet stretcher git you down," and "Pound him, parson, p-o-u-n-d h-i-m," made the night merry with unusual sound.

But although the struggle had seemed uncertain at first, it very soon became evident that inch by

inch Bobbie was retreating toward the open doorway. When he had all but gained the threshold, to the amazement of the satellites who continued to cheer him on, he turned suddenly and disappeared in the outside darkness.

A cheer went up as the preacher slipped the bolt in the door, but quiet was soon restored when he said: "My friends, I deeply deplore this affair, for I never knew an encounter of this kind to prove a means of grace. But I do not see how it could have been helped. At any rate, too much of our short time has been taken to allow of further services tonight. But before we leave here let us pray. Will you kneel while I do the praying?"

"Can you put up as good a prayer as you can a fight?" some one asked.

"Better, I nope," the minister replied.

"Let her go then," and strange to say, almost to a man the company knelt and listened to a prayer that made them feel more sober than they had felt in many a day. Hell was made to seem quite near, and heaven very desirable.

Bobbie, on the outside, also heard the prayer.

After making his hasty exit from the meetinghouse, he had stopped on the step to examine himself. He passed his hand over his face expecting to find blood, but not a drop rewarded his most careful effort. Then he slowly tried his joints, so certain was he that he must have been crippled.

Finding that he was intact, he listened to the prayer that was being offered inside—a prayer in which the minister pleaded for him as when one pleads for a life, and when at the close, the petitioner begged that not one who had come to the meeting that night should be cast into the outer darkness of the lost, Bobbie shuddered for he felt that he was already in outer darkness.

During the few moments that he sat on the step in the fresh air he sobered considerably, and when he knew that the meeting had reached its close, he hurried away in the darkness determined if the minister carried out his intention of speaking the next day, to hear what he had to say.

News of the Saturday night meeting spread around the camp rapidly, and at the Sunday morning service the meetinghouse was packed with people eager to hear the man preach who had put Bobbie—the terrible and only Bobbie—out of the church. But when the minister began to talk to the people they forgot him, their thoughts in some mysterious way being turned to the God he worshiped. He made the vexed subject of regeneration appear so simple that in answer to an invitation a number signified their desire to enter the kingdom of God by spiritual birth.

Bobbie was not one of these, though he sat through the service scarcely moving his eyes from the speaker's face.

Again, at the afternoon service, Bobbie sat with his gaze riveted on the minister as if he had discovered some new kind of being, but made no indication of wishing to change his way of living.

At the evening service, however, somewhat to the minister's surprise, when an invitation was given to

"Come on—come on, and put me out!"

Again the minister paused until the laugh had ended.

"My friends," he then said, "as I told you before, the gospel is free, but unless you gentlemen preserve better order I shall make it a part of my Christian duty to put you out of this house," and he looked directly into the bronzed face of Bobbie.

A great hush followed the words and all eyes were turned on the Goliath of the camp.

For a moment the silence lasted; then Bobbie sprang to his feet, clenched his fist until his knuckles stood out like steel knobs, and shaking this formidable weapon defiantly, advanced toward the minister, his heavy, unsteady pace jarring the structure.

"My friend," the minister began, as he advanced; but Bobbie drowned the words he tried to utter in a great roar of rage, crying, "Come on—come on, and put me out."

"My friend," again expostulated the minister.

"Put me out," the advancing Goliath continued to roar.

"My friend—" but the words were stopped by a

"FRENCHY"

Mrs. Dalton could not see all this pathetic life-story, but she did see the tears, and the quiver of the lips, and the sensitive and attractive face.

"How many days have you been on the road?"

"Two days, madame."

"If you are tired, how would you like to rest here a day or

two and do some work for me about the yard and barn? There is a comfortable room in the barn where you can sleep, and your work will give you money to pay your fare the rest of the way to Denver."

The dark eyes, whose sad, haunted look had first won Mrs. Dalton's sympathy, flashed with a glad surprise.

"Yes, madame. I glad to do that. You very good, madame. Merci, merci! Que vous etes bonne!"

In his excited pleasure he had unconsciously slipped into the use of his native tongue. When he realized that he had done so, he blushed in awkward confusion.

Bridget's ire was boundless when she was told of the new arrangement, and was directed to give "Frenchy" some odd jobs to do about the house and barn, and all his patient efforts to be of service to her did not soften her resentment.

On the fourth day of his stay, Mrs. Dalton and several of her guests went on a picnic to the Falls. Fred accompanied them. Baby Bess was left in charge of the new nurse girl. This new maid with her airy ways was another of Bridget's grievances.

"A foine miss is she to take care of our baby," she had scolded only that morning. "She thinks a foine sight more about her ribbons than she ever does about our darlint, and she with a fellow at her heels ivery toime she turns around," and Bridget slammed the oven door shut with a bang that made Mrs. Dalton's nerves wince.

"Well, I am sorry, myself, to leave baby alone with her today, and wish you were to be here all day. But if your friend is very sick and has sent for you, I suppose you must go for a little while this afternoon. But don't stay long. After all, I know of no reason why I should distrust Rose."

"No more do I, mum, only for the plain raison that she's a silly fool!" snapped Bridget.

The picnickers started off in gay spirits. Baby Bess threw kisses to them gleefully until the stylish trap was out of sight.

"Frenchy" watched the start from the barn. He was happier than he had been for many a day. He had had three warm meals a day for four successive days, and a comfortable bed to sleep in. Mrs. Dalton had caught sight of him watching the party depart, and had waved him a gay farewell. He had lifted his ragged cap gracefully in return, for the very peasants in the field have good manners among the French. His heart warmed toward the gracious American lady. He wished impotently that he could do some great, heroic thing for her. But he could not, so he went back patiently to the common task of raking the yard. That, at least, he could do faithfully and thoroughly. Even Bridget was unable to find fault with his careful work.

After dinner he saw Bridget start off wonderfully attired in her "Sunday best." Rose was playing with baby Bess on the shady piazza. Later he noticed that one of the grooms from a neighboring summer house had strolled across the lawn and was leaning over the piazza railing, jesting loudly with the pretty maid, whose bold, black eyes were nothing loathe to carry on a flirtation. The baby played about on the lawn, unnoticed by Rose.

A half hour later "Frenchy" saw the little child straying farther and farther away, unheeded by the maid. His first thought was to call to Rose, and then remembering how unwelcome his presence was to all the

servants and their plainly expressed dislike toward him, he hesitated to draw further displeasure on himself. He put his rake away and slipped out quietly to follow the three year old darling of the family. The little form, attired in rich embroideries and dainty laces, had trudged out of sight during the moments that it had taken him to put away his rake, but he knew well enough where he should find her, for she was evidently following the little mountain path that led to a spring whither she had often gone with Fred or her mother.

Quickening his pace, he soon passed the turn which shut off the path from his view. As he did so, a baby's cry of terror pierced the air, and he saw a monstrous eagle swoop down from the mountain side and fix his talons in the baby's soft shoulder. The eagle, with seeming ease, rose in the air a few feet carrying the child with him. "Frenchy" observed that the bird did not soar very high, but kept only a little above the mountain path, which he seemed to be following. Breaking into a frantic run, "Frenchy" sped like the wind up the path. He had no definite plan, for he carried no weapon. He only knew that the darling child of the sweet American lady who had been kind to him, was in danger, and that somehow he must save her even if it cost his own life.

The eagle began to soar higher up the mountain side, the frantic screams of the child seeming to frenzy him. At the sight, "Frenchy" despaired, for how was he to follow up the side of that steep mountain's face? But not for a moment did he halt. Breaking from the easy path, he began to climb up the mountain side, tearing his clothes and his hands cruelly and scratching his face on the bushes.

A moment later, pausing for a moment to look upward, he caught his breath in a quick joy, for the eagle, beginning to fly close to the mountain side again, had touched so low that the child's dress had caught on a mountain bush. The mammoth bird was making frantic efforts to pull the child loose from the entanglement, but vainly. The screams of the

(Continued on page 102.)

"NO SIR, I've no bread for you—a big, lazy tramp loike you! Git out o' here! I won't encourage sich shif'less doin's by feedin' the loikes o' you. Git out, an' don't yous be comin' around here agin, at all!"

Mrs. Dalton's cook gave the broom with which she was sweeping the front steps of the Dalton summer cottage in the Colorado mountains a vicious twirl, suggestive of latent weapon-like possibilities in it.

Bridget had been cook in the Dalton household for many years, and loved its inmates with Irish fervor, and ruled them with Irish vigor. "She thinks she owns the whole house and us, too," complained nine-year old Fred, as he smarted under her iron regime.

"I not be some lazee tramp!" and the black eyes of the fourteen year old vagrant flashed indignantly. "I am miner out of work, and I am go on my way till Denver for find some work," and he shook his long, black hair out of his eyes with an emphatic toss of his head.

"One of those foine, sly for'ners," sniffed Bridget, who counted her Irish blood wholly American. "Ey-Italian, loike as not, eh?"

"No! I some French boy. Some French boy so good as some bad Irish woman!" flashed back the ragged boy.

"Bridget!" called Mrs. Dalton from the corner of the broad piazza, where she had been sitting unobserved by both of the speakers, "send the boy to me, and you may go in the house and prepare a warm breakfast for him."

Bridget gave her broom an energetic stroke or two which spoke volumes, then turned, sputtering with wrath, to enter the house.

The boy flushed a deep red under his swarthy skin, but stepped unhesitatingly up the piazza steps and crossed to Mrs. Dalton's side, where he stood awkwardly with his torn hat in his hand waiting for her to speak.

"You said you were a miner out of work?" she questioned, looking curiously at his slender, boyish form.

"Yes, madame. I work with my father in some mine. My father is died—last month. The mine is come no good, and they tell me go 'way. I have no money, and I must walk till Denver."

The nervous face of the boy twitched. Mrs. Dalton saw that tears were in his eyes. She could not see the awful loneliness and desolation in the boy's heart, the feeling that the great, big world was a desert that was trying to swallow him up. She could not see the pathetic pictures of memory in his heart—the little cottage in la belle France, the cold face of la bonne mere lying so still in the cheap coffin, the plate with too little bread to satisfy the hunger of father and son, the pere coming one day with two tickets for l'Amérique, the embarking in the steerage of the great ship, the landing among strange faces and tongues that made their hearts heavy with homesickness, the long search for work, the migrant train that carried them with a lot of Swedes and Poles to the Colorado mines. She could not see these pictures which crowded his mind and sent tears to his eyes to greet the first kind words he had heard for many days. The only bright pictures in his memory were of his life in the mine with the pere, who had loved him and in his rough way showed it often. Then had come the mine explosion, so awful that he shrank from thinking of it, and the men digging out dead, charred bodies. They laid one of these bodies in the cabin "Frenchy" called home. They said that it was his father. He had given one look at the black, charred face and fled with a cry into the night. He had wandered two days and nights in the lonely mountains. When he returned he was told that the mine was to be abandoned. There was no more work for him. He peeped into the cabin that had been his home and saw that awful black shape had been taken away. He did not even ask where they had buried it. He could not bring himself to enter the cabin to get such few articles as were there. The rough miners pitied the boy in his speechless grief, and would have helped him, for they all liked "Frenchy." But he waited for no sympathy. Striking off down the mountains, he turned his face toward Denver. He had reached a popular summer resort in the mountains and, faint from lack of food, had stopped to beg his first meal. He had had no food for two days.

Breaking into a frantic run, "Frenchy" sped like the wind up the path.

BOOK-KEEPING TAUGHT BY MAIL

GOOD book-keepers always in demand. Big salaries for our students because of more practical training. Book-keepers, Bank Clerks and office assistants become successful business men. Why not let us prepare you for a good paying position, and success in life! Write to-day for full particulars, free.

THE URBAINS SCHOOLS, 887 Calhoun St., Ft. Wayne, Ind. Note—We also have the best courses in existence in Shorthand and Business and Social Letter Writing. Write stating course desired.

I WILL TEACH YOU SHORTHAND FREE

At the age of fifteen years I was the youngest Official Stenographer in the World. I have had ten years' experience in all kinds of shorthand work since then, and receive to-day one of the highest salaries paid to any stenographer in Texas. To introduce my educational works, I will teach shorthand free by mail to a limited number of pupils. Here is a chance for ambitious young men. Write to me
CHAS. M. NEVITT, Box 181, DALLAS, TEXAS.

THE RAILROAD LOCOMOTIVE
Thorough Home Instruction. Assistance to Employment.
Railroads need many thousand instructed firemen annually. GOOD PAY and chance to become an Engineer. ENROLL NOW for the great Fall increase of force on all railroads. Particulars free.

BOYS in the HOME, CHURCH and SCHOOL

THE AMERICAN BOY
now three years and three months old, sends
NEW YEAR WELL WISHES
to its 100,000 subscribers and its 100,000 readers besides
MAY WE ALL HAVE THE BEST YEAR OF OUR LIVES!

Earning an Education.
One hundred and one of the students of Columbia University worked at various employments last summer to earn money with which to continue their schooling. The total sum earned by the 101 was \$15,531.95.
There is a committee at Columbia which aids needy students by helping them to get employment. Almost nothing was refused by these young men, who had determined some way to get along. One boy earned \$275 as a companion to boys; another \$104 as a farm hand. One made \$30 and expenses as an attendant at a summer resort; another earned \$175 as an insurance agent. Almost every kind of work was represented by these boys.

Unduly Excited.
One of our California boy friends has worked himself up into a fever of excitement over a report, which he says he has heard, that after January 1, 1903, our American soldiers are to be uniformed in green. He says: "O, the terrible thought of our American soldiers marching to the Irish national air of 'Wearing of the Green.'" It is further asserted, he claims, that the War Department intends to order the dear old flag changed to green also. He adds that if American boys will bear this insult they are dead beyond recall, and could not be counted upon to defend either home or country. He urges us to "hustle the boys up" to pour in petitions to the President demanding that he will not sign so infamous an order. Somebody must have been playing a joke upon this California boy. His fear is entirely groundless.

With Paper and Shears.
Elmore Ewing Stokes, the young son of Horace A. Stokes, Superintendent of Schools Delaware, O., is a genius with the shears, and reminds us of Charles Dana Gibson and his wonderful use of the shears when a boy. When a very young boy Ewing surprised his parents one day by showing them illustrations of nursery rhymes which he had made with his pencil. One day later when cutting out some colored illustrations from a newspaper a new thought came to him, and taking his paper and scissors he began to develop a talent which has steadily grown and caused widespread interest among his friends. Instead of cutting out pictures that he saw in the papers, he went to work free-hand and cut out pictures that only existed in his mind. The Spanish-American War was then on, and, young as he was, he wanted to go to the front. Of course, that was impossible, but his mind was full of it, and hour after hour he spent cutting out soldiers in every conceivable attitude. He made two fleets, one Spanish and the other American, and enough land soldiers to make a formidable army, bands of music, ambulances, etc. All of these he arranged on the floor in such a realistic style that you could imagine you were reviewing a great land and naval battle. In cutting he holds the shears stationary and moves the paper, seldom taking the shears from the paper until the figure is com-

plete. "Buffalo Bill," "Pawnee Bill," "Uncle Remus," "The Jungle Books," "The Bunny Stories," "Uncle Tom's Cabin," and scenes from real life furnish him with a never-ending source of ideas. Action characterizes all his cuttings. Nearly fifty of these cuttings were recently placed in the hands of the editor of THE AMERICAN BOY, and in endeavoring to select one with which to illustrate this article the editor was greatly perplexed, as every one of the cuttings was a little masterpiece. The boy scissors artist is particularly fond of making animals—not single animals, but groups, as farm yard scenes with barns and fences. You see the horses, cattle, sheep, chickens wandering about. Everywhere is displayed his love of the young of all species. Little dogs curl up near their mother, and little chickens follow the mother hen. His lions and dogs are especially fine. With no guide but the mind picture he has formed, he cuts them out, then with pen and pencil shades them until they stand forth, almost breathing realities. One day his mother went into the parlor and found a vast array of figures in a large circle and the boy bending over them deeply interested. He said it was Custer's last fight. He had just been reading an account of it. Custer and his men were in the center

One of young Stokes' horses cut with shears without copy.

bravely making a stand. The Indians were advancing on every side; while at a little distance the ponies were tethered browsing the grass. Everything he reads he thus illustrates for himself. The Leather Stocking Tales, the Henty books, histories, and so on, furnish an endless variety of subjects. When President McKinley was assassinated the boy depicted the tragedy scene after scene. He designed this year a dainty Christmas card. Upon a background of dark cardboard he painted a bunch of Christmas bells, each clapper being rung by a tiny cherub; and as St. Valentine's Day approaches he is a very busy boy, we can imagine. At the Delaware County Fair last summer he took three premiums on his work, the first on cuttings, the first on pen and ink drawings, and the second on an original design in drawing and coloring. Ewing is under a good special drawing teacher in the public schools, and later will be given special instruction in whatever he seems to be especially adapted for. He greatly desires to learn wood-carving and sculpturing. The boy has a great love for all things beautiful. We know not what his life may be, but it seems that he should succeed as an illustrator, following in the steps of Gibson, whose boyhood his resembles in many ways.

Reach the Top
by taking a thorough legal education at little cost in your own home, under the guidance of the oldest and most successful correspondence school in the world, that directs you successfully how to
Study Law at Home

The Boyhood of a Great Cavalry Leader—Annah Robinson Watson

HERE was once a rude cabin in the wilds of Middle Tennessee where lived a young blacksmith and his wife.

This cabin was only eighteen feet by twenty and was built of hewn cedar logs with chinks between, where light and air had their own way about entering and did not ask for a window. A great fire place occupied the entire end of the cabin, for this was the centre and theatre of the home life. The cooking was done here, the young mother sat here to rock her babies and croon their lullabies, and the father sat here during the hours between outside work and slumber and discharged many household and family duties which would astonish the average man of today.

Around the house was a newly cleared patch of land and in front of this ran the freshly opened public road which pierced the wilderness. Across this road from the cabin was the shop of the young blacksmith, where forge, anvil and hammer made stalwart music and set a lusty measure for the growing of the young lives which were attuned to their dominant note.

In this cabin was born in 1821 an American boy destined to become one of the immortals of his people. It was here that Nathan Bedford Forrest, one of the greatest cavalry leaders of his own, or any other age, first saw the light.

He was the firstborn of the eleven children of William and Marian Beck Forrest, and from the first was sturdy and strong of limb, and took as by nature to the wild and primitive life in which his lines were cast. When quite a little fellow he was marked for his fearlessness and determination, qualities which won quick recognition even during his childhood and which grew with his growth.

In the settlement there were a half dozen or more children, besides those of the Forrest family, who were in the habit of going out during the season to gather blackberries. One hot day the little troop had been out a long time and had turned their steps homeward when suddenly was heard and seen an immense rattlesnake. Its blood-curdling hisses and shrill rattle were enough to frighten much older unfortunates who might be within reach, and the children, in wildest alarm, dropped baskets and buckets and ran for their lives. One only was left standing erect and gazing with determination at the enemy. It was Bedford Forrest. The little fellow stood his ground, calling to the others to come back and help him kill the monster.

Without pausing for reply they flew on and single-handed he turned to the attack. Quickly grasping a long stick from the ground he went close to the briers where could be seen the reptile, its head lifted high and ready for a spring. Not losing a second he struck so vigorously that it dropped dead, and it was soon carried home in triumph hanging from the stick.

Bedford was greatly beloved by his companions; he enjoyed as well their enthusiastic admiration and confidence. One day the boys of the settlement took their horses down to the creek for water. One of the youngest, riding out into mid-stream, leaning over the horse's neck as he bent to drink, suddenly dropped his precious Barlow knife,—the joy of every primitive boy's heart,—into the water. In those days luxuries of all kinds were much scarcer than now, and the boy who lost his knife was in sorry plight, for there was no telling when it would be replaced by another.

The little fellow began to cry and sob and bemoan his loss, but Bedford coming up, exclaimed cheerily, "Don't cry, I'll get it for you! It must be just down there at the bottom of the stream. Never mind; I'll get it."

Then riding his own horse back to shore he jumped down, pulled off his clothes and waded out. The water was three feet deep, but he dipped under and remained as long as he could hold his breath, groping around in the mud for the knife, but it was not found.

Again and again he did this, bringing up handfuls of mud and leaves from the bottom, but the knife was still missing. The eager eyes of the little companion were fixed upon him hopefully. The result so far seemed very discouraging, but this sturdy young fellow, who never gave up an undertaking until success was achieved, or defeat inevitable, continued the search. At last when he had been under the water at least a dozen times the knife came up in a great ball of mud.

When Bedford was thirteen years of age the household moved to Mississippi, and here, three years later, his father died, leaving him the head of a family which consisted of his mother and ten younger children. This responsibility he assumed at once with dignity and determination, serving as his mother's "aide de camp" in all matters pertaining to the wise management of the estate and the welfare of his brothers and sisters.

The country about his Mississippi home was very thinly settled, and although the Indians had gone to their Reservation beyond the Great River, wild beasts abounded which, while they doubtless added to the romance and excitement of life made excursions into the virgin forest extremely dangerous. The dwelling of the nearest neighbor was ten miles distant, and one day the mother of the family started out on horseback with her sister to visit this neighbor.

The roads were only bridle-paths winding in and out among the trees and close underbrush, but they went unattended, made the visit, and did not start on the return until the afternoon, Mrs. Forrest carrying on her arm a basket containing several young chickens.

It was not long before the shadows began to fall, but riding rapidly the two were within a mile of home when the darkness fell. They were anticipating no danger, when suddenly on the fragrant silence of the woodland rang clear and shrill the yelp of a panther. It was evident from the sound that the animal was very near; the horses heard, and knowing well what the sound meant, started forward in a hot run, while the panther in long, even bounds came rushing after the scented prey. The

GENERAL N. B. FORREST.

riders could not go abreast; the path was too narrow. Mrs. Forrest was behind and her sister screamed back, "Marian! Marian! drop the chickens! for heaven's sake, drop the basket!"

"The varmint shall not have my chickens!" was the determined reply, and the two dashed forward with the beast gaining upon them. They were now near the creek which ran only a few yards from their home; they lashed the horses, then reaching the steep precipitous banks checked the reins, lest they be dashed headlong down the embankment, and into the stream.

The panther gained upon them. The foremost rider reached the water's edge and started across the ford, but Mrs. Forrest as she plunged down, suddenly heard behind her a mad yell, a spring, and then felt upon her shoulder and neck the horrible clutching of the panther's claws while its hot breath seemed to envelope her. At the same instant the claws of its hind feet were driven deep into the back of the faithful animal she rode. The horse was wild with fright and the agony of lacerated flesh. It reared and plunged, and gave a spring which dislodged the beast and sent it reeling into the water.

The screams of the travelers brought the other members of the family to the rescue and Bedford, whose tender love and reverence for his mother was one of his most notable characteristics, hurried out and caught her in his arms. He lifted her tenderly from the saddle and helped her into the house.

"I did not drop the chickens," she said briefly.

STRENGTH

Twenty-five years ago in acquainting jewelers with the strength of the Jas. Boss Stiffened Gold Watch Cases, an enterprising salesman used the method here shown. Jas. Boss Cases are still the strongest cases made. As good as solid gold in appearance. Better than gold in wearing quality. Less than solid gold in cost. In a

JAS. BOSS
Stiffened Gold Watch Case

there is a layer of very hard composition between an inside and outside layer of solid gold reducing the cost of the case, and adding greatly to its strength. BOSS Cases are guaranteed to wear for 25 years; are recognized as the standard, and sold as such by all jewelers. Write us for a booklet.

The Keystone Watch Case Company, Philadelphia.

By This Mark You Know Them

Her wounds were carefully dressed, and then he loaded his old flintlock gun, called his pack of hounds, and started out upon the track of the panther.

"Wait, wait until morning," his mother begged. "It is dangerous to go into the woods during the darkness."

"No, mother," he answered firmly, "by daylight the trail will be cold and the dogs cannot follow it. I'm going to find that beast now."

Soon the hounds had caught the scent and off they went through the briers and cranebrake, through swamps and tangled underbrush in the heavy darkness.

It was impossible to keep pace with them so Bedford cut a long slender grapevine, tied it about the neck of one of the pack and held it tight; in this way he kept up with the chase. Though the other dogs might be out of hearing as well as sight, their companion easily followed their trail.

Hours passed, but at last he heard the hoarse baying of the pursuers which told that the panther had been overtaken and treed. He hurried on through the darkness, and upon reaching the hounds collected about the tree, took up his position a few yards away and waited for daylight.

In the gloom and silence his trained ear could often catch the swish, swish of the great cat-like tail, as it beat in angry strokes upon the limb near by. Now and then an impatient growl smote the air, but he stood his ground, and after a while faint rays of light came sifting through the tree tops; day was breaking. Now he caught his first glimpse of the beast, as it lay at full length on the limb and snarled at the dogs watching below.

The stalwart young hunter only waited for sunrise and a more certain light on the scene, then he came a step nearer, looked critically at the beast, lifted his gun, took aim and fired. The bullet pierced its heart and with a low stifled cry it fell to the earth a lifeless mass.

Then with his long huntsman's knife he cut off the head and ears and carried them home to his mother.

During the day the young woodsman spent his time at the plough, felling trees for firewood, garnering the grain, and in other manly occupations which contributed to the support of his mother, his young brothers and sisters; and at night he worked until late, as his father had done before him, making buckskin leggings and shoes and coonskin caps for their use.

With unflagging industry, untiring energy, and unflinching self-sacrifice did he devote himself to the care of his family, and by the time he was nineteen years of age, so greatly had he improved their worldly condition that they were well provided for and most comfortably situated.

It was about this time that the Texas struggle for independence began to excite interest. Rumors of the war reached the Forrest household in this Mississippi home, and the slumbering soldier in the soul of this remarkable boy awoke and answered. A company of volunteers was formed in the neighborhood and he joined it.

The volunteers started on the Southward march, the boy who was later to be one of the most noted cavalry leaders of the greatest American war was a conspicuous figure among them. He was tall and slender but sinewy; he had black hair, a reddish olive complexion, which in time of excitement became almost as dark as an Indian's, and deep-set grey eyes, from which flashed a clear piercing glance like that of the eagle.

The heart of the dauntless soldier cherished from earliest years of childhood the most intense and all-absorbing love for his mother, and to his dying day this love never wavered nor grew cold. With her he was always gentle, respectful, and yielding to a remarkable degree, and his bearing was characterized by a chivalrous deference which was beautiful to behold. Truly did he emphasize the truth of the words, "The bravest are the tenderest."

Thanks are due Harper Brothers and John A. Wreth, M. D., for use of material contained in the valuable work recently issued, "Life of General Nathan Bedford Forrest."

Burrowes

Burrowes PORTABLE TABLE
For Home Playing

915 TO 945—SENT ON TRIAL
For Pool, Billiards, Balleto, Trapping, etc.
36 FASCINATING GAMES—USE IN ANY ROOM
Size, 5, 6, 6½, and 7 ft. Weight, 30 to 70 lbs.

Place on library or dining table or on our folding stand, quickly level with our leveling blocks, set away in closet or behind door. Recently improved. Rich mahogany frame with piano finish; bed of patent laminated wood with steel gliders; the only bed that will remain perfectly level under all conditions; green broadcloth cover, best rubber and steel cushions, concealed pockets with covers, 16 sheet balls, 4 cues; 40 implements, GRATIS. Write for booklet, free; also for names of your local dealer. Burrowes Folding Tennis Tables the best made. Send for descriptive price list.

THE E. T. BURROWES CO., Portland, Me., and New York

Two blades, finest razor steel, elegantly finished, sent postpaid.

The Jack-Knife Co., Room 200, 112 Dearborn St., Chicago.

A Heart of Gold

BRITT'S pasture had bloomed into a village of tents in a single night. The new town was a busy place, and the life in each one of its canvas domes a very necessary part of the circus whole; none was more so than that of the big dressing room which poured its treasures into the main tent at every performance. Now, it was in the usual state of bustle incident to the progress of the "show." It was nearly time for the "bareback riding," and horses and men were grouped about in apparent confusion; but it was only an appearance, for at the signal they would fall into line with clock-like precision.

The director's piercing glance roved about like a great searchlight. Everything was right, and every man was in his place—every man but one.

"Where is Jim Pipes?" asked the director shortly. The clown's lately developed habit of appearing only at the last moment came very near to being a breach of discipline, and this could not be tolerated for an instant; not even from that favorite, Jim Pipes. The riders glanced about with interest, for the director was not a man to be trifled with.

"Where is he?" demanded the impatient manager. "We'll stop this sort of thing in very short order."

"He's comin'," answered a voice out of the crowd, and an humble friend of Jimmy's darted out to help the missing clown to a sense of duty.

"Might know he was lookin' through some hole tryin' to see Joe go through his new turn," grumbled the man. He did not see that it was any business of his to shield Jimmy, but it was not in the nature of the man to stand by and hear the gentle, kindly-eyed clown hurt or scolded.

"He'd beard the lion in his den, much less the manager, for Joe—an' all 'cause he's Mam'oiselle Florine's boy. Ef Jimmy ain't been faithful to his wife, I ain't a man," ran quickly through his mind with something like respect; still, he thought, she had been dead so long, it seemed like the clown was overdoing the thing. A sudden suspicion explained Jimmy's unusual vigilance.

"I 'spect it's Dorsky that's on his mind," concluded the man, as he hurried around the tent.

Meantime the offending clown had made his way to a hole in the big circus tent through which he could see the ring with very little trouble. Whichever way the tents were set up, or in whatever town, Jimmy could go straight to that rip. Now he was down on his knees straining his eyes through the slit at the lithe and beautiful body within, swinging like a graceful bird from one trapeze performer to another. Jimmy's glance flew rapidly from the boy to Van Dorsky. Someway he had never felt quite safe about the Pole and today he was particularly

uneasy. His love-sharpened sight detected a strange, reflective brightness about Dorsky's eyes. What was it, liquor? "Dangerous," muttered the clown as he fairly burned the man with his

scrutiny. The wild streak was coming out. "He ain't made a false move yet," thought the sentinel, "but he might;" so Jimmy watched for the boy's sake. Everything went well and the father forgot his fears in pleasure at Joe's performance.

"He's more like Florine every day," he said, dreamily. As the boy's red trunks made a bright spot in the air again, a glow of pride suffused the father's face. "He'll soon be good as she was," muttered Jimmy, "even in them flyin' leaps, an' nobody ever could touch her there."

The man's eyes had grown wistful and tender. For a moment the exquisite figure of his wife going through her wonderful evolutions seemed to play be-

fore his eyes, and the old, worshipping gratitude rushed up from his heart as it had a thousand times before.

"Wonder why she took me," he whispered with moist eyes, "then she give me Joe." He watched the boy and his flights in air with the fascinated interest that Mademoiselle Florine once evoked. "I never could do it," he thought; "couldn't do nothin' but train dogs an' make a fool of myself."

Other memories came trooping forward and he smiled amusedly.

"The boy never could bear to see me painted up from the time he was a baby." Joe was a hot, proud little soul. Yet fresh in the father's memory were the tears of rage the little fellow shed on "daddy's" breast, when for the first time he heard a lot of rough men call Jimmy "an old guy."

"When I get rich," sobbed the boy, "you won't have to be a clown any more." That was long ago; but when Joe got an idea in his head, it stayed there, and he had not given Jimmy much rest since.

"Looks like the time's a comin'" said the clown to himself; "Joe's gettin' to be such a star performer." But someway it made Jimmy lonely; he loved his dogs and his jokes—and—well, the thought of giving them up hurt—yes, it hurt. He felt tired and closed his eyes for an instant. Joe must not grow away from him, no, never.

"I'd give up everything for him. Why not what he dislikes? anything will do me."

"Here! you, Jim," interrupted his friend, "you're goin' to have a row on my hands, well as on yours, chasin' round the tent after you. Come erlong, an' hurry up erbout it." At the first word Jimmy was on his feet shaking the dust from his baggy trousers, and in another moment they were on their way to the dressing room to await the approaching call.

Jimmy had no more than taken his position in the dressing-room, when the audience in the big tent shivered as from a single impulse, and a cry of horror burst from the lips of the spectators. It was done. Dorsky had made the false move; he loosened his hold on one of Joe's feet sooner than on the other, and with all the force of the tremendous swing the boy went hurtling outward. He missed the outstretched hands of the inward swinging trapezist, felt himself going, lost his hold on himself, let his arms and legs fly, struck his back on the guy ropes, turned helplessly and struck the ground with a thud just as the ringmaster reached him with giant bounds.

They took him up on a tumbler's nearby mattress and carried him out. Before the crowd in the dressing room caught the meaning of the confusion, it came to Jimmy with a rush—Dorsky! and he broke to the front.

"Joe!" came from his lips like a wall. The men kept their eyes down and some of them looked at the two sideways. Falls like that meant death or crippling. Jimmy ran along beside the moving mattress; laborers and "stars" surged around. The confusion increased.

"Ready here!" ordered the manager. The trapezists hurried in explaining and protesting.

"Fall into line!" insisted the manager. No time to talk—tend to that afterwards. Jimmy's habit of obedience almost startled him into moving.

He was smoothing Joe's limp little hand. "Oh! Joe, Joe," he murmured piteously.

-Lucy S. Orrick

"Sorry," said the manager, with brief sympathy, "but we have to go," and he looked at his best clown expectantly. He was not heartless, but the audience waited, and the circus had to proceed; besides, he knew Jimmy could do nothing. But for once he counted without his host; the model stickler for iron-bound rules stood rigidly.

"Not till I know what's the matter with him," he said with a stubborn set of his jaw. The riders looked about uneasily; they did not want to hear the verdict with Jimmy Pipes by; sympathy made them gruff and sharp-tongued.

"Get out of the way," said one to another as he tried to move off. The doctor was worst of all.

"Go on," he urged sharply; "when Joe opens his eyes and sees that face of yours it'll make him worse."

Jimmy drew back as if he had been struck.

"Oh! I forgot," he mumbled.

"We'll do all we can," added the doctor more gently.

"Ready!" again interrupted the manager; time was passing and if the worst had to come, Jimmy had best not be there. "They will send if they need you," and Jimmy slowly bestrode his donkey. When he galloped into the ring grimacing and shouting at the audience, no one could have told what lay behind him. He ridiculed the ringmaster and flung joke after joke at his head. The people laughed uproariously; but the grotesque, painted grin on the clown's face mocked at the terror in his heart. Everything in him was in awful suspense at Joe's condition. He did not dare to think the boy might die, and then, there was something else that would be worse than death itself to Joe. At the thought, all Jimmy's jokes seemed to leave him; only one thing hampered on his brain and that he had to use.

"Ef you had two cakes, ate both and had one left what kind of cake would it be," he asked, with a wild sort of ring in his voice. It was the last conundrum Joe had asked him. The bodily exercise of a somersault and other awkward imitations of the skillful riders were a relief to him. It seemed to Jimmy his "turn" would never end, but he tried to keep his thoughts to the subject in hand.

"What kind of cake would it be, mister?" he persisted, planting himself with impudently hilarious mien and outstretched trousers directly in front of the ringmaster.

"It wouldn't be any kind. There wouldn't be any left."

"There wouldn't?" roared the clown, derisively; "what about stomachache?" The negroes in the "black tier" howled and screamed, and the clown with another somersault and kangaroo leap evaded the ringmaster's whip and at the same time landed on the donkey face toward the animal's tail, and dashed rapidly out of the ring after the gaily decked trick riders.

When he drew up at the dressing-room tent, he was trembling like a leaf: "Is he any better," he asked, a cold perspiration beading his lip.

"Ain't come to, yet, but the doctor'll bring him round," was the cheerful answer. Jimmy was wiping the grease paint from his face with quick, nervous dabs. He did not wait to hear more, but rushed to the mirror with the vaseline bottle; a few more rubs and his face was clean. In another moment he stood at the side of Joe's cot.

"How is he, doctor?" was his first question. Jimmy's real face was white as a mask and his voice so faint the doctor hardly recognized it. The clown himself seemed to be standing on his heels awaiting a blow in the face, while an empty black sickness surged up to his very eyes.

"He'll live," said the doctor, quietly. The strain of it over, Jimmy sank on his knees beside the cot with his face in his hands. That Joe was still his own, filled his mind with a sort of dizzy happiness.

"But," went on the physician, "I—I—don't think he'll ever mount the trapeze again." A dazed look came over the father's face, there was a terrible stillness for a moment, and the first sounds to break the silence were Jimmy's suppressed sobs.

First, Florine; now Joe—Joe in all his youth and beauty struck down to utter helplessness, while he, Jimmy, was spared in all his strength and ugliness. To the father it seemed an awful kind of sacrilege.

"Oh," he moaned inwardly with a great ache at heart, "if it had only been me." What would the boy do? All his talents and labor gone to naught. It would kill him.

"Daddy," a faint voice called. "What is it?"

Jimmy raised his head with a start.

"Nothin', lad, nothin'," he protested hurriedly. "I was so scared you wouldn't come to; but you are all right now, you'll just have to rest some little time 'fore you get over that fall," he assured lovingly, but with a nervous gibbness.

The doctor, who stood on the other side of the cot, was young, and in spite of the stern look about his mouth he could not bear the sight of Jimmy's almost

If I Were a Boy Again—J. L. Harbour

IT IS so many years since I was a boy and I have seen so much of the world in those years, that my opinion ought to be of some value. The wrinkles are beginning to show in my face, but I do not think that there are any on my heart, because I still feel young and I have so much sympathy with and for boys.

It is because I am so fond of boys that I would like to say a few things to them in regard to the things I would like to do if I were a boy again. Of course, I know that it is true that "Boys will be boys" in many respects, and I am glad of it. Every boy has a right to the joyfulness, the merriment, the buoyancy and the freedom from care that belongs to boyhood. Every boy has a right to be happy, but no boy has a right to be happy at the cost of the peace and happiness of others. We "grown-ups" have a good many rights that you "youngsters" ought to respect, and that you can respect without curtailing your own happiness.

If I were a boy again and I knew all that I know today I would try to be more mindful of the rights and the happiness of others. I would not insist on always having my own way, no matter how much inconvenience and real trouble it gave my family and my friends. I think that I would have an occasional little conference with myself and I would say in that conference:

"Now, see here, boy, you have no right to make a nuisance of yourself for the gratification of your own pleasure. You have no right to create pandemonium wherever you are, simply because you are overflowing with animal spirits and you want to let off steam. Other people have a right to peace and quietness in the house, and you are bound by all the laws of kindness and courtesy to respect that right, and you should do your "letting off steam" when you will not annoy others by doing so.

If I were a boy again I would set more value on personal tidiness than I set on it when I was a boy. I know now that my carelessness in this respect was a great annoyance to my family and friends, and that my grimy hands and uncombed hair must have been a real annoyance to my teacher and to my family. I know now that a boy rises in the esteem of people when he is neat and tidy in his personal appearance, and that a really untidy boy repels those of refined taste. If I were a boy again I would make a very free use of those two cheap and abundant articles—soap and water.

If I were a boy again I would try not to think that I had a right to the best of everything at the table, the best chair in the house, the lion's share of everything, and I would try to have more respect and

consideration for my elders than some boys of whom I know. If there is anything in the world that sets a boy away up in the good opinions of others it is real unselfishness and real kindness and courtesy to those much older than himself. When I see a boy rise and lift his hat and give his seat to a lady or to an old gentleman in a street car, or when I see him ready and eager to render some service to ladies or to the aged, it warms my heart toward him, and I know that he has the instincts of a real gentleman. And when I see a boy absolutely unselfish in his home and among his mates I know that I see a boy who cannot help being popular, and who will have many friends, no matter where he is.

If I were a boy again I would not reserve all of my smiles and merriment and courtesy for others and be sullen and rude and "cross as a bear" in my own home. I have known some boys of that type and I cannot help thinking that they are real humbugs, for they often receive credit for being "such nice boys" when they are not nice at all to those to whom they ought really to be most kind and courteous. The boy who snaps and snarls at his mother and who is sweet and smiling to the mothers and sisters of other boys is really playing a part. Don't you think so?

If I were a boy again I would be a regular attendant at church and Sunday school, for by doing so I would not only be honoring my Creator but I would rise in the respect of all who know me. Wide experience and years of observation have taught me that the boys who attend church and Sunday school invariably stand higher in the community than the boys who spend their Sundays on the streets or even in their own homes reading or dawdling or snoozing. If you will look into the matter I am absolutely sure that you will find that the church-going and the Sunday school boys are in a good many ways superior to boys who never go to Sunday school or to church, and that they do stand higher in the respect of those whose good opinions it is well worth while to have.

If I were a boy again I would cultivate a spirit of true patriotism and I would honor my country and my flag. I would know all that the beautiful red, white and blue emblem stands for, and I would do all that I could to add to the glory and honor of my native land. One day not long ago I saw some boys trying to raise a small flag to the top of a flagstaff on a lawn before which I was standing talking to a friend. The boys were having some difficulty in hoisting the flag, and while they were trying to make it rise a fire engine came along with the rattle and clatter that always sets a boy's blood to tingling. The two boys who had the flag in their hands at that

moment dropped it to the ground and started to follow the fire engine, but the third boy tarried and was folding up the flag when one of the other boys looked back over his shoulder and called out:

"Come along, Ted! You'll miss seeing the fire!"

"I'd miss a dozen fires before I'd go off and leave my country's flag in the dirt!" replied Ted, and I felt like saying:

"Good for you, my boy! You have the spirit of true patriotism, and you do well to so honor your country's flag"

If I were a boy again I would spend no time at all in what some people call "loafing." And I would keep off the street when it was unnecessary for me to be there. I would shun tobacco and rum because it has been very clearly demonstrated that they are bad for any one, and that rum in particular is at the bottom of most of the evil and sorrow in the world. If I were a boy again I would make almost any personal sacrifice in order to secure a good education, not only because a good education adds immensely to the pleasures of life, but because it adds to one's usefulness, and it is imperative to the highest degree of success.

The Regeneration of "Bobbie"

(Continued from page 78.)

those who wished to lead cleaner, happier lives to come forward, Bobbie went and knelt with others while the minister prayed.

After the prayer, Bobbie extended his hand to the minister with the remark, "You've knocked me out all around, parson, and I'm blamed glad of it."

"Say so to your companions," the minister suggested, smiling.

"I ain't no talker," Bobbie protested.

"But you can say a word."

"If I have to reckon I can," he said, soberly, and turning toward the miners he said: "Fellers, some folks has their regeneration preached into them, and some has it pounded in. I've had mine pounded in—but I reckon it's all the same sort of regeneration; and, fellers, see this?" and he drew a bottle from his pocket; "it's got a quart of the pure article in it—see?"

When all eyes were fixed on the bottle he held in his outstretched hand, he said: "Well, you won't never see it again," and turning suddenly he flung it out the door.

"Praise the Lord," the minister ejaculated, but his exclamation was lost in a tumult of cheers, for two of the satellites sent their bottles after Bobbie's.

A Young Embalmer.

O'Fallon (Ill.) has the distinction of having a very young embalmer as one of its "business men." He is Henry P.

intelligencce shown by him in his work. The safety of many thousands of lives depends upon the proper performance of the duties of the section master. It is an important position for a young man.

HENRY P. SCHWARZ.

Schwarz, fourteen years old. He began work as an undertaker and embalmer about four years ago, and is a graduate of the Massachusetts School of Embalming and also of the National School of Embalming. At the Undertakers' examination, held by the Illinois State Board of Health at Peoria in June, he passed with high honors, making an average grade of ninety per cent.

A Young Section Master.

George Gillet, age nineteen, has been made Section Master of the section of the Michigan Central Railroad between Dutton, Mich., and Caledonia, Mich. The position was given him on account of his strict attention to details and the uncommon

PETER OSSE.

A Novel Kind of Artist.

Peter Osse, of Grand Rapids, not yet twenty years old, saw a newspaper item in which it was stated that a man in California had placed four thousand words upon the back of an ordinary postal card. This set Peter to thinking and he made up his mind he could do better than that. After a number of trials he put upon a 3 1/2 x 5 1/2-inch card the astonishing number of 10,600 words. Then he tried his hand on a postage stamp and put on its back the Lord's Prayer fifteen times—a total of 1060 words. He writes with a common lead pencil and without the aid of a magnifying glass. Peter is a barber by trade, but spends his spare moments in this work. He is now endeavoring to put the Constitution of the United States and the Declaration of Independence on one postal card. Having some doubt as to the truth of the reports regarding this young man, we wrote for further evidence, and received a letter from one who says that she has seen the postal card on which he is now working and that it contains over 7,800 words and not half of it is yet filled.

A Historian at Thirteen.

Carlton S. Way, a thirteen-year-old Hartford (Conn.) boy, is writing a history of the United States, and the first volume has

CARLTON SHEPARD WAY.

been completed. The book contains 155 closely typewritten pages and is illustrated with maps. It is bound in brown cloth, the binding being the only thing about the book that the author did not make himself. The volume gives a brief account of the physical characteristics of the continent, describes the Mound Builders and Indians, and then relates the incidents connected with the discovery of the country by the Norsemen. Something is given of the history of each of the thirteen colonies, and the closing chapter deals with the events leading up to the Revolutionary War.

Young Way is Class boy of Yale '85, and also Cup boy of '85, Wolf's Head, Yale. We can think of no better mental exercise for a boy than the doing of what this boy has done.

There is always hope in the man who actually and honestly works. In idleness alone is there perpetual despair.—Carlyle.

Youngest Soldier in the Army.

Frank A. Bonner, who has just reached the age of sixteen, is the youngest soldier in the United States army. He was enlisted under a special dispensation and will be detailed as a bugler to either the Fourth or the Eighth cavalry.

A Great Memory.

Little Samuel Arthur Moser, of Chicago, who is only eight years old, shows a wonderful power of memory. The faculty seems to be a natural one, as his memory has never been cultivated. The boy has been in the public schools for two years, and prior to that time spent two years in a kindergarten. When he was but five years of age his playmates noticed his wonderful aptitude for figures and dates. He knows the names of all the presidents, the dates of their births and deaths, and can add imposing sums by mental arithmetic. He has at his tongue's end a mass of geographical and historical information, and seldom stumbles in an answer. He is a great reader of the Bible, historical works and the daily newspapers, and often has to be literally driven from reading to his bed. The boy is in perfect health and spends much of his time on his bicycle.

S. ARTHUR MOSER.

We had just emerged from the woods and were nearing a high rail fence which surrounded my father's farm...

Jim dropped his gun and his half of the porcupine and ran like a deer. For some reason which I can not explain I could not let loose of mine...

A thought entered my head which saved my life. Acting as quick as lightning I turned and brought the porcupine down with all my might...

When I got on top of the fence I saw our hired man, Bill, running like a deer across the field, with gun in hand.

ONE day, when a lad of about fifteen summers, my chum, Jim, came from the city to spend his vacation with me in the country...

One day, however, we had quite an adventure, which I shall proceed to relate, for, as it came near ending my earthly career, it is quite vivid in my memory.

It happened in this way: Jim liked the girls, and, hailing from the city, was quite a favorite with the half-dozen country lassies who lived near by.

One Sunday afternoon shortly after he had taken his departure for the realms of bliss, I decided to take my father's old mare and two-wheeled gig and drive out into the country to kill time.

A serious obstacle confronted us. My people were very strict church members, and I would as soon have thought of committing murder as of going hunting on Sunday.

We took turns napping and when the clock finished striking twelve, were on our way, fully equipped for battle.

Standing there with hearts beating like trip hammers and almost breathless with excitement, we counted nearly twenty round bunches within a radius of only a few rods.

In this way we labored until the sun came up. The turkeys had apparently left the country, for we had not seen one for some time.

get nearer, so we decided to chance a shot from there. We took deliberate aim from either side of the large tree and fired.

We searched until noon and then sadly turned our faces toward home, instinctively keeping a sharp lookout among the branches. We freely discussed the fact that we had been lured several miles from home...

Suddenly Jim grabbed hold of me and pointed towards a neighboring tree. There, sure enough, was something rolled up snugly on a limb, about twenty feet from the ground.

After discussing the matter for a few minutes, we finally resolved to get as near as possible, take deliberate aim, and both fire at the same time.

The bunch rolled off the limb and came tumbling to the ground. We held our breath in terror and did not stir for some time, never once thinking to reload our guns.

We ran up to it and Jim was going to pick it up by the tail; but no sooner had he touched it than he uttered a cry of pain and held up his hand in terror.

We were now convinced that our game was nothing more nor less than a porcupine. What to do with him was the next question. My folks would like to see him, even if he were not good to eat.

Two of the best pieces of music for American boys ever published, by which in January we shall have one thousand copies of each to sell to American boys.

The Agassiz Association

THE AMERICAN BOY is the only official organ of the Agassiz Association and should be in the hands of every member. All correspondence for this department should be sent to Mr. Harlan H. Ballard, Pittsfield, Mass. Long articles cannot be used. THE AGASSIZ ASSOCIATION welcomes members of all ages, and any one who is interested in any form of natural science is invited. Established in 1875. Incorporated in 1882. Short notes of personal observations are particularly desired for use in the A. A. department. Send illustrations when convenient. Questions are invited. Address H. H. BALLARD, Pittsfield, Mass.

Boys Books Reviewed

HANS ANDERSEN'S FAIRY TALES. Translated from the Danish, by Carl Siewers. It is safe to say that the fairy tales of Hans Christian Andersen will be read just as long as there are little folks to read and enjoy them. These stories are never of the preachy kind, but simple tales with many queer and altogether fascinating happenings in them. This book is handsomely gotten up, and Mr. Mora's happy illustrations will just make the young reader's cup of enjoyment run over. Price \$1.50. Dana, Estes & Co., publishers.

PHIL AND DICK, by E. H. Lewis. All boys love to read sea stories of adventure and here is one which contains sufficient excitement to satisfy the reader's utmost craving. It tells of two boy apprentices in the U. S. navy, and the many things which happened to them during their service with Uncle Sam. Their hairbreadth escapes from drowning, pirates, robbers, shipwreck, with vivid descriptions of foreign cities, make up a book which is calculated to keep a boy awake beyond the usual hours. It is nicely illustrated and printed in large, clear type. 291 pages. Cloth. Price \$1.00. The Saalfield Publishing Co.

We have received a copy of Vol. I, No. 1, of The Model Electrical and Mechanical Engineer, a journal of mechanics and electricity for amateurs and students and, from its contents and make-up, we believe, this paper will greatly benefit the boys and even adults who love to do things. Part of the contents tell of How to Make a Telephone, and How to Build a One-fourth to Three-eighths H. P. High Speed Center Crank Steam Engine, with suitable drawings, besides many other things interesting to the amateur engineer. The paper is also the official organ of the Society of Model Electrical and Mechanical Engineers. It is published by Robert Thistlewhite; the subscription price \$1.00 a year. THE AMERICAN BOY will receive subscriptions.

No More Henty Books.

The news we have to communicate to our boys this month that George Alfred Henty is dead will come to them as a distinct shock, for Henty has been the ideal writer for boys for several generations. Mr. Henty was an Englishman, but his books found thousands upon thousands of

GEORGE ALFRED HENTY.

readers in America. He was educated at Cambridge and served in the Crimean war. Later, as a correspondent, he was in the field in the Austro-Italian, the Franco-German, and the Turco-Servian wars, and was with the Abyssinian and Ashanti expeditions as well as with Garibaldi in Italy. In these various fields of action he absorbed an immense amount of material for stories and boys have devoured his writings with eager zest. He was a very industrious writer, turning out two or three books a year and never repeating himself. At the time of his death he was in his seventieth year and was still writing. His books are found wherever boys of the English race are found. The Hartford Courant, in speaking of the boys who have read the Henty books, says: "They will be more intelligent British subjects or American citizens a few years hence for having read the Henty books in their boyhood."

Between eighty and ninety books are the product of Mr. Henty's great industry, and these have been left as an enduring memorial. Henty will be kindly remembered and regretted for a long time to come by the boys of two great nations.

The great and overshadowing peril of a boy's life is not, as many suppose, his bad companions, or his bad books, or his bad habits; it is the peril of homelessness—a peril that often exists even in luxurious houses.

Curiosity From Guatemala.

3d Avenida Sur, No. 96,
Guatemala City.

Mr. H. H. Ballard:

Dear Sir—I inclose a drawing of a "wooden flowers." These flowers grow only on the slopes of the Agua and Fuego volcanoes of this country. Inside it is of a dark coffee color; the outside is lighter. It is hard and looks as if beautifully carved. I have some that I would exchange with other boys.

Yours truly,

ARTHUR D. DURAN.

As our readers will want to know more about these strange wooden flowers, we reprint the following account from the Literary Digest:

"It is well known that certain plants develop in the neighborhood of other plants, with which they live in more or less intimate union. According to the degree of intimacy, these plants are known as commensals, epiphytes, or parasites. The commensal establishes itself near its neighbor and takes a part of its nourishment; the epiphyte lives fixed on its host, but without taking any of the latter's sap, and its action is purely mechanical, whether protective or injurious. The parasite, which is often more terrible for the plant than for the insect, fixes itself deep in the plant's vitals and is nourished exclusively on its substance. All parasites are not injurious; the mistletoe, if it is

White-Footed Field Mice—Mrs. M. K. Harrison.

Thinking that an experience which we had with some white-footed field mice may interest the Agassiz boys and girls, I will relate it. These mice are pretty little creatures, with soft, silky fur. Scientists call them *Hesperomys leucopus*, a name they may try to remember.

One bright morning in Autumn my little boy came into the house with a stout stick, some eighteen inches long, in his hand, to which was attached a very neat nest made of shreds of bark, grass and bits of old wood.

Hastily explaining, he said: "I found this pretty nest in the woods. I think it is empty, and see, there isn't any door! I want to put it in the museum, but haven't time now. I must go right back to the woods with papa for more wood. I'll leave it here in the window. Don't let any one touch it." And, carefully placing the nest in the window, he hastened away.

A tired boy does not always remember even new found treasures, and the nest remained in the window undisturbed for two or three days.

Taking his boots one morning from the corner of the dining room, he thrust a foot into the first one, but found it would go in but a few inches; then he tried the second with a like result. "What is the matter with my boots?" he exclaimed, and turning them upside down some two quarts of pumpkin seeds fell out. "Well, I would like to know how these seeds came here?" he asked in surprise. Everybody was interrogated, but no one knew anything about it.

The seeds had been left to dry by the kitchen stove the night before. Investigation was made, and not a seed or piece of a seed could be found outside of the boots. As the seeds were not dry enough to put away they were taken back to the kitchen, and that night were left just as before. The next morning every seed was in the boots again. We thought it might be the work of mice, but no mice that we knew of could accomplish so much in so short a time, and what mouse could resist the temptation to eat pumpkin seeds and scatter the chips by the way?

During that day Arthur thought of the nest in the window, and going to get it he found that the door had been opened from the inside, and the occupants of the nest had gone. "O, I know what it is now!" he exclaimed. "Something that came out of this nest put the seeds in my boots." A few days later the *Hesperomys* were taken in a trap, and the mystery was explained.

Two-Headed Snake.

1215 Franklin Ave., New York, N. Y.
Some time ago in a park called "Crotona," about a mile from where I live, there was a two-headed rattlesnake captured. The party who caught it presented it to The Bronx Zoological Garden.

TWO-HEADED SNAKE

While the snake was there I had the pleasure of seeing it. It was very delicate, this being accounted for by its not having enough to eat, not that they weren't given enough, but because the two heads were constantly quarrelling.

not too abundant on the oak, has rather a beneficent effect than otherwise. But another plant of the same family (*Loranthaceae*) makes real ravages on its victim, and thereby produces the curious result that is represented in our picture, which is called "wooden flowers." This is a name given by the natives of Tierra del Fuego, the country where the parasite is found. The wooden flowers are an excrescence that forms on the branches of the trees after the development of the parasite, whose seeds are deposited thereon by birds. These seeds contain a sticky material that enables them to adhere to the tree. Once fixed, the seed penetrates the outer bark, enters the liberoligneous part of the wood, and causes a tumor that takes an approximately spherical form and is of a size that varies with the importance of the branch. The latter sometimes withers, but often continues to grow, though weakened; new seeds arrive and there results a group of "wooden flowers." The union is then so intimate between the plants that in making a transverse section it is almost impossible to say where one begins and the other ends. The parasite does not live more than three or four years, but it leaves traces of its existence. The "flowers" have a diameter varying from two to sixty centimeters (an inch to two feet).

These "flowers" are not, as one might believe, formed by the roots of the parasite, for it has none. They are formed by a prolongation of the ligneous part of the wood itself, forced through the bark. Their volutes are very graceful in their effects, and recall the classic *ascanthus* leaf, as is shown in the illustration.

No money required until brooches are sold. We take back all not sold. Address Howard Mfg. Co., Providence, R.I.

SINCE Rugby was founded, as recently as 1567, it is considered in England to be quite a modern school, but when I visited the place this year I saw evidences of antiquity on every side. After Lawrenceville and Andover it seemed very old indeed. The boys attending Rugby are chiefly from the middle class of English society. There is not a tittle in the school. The boys' fathers are, for the most part, lawyers or physicians or manufacturers in the neighboring cities. On this account I found the Rugby boys more friendly to strangers than were those of Eton, and during my visit to the Institution I felt as if I were indeed one of them.

In the beginning, Rugby was only a grammar school for the youngsters of the neighborhood, and it never amounted to much until Dr. Thomas Arnold, "The Doctor" of "Tom Brown's School Days," became head master. He reorganized everything, and brought Rugby to the high position it occupies today among English public schools. When Dr. Arnold first went to Rugby the need of a new order of things was plain to his keen mind. The "houses" where the boys were living were nothing more than boarding houses, and the masters, instead of living in them, as they should, tried to eke out their slender incomes by serving as ministers at neighboring churches. "The Doctor" arranged that each house should have several masters in charge. He also arranged the system of "fagging" which is now used in all the public schools in England. He believed that in a school community the older boys should govern the younger in their daily life, and be responsible for order in the different houses. "The boys," he wrote, "are for nearly nine months of the year living with one another in a distinct society. Their school life occupies the whole of their existence. At their studies and their amusements, by day and by night, they are members of one and the same society. For this they require a government. * * * It is idle to say that the masters form, or can form, this government. * * * A father with thirty sons would find it no easy matter to govern them effectually. How much less can a master govern thirty boys?" For these reasons Dr. Arnold decided that the boys in the sixth form should rule over the others, and if in any house there were not a sufficient number in that form to preserve order, he appointed some of the fifth-formers to assist.

This system of fagging is carried out at Rugby today, but I couldn't make up my mind, when I was there, that I would care to be either fag or fag master. It doesn't seem right for one boy to act as servant to another, and the fags at Rugby are obliged to do regular housemaid's work. The first thing in the morning one of them, who is appointed for the week, is obliged to wake all the other fellows in the dormitories. This is by no means an easy task, and sometimes it is positively dangerous. Occasionally it is necessary to use water and clubs to get them all out, and then the unhappy fag has to flee before the wrath of the upper formers. Then, after the first morning lesson has been said, the fags go to the town and purchase supplies for their masters' breakfasts. When they get it home they must cook and serve it, and they hardly have a chance to get

any food at all for themselves. All they are allowed under the school rules is a quarter pound of tea and a pound of sugar each week. The rest each boy must buy for himself.

As at Eton, all the fellows eat their dinner together, but at five o'clock the fags must get ready their masters' tea and serve it. One or two of them must prepare the toast, and that is a job I wouldn't like at all. Each sixth-former has two rounds of it, and the poor fags have to hold it before a fire which is a veritable furnace. The worst of it is they are not permitted to use toasting forks, and very often their hands are fairly scorched.

After tea it must be seen that the rooms of the sixth form are in apple pie order, and then they are through for the night—all except one who is appointed to stand watch in the hall to answer the calls of any "praepostor" who wants water or something for supper. I think this last duty must be the most thankless of all, for there is very little excitement in the houses after tea. The fellows are all supposed to be studying their lessons for the morrow, and the masters take care that there is no romping in the hallways. I was told a story by one of the boys which fairly made cold chills run down my back. It was about a fag who was left standing in the hall one night to answer supper calls. He heard and saw absolutely nothing until rather late, and then he perceived a tall white figure, wrapped in a bluish flame, coming down the corridor. In its hands were bread and cheese and beer and it floated in the air, rather than walked. From one room to another it passed, serving supper to all the sixth-formers, and finally disappeared as mysteriously as it came. After that the fag was not obliged to stand watch any more, for he was frightened nearly out of his wits. This story is always told to the new boys arriving in the house, and they are told to look out for the ghost while on fag duty in the halls.

The new boys arriving at Rugby have rather a hard time at first and are subjected to treatment which corresponds to hazing in American schools. I was shown a table on which they are made to stand on "new boy's night" and sing a song. They must stand with their legs as far astraddle as possible, holding a candle in each hand, and if they strike a false note there is violent hissing in the audience. When the songs are finished they are required to pledge the health of the school in a drink composed of salt and water and tallow candles.

Of course the most sacred landmarks and customs at Rugby are those which are mentioned in the story of Tom Brown. As I went through the school-house I was shown by one of the boys the "double-study"—fully five feet by six—which is said to have been occupied by Tom and Arthur, and in the corridor I had pointed out to me the top of the old hall table, with T. Hughes carved boldly upon it in capitals. None of the boys doubt but what Tom Brown really lived and attended the school.

The great dining-hall where all the boys eat their dinners stands just as it was described in the famous book. There are tables all around the sides, and tables in the middle. The smaller boys are given seats at the side tables, and as they progress through the different forms, they move around the

room until finally they are given one of the seats of honor at the middle table. To sit there is a distinction greater than being merely in the sixth form, for a fellow must have a clean record to get there. When the dinner is over, the little boys pass out through a corridor, while the sixth-form fellows go out through a door directly into the yard. For a little boy to go out through the big boys' door would be a piece of arrogance not to be tolerated, and any chap bold enough to try it would be made to suffer in consequence.

The boys who were guiding me about the school insisted that I mustn't leave until I had seen the schoolrooms where Dr. Arnold used to meet his sixth form. Many old men in England remember these rooms as places where they learned more about obedience and discipline than they could ever have learned had it not been for the famous head master. The furniture in these rooms is not old, as at Eton, but the walls are covered with old table-tops, upon which are carved the names of the old scholars who attended in Tom Brown's time. The boys are not permitted to display their talent as carvers nowadays. If they cut out even so much as their initials they must have the wood planed and polished, or else buy a new table. This seems rather hard, in the light of old customs and traditions, and makes the Eton boys rather to be envied.

Of course I was interested in visiting the old "close" which I had read about so often, and where the game of football as we know it in America is said to have originated. The three trees which used to stand within the football field are gone, now, but there are others standing, and the close is a shady, attractive place on a sunny day.

Aside from football records, the close is famous as the place where all fights have taken place among the boys since Dr. Arnold's time. Before then it was the custom for the fellows to meet in some place where they wouldn't be disturbed and settle their quarrels by a knockout bout. Arnold ruled that all such contests should take place in the close, where he could overlook them from his study windows. If there were any breaches of this rule, the penalty was expulsion for all parties concerned. Every boy will remember the fight between Tom Brown and Slugger Williams, and it was no-imitation affair; but Dr. Arnold intervened before one of the boys was killed. Nowadays the fights are not so much encouraged by the masters, and the close is no longer a famous field of war. But all the Rugby fellows would like it better if they were allowed to settle their quarrels in this way, and they maintain that there is more spite and nasty feeling in the school today than in Tom Brown's time, when it was all knocked out by black eyes and bloody noses.

It was at Rugby that the modern system of Christian education had its beginning. When Dr. Arnold went to the school he found it one of the most immoral and rebellious in England. Drunkenness and swearing were common vices among the boys, and all sorts of vicious acts were approved by the sentiment of the school. It was a slow process which built up the moral and religious tone of the institution, for the boys were not easy to manage. Most of them used to keep guns in the backs of stores in the town, and whenever occasion presented itself

they went out on poaching expeditions. Everyone knows that poaching is considered one of the lowest crimes in England, and Arnold stopped it at Rugby by telling the shopkeepers he would forbid the boys to enter their stores at all if they assisted them in poaching.

There was a horsey set at Rugby, too. The country round about the school is first-rate for hunting, and it was a great temptation for the boys to mount a horse and go riding for game. It is told that on one occasion a boy who considered himself a great steeple chaser bragged that he could beat any fellow in the school and give him the pick of horses at that. A sixth-former named Corbett accepted this challenge, and the race was held amid great enthusiasm. The challenger lost, but after the race he whined so much about the superiority of Corbett's horse that the latter agreed to ride the chase over again, exchanging horses. When he won a second time the whole school was greatly excited, and Corbett's name was written among Rugby's heroes. After this, racing was popular, and a grand steeple chase was organized, for which there were seven entries. Dr. Arnold, however, decided that this sort

of thing had gone far enough. He sent for Corbett and told him that he had refrained from interfering in the two former races, because if he did both boys would have been expelled. He said that if this other steeple chase came off he would expel every boy who was present or who took part in it. Of course, it was abandoned. Dr. Arnold was a good sort of a man, though, for soon after there was a great national steeple chase near Rugby, and he allowed the entire school to go and see it.

Today Rugby is known as the most democratic school in England, and on this account it is the most American, so American boys would feel more at home there than at Eton or Winchester or other British schools. Boys at Rugby stand on an equal plane of respectability, and there are no earls or viscounts among them. They usually lead all other institutions in athletic sports, and Rugby football is famous the world over. Altogether, it is a wholesome, attractive place, but in spite of its history and traditions, I would rather be educated at an American school. It is hard to understand why some parents send their sons abroad to be educated, for the boys themselves are almost sure to have a hard

time. They will be snubbed in England for being too American, and when they get home again they will be snubbed because they're "quite English, you know." All authorities agree that a boy who expects to live and work in the United States has no business to attend school abroad, and that such a course is sure to be detrimental to his happiness and his success in life. The standards of living are very different in this country from what they are in England, and when the Rugby boy comes here he has to unlearn many things. Some American schools have adopted characteristics of Rugby and Eton, and find that they work very successfully. At Lawrenceville the fellows live in "houses" similar to those at Rugby, and each house is in charge of one or more masters. At Groton the boys of the sixth form have authority over the smaller ones, and at St. Paul's the boys are watched over with as much severity as are their English cousins. But as yet we have nothing to correspond to what are known as "public schools" in England, and perhaps it is just as well that our institutions should be typical of our great country, and not planned after foreign models.

Uncle Sam's Porto Rican Children

IN the island of Porto Rico, a land of perpetual summer, Uncle Sam has taken under his care more than 322,000 children of school age. School age in Porto Rico is from five to eighteen years, though not many of the island children attend school after they are fifteen years old. When Uncle Sam took possession of Porto Rico a few years ago he found that eighty per cent of the people on the island could not read or write. Only the well-to-do-people in the cities, and the wealthy planters thought of send-

But the children of Porto Rico still sing "Borinquen," and one of the principal cities is named Ponce after the man who wanted so to be a boy again that he lost his life in the attempt. The children of Porto Rico do not have fine modern schoolhouses. Houses originally built for storing coffee or sugar, or barracks intended as the quarters for soldiers, in fact any building that would do, has been pressed into service. Porto Rican schools are pretty noisy, as a rule. Under the old Spanish system

live in huts with thatched roofs, huddled in little villages amid groves of great towering palms. It is especially for the benefit of "the child whose home is a shack, whose world is a cocoanut tree, a banana grove and poverty," that the schools of Porto Rico have been established. Porto Rican children are especially fond of pictures. Heretofore they have lived a pictureless life. No picture papers were known in the island before Uncle Sam took charge and the children never even imagined such a thing as a picture book.

Now, greatly to their delight, thousands of pictures have been distributed for the decoration of the interior of the schoolhouses. In the interior of the roughest shack pictures are stuck up on the walls which the children have cut out of some illustrated publication.

The children in the rural districts are just beginning to wear shoes and stockings, something they never thought of in the old Spanish days, and such of them as are fortunate enough to possess these articles of apparel prize them almost as highly as they do pictures. So careful are they of their new and strange possessions that when they have walked a little way from the schoolhouse, after school, they sit down and take off their shoes and stockings and carry them home under their arms.

When a Porto Rican boy is fifteen years old he generally leaves school and goes to work on one of the plantations where they raise coffee, or on one of the estates where the cane grows from which they make sugar and the Porto Rico molasses which, very likely, you are eating on your buckwheat cakes these winter mornings.

The Paris-Vienna Automobile Race.

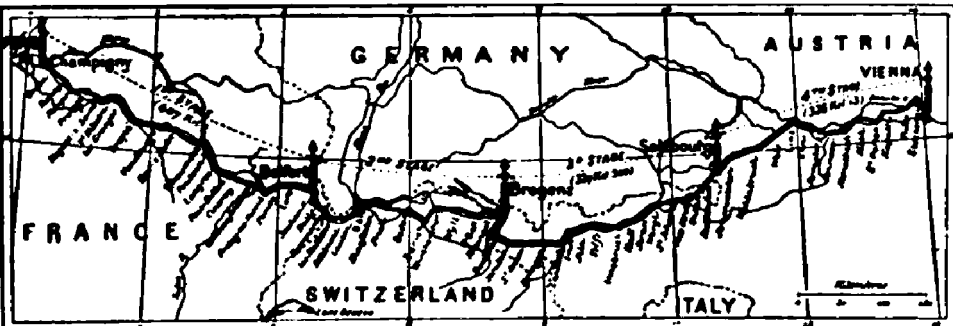

Boys will not fail to be interested in a short account of the great automobile race from Paris to Vienna, which took place last summer. It may be a little late to write an account of it, but it will not be uninteresting for that reason.

One hundred and thirty vehicles made the start over the route, which was 890 miles long and divided into four stages, one of which was to be covered each day. The best time was made by Renault in a

THE MEN AND THE MACHINE THAT WON THE BENNETT CUP.

machine of his own make which weighed about a thousand pounds. He completed the journey in fifteen hours and twenty two minutes actual running time, or an average of fifty one and one-fourth miles per hour, as fast as many of our express

The Route of the Paris-Vienna Race.

ing their children to school. There were a few schools, such as they were, scattered among the large towns, but in the villages and country districts there were no schools at all.

Uncle Sam is changing all that and this fall he opened in Porto Rico 1,200 schools, which began the school year with an attendance of more than fifty thousand pupils.

So now, every school-day morning, high up on the mountain sides, down in the fertile valleys and over the huts of the little villages and the whitewashed stone houses of the cities, rise American flags before a thousand schoolhouses.

Porto Rican children are fond of singing, and nearly all of them are good singers. They generally begin the school day by singing "The Star Spangled Banner," "My Country 'Tis of Thee," or "Hail Columbia," singing the English words, and following the American song with "Borinquen," sung in Spanish. "Borinquen" is the ancient name of Porto Rico, and the song bearing that name was to Porto Rico what "America" is to the United States. "Borinquen," or "Boriquen," means "the land of the valiant lord," and is what the natives called the island when Columbus discovered it on his second voyage to America.

The island was so beautiful with its fruits and flowers, its mountains and its streams, that Ponce de Leon, the same man who afterward discovered Florida, thought that he would certainly find there the fountain of perpetual youth. Captain Ponce, though a valiant soldier, was getting old, and believed, foolish man, that somewhere in the New World he would find a spring of water which would change him into a boy again. It is a singular fact that boys do not wish to be men half as badly as men wish to be boys.

Captain Ponce did not find the fountain of perpetual youth in Borinquen, and your history book will tell you that he afterward went seeking it in Florida and was killed there in a battle with the Indians.

trains. The roads traversed were some of the worst in Europe, and in the final stage of the journey they passed directly over the Altberg, a mountain five thousand feet in height. Additional interest was afforded by the fact that the race for the Gordon-Bennett cup was held at the same time over part of the route, or 383 miles. Mr. James Gordon-Bennett offered a cup for an annual international race, the cup to be held by the automobile club whose champion won the race. In this race the cup was won by S. F. Edge. At Vienna there were more than 20,000 persons assembled at the hippodrome to see the finish. Renault, as stated, won the prize of honor, which was offered by the Emperor Francis Joseph to the French racer who arrived first. President Loubet offered a similar prize to the first foreign chauffeur, and this fell to Count de Zborowski, an Austrian.

THE MEDICATED CROUP NECKLACE

OR AMULET is a simple and effective safeguard against that dreadful disease, CROUP.

The Original and Only Sure Preventive. It is worn next the skin, forming a medicated barrier and close protection to the Croup centre. The medication is absorbed into the system of the child, by contact or inhalation. It is used by adults having throat trouble. The Croup Necklaces or Amulets is endorsed by leading physicians, and is indispensable to every home. Send for circulars. Read our testimonials and order by mail a Medicated Amulet for Your Child. PRICE, 25 Cents.

MEDICATED CROUP NECKLACE CO., Goshen, Ind.

Ezy-fixt Towel Rack

A household necessity to every woman who values usefulness and neatness. 18 feet in length of arms, you can use one or all of the eight arms at once if you need, and fold those unused out of the way. The parts are of nickel-finished steel with polished hard wood arms. Express prepaid anywhere in the United States. One for \$1.25; two for \$2.35; three for \$3.40; four for \$4.40; five for \$5.00. THE GREAT AMERICAN

FOR MANLINESS IN MUSCLE

EVERY ENERGETIC AMERICAN BOY SHOULD BE A MEMBER

Company News.

PROF. F. B. WILLIS COMPANY, No. 3, Ada, O., holds its meetings on Tuesday evenings. On the evening of August 16 it held a social and lawn fete, clearing about five dollars, which is to be used for books for its library. The following is a copy of the poster:

SOCIAL AND LAWN FETE ON THE CAMPUS, SATURDAY EVE., AUG. 16, '02.
Under the auspices of the ORDER OF THE AMERICAN BOY. Ice Cream, Lemonade and Cake will be served at popular prices. Music by the band.
EVERYBODY IS INVITED

to attend. Come out and enjoy a social hour with your friends. We want your patronage and encouragement in a worthy cause.

THE PROF. F. B. WILLIS COMPANY, Division No. 3 of Ohio.

Prof. F. B. Willis, after whom the company is named, has presented to the Company a number of books for its library.—LITTLE BLUE COMPANY, No. 10, Fairbury, Neb., takes its name from the Little Blue river at that place.—WASHINGTON COMPANY, No. 15, Washington, Pa., has organized a football team with Fred Berthel as captain and Carl Duvall as manager.—GENERAL GEORGE ROGERS CLARK COMPANY, No. 18, Springfield, O., held its election of officers September 19, with the following result: William O'Brien was chosen Captain; Ned Wallace, Vice Captain; Carl Gephart, Treasurer, and Justus Hahn, Secretary.—JOHN BROWN COMPANY, No. 6, Paola, Kas., expects soon to organize a zobo band. It has a picture of "Old Abe" framed and hanging up in the club room.—THE BENGAL TIGER COMPANY, No. 10, Lisbon, Ia., will soon have a gymnasium and a library. Company dues, three cents a week, with a fine of three cents for the use of profane language or for using tobacco.—APOLLO COMPANY, No. 31, Yale, Mich., holds its meetings on Wednesday evenings. This Company has a library of over forty books.—JAMES LANE COMPANY, No. 8, Yates Center, Kas., is one of the prosperous companies of the Order. It has a baseball team and has played one game so far, the score standing 33 to 23 in favor of the O. A. B., "A very tight game, to be sure," the captain writes, "but then, we have only been organized about three weeks." It is also organizing a football team, and the captain says it expects to play and win before long.—CUBAN ATHLETIC CLUB COMPANY, No. 7, Cuba, N. Y., is very much interested in baseball. It did not go camping on account of bad weather.—VICTORIA COMPANY, No. 1, Watervliet, Mich., held its election of officers on Thursday evening, Sept. 26, with the following result: Captain, Claude Pelton; Vice Captain, Jonas McGowen, Secretary, Alram Randall; Treasurer, Sherwood Smith; Librarian, A. Frazee; Corresponding Secretary, Burr Baughman; Sergeant-at-Arms, Sebastian Smith.—JOHN HARRIS COMPANY, No. 10, Harrisburg, Pa., recently elected the following officers: Captain, Charles Meck; Secretary, James Shope; Treasurer, Paul Gottschall. This Company is about to complete an underground clubhouse at which it has been working for three months. It has also built an ingenious sail-wagon and a canoe, of which the Secretary promises to send us pictures soon. It holds its meetings from 7 to 9 p. m. From 7 to 8 the time is devoted to business, and from 8 to 9 the members play ping-pong and other interesting games, such as checkers, chess and crokinole.—RED STAR COMPANY, No. 12, Nappanee, Ind., holds its meetings on Fridays. Dues, five cents per week. It has the club room nicely fitted up and has had its charter framed.—U. S. GRANT COMPANY, No. 9, Eureka, Cal., holds its meetings on the first and third Thursdays and second and fourth Fridays of each month. Dues, ten cents per month. The members are fixing up a tank house for their club room, and have a library of about twenty two books.—WASHINGTON COMPANY, No. 15, Washington, Pa., has a strong football team. The captain says the members practice every day, and promises to send us a picture of the team.—GENERAL ALGER COMPANY, No. 32, Corunna, Mich., has uniforms of navy blue trimmed in white. It will also have a flag.—LONE STAR COMPANY, No. 1, Ennis, Tex., has not been holding its regular weekly meetings during the summer months, but meetings will be resumed the first of November. It has a nice gymnasium and a fine library of over seventy five books. This Company has a membership of thirteen, and they are all busy boys. The secretary writes, "We are all going to the World's Fair in St. Louis in 1904, if possible."—GOLIAD COMPANY, No. 11, Leonard, Tex., held its first meeting the evening of October 8, at which

The Order of The American Boy

A NATIONAL NON-SECRET SOCIETY FOR AMERICAN BOYS.

UNDER THE AUSPICES OF "THE AMERICAN BOY."

Object:—The Cultivation of Manliness in Muscle, Mind and Morals.

The object more definitely stated: To promote mutual and helpful friendships among boys; to give wider circulation to high class boy literature; to cultivate in boys physical, mental and moral courage, and develop them along social, intellectual and moral lines; to cultivate purity of language and actions; to discourage idleness, and encourage honest sport and honest work; to cherish and emulate the examples of great and good men; to inculcate lessons of patriotism and love of country; to prepare boys for good citizenship; to cultivate reverence for the founders of our country, and to stimulate boys to all worthy endeavor.

Boys desiring to Organize Companies may obtain a Pamphlet from us containing Directions. It is sent for a 2-cent stamp.

For Every Boy to Answer

BOYS! Please write answers to the following questions, numbering each answer, and mail to Wm. C. SPRAGUE, Editor, Majestic Bldg., Detroit, Mich.

This is for EVERY BOY who reads "The American Boy," whether a member of the O. A. B. or not.

1. Population of your town or city?
2. Number of churches?
3. Number of saloons?
4. About how many boys between 8 and 20 years of age?
5. How many boys' clubs, (not baseball or football, or the like), boys' societies, boys' organizations in your town? Don't count church societies where boys and girls both belong. Name them if you can?
6. How many churches have a special society or work for boys? Name the societies if you can?
7. Is there a town library with boys' books in it for boys to use?
8. Is there a library for boys in the town?
9. Is there a gymnasium open to boys in your town?
10. Is there reading rooms open to boys, furnishing boys' books and papers?
11. Is there a boys' literary or debating society or military company, open to boys generally?
12. What are the men and women of your town doing to provide boys with healthful amusement, and keep them employed in some interesting undertaking, to keep them off the streets and away from demoralizing influences, particularly through the winter?
13. Do the town authorities do anything for the boys in the way of furnishing a public park or playground where boys can have a good time unmolested, or in any other way to make boy life in your town better and happier and improve the morals of the community?
14. Does the town provide courts and a jail for boys who are bad?
15. Does the town spend any money to keep boys out of court and out of jail?
16. Does the town permit the saloons to violate the law to your injury?
17. Does it ever violate the law in doing anything to your advantage?
18. Will you give us the full names of any men or women in your town who are trying to do something for the boys of the town?
19. Will you give us the full names of any men or women who would try to do something for the boys if they knew how and thought they had the chance?
20. Will you help us interest some one or more persons in your town to do something for the boys of your town? If you will, you may hear from us again.

We Want More Companies and Bigger Companies.

We want every reader of THE AMERICAN BOY to go out and make an effort to interest five or more boys in the organizing of a Company. We have just issued a new pamphlet telling all about the Order. You can get it by sending us a two-cent stamp. Three hundred Companies is just a start; we want three thousand. With a live Company of boys in every American town, what may we not do for the town and for the boys?

American Boy Libraries.

We have ready for shipment to any Company that wants it a library of five standard books for boys. The Company may have the use of it for a reasonable time by sending us fifty cents and paying the expressage one way. We have many of these libraries, and we guarantee them to be first-class, high-toned books for boys.

St. Ignace, Mich., April 21, 1902.
Dear Sir—I received Library No. 6, and I think I have never read better books.
Yours truly,
PERCY BROWN,
Librarian Pere Marquette Company, No. 1.

Company News.

(Continued.)

time the following officers were elected: Captain, C. P. Dodson; Secretary, Malcolm McLarry; Treasurer, R. T. Shiels.—JAMES LANE COMPANY, No. 8, Yates Center, Kas., had a baseball team last summer and now has a football team. It has a club room under one of the banks, and boxing gloves, punching bag, and fencing foils and masks. The dues are five cents a week.—TEXAS PANHANDLE COMPANY, No. 10, Quanah, Tex., is organizing a football team. It has a fine library, the books having been contributed by the various members of the Company. It hopes soon to have money enough in its treasury to buy a punching bag.—BENJAMIN HARRISON COMPANY, No. 20, Canton, O., recently elected officers for the six months commencing October 1, as follows: Captain, Robert Cordray; Vice Captain, Norville Griffin; Secretary, Harrison Lautzenheller; Treasurer, Charles Fiala; and Librarian, Ernest Fiala.—GEORGE A. CUSTER COMPANY, No. 1, Big Stone, So. Dak., resumed its meetings the last week in September. The following are its officers: Captain, George Puder; Vice Captain, Paul Trapp; Secretary, Walter Oehler; Treasurer, Lee Gold. This Company has about \$4.50 in its treasury and will soon have a library. It is planning for an oyster supper, the proceeds of which will go into the treasury. Its colors are red and yellow. A fine of one cent has been imposed for disorderly conduct during meetings, and a fine of five cents for using profane language.—ROOSEVELT COMPANY, No. 4, Pueblo, Colo., holds its meetings every Saturday afternoon at the home of the Captain.—GENERAL SAM HOUSTON COMPANY, No. 2, Comanche, Tex., expects soon to have a gymnasium. This Company held an interesting meeting on the afternoon of October 10. It played a game of football, after which a fine literary program was rendered, papers on the Lives of Lincoln, Franklin and Jefferson being features.—STEPHEN F. AUSTIN COMPANY, No. 9, Ennis, Tex., has rented a club room and has a fine library of sixty books.—GEORGE D. ROBINSON COMPANY, No. 6, Chicopee, Mass., has a nice club room and recently had its charter framed. The members have been taking fencing lessons.—RIVER VIEW COMPANY, No. 1, Rio Vista, Cal., recently added eight new books to its library.—THE BENGAL TIGER COMPANY, No. 10, Lisbon, Ia., has at this writing nine members, all of whom, the Captain says, are good, honest and upright boys. Meetings are held in turn at the homes of the various members on Monday evenings. This Company has a fine gymnasium and is adding improvements to it from time to time. Company dues are three cents, and the same amount is imposed for fines. At the meetings the strictest order prevails. This Company visits its sick members. It has a nice little sum in its treasury and is out of debt, "and," the Captain writes, "that we are proud is no name for it." It will soon have its charter framed. The Captain promises us a picture of the Company as soon as it gets a little more money in its treasury.—MILLBURY COMPANY, No. 10, Millbury, Mass., has rented a small cottage for a club room, paying \$2.50 per month rent. This Company has a wrestling mat, dumb bells, boxing gloves, etc. Dues, five cents per week. It has one officer whose business it is to impose fines, etc. A fine of one cent is imposed for the use of profane language.—GENERAL ALGER COMPANY, No. 32, Corunna, Mich., holds its meetings on Friday evenings in a bar at the Captain's home. The room is carpeted and has a stove in it, and is decorated with bunting and flags. On the day the Company received its charter a furniture dealer framed it, free of charge, in order to help the boys. The members made a writing desk like the one described in the August number of THE AMERICAN BOY and have it in their club room.—GEORGE W. STEELE COMPANY, No. 6, Swayzee, Ind., recently had the pleasure of listening to a lecture by Mr. McKeever, the proceeds of which went into the Company treasury. On account of bad weather the attendance was small, the Company netting about \$3.50.—JOHN BROWN COMPANY, No. 6, Paola, Kas., recently elected the following officers: Captain, Damon Walthall; Secretary, Lyle Beard; Sergeant-at-Arms, Harry Pieker. This Company has two rooms in the rear of Dr. Walthall's office. Meetings are held every other Wednesday evening at 7 o'clock. Ex-Captain George E. Quimby writes that the Company has only been able to take part in one Field Day contest on account of the bad weather. He promises us a picture of the Company and club room.

E, MIND AND MORALS

MEMBER OF "THE ORDER OF THE AMERICAN BOY."

O. A. B. Pennant

AMERICAN BOY TOWN MEETING.

Program of Exercises for Companies of the Order of the American Boy for January 24, 1903.

Every boy is or should be interested in the welfare of his town. He should do what he can to make and keep it clean, attractive, healthful and prosperous. Too few grown up people give this matter proper attention and study. Perhaps your town needs waking up on this subject. Perhaps the boys are the ones to do the waking. At least boys ought to be preparing themselves for intelligent, useful citizenship, and this is one important step in the preparation. The subject of this meeting is really: OUR TOWN—WHAT CAN WE DO TO IMPROVE IT?

Divide the subject up into parts, assigning each part to a member. All boys not on the program should keep their eyes and ears open and study the whole subject so as to be ready to debate every phase of it. Talk to your parents, your grown-up acquaintances, the Mayor and Aldermen, or Councilmen, and particularly to the school teachers and editors of the town papers. The editors will jump right in and help you by notices and comment in their columns. Invite everybody to attend the meeting. You will find you have stirred up a mighty interest. Addresses should be by members and should not exceed in length ten minutes.

PROGRAM.

1. Call to order and salute to the flag.
2. If there is business to be done, follow order given in the O. A. B. pamphlet. If not, or if you wish to dispense with business for the evening, pass to
3. Statement by the Captain as to the object of the meeting and the manner of treating the subject (by short addresses and debate).
4. Address—Subject: A CLEAN TOWN. (Tell about the condition of the streets and alleys, front and backyards. Do the merchants sweep their refuse into the streets? Do the citizens empty their ashes and garbage into the streets and alleys? Suppose you had taken a walk through the town, tell what you saw in the way of cleanliness and its opposite. Then offer the following resolution: "Resolved, That our town is as clean as it ought to be.")
5. Ten minute debate on this resolution and vote on it.
6. Address—Subject: A BEAUTIFUL TOWN. (Point out the unsightly features of the town, the muddy streets, broken sidewalks, unpainted houses, untrimmed trees, lack of shade trees, neglect of public park or grounds or public buildings, neglect of lawns and fences, the letting of animals to run loose in the streets, the lack of spirit of pride in the town, etc., etc. Then offer the following resolution: "Resolved, That our town is as beautiful as we can make it.")
7. Ten minute debate on this resolution and vote on it.
8. Address—Subject: AN INTELLECTUAL TOWN. (Tell what it has and has not to interest and instruct the people: A lecture course, public library, literary societies, clubs for boys and girls, musical societies, churches, schools, etc., etc. Then offer this resolution: "Resolved, That the people of this town are well provided with everything necessary to make an intelligent, up-to-date, modern American town.")
9. Ten minute debate on this resolution and vote on it.
10. Address—Subject: A MORAL TOWN. (Tell all you can about the kind of men who run its affairs, drinking, gambling and bad literature in your town, enticements held out to young men and young women on the streets at night, what is being done by churches and good people to counteract these influences. Is the law enforced? Then

Rank of Individual and Company Members

NOTE:—An INDIVIDUAL MEMBER is one who does not belong to a Company. A COMPANY MEMBER is a member who belongs to a Company. An HONOR MEMBER is a member who has had his name on The American Boy Roll of Honor.

Every Member of a Company (excepting an Officer) is a	FIRST DEGREE MEMBER
Every Officer of a Company (Captain, Secretary, etc.) is a	SECOND DEGREE MEMBER
Every Member (Individual or Company Member) who sends us One New Subscription is a . . .	THIRD DEGREE MEMBER
Every Member " " " Two New Subscriptions is a . . .	FOURTH DEGREE MEMBER
Every Member " " " Three New Subscriptions is a . .	FIFTH DEGREE MEMBER
Every Member " " " Five New Subscriptions is a . . .	SIXTH DEGREE MEMBER
Every Member " " " Ten New Subscriptions is a . . .	SEVENTH DEGREE MEMBER
Every Member " " " Twenty-five New Subscriptions is a	EIGHTH DEGREE MEMBER
Every Member " " " Thirty-five New Subscriptions is a	NINTH DEGREE MEMBER
Every Member " " " Fifty New Subscriptions is a . . .	TENTH DEGREE MEMBER

Members need not send all subscriptions at once. Every time you send sufficient new subscriptions you will receive promotion. We pay CASH commissions on the subscriptions or give PREMIUMS if you prefer, (see our Premium List sent you) and we furnish to you free PRIVATE STAMPS and a BADGE showing your rank. In addition, a Tenth Degree Member receives THE AMERICAN BOY free DURING HIS LIFE; a Ninth Degree Member receives it for TEN YEARS and the Eighth Degree for FIVE YEARS.

WILLIAM MCKINLEY COMPANY, No. 20, MARISSA, ILL. One of the Companies of the younger boys of the Order.

Twelve Great Days.

We are planning programs for individual members and Companies of THE ORDER OF THE AMERICAN BOY to enable them to celebrate twelve great days in 1903. The days are as follows:

- January 24—AMERICAN BOY TOWN MEETING.
- February 21—AMERICAN BOY LIBERTY DAY.
- March 21—AMERICAN BOY INDIAN FESTIVAL.
- April 25—AMERICAN BOY GRAND RALLY.
- May 23—AMERICAN BOY TREE PLANTING.
- June 20—AMERICAN BOY FAIR.
- July 4—AMERICAN BOY INDEPENDENCE DAY.
- August 22—AMERICAN BOY CAMP FIRE AND CORN ROAST.
- September 19—AMERICAN BOY FIELD DAY.
- October 31—AMERICAN BOY HALLOWEEN.
- November 28—AMERICAN BOY CONGRESS.
- December 19—AMERICAN BOY ANNUAL BANQUET, PUBLIC MEETING AND ADDRESS.

Every member, whether an Individual or Company member, will look forward to these days as red letter days for 1903.

offer this resolution: "Resolved, That this town is as moral a town as it should be."

11. Ten minute debate and vote on it.
 12. Address by the Captain or by some other member or by some good citizen (man or woman) on HOW OUR BOYS MAY HELP MAKE THIS TOWN WHAT IT SHOULD BE.
 13. Remarks by visitors.
 14. Let the Captain offer this resolution and put it to vote with or without debate: "Resolved, That we, the members of _____ Company, No. _____, Order of The American Boy, do hereby pledge ourselves to do everything in our power and, so far as we know how, to make our town, so long as we live in it, a clean, beautiful, intellectual and moral town, and that we urge on the town authorities and the citizens of the town to join us in making this town a model, progressive American town." (Have this resolution, after being signed by the members, printed in your town papers and send a copy to the Mayor.)
 15. Closing exercises as in regular order of business.
- Note 1.—The program may be enlivened by singing or instrumental music.
Note 2.—Members who are individual members, that is, not members of Companies, are asked to study the subject with reference to their own towns, and

on January 24th write us a 500-word essay on the characteristics of their home towns. The best essay received by February 10th from a boy under ten years of age will entitle its writer to a \$3 prize. The next best, a \$1 prize; for the best essay from a boy over ten a prize of \$3, next best \$1. Boys in Companies are not to compete.

Notice to Officers.

Every Company Captain (or Secretary) is hereby requested to send us the names of the officers and active members of his Company, with their street addresses, so that we can promptly send them degree attachments for their O. A. B. badges.

Interest Your Fathers and Mothers.

Let every member of the Order tell his grown-up friends about THE AMERICAN BOY TOWN MEETING for January 24, so that they may help plan for it. After the meetings is over we shall expect every Company Captain (or Secretary) to tell us about it.

New Companies Organized Between Oct. 15 and Nov. 25.

Old Comfort Company, No. 33, Division of Michigan, Jackson, Mich., Captain Max Loomis.—Little Giant Company, No. 34, Division of Michigan, Carney, Mich., Captain Glenn Craney.—Fliekertall Company, No. 6, Division of North Dakota, Devil's Lake, N. D., Captain Harlan R. Fancher.—William McKinley Company, No. 11, Division of Iowa, Des Moines, Ia., Captain Laurence Lane.—Santa Lucia Company, No. 10, Division of California, San Luis Obispo, Cal., Captain Thomas H. Hourihan.—William T. Sherman Company, No. 24, Division of Ohio, Lancaster, O., Captain Herbert Mattox.—Sheridan Company, No. 21, Division of Illinois, Chicago, Ill., Captain Arno Grauel.—Coyote Company, No. 12, Division of Iowa, Cherokee, Ia., Captain Ronald M. Maynard.—"Star of the West" Company, No. 4, Division of Oregon, Elgin, Ore., Captain Elmer Thomas.—General George A. Custer Company, No. 22, Division of Illinois, Freeport, Ill., Captain Wesley Eiseman.—Crockett Company, No. 25, Division of Ohio, Jackson, O., Captain Donald Jones.—Bay Ridge Company, No. 19, Division of New York, Brooklyn, N. Y., Captain Frank H. Waring.—Cahokia Company, No. 23, Division of Illinois, Edwardsville, Ill., Captain Milton Harnist.

Whole number of Companies to Nov. 25th is 272.

Indianapolis

THE Indianapolis News Association of Carriers has been attracting much attention on account of the part it has taken in raising a popular subscription for the purpose of purchasing the Arsenal site in Indianapolis as a location for a National Technical Institute.

The endowers of the school offered to locate it in Indianapolis in case the Arsenal grounds and buildings were donated by the city as a site for the school. The United States Government proposed to sell the property for about \$150,000, and with this sum to buy ground near Indianapolis for an army post.

The movement started off with two \$10,000 pledges and these were followed by large subscriptions of varying amounts until \$90,000 was reached, then the fund stood still for several days and it was seen that it would be necessary to raise at least a part of the amount in small subscriptions.

The carriers of The Indianapolis News, stirred with the thought that they might, as an association, be able to help the city secure the institute and the post, and seeing the opportunity which this school would offer to every boy to become an expert along some practical line, offered to make a canvass for popular subscriptions.

A plan of action was carefully mapped out and an announcement was made by the carriers that they would, on a certain Friday, insert in each copy of the paper delivered a blank pledge, and that on Saturday the pledges would be called for. This plan was carried out except that the boys found that one day was not sufficient for gathering in all possible pledges. Sunday morning found the carriers all over the city asking for an offering.

The substations all day Sunday had the appearance of political headquarters on election day. "How is it going?" was the question asked of each new arrival. The boys regarded the movement as a patriotic one, and did not look upon the Sunday effort as one either of work or play. On Sunday afternoon the carriers at one of the stations met and discussed the situation, going over what had been done to see if any one had passed by an opportunity. It was discovered that one carrier had grown discouraged at the first "turn down" and had not asked his other customers for a pledge. This discovery sent a shock through the meeting. One boy went on a run for the substitute carrier of the neglected route, found him in Sunday school, stated the case to his teacher, secured his release and hurried back with him to the station. With the "sub" as a pilot, a committee of carriers was soon going over the route. Monday morning the carriers were unwilling to close the canvass and declined to make a final report until the end of the week, when over \$3,300 in pledges, from five cents up— but mostly for one dollar—were turned over to the canvassing committee.

The effort put forth by the boys so stirred up the people generally that the \$100,000 mark was reached, and a pledge of \$25,000, which was not to materialize until \$100,000 should be raised, was added to the list, leaving \$25,000 to be secured. This amount was taken care of by men of means.

When this great national technical school is located in Indianapolis, the effort of no one to secure it will be more highly regarded than that of these News carriers. The boys not only gave their time to the movement, but subscribed liberally, the subscriptions of the boys at one station, which was modestly reported as the "Carriers of Station D," amounted to an average of almost one dollar a carrier.

The carriers of The Indianapolis News, in Indianapolis, have a strong organization which is made up of substation and suburban carriers to the number of one thousand. Each section has a separate organization and is known as station "A," "B," "C," etc., the youngest station being known as "H." At the "Central Station," located in the building where the News is printed, is a gymnasium which is the home of an athletic organization that came into existence two years ago and which is known as the News Athletic Association. At the opening of the fall season certain nights are set apart for each station in the "gym" and on these nights the room is open only to the carriers from the station to which the schedule shows the gymnasium belongs. These nights are not spent in horseplay, but in work, for the association boys are always looking forward to some meet.

Last winter a basket ball league of ten clubs held sway, and so close was the finish that the pennant was not won until the last half of the last game had been played. The interest aroused over the result of this last game was so intense that it was seen that even the large Y. M. C. A. gymnasium, in which the last two games had been played, would not hold the spectators so that Tomlinson Hall, the great convention hall of Indianapolis, was secured, and in its center the field was laid out. Row after row of seats surrounded the field, special chairs filled the stage, and even the upper gallery, situated high above the great balcony, was thrown open to the public, but when the referee's whistle blew and the ball rose over the heads of the center men, not a seat was vacant and standing room was at a premium. It was the biggest crowd that ever witnessed a game of basket ball in the state of Indiana.

From the star players of this league an "all star" team was organized, which played a number of brilliant games with teams outside the league, finishing the season by defeating the "Greenfield, Indiana, Stars," a team that had never been

STATION D TRACK TEAM—PENNANT WINNERS NEWS FIELD DAY, 1902.

beaten and which held the championship of eastern Indiana for teams of its class.

A big field day and picnic was held by the News last June for all of its Indianapolis boys. Special electric cars ran through from the substations to Fairview Park, seven miles from the city. These cars were so timed that they arrived on the park line about a minute apart, and, headed by their own band of forty five pieces, the boys in one long procession went whizzing through the heart of the city and out to the park. A printed invitation had been extended by the carriers to each subscriber to bring his family and dinner basket and spend the day with the association. This invitation was accepted by a great number of the boys' friends, who came wearing the station colors of their carriers. The day before, each carrier and seller, received a ticket with seven coupons calling for peanuts, popcorn, pop and merry-go-round rides.

The paper opened headquarters for the day in one of the buildings on the grounds, providing a dressing room for those who took part in the athletic events, a check room for lunch baskets, an emergency hospital in charge of a surgeon, and a refreshment booth where all the coupons except the ones calling for rides on the merry-go-round were redeemed.

The entries in the athletic events were so numerous that it was found necessary to run most of the events in heats and finals and some even in great finals. Prizes were given to those winning first place. The station winning the Station Relay

Race received a silver cup and the station securing the greatest number of points, a pennant, while the carrier securing the greatest number of points received a gold "all-round" medal.

It has been the policy of the paper in the past to give a banquet on Thanksgiving to its city circulation forces. Last year over one thousand covers were laid. This year a change was made—turkey lunch was served in the News restaurant to any carrier or seller who dropped in, and a monster vaudeville entertainment made up of high class acts, to which each carrier received three reserved seat tickets, was given at night.

On the staff of the paper is carried a "Musical Director," whose sole duty is to direct "The Indianapolis News Newsboys' Band." The band, which is limited to those actually carrying or selling the paper, was organized two years and a half ago, and made its first appearance at the Indiana State Fair in September, 1900. Hundreds of applications were received for admission to the band. Each application was carefully gone over and about one hundred and fifty boys were notified to report for examination; from this number the original band was recruited. Then came days and nights of hard work, and thus there has come forth a brass band of forty five pieces that does not take second place with any juvenile band in the country.

The band has played all over Indiana and has requests for many times the number of engagements it is able to fill. The en-

Newsboys

tire expense of the band, including instruction, music, instruments and uniforms, is taken care of by the News.

A second band, composed of boys in waiting, is ever ready to fill any vacancy in the organization, but the vacancies are few and far between, and always due to some cause beyond the control of the boy, for the band boys would rather give up Christmas and birthdays than the band.

The Indianapolis News claims that its carriers average several grades higher than the ordinary boy. The cause for this is that the policy of the paper is to have no dealings with boys who do not realize that carrying the paper is just as much a part of the business as printing it—this brings together a good class of carriers to start with. Then each carrier is required to carry on the affairs of his route in a systematic manner, and if mistakes are made by the boys, they are sure to get a letter from the office pointing out the error. Thus these young men and boys secure an early business training. A remarkable thing about these carriers is that while about nine hundred of them own their own routes, and are not restricted to any certain section of the city, in many cases eight or ten carriers operating on the same square, there prevails the best of good feeling, and few are the carriers who would think of "cutting in" on another's list of customers.

In no other line of business is the competition so close nor the relations of those competing so friendly. An active campaign for new customers is kept up at all times, the carriers urging themselves on for a three-fold cause: First, because every new customer increases the value of the route and the weekly profits; second, because the carriers are loyal to their own station and watch its growth with joy; and last, but hardly least, because every one connected with the city circulation has set his mind on reaching a paid circulation of 40,000 in the city of Indianapolis alone. This effort to reach 40,000 was launched with a shout at the banquet on last Thanksgiving Day, and has been the goal toward which every carrier has worked during the past year.

The News conducts a "Savings Department" for the benefit of its carriers and sellers, receiving deposits from one cent up and paying interest semi-annually on time deposits. Steel banks, to which the News holds the key, are issued to those who desire them and who have at least fifty cents on deposit. These banks, which hold safe against all temptations any money once dropped within their walls, are usually brought to the office of the Savings Department in the News building once a month, and the contents deposited. A pass book is issued to each depositor and the department is in every way carried on under the same rules as the Savings Department of any Trust Company. The deposits at the present time amount to over sixteen hundred dollars.

Shorthand in Ten Easy Lessons

ISAAC PITMAN'S SYSTEM

TWENTIETH CENTURY REVISION

By special arrangement with Isaac Pitman & Sons, 33

Union Square, N. Y.

ISAAC PITMAN. (The Inventor of Phonography.)

LESSON V.—UPWARD AND DOWNWARD L AND R.

As a thorough knowledge of the alphabet is essential to the student, the same should be written out from twenty-five to fifty times every day until the student is perfectly familiar with the various signs.

Concerning the upward and downward writing of *r* and *l*, we find on page 23 of the "Teacher" that "when *r* is the first or only consonant in a word, it is written downward if preceded by a vowel, and upward if not preceded by a vowel," as *r*, *arr*, *rake*.

There are many hundreds of words in our language in which *r* is the first consonant, and it is either preceded or followed by a vowel. By this rule it is known by the shorthand form of a word that if it is written with *r*, there is a vowel before *r*, as *ark* or *arm*; and that if it is written with *r*, a vowel follows *r* as *read* (past tense) or *ready*.

But there are about a dozen words, mostly of rare occurrence, in which the observance of the

rule would produce inconvenient outlines. In these cases we disregard the rule, and write the word in the easiest way. Therefore in any case where the downward *r* presents an awkward or inconvenient outline or joining, substitute the upward *r*.

When *r* is the last consonant in a word it is written downward when it is the final sound, and upward if a vowel follows, as *car*, *carry*. The upward *r* is always written after a single straight upstroke. The final *r* is also written upward, for the sake of ease in writing in such words as *answer*.

In words that contain three or more stroke consonants, and also when the use of the downward *r* would carry the hand more than one stroke below the line, the final *r* is generally written upward.

When *r* is preceded and followed by a vowel, there being no other consonant in the word, you should use the downward *r*, as *arrow*. Do not overlook the fact, however, that the circle *r* or a loop changes this; thus, *story*.

Initial *l* before either of the horizontal consonants (*h*, *g*, *m*, *sp*, *n*, *ng*), not hooked initially, is written upward if it is the first sound in the word, and downward if a vowel precedes; as *like*, *alike*. In other cases it is generally written upward.

Final *l* is generally written upward; but after *f*, *r*, *kw*, *sk*, and the up-strokes *r*, *w*, *y*, *h*, it is written upward if followed by a vowel, and downward if it is the last sound of the word. After *n*, *ng* it is generally written downward.

Examples: *full*, *fully*, *yellow*, *only*, *annual*.

As you are already aware, the consonant *sh* when standing alone is written downward, and when joined to another consonant is capable of being written either upward or downward. A few hints as to the proper use of this consonant may not come amiss in this lesson. You will find that *sh*, like the *shon* hook, is generally written on the opposite side to that on which a preceding circle or hook occurs; as, *plush*, *brush*; but after a horizontal character the *sh* is most conveniently written downwards; as *cash*.

After the upward *l* standing alone or preceded by a horizontal consonant *sh* is written downwards, as *lask*. When *l* is preceded by *p* or *b*, *l* is written upward. *Sh* is written upward after downward *l*; also upward initially, as *English*, *sugar*.

When *l* is written down or *sh* up, the vowels' places are reckoned accordingly.

Work for this month to end of Exercise 40.

Those of our readers who are desirous of taking up this valuable course of shorthand lessons can do so by purchasing the "Phonographic Teacher," "Key to Phonographic Teacher," and six "Phonographic Exercise Books." These works will be sent postpaid by Isaac Pitman & Sons, 33 Union Square, New York, to any address on receipt of one dollar.

nice picture, with just about the right stop used, the right timing, development and printing. R. W. Von Niede, Ephrata, Pa., sends a "race" between a bicycle built for seven," and another "built for nine;" that is, it looks like it. As a matter of fact there are only two ordinary bicycles in the picture, the placing of the "riders" making the illusion. It is certainly a fine piece of photographic work.

The Boy Photographer

Edited by Judson Grenell

THE AMERICAN BOY offers twelve prizes of Two Dollars each for the best Amateur Photograph received during the twelve months in the year, one prize for each month, also a second prize each month, of one dollar, for the next best photograph, the competition to be based upon the originality of the subject and the perfection of the photograph. The contest is open to subscribers only. Photographs will be returned if stamps are sent for the purpose. All photographs entered in the contest and not prize winners will be subject to our use unless otherwise directed by the sender, and fifty cents will be paid for each photograph that may be used, the prize photographs in any event to be our own, without further payment than the payment of the prizes. Write on the back of the photograph its title, with a description of the picture, and the full name and address of the contestant, who in every case must be the artist who took the picture.

Baker, Urbana, Ohio, sent a very delicate and artistic picture of sheep, with a sharp foreground, a clear middle distance and a hazy horizon. "A Woodland Scene," by Richard F. Rome, Victoria, B. C., showing a road through the woods, with the shadows falling across the pathway, cannot be excelled for clearness. And "The Old House by the Cliff," by Homer Ross, Jamestown, is a lovely bit of rural scenery. Among the groups is one by Foster E. Cohen, Madison, Ga., and another by Edward H. Ray, Newburgh, N. Y. The funny thing about these is that the southern picture is of white children, while the northern one is of colored kids, with one exception. Both, however, are good pictures. J. C. Watson, Malvern, Ia., sends an agricultural scene, that of a man cutting grain with the old-fashioned scythe, and he has appropriately entitled it, "By the Sweat of Thy Brow Shalt Thou Eat Bread." "Fighting the Fire," by H. K. Scranton, East Orange, N. J., is a realistic scene, and considering the difficulties encountered in taking fire pictures it is very good. Ira Fisher's "After the Storm," and J. R. Fox's water scene are worthy of mention. E. G. Nye's picture might be called "Fishing for Bass," as the fisherman shown had just landed a three pound fish.

FIRST PRIZE PHOTO. By R. W. VonNiede, Ephrata, Pa.

There are only two single wheels in this picture. The effect is produced by a number of persons standing in line on an inclined plane.

Favors With Comments. October was not as productive of the very best pictures as have been some others. Perhaps the opening of school has something to do with this. But anyway among the scores received were a few of more than ordinary merit. Margery

These Are Excellent. "Nature's Production," a picturesque scene, by Frank Key, Wilmerding, Pa., shows a stream among the hills, with a small boy in the foreground getting a drink by making a cup of his hands. Printed in platinum it would be an ornament to the walls of the best room in the house. Brice Dick, Liberty, Neb., sends a picture of three boys camping. They are evidently having a good time, though there might be improvement in the attitude of the youngsters. J. N. McCurdy, Bucyrus, O., has something cute in the picture of a boy, a homemade two-wheeled cart and a dog dragging the outfit. Cows on a side hill, as photographed by John S. Broughton, Waterbury, Conn., is beautiful, but perhaps there is a little too much foreground for the best effect. The "Hollow Elm Tree," taken by Paul Grau, Bowling Green, Mo., hints at all sorts of game hidden within the recesses of the tree. A homely yet effective picture is Don R. Baker's "Mountain Road," probably taken near his home in Dayton, Washington. It shows a wooden bridge for a foreground, and beyond rise the majestic mountains. Walter Sauer's water scene, Milwaukee, Wis., shows just about the right timing, though the subject is not particularly artistic. However, it is a good picture, but can be improved by cutting away half of the foreground and some of the sky. Charles C. Hammond sends a picture of a little girl with her baby carriage and doll baby, a boy and a goat. The goat and the doll baby are not concerned about the photographer making the snap, but the children are a little too self-conscious. Yet it is a

Answers to Correspondents.

Willie V. Watson—Write to E. & H. T. Anthony, 122 Fifth Avenue, New York, for their list of publications on photography.

Reginald Boyd—Let the negative soak in water a little while before using an intensifying or a reducing solution. The directions accompanying the solution are sufficient to attain success, if rigidly followed.

Greeley Ackerman—The hypo for fixing sollo and similar prints should consist of one ounce of hypo to twenty ounces of water. The prints will fix in fifteen minutes. For velox prints use one ounce hypo to four ounces water.

Edwin Buzzell—Spots on prints show that the toning solution failed to flow over the surface of the paper; or, there was dust between the paper and the negative when printing; or the hypo may have dropped on the prints. It is not so easy to trace a defect unless one knows just what was done or left undone. Light spots on velox prints are caused by air bubbles between the developer and the print. This can be prevented by rubbing the face of the print, during development, with a small piece of absorbent cotton.

SECOND PRIZE PHOTO. By Bruce Dick, Liberty, Nebraska.

No Use for Them at Present. G. P. Stephens, one of our friends, who resides at Bass, Ky., writes: "I am an amateur photographer. I have come across a couple of rare objects, one a tailless calf six months old, born without any tail, and the other an old lady who has passed the 107th mark. Could you use either or both of them? If so, what would they be worth to you?"

ENGINEERING
OFFERS GREAT OPPORTUNITIES TO BOYS.
Main Bldg., Armour Inst.
THE AMERICAN SCHOOL OF CORRESPONDENCE
Offers Correspondence Courses in Electrical, Mechanical, Locomotive, Stationary, Marine and Sanitary Engineering, Navigation, Architecture, Mechanical and Perspective Drawing, Sheet Metal Work, Textile Manufacturing. Also 40 Short Special Engineering Courses.

Instruction Under Members of Faculty of ARMOUR INSTITUTE OF TECHNOLOGY.

Students are under the instruction of the very men who preside over the Laboratories and teach the classes of the Armour Institute of Technology. All work, therefore, will receive full credit toward resident work at Armour Institute should the student at any time continue his studies there.

FOR EXAMPLE: Parts 1-6 of the work on Mechanical Drawing mastered under these auspices will be accepted as entrance preparation on that subject to the College of Engineering.

As a help in their studies, all students in full Engineering Courses are furnished a Technical Reference Library (in ten volumes) in addition to the regular instruction books.

Catalogue sent upon request.

The American Boy Roll of Honor for 1902

THESE BOYS HAVE EARNED DISTINCTION BY THEIR HEROISM
OR THEIR GOOD WORK IN SOME PRAISEWORTHY DIRECTION

EDISON CURRY, age 13, DeLand, Fla. Saved a life May 14.
PAUL ROSS, Cato, N. Y. Saved his brother from drowning.
ROY K. BENNER, Hazleton, Pa. Excellence in school work.
WALTER B. NISSELY, Florin, Pa. Excellence in school work.
SOLOMON H. RHODES, Irwindale, Cal. Excellence in school work.
LORENZO MOSHEIM, Seguin, Tex. Excellence in school work.
ARTHUR MOSER, age 10, Hooper, Colo. Excellence in school work.
BENJAMIN HARRISON, Normal, Ill. Excellence in school work.
ERNEST LEROY, age 11, Trenton, N. J. Excellence in school work.
KENNETH MOORE, age 10, Baltimore, Md. Excellence in school work.
JESSE BAXTER, age 17, Guthrie, Okla. Perfect record in school attendance.
HAROLD HARTSOUGH, age 11, Cleveland, O. Excellence in school work.
RAYMOND CLARK, age 15, Chicago, Ill. Saved the life of a little girl in a runaway.
ARCHIE KAY, age 7, New York City. Saved the life of a playmate January 17th.
DONALD RIGG, age 10, Kidder, Mo. Sacrifice for others. High standing in school.
JAMES HORTON, Philadelphia. Saved lives by stopping a runaway horse, January 2d.
OSCAR BELA, Chicago, Ill. As elevator boy, saved the lives of many people, January 18th.
EDWARD O'DEA, age 14, Buffalo, N. Y. Medal winner in school work and excellence in athletics.
JAMES SHEA, age 14, Philadelphia, Pa. Heroic attempt to save the life of a drowning playmate, July 7.
HARRY BROOKS, age 14, Hinton, Ky. Successfully passed the teachers' examination at Cynthiana, Ky.
STURLEY CUTHBERT WOLFF, age 13, St. Louis, Mo. Remarkable intelligence and enterprise in school work and in money making.
BERNARD HAWTHORNE, age 15, Timpson, Tex. Getting a first grade teacher's certificate for four years at age of fifteen, and at the same age head book-keeper and assistant cashier in the Cotton Belt Bank at Timpson.

CHARLEY ROACH, Lisbon, Ia. Excellence in school work.
HAROLD STONE, Hazelton, Pa. Excellence in school work.
FRANK M. FIELD, Mason, Mich. Excellence in school work.
JOHN CLAY, age 14, Williamston, Ky. Excellence in school work.
THOMAS VESTAL, Eagle Point, Ore. Excellence in school work.
SETH N. HART, age 14, Otho, Ia. Has never been tardy at school.
E. L. PARKER, Marshalltown, Ia. Saving a young lady from drowning.
RODDY MURCHISON, age 16, Terry, Mont. Rescuing a baby from drowning.
GLEN B. CLIFFELL, age 16, Colon, Mich. Bravery in attempting to save life.
JAMES BLACK, Greensburg, Ind. Has not been absent from school a day in five years.
EDWARD MAHER, age 12, Williamsburg, N. Y. Saved his brother from drowning at the risk of his own life.
BEN O. WILKINS, age 15, Port Chester, N. Y. Attended school for eight years without missing a day.
J. DE VOE WILKINS, age 12, Port Chester, N. Y. Attended school for five years without missing a day.
VINCENT E. DAILEY, Albany, N. Y. Excellence in school work and effective work in athletics and money earning.
RODGER W. HILL, age 14, East Liverpool, O. Remarkable fortitude and presence of mind in suffering and danger.
WILLIAM SCHILL, Detroit, Mich. Prize winner in a newspaper literary contest and one of the most provident among Detroit newsboys.
ROY LOOMIS, age 15, Arbela, Mich. For the conscientious carrying out of his agreement under discouraging circumstances.
LEONARD SWEETZER, Delta, Colo. Has not missed Sabbath school in three years, though living two miles from the church.
CLYDE ROND, age 9, Atwell, Tex. This boy, for his age, has given an unusual example of how helpful a young boy can be at home.
BYRON L. KELSO, aged 14, Terre Haute, Ind. Highest grade in school work in five successive examinations. His grades in no case fell below 90.

CLARK ROBINSON, Bangor, Me. Saving a life.
OWEN H. PERSON, West Point, Neb. A brave act.
JACOB BLUESTONE, age 16, St. Louis, Mo. Saved a life.
GALLOWAY HARRISON, Hot Springs, Ark. Saved a life.
F. C. EWELL, Kewanna, Ind. Excellence in school work.
CLIFF CHAPMAN, age 9, Kokomo, Ind. Preventing a train wreck.
FRED GANSHOW, age 10, Oak Park, Ill. Unusual bravery in danger.
PERCIVAL H. KEANE, age 15, Chicago, Ill. Repeated acts of heroism.
HAMMOND BEALL, age 13, Cincinnati, O. Excellence in school work.
FRED PUFTHAK, age 16, Chicago, Ill. Saved a life by heroic action.
CHARLES C. CURTIS, age 13, Amesville, O. Excellence in school work.
DANNIE ARBUCKLE, age 9, Kokomo, Ind. Preventing a train wreck.
TONY MITCHELL, Butte, Mont. Bravery and presence of mind in danger.
RUSSELL R. VOORHEES, age 12, Newark, N. J. Excellence in school work.
GERALD OSBORN, age 14, St. Johns, N. B. Saved an express train from disaster.
PAUL FUDGE, Kalkaska, Mich. Never missing a day in school nor being tardy.
HAROLD FUDGE, age 8, Kalkaska, Mich. Never missing a day in school nor being tardy.
ROBERT AUSTIN HALL, Lowell, Mass. Unusually good school attendance record for five years.
WILLIAM WATSON, age 16, Guthrie, Okla. Loyalty to his teacher in spite of strong opposition.
OSBORN BROWN, age 11, Greenwich, O. Attending school for five years without once being marked tardy.
EDWARD A. HANCHETT, Dallas, Tex. Medal winner in St. Mathew's Cathedral Choir. Greatest general usefulness and highest excellence in choir work.
GEORGE N. RAGAN, Pueblo, Colo. Remarkable industry and enterprise shown in money making pursuits, and unusual wisdom shown in taking care of and spending his money.

M. C. HARPER, Paris, Tex. Saving two lives.
ELMER BEATTY, age 13, Toledo, O. Excellence in school work.
WILLIAM DOEPEL, Mattoon, Ill. Saved the life of a boy friend.
GEORGE ROWE, Copperopolis, Cal. Excellence in school work.
CLYDE M. JOICE, age 12, Chicago, Ill. Excellence in school work.
HARRY MANERS, LaGuardo, Tenn. Excellence in school work.
FLOYD THOMAS, South Ottumwa, Ia. Excellence in school work.
JAY W. DAWSON, New Hampton, Ia. Excellence in school work.
LEONARD B. WRIGHT, Loire, Tex. Excellence in school work.
FRED CHURCHILL, St. Paul, Minn. Saved a child from drowning.
WILLIAM A. MARTIN, Mt. Pleasant, Ind. Excellence in school work.
WALTER YOUNG, Rock Island, Ill. Unusual record in school attendance.
ROLLIN C. SCOVILLE, Salt Lake City, Utah. Excellence in school work.
JUDSON W. ALDERMAN, age 13, Springdale, Ark. Never been tardy at school.
H. REID ALDERMAN, age 10, Springdale, Ark. Never been tardy at school.
VILAS H. JACKSON, age 12, Colfax, Wis. Excellence in school work and general good conduct.
WILSON WEAGLEY, Helena, O. Not missing a day or being tardy at school in the past two years.
EDDIE FORD, age 11, Port Richmond, Staten Island, N. Y. Saved the life of his three-year-old brother.
ROBERT AUSTIN HALL, age 11, Lowell, Mass. Not absent or tardy from school in five years and two months.
STANLEY SCHEIDLER, Cambridge City, Ind. Went to school four years without missing a day or being tardy.
CECIL MOORE, age 13, Noblesville, Ind. Regular attendance at school through five years though living a mile and a half from school.
TOMMY DEAN, age 16, Cincinnati, O. who has won the title in Cincinnati of "Canal life-saver" by having rescued four boys from drowning in the canal.

We begin this month to make up the Roll for 1903
It should be ten times as large as that for 1902

Top or Bottom—Which?—By Archer Brown of Rogers, Brown & Co., New York

A Study of the Factors Which Most Contribute to the Success of Young Men

[BEGUN IN SEPTEMBER.]

IX.—THE AMUSEMENT QUESTION.

Is it wicked to dance?
Is it wrong to play cards?
Is it sinful to go to the theater?
What is the matter with billiards, pool, the races, wine suppers, and like ways of extracting the joys from life?
Here you have the amusement question, ever recurring, much discussed, never settled. The young and healthy of both sexes want fun, recreation. Those older in life and hard at work want relaxation. All are entitled to whatever of real enjoyment can fairly be gotten out of life. There is none too much, from first to last. We all know. But the moment a young man enters into this world of amusement he finds queer and puzzling things. First, he notes a diversity of views among people as to what is wholesome and proper. A range of pleasures which are pursued without any question of propriety in one circle is by another circle discarded and forbidden. He finds that the particular kind of amusements which the human race seems to take to most naturally and eagerly is by many thought to be demoralizing to health and character. Next he finds (and this is very puzzling) that some good people denounce as thoroughly sinful pleasures which his conscience tells him are not necessarily so.
Let us see if we can get a clear view of this matter—a view free from foolish fanaticism on the one hand, and rank worldliness on the other. You will note that amusements easily divide themselves into two pretty distinct classes: those which give diversion with rest to mind and body, and those that give diversion with waste of mind and body. The first are wholesome, healthy, necessary; the second, enervating, unhealthy, exhausting. You can take up any one of them, and by applying this test quickly classify it under

its proper head. A boy fifteen years of age will not go far wrong in his judgment.
The late hours, bad air, and usually doubtful moral influence of a theater, for instance, seems to throw most plays out of the first class. Dancing, innocent enough in itself, can hardly be claimed, by its most active votary, to build up strength, either of body or intellect. Card playing, billiards and the like, though differing in no essentials of morals from chess or golf or tennis, have in nine cases out of ten certain tendencies and associations that prudent people for some reason like to avoid. Indeed, it is a pretty fair assumption that if a large element in society, representing perhaps the best in culture, refinement, and morals, has for generations agreed upon certain diversions as dangerous and harmful, there is something more than religious cant and prejudice back of the sentiment.
But we must admit that when a young man enters mixed society, the first impression he gets is that the euchre, the dancing, the theater party, the wine supper, and the billiard table about describe the whole range of social pleasures. It would look as though there were little left for him if he turned away from these.
Here comes up the point of view: What are you after, anyhow? Is it the killing of time, you having so much time to kill? If so, there is no better way than by these amusements. Kill it mercilessly with anything that is not a vulgar offense against morals or law. But do not make the foolish mistake that, alas! is so universally made by young people of scant equipment of mind, namely, that these pleasures of fashionable and worldly people are the best going. They are not. There is a whole world of delights as keen as any social youth can invent—pleasures that drive away care and give vent to the buoyancy of nature, amusements that afford wholesome relief and recreation—and all high above the range of things that pander to doubt-

ful tastes and appetites. On the contrary, they improve the tastes, cultivate the mind, enlarge the social powers, and develop the muscles.
Now what sort of a pleasure world is that? you ask. Well, first, it is a world for young folks of brains, sense, and heart, and any others will feel uncomfortable in it. If nature has been unkind to you in mental endowments, if fair opportunities for education have been denied, if you have a strong natural tendency to run to things forbidden, you will find this a hard mine to work. Second, it is for those who have some ambition for self-improvement, who expect at the end of each year of work and play to be better than at the beginning.
Shall we particularize some such amusements? In briefest form here are a few. In outdoor pleasures: riding, bicycling, hunting, ball, tennis, golf, or whatever of the manly sports is most practicable in your situation; studying nature through rambles in forest and field, the study and care of animals, the cultivation of plants and flowers, the pursuit of geology among the rocks—and so on through a range of delights that will make better lungs, stouter legs, redder blood, and stronger brains.
Of indoor or social pleasures, try these: Friendly calls upon the best young people you know of both sexes. Cultivate the fellows who know more and are a little better than you are. Call on the young ladies who can teach you something of real social graces. Made a study of bright, lively, improving conversation. The art of intelligent converse beats cards and every other time-killer known. It makes its possessor a godsend among young people who have developed the talents of their heels at the expense of their heads.
Then in entertainments there is the whole range of concerts, from the symphony to the college glee club or the perennial plantation minstrels. There are lect-

ures from great thinkers and wits. But in concert or lecture take pains to study beforehand what you go to hear, that lasting profit may result.
Again, cultivate a hobby. For example, architecture, etching, engraving, coins, photography, the microscope, the telescope, mineralogy, music, water colors, anything in which you take a natural and easy interest. Study the literature of the subject. Begin a collection of examples or specimens. Slowly add to them without extravagance. Ride the hobby so well that you can soon entertain and instruct friends an hour upon it.
Once more, travel. Journeys a wheel, or on foot, like those of Bayard Taylor; short excursions by rail to points of historic or other interest; at longer intervals extended journeys to the great West, the sunny South, the marvelous Lake Superior district, Cuba, the Bermudas, perhaps even to Europe. Do you say that is impossible because of the cost? That will not compare with the expenses of a society young man who pursues even moderately the fashions of dancing, theaters, billiards, wine, cigars. Such travel and observation give the keenest amusement, and at the same time broaden the mental horizon amazingly.
These are a few of the innumerable ways open to a young man of Christian principles in this twentieth century to thoroughly enjoy himself along with his hard work. If you will enter heartily into these things in the hours given for diversion, and after fair trial say they are not as satisfying and enjoyable as the amusements modern society runs to, your case, I think, will be the first on record.
Perhaps you will say there is room in your scheme of life for both kinds. There is not. You are deluded if you think so. Fashionable pleasure is a jealous master. If I dance, I do not want to do it like a green farm hand. But if I shine in that and kindred lines, you must not expect me to know much of Horace or history, of science or music or modern art—unless, indeed, I chance to belong to the leisured class, which has yet but little place in this vigorous young republic.
So if you ask me, is it sinful to dance and play euchre, poker and the like? I answer, Not necessarily. Your conscience, if sound, will determine. But why raise the question? "There is a better way."
(Concluded in February.)

Some Ball Games of British Boys

In the main the games of the boys of England are much the same as those of the boys of the United States, but there are some notable exceptions. Most of the ball games which American boys play—baseball, one-two-and-three-old-cat, etc.—are practically not played by England's youngsters. Cricket and variations of it take the place of all of them. To the average American boy cricket would seem like a very slow game, which probably accounts for the fact that it has never gained much of a foothold in the United States. Football is even more popular among English boys than it is among American boys, however, and the matches between the elevens of the big English public schools create almost as much interest and excitement as do the games between the great college teams on this side of the Atlantic ocean. Still, games played with balls and bats are by no means unknown in Great Britain, and some of them are interesting enough to make it worth while for American boys to try them.

For instance, there is "Town Ball." This is not played with a ball at all like our American baseball, but with a light, hollow rubber ball, invariably white in color. The

easy to become accustomed to. But to get back to our game of town ball. The batsman must run whether the result of the "touch" (the term "hit" is not used) be what would be known in baseball as "fair" or "foul." There are no men stationed on the bases, but it is the play of the "outers" to catch or pick up the ball (no point is counted by catching a "fly-ball") and to throw it at the fleeing batsman so that it will "point" him. An American boy would call this "burning" or "stinging," but the soft ball used in town ball does not hurt. When a runner is hit he is "without," and so it goes until all the men of one side are "without." Then the "withins" take their places in the field and so on.

When a man is put "without" he retires from the game entirely for that "term," or inning, and thus the number of "withins" gradually decreases until there is only one "within" left. Of course, there is no hope for him unless he can make what we would call a home run and what they call a "round." This is not often done.

Every American boy has in his youth thrown a ball up against a blank wall to catch it on the rebound. The English boy

English boys call this ball a "bouncer." The word "bouncer" has a very different meaning to the English boy than it does to the American boy. A "bouncer" is an unpleasant person. The boys in British schools who are bullies, or are disagreeable in other ways, are "bouncers." The word "bouncer" is, therefore, used to describe a ball that bounces. The bat is called a "delill," and is flat like a cricket bat, only not so wide. It is less than two-thirds as long as the American baseball bat. It would be easy for any boy who is ordinarily clever with his pocket knife to make one out of an old fence picket, or any like piece of wood, by forming a handle at one end and squaring off the other end and slightly rounding the corners. The bat does not require any such strength as a baseball bat and, therefore, may be made of soft wood.

There is a "home base," as there is in baseball, although it is much larger than an American "home base." The similarity ends there, for there may be as many other bases as the players desire. Thus, the field may be three-cornered; it may be four-cornered; it may be five, six, seven or eight-cornered. In England the eight-cornered, or octagonal, field is generally preferred. The distances between the bases (which the English boy calls "places") are about the same as those between the bases on an American baseball field.

The "place" for the pitcher is located with about the same relation to the "home place" as is the American pitcher's position to the home base in baseball. The pitcher is not known as "pitcher," however, but as "giver," and his work requires much less energy and skill than does that of the American baseball pitcher, for he merely throws (or "gives") the ball swiftly overhead to the catcher, aiming to "give" it over the right shoulder of the boy at the bat. The batsman does not really strike at the ball, but holds the flat bat, or delill, in such a position that the ball will strike it and glance off or rebound to some part of the field vacant of any player on the opposing side.

If the ball touches the bat at all the batter must run for the nearest "place" to the left—not to the right as in American ball games. In England, you know, many things are done in a left-handed way. For instance, when one drives on an English street or road he must keep to the left instead of to the right as in America, and the pedestrian on the sidewalk must do the same. It is very confusing to the American boy in England on a visit, and not

has made a game of this which he calls "Cry Out." In front of a "dead" or "blank" wall three sides of a square are marked on the ground by drawing a line with a stick or otherwise. The wall itself forms the fourth side of the square. The "crier" is chosen by the method which every boy knows—that is, by "hand over hand" on a stick. Most American boys call this "choosing up." The one who is chosen takes his place in the middle of the square. The others line up on the outside edge.

The crier then numbers them "one, two, three," etc., the number of boys on the line being unlimited. The "crier" then throws the ball against the wall, sometimes on a slant and sometimes straight—quite as it pleases him. He may throw it hard or "easy," as he pleases. At the instant it strikes he must call out the number of some one of the boys on the line. It does not matter which one, so long as no member is called twice in succession and so long as all the numbers are called in one round. The one who is called must try to catch the ball. If he does, then he becomes "crier"—the best place in the game—and remains "crier" until someone catches a ball thrown by him.

Daring Walkers on Stilts.

American boys walk on stilts, but as compared with French boys, they know little of the sport.

Perhaps the reason for this is that in one part of France—away down in the south of the country—stilts are a necessity to the people, who are mostly shepherds. They must walk on stilts in order to oversee their vast flocks of sheep as well as to pass through the bogs which beset them everywhere.

These shepherds—men and women both—walk continuously on stilts that are from six to eight feet high. These stilts are merely fastened to the feet. There is no thought of an upright by which the hands and arms may steady the progress of the aerial pedestrian. Sometimes the stilts have uprights reaching as far as the knees and bound firmly to the legs. Generally these shepherds and shepherdesses carry long poles which they can use either as balancing poles or as supports—very long canes, as it were, reaching to the ground.

They become so expert in stilt walking that it is no unusual sight to see a shepherdess striding along on stilts that raise her six feet above the ground, with her balancing pole strapped to her back and her hands busily knitting socks for husband, son or brother.

The complete unconcern with which these hardy country folk make their way along on stilts is astonishing. One might almost say that children have stilts given to them instead of cradles.

The writer witnessed a race on stilts in the south of France. It was one of the sports to celebrate a holiday. The course was about four and a half miles long, and was covered by the two winners in the extraordinary time of thirty five minutes. When you stop to think that the average good driving horse does not ordinarily trot as fast as this, the wonderful skill of these French stilt walkers will be appreciated.

One of the winners was a boy and the other a girl. Both were about fourteen years old. Entered as contestants in the race were old men and women as well as young folk. Third in the race was an aged shepherd, who certainly looked as if he had well passed his seventieth birthday.

These shepherd stilt walkers have had their influence on boys throughout France. Paris is a great city for holidays, and on many of these holidays a part of the celebration is a parade. In these parades stilt walkers always play a leading and amusing part.

One such procession was led by a gigantic and grotesque figure not less than twelve feet tall. Afterwards, when the procession disbanded, it turned out that this figure was really a boy of about sixteen, who was not more than four feet six inches tall. Not only had he made the long march on high stilts, but he had still further increased his apparent height by binding a long stick to his back. This reached far above his head, and bore on its upper end a large false head. A cross bar just under this head formed false shoulders and arms, and from these in long, loose folds, hung a calico gown, which reached to the ground.

Prizes are almost always given for the best marchers in these Paris parades, and on this occasion the boy on stilts won first prize.

Strange stilts are those used by Japanese and Chinese boys. Instead of having side blocks as do the stilts used by American

boys, they have foot rests mortised on the stilt stick and projecting backwards. These stilts can only be used when the Japanese boys' feet are bare, for the stilt stick must be grasped between the first and second toes of each foot.

Spanish boys are great stilt walkers, and they invariably use sticks that reach only to the hips, and are strongly bound there as well as at the ankles.

In some of the islands in the South Pacific ocean very rough sport is engaged in by boys on stilts. Perched high on their thin supports, and with their faces and skins grotesquely painted, these semi-savage lads—sometimes as many as twenty at a time—meet and strive to trip each other up or knock each other down.

Like most sports and games, stilt walking is of very ancient origin. Cut in the stone which forms the tomb of one of the oldest of the Pharaohs, there is a crude picture of a man leading a procession and walking on stilts. This ancient stilt walker must have been very skillful, for he is holding onto no side sticks, but is using both hands in holding a great horn to his mouth, which he is apparently blowing.

"The Stretched Forefinger of all Time" is on the dial of an

Elgin Watch

—the world's standard for pocket time-pieces. Perfect in construction; positive in performance. Sold by every jeweler in the land; fully guaranteed. Booklet free.

ELGIN NATIONAL WATCH CO.
ELGIN, ILLINOIS.

KLIP-KLIP
THE POCKET MANICURE
TRIMS, files, shapes, and cleans, and keeps the nails in perfect condition. A complete manicure for man, woman or child. Silver steel, nickel-plated. Sent postpaid on receipt of price if your dealer hasn't it. **25c**
KLIP-KLIP CO., 685 S. Clinton St., ROCHESTER, N. Y.

Will grow in the house or out of doors. Hyacinths, Tulips, Crocus, Fuchsias, (Orchids, Jonquils, Daffodils, Decoy Lily, Tuberoses, Gladiolus, Chinese Lily, Begonia, Gloriosa, Lilies of the Valley—all postpaid, 25c. in stamps or coin. A premium with these Bulbs we will send FREE a giant collection of flower seeds—over 200 varieties. Address: **Millside Nursery, Somerville, Mass.**

AGENTS WANTED
BY THE WAY!
HAVE YOU TRIED THE KLIP?
Covers to Order. Price List Free.
YOU CAN BIND one sheet or three hundred sheets in ten seconds. The Klip binds loose sheets, pamphlets or magazines.
H. H. BALLARD, 875 Pittsfield, Mass.
AGENTS WANTED

Dumb-Bell Buttons, FREE!
We only ask you to pay the postage and get a pair of the latest style Dumb-bell Cuff Buttons. **FREE!** Guaranteed value, 25c. Either silver or gold, heaviest plates. Will wear six months. Sent with our Big Bargain Catalogue **FREE**, if you send 3 two-cent stamps for postage. Address: **J. IHRIG JEWELRY HOUSE, Rochester, N. Y.**

FREE! BEAUTIFUL AIR RIFLE!
shoots B. B. shot with great force, and is just the gun for small game or target practice. Barrel is nicely nickel-plated and stock is of wood with mahogany finish. **SENT ALL PREPAID**, to any boy for selling it of our beautiful air-pistols at 10c. each. We trust you. **New England Supply Co., Otis St., West Mansfield, Mass.**

OFFICERS, MEMBERS AND FRIENDS OF ORDER OF AMERICAN BOY.
Or any one else. You can have an artistic and patriotic ornament for your room or company room free of cost. Send postal with name and address and let us tell you about it. **MATEDEL PERRY, 6, N. 8th St., BROOKLYN, NEW YORK.**

Gold Rings FREE
Sell 10 pks of Smith's Hair Grower and Dandruff Cure at 10c each. We trust you: when sold send money and we'll send 2 rings or choice from our premium list. Agents wanted. **Roebuck Perfume Co., Box 84, Woodboro, Md.**

DELICATE PERFUMES AND TOILET WATERS
easily and inexpensively made at home. Write for our booklet which tells all about them. **TALOTT MFG. CO., A. B. BOX 6, STATION E, BROOKLYN, N. Y.**

WE Make You a Present of a fine mouth organ. Write at once, big catalogue free. **Musical Novelty Co., Dept. 8, Detroit, Mich.**

With the Boys

LOWELL W. CORNELL, Cleveland, O., says that he and his brother are much interested in THE AMERICAN BOY and always hurry home from school on the day they receive it.—**JAMES E. SIPPRELL**, Arlington, Wash., sends us a pencil drawing showing a scene near the postoffice in his town the day THE AMERICAN BOY arrives. It is highly interesting, but not so drawn that it can be reproduced. It shows a crowd of boys running with all their might and main to reach the post-office.—**FRED NASH**, Sumter, S. C., is working to raise money to renew his subscription. He paid for his own subscription last year with wages he received in dropping peas and corn. He made money enough last year to go to the Charleston Exposition. Fred has a gun and two dogs. He says he agrees with us regarding child labor in his state. He says it is just like negro slavery, only the parents get a few dollars a month for the labor the children do. He thinks the state legislature ought to take some steps to stop this form of slavery.—**JOHN E. FULHEY**, Bellaire, O., says his father is going to send in the money at once for renewing his subscription. He thinks he has a very good father. He says he makes him work, and doesn't let him run around in the evenings, but that he gets him lots of good reading, like THE AMERICAN BOY. John drives the milk wagon, supplying 150 customers with milk. He expects to get a gun on Christmas.—**RUSSELL L. MUNDHENK**, Arcanum, O., thinks he has a joke on himself. He says he took THE AMERICAN BOY from his postoffice box and was going home with it. He got so interested in it that he walked an eighth of a mile past his house before he discovered how far he had gone astray. He is thirteen years old and is a freshman in the High School. He sends a list of his belongings, including horse, dog, cow, rifle, a watch, microscope, books, desk, kite, pigs, money, and "other things," amounting in all to \$425. Pretty good for a boy.—**ARTHUR ARCH-GOLD**, Chicago, eleven years old, is in the sixth grade at school. He has been going to school four years. In a recent spelling match he spelled down the whole school. He says he knows the capitals of every state and country in the world. He intends to be a great baseball player.—**GEORGE R. LINSBLOM**, Manistee, Mich., age twelve, is in the seventh grade at school. He is studying shorthand by correspondence and intends to become a reporter.—**EDWARD L. FERNALD**, West Medford, Mass., writes a nice letter telling how much he thinks of THE AMERICAN BOY and how he enjoys the puzzles. He says that his mother thinks it is the best paper that ever came into the house, and that what other boys have done her boys can do.—**L. ALLEN BECK**, Yates Center, Kas., whose father is a bank cashier, says that next summer he is going into the bank to learn all that he can. He is fifteen years old and in the first year of the High School, "but," says he, "I would not stay out of school for anything. I expect to go to college when I graduate here, for I think a man nowadays needs a pretty good education to be anything." He is interested in electricity also and has a small stamp collection.—**HAROLD L. HOLMES**, Syracuse, N. Y., won one of the six prizes offered the school children of Syracuse by the Syracuse Herald for the best bouquet of flowers exhibited at this year's State Fair. The flowers were from seeds given out by the Herald in the spring.—**SOLOM JEHU CARTER**, Rosedale, Ind., has been doing unusual work for a boy in making speeches for the Prohibitionists. He has two medals that he has won for oratory, and has an offer to go to Kansas next summer and speak. He wants us to suggest some paying business for a boy to engage in before and after school. If our correspondent will

in the eighth grade in school, is fourteen years old and an only son, and, he says, "I am petted to death."—**GEORGE W. SPALDING**, San Francisco, Cal., thinks he is the smallest bell boy in San Francisco. He is a native of California, having been born in San Francisco in 1887. He has been working as a bell boy in different hotels for four years. He thinks his picture in the paper will get a great many subscribers for THE AMERICAN BOY among the guests at the hotel. This would hardly induce us to put the picture in the paper, but we like an ambitious boy such as George is and his picture goes in to show what a San Francisco bell boy looks like.—**JOHN R. TEMPLE**, Mankato, Minn., twelve years old, sends some very good poetry. We wish we could print the verses that he sends. Here are a few of the lines. In speaking of how the world is sympathetic, but doesn't carry its sympathy into action, he says:

"We do not care to take the lead, and stand the brush and brunt; At lifting we're a failure, but we're splendid on the grunt." Here is another couplet: "If talking were effective, there are scores and scores of men Who'd move a mountain off its base and move it back again."

WILL H. BROWNE, JR., Fulton, Fla., writes us a long letter. He was born in Florida and lives on the St. Johns river. Near his house the ground is covered with oyster shells put there by the Indians many, many years ago. His home is on the top of a shell heap, which slopes away from it in all directions. In Crooked Creeks, near by, are many kinds of fish, crabs and oysters. The ocean is three miles away, but he can see its breakers plainly with the naked eye. He often finds pieces of Indian pottery near his home, which indicates that there was a big

violin. He is fourteen years of age and goes to high school. He and another boy are writing a play called "Billy's Tenderfoot."—**ANSEL** and **HALMEN BARNES**, Deering, Kans., are two very enthusiastic AMERICAN BOY readers. They live on a farm, and though but fourteen and eleven years old they were of so much assistance to their father that he was not compelled to hire any help during the past year. They first saw THE AMERICAN BOY through their grandmother's having made it a birthday present for one of them.—**BERNARD WOOFENDEN**, Madison, Wis., wants to know how he can keep from letting his legs hang over when he dives. We don't exactly understand the question, but would suggest that he tuck them up under his chin. If he will write us again telling us more definitely what he means we will try to answer. Bernard is going to build an ice boat the coming winter.—**ORLO STEARNS**, Chelmsford, Mass., writes a very flattering letter to the editor. He says THE AMERICAN BOY is like the Baptist minister in his town, who is the only man in the town who takes any interest in the boys' games and sports. He says: "He comes down nearly every noon to give the football team practice in the tricks of the college teams. He is what I imagine the editor of THE AMERICAN BOY to be—eager to build up the boy into a strong, virtuous man, desirous of bringing the boys nearer together." Orlo is in the High School and studies Latin, Algebra and Rhetoric, having entered the High School when thirteen years old.—**ARTHUR ELLSWORTH**, Corning, Ia., makes his spending money by getting subscriptions for magazines. He and his brother have a large case of books, another of papers, and another of curios and specimens of rocks. His brother has a collection of stamps and a few coins. He wants some boy to tell him how to solder granite ware.—**HAROLD GOODWYN**, Sunderland, Mass., tells us how glad he is that his grandfather bought THE AMERICAN BOY for him. He never cared much about reading before he took this paper. He says he left his school last May, but that the paper has showed him that he ought to know more, so he is going back.—**E. C. BYE**, Philadelphia, Pa., has every number of THE AMERICAN BOY from the

JOHN Smeal Belchambers and his mother. This little boy writes us an entertaining letter every month from his far away home in India.

Jack Crawford, with whom he got acquainted through THE AMERICAN BOY, was to lecture in his town that night and that he was going to hear him. We envy him the opportunity.—**WILBER D. HAWK**, New Kensington, Pa., wants us to tell the boys who said that Nehemiah and Bildad were the smallest men mentioned in the Bible that such is not the case. The honor is due to "the man who slept in his watch."—**CARL LUMPKIN**, Colorado Springs, Col., 17 So. Fourth street, wants to correspond with other boys who are studying the shorthand lessons published in THE AMERICAN BOY.—**FOREST BEESON**, Lyerly, Ga., says he would rather do without a good dinner than without a copy of THE AMERICAN BOY. He gives another testimonial of its interest and worth in saying that Mrs. J. Lindsay Johnson, Rome, Ga., President of the Women's Federation Clubs, says that it is the very best boys' paper she has ever seen.—**EZRA D. SARGENT**, Ezra, Ky., age thirteen, received the highest award on composition writing recently in his school. The subject was, "The Life of Simon Kenton."—**MARVIN J. TAYLOR**, Richmond, Va., tells us of a boys' club recently organized on Church Hill, Richmond, under the name of the Knights of St. George, by the Rev. J. D. Langley, the object of the club being to foster friendly feeling among the boys, encourage their attendance upon the churches, give them experience in parliamentary matters, and keep them off the street corners. Mr. Taylor is assistant regent. The club meets at the homes of its members. At its November meeting the name of the club was changed to "The American Boys' Club." Each member wears a pretty silver button bearing the letters and figures, "A. B. C. 1902."—**J. E. TERWILLIGER**, Syracuse, N. Y., gives us a short sketch of the Syracuse Boys' Club, which was founded to help homeless boys and keep them off the streets. Its founder is the Rev. Dr. Calthrop, of the May Memorial Church. The club has a superintendent, who is in full charge, and the boys elect a governor once a month, who looks after the department and order of the members. Their rooms are on one of the main streets of the city, and consist of a game room, a drawing room and a reading room, while in the basement is a ping-pong set, a punching bag and a Whitely exerciser. One of the objects of the club is to help the boys be "respectable." One of the boys recently got in trouble and was arrested. The superintendent secured his release and found him a place in a drug store, where he is doing nicely. The club is supported by voluntary subscriptions. It has a library of some fifty volumes.—**THE BUNKER HILL BOYS' CLUB**, occupying a ten-room house at No. 10 Wood street, Charlestown District, of Boston, is nine years old. It has 536 members, and boasts of a ball team unsurpassed in the vicinity of Boston, and has classes in printing, practical carpentry, gymnastics and drawing. The club hours are from 9 a. m. to 12 noon, and from 7 to 9 p. m. every day excepting Sundays. Emerson L. Hunt is the director.—**CHESTER TITUS**, Osage, Ia.; **WILLARD RAY ISHAM**, Dillon, Mont.; and **RAY PULLEN**, Benton Harbor, Mich., send us short stories of their own composition, all of which read well and we are sorry that we cannot find room for them in THE AMERICAN BOY.—**Frank H. Murray**, Clifton, Ill.; **Walter Moblard**, Brooklyn, N. Y.; **Ewing Hunter**, Kansas City, Mo.; **Benjamin Lazarus**, New York City, N. Y.; **Raymond Roth**, La Crosse, Wis.; **Ralph Horton**, Beardstown, Ill.; **Oliver Cook**, Marine City, Mich.; **Bennie Borcus**, Rossville, Ill.; **Claude Close**, Unionville, O.; **John T. Quinn**, Keeseville, N. Y.; **Elmer Marshall**, Carroll, Ia.; **Wenner Applin**, East Tawas, Mich.; **Bernard Cowham**, Oshkosh, Wis.; **J. R. Lambert**, Somerset, Pa.; **Guy Mc-**

SAMPLES OF THE WORK OF OUR BOY ARTISTS. The train is by a boy who does not give his name; the ship by Ben. Lazarus, of New York City; the dog picture by Ralph Horton, Beardstown, Ill.

Indian camp there at one time. He and his brother own four bulls, named "Gridley," "Jim," "Jerry" and "Curly." They have also a mule, "Jimmy" by name, and a big horse, "Blucher." They have also sixty head of Jersey red pigs, fifty head of Belgian hares, fifty hens and some small chicks, four dogs, five small alligators, a gray squirrel, and a cat. Will says he has caught wild cats, coons, possums, skunks, rabbits, foxes, and marsh hens. He knows all their tracks and their runways.—**G. C. BEAMAN**, Pueblo, Colo., writes that he reads THE AMERICAN BOY with interest; that he has no other friend to talk to because for a good part of the time he is a herder living almost alone.—**JOSEPH P. SMITH**, Morgan, Miss., writes us an enthusiastic letter saying that he has given up several 25-cent cheap papers for THE AMERICAN BOY, which he terms the "star of journalism." He thinks our magazine ought to reach the million mark soon.—**CLYDE M. JOICE**, Chicago, Ill., twelve years old, has made a fine record in school work, having finished the seventh grade in five months. He was the only one in his class whose average was excellent. Since entering the eighth grade in September last he has ranked number one, and after two months was promoted to the advanced eighth.—**W. J. BRAY**, Butte, Mont., finds it difficult to get boys to subscribe for THE AMERICAN BOY in his town, because, as he says, the five and ten-cent novels have such a powerful hold on the boys, who even take them to school to read them. He says the pictures on the front covers of these books tell him all he wants to know about what is inside. He thinks the Butte High School is about the best in the northwest. It boasts of an orchestra, a mandolin club and a glee club. He sends a design for the front and back of an O A B watch charm.—**RAYMOND F. ADAMS**, Sherman, Tex., says he is writing a book called "Tom Rogers and His Comrades;" that he has written ten tablets full and expects to write at least twenty. He takes music lessons on the

beginning, excepting No. 2, of Volume 1, which he is willing to buy from any boy who will let him have it. He collects stamps and coins, and has a collection of 1,155 stamps.—**FLOYD THOMAS**, South Ottumwa, Ia., wants to know if Alger's, Optic's and Barbour's books are good for boys. Opinions differ. I myself would not object to my boys reading them. He also wants to know if Henty tells facts in his accounts of the English wars. I have no doubt that the main incidents of his stories are true, though, doubtless, there is much of the coloring that is imaginative. Mr. Henty just recently died. He wrote seventy books for boys.—**WALTER R. STEELE**, Menominee, Wis., was born in California. His mother died when he was a baby, but his aunt adopted him, and he says he has never missed a mother's love, and that he and his aunt are great chums. He is troubled with poor eyesight, and his aunt reads THE AMERICAN BOY to him. He thinks the schools of Menominee are splendid. They have a training school, a gymnasium, and an auditorium donated by Senator Stout.—**STANLEY S. THAYER**, Forest City, Ill., last June won a beautiful gold medal offered by his teacher to the boy who should make the best showing in deportment for the year. His parents, as a further reward, gave him a trip to Van Wert, O., to visit his grandmother, who subscribed for THE AMERICAN BOY for him.—**MICHAEL H. C. BOLLES**, Kortright, N. Y., is a farmer's boy and he writes us all about the farm and we are very glad to hear from him. We like the spirit of farm boys. The letter is accompanied by one from his parents, in which they tell what a splendid boy he is about the house and in the fields, making himself very useful in every possible way. This boy will grow up to be a good and useful man, for, according to his own statement, his mother says it is interesting for her to read about boys, and if she is thus interested in boys she must be a good woman, and good women are the making of good men.—**PAUL DAILY**, Chilliocthe, Ill., writes us on November 5 that Captain

GEORGE W. SPALDING.

read the extracts from boys' letters that appear in the Boys as Money Makers department he will get a good many more hints than we can give him. Solon has a library of fifty books and subscribes for three papers, all of them good ones. He is taking piano lessons. The boys in his neighborhood have organized a drum corps and he is learning to play the fife. He is

Dowell, Des Moines, Ia., and C. Emerson Watson, Beaumont, Cal., have sent in drawings, all of which are good.—HEWITT T. JOYCE, age 12, and VAN SANTWORT KNOX, age ten, both of New Brunswick, N. J., each of whom is the son of a preacher, are the owners and managers of a library known as the Bayard Street Library. The boys have 186 volumes, which they have catalogued, the catalogues being typewritten. The books are all of special interest to boys, and are issued to the boys of the neighborhood, who are members of the library the fee being five cents a year.—HARRY F. BLANCHARD, Ticonderoga, N. Y., says he would like to hear from boys in foreign countries who are interested in THE AMERICAN BOY.—

A Young Southern Artist.

Tiney Molina is a name which, if we are to believe those who write about him, is destined to become known wherever the work of great artists is appreciated. Tiney Molina lives in Savannah, Ga., and is not much more than a boy. Savannah is his native city, but Molina is not American in blood. His face shows it. Dark, deep-set, luminous eyes, olive complexion and black, silky hair proclaim his Spanish extraction. Molina may be called a true child of nature. He loves nature, revels in it, and paints it as he sees it. The walls of his studio are covered with finished pictures, and the corners are full of unfinished canvases. There is one that will surely be noted. It is a painting of the Egyptian queen, Cleopatra. This picture was exhibited last year at the Georgia

TINEY MOLINA.—Photo by Moore.

State Fair, where it took the first prize. At the suggestion of an artist friend, Molina will paint a life-size Cleopatra and enter it in the art exhibit at the World's Fair in St. Louis in 1904. At this same Georgia State Fair Molina won three other prizes, namely, a prize for the best study of a head, reproduced from a photograph in these columns, a prize for the portrait of a friend, and a prize for the best collection on exhibition. The study of the head was made from a pose by Everett Stothard, a Savannah boy, noted for having a wonderful voice, a high soprano of exceptionally rich tone and quality. Besides having a studio in Savannah, Molina has a studio in Maine, where he spends three or four months during the summer

"OFF FOR THE DAY."

Photo by Moore from Original Painting.

Youthful Fire Fighters.

Dressed from head to foot in the regulation uniform of the Syracuse fire department, little seven-year-old Merrill B. Fish and his six-year-old brother Melvin are chips of the old block, their father being Charles A. Fish, of Engine No. 8 of that city. The boys have a miniature fire patrol wagon, which, until recently, was drawn by a pair of goats. Now they use a pair of genuine Shetland ponies, which together weigh 600 pounds. These little ponies carry the patrol wagon with great speed over the pavements. Their names are Major and Dan. In a little shed in the rear of Mr. Fish's home Major and Dan stand waiting for the fire alarm. Right over their heads are the swinging harnesses by which the boys make a quick hitch. The little patrol wagon will stand almost any strain. The body and the running gear are painted a bright red with black stripes. In large letters on each side of the wagon box is painted, "Fish Brothers' Fire Patrol," while on the side of the driver's seat is painted "S. F. D., No. 1." Back of the driver's seat are the seats for the crew, running lengthwise of the box, and there is a hanging step on the rear the same as on a regulation fire patrol. On the opposite side of the driver's seat hang two lanterns, one red and one white. The wagon will carry a crew of seven boys. It is equipped with small rubber hose. The boys have all the paraphernalia of firemen, such as rubber boots, rubber coats, helmets, badges, etc. The chief of the Syracuse Fire Department has given them regulation badges, and they have the same buttons on their uniforms as are worn by the paid members of the department. Merrill is the driver, and Melvin's place is on the rear step. The boys attracted a great deal of attention recently in a parade of the engine companies during the State Fair.

A Young Historian.

J. Stanley Moffatt, Nashville, Tenn., noticing an article in our August issue about a boy in Washington who had written a history of the Boer War, writes that at the age of twelve he wrote a brief history of the Spanish-American War and circulated 500 copies of it.

A Brilliant Young Negro.

Willis O. Tyler, a young colored man of Monroe County, Indiana, who has just entered the Harvard Law School, has made an enviable record in Indiana schools. Last

of each year and where he does most of his nature work. Many of his pictures are owned by an admirer in Boston, but he is still at work turning out beautiful examples of his skill.

Molina is truly a genius, and fame lies before him in a straight, wide, easily-traveled road. A gentleman, the last lineal descendant of that great German master, Rembrandt, himself a noted artist under the same name, has made the prediction that Molina will become one of the greatest painters this country has ever produced.

A Bright Nashville Boy.

Leslie Cowan, a fourteen year old boy, of Nashville, Tenn., is employed as a messenger by the Cumberland Telephone & Telegraph Company in their executive office, and is highly regarded by his superiors. Always willing to work, and anxious to please, he goes about every errand assigned him with intelligent alertness. He is one of the kind so much needed in every business office, store and factory, and by every mother—one who can carry a "message to Garcia."

He holds a card in the Y. M. C. A., presented to him by the Treasurer of the Company, Mr. T. D. Webb, and by this he is entitled to, and enjoys the many wholesome privileges and influences of that noble institution. The General Manager, and others connected with the Cumberland Company's service have from time to time found many substantial ways in which to reward his diligence, and show their regard for him. Last Christmas he was presented with a purse containing twelve dollars, which was straightway deposited in the Savings Department of the Company, where it will draw compound interest, and be added to in principal from time to time.

A Boy Church Chimes Ringer.

Robert Hunter, Chicago, Ill., age thirteen, rings one of the most expensive sets of chimes in America—that in Grace Episcopal Church, Chicago. Robert is one of the Grace Church choir and is an accomplished musician. After the \$10,000 set of chimes was placed in Grace Church many candidates appeared for the position of bell ringer. Robert Hunter secured the place, and, young as he is, he takes rank with the best bell ringers in the country. Every Sunday he rings the bell three times. The first is at 7:30 a. m., the second at 10:30 a. m., and the third at 7:30 p. m. Each time he works almost half an hour in the steeple of the church. First he tolls the big bell weighing 2,200 pounds, which hangs in the center of the group of nine, and then he turns to his levers, which are arranged like the keyboard of a piano. There are nine of them, and they occupy a space more than two feet wide. Beating down upon one of them and then another in rapid succession is no small task, but the boy's hands fly across the levers like the fingers of the piano player executing a difficult run. Each lever is lettered and is connected above with the bell corresponding to its letter. A heavy wire runs from the lever to the striker above the bell, and it is said that the arrangement makes it possible for the boy to play whatever selection he may desire.

Gerald Osborn, of St. Johns, N. B., age fourteen, a short time ago saved an express train from disaster. He noticed a broken rail and flagged the train at night by waving a burning newspaper. The railroad company gave him a check for \$2,000, and a life pass over the railway.

With Us No More.

Hardly a day passes that we do not receive the sad news of the death of some one or more of the boy friends of THE AMERICAN BOY. A Buffalo (N. Y.) boy sends us a very kind letter telling us of the sudden death of Master John E. Murray, of Buffalo, whom he says was one of THE AMERICAN BOYS' brightest and most faithful subscribers. He was a bright

JOHN E. MURRAY.

boy at school and was loved by his principal and teachers. That he was a good student is indicated by the fact that he had won two medals. "One of his great pleasures," says his friend, "was THE AMERICAN BOY, and particularly the puzzle department, in which his name frequently appeared."

Ray W. Ward, Highlands, Cal., writes of the death of his little brother, Johnny C., who was a subscriber to THE AMERICAN BOY. His death came through a bicycle accident. Johnny had started from his home on his bicycle to take a piece of watermelon to his father, who was working in an orange grove a short distance from the house. He was riding with one hand on the handle bar and ran off a little bank which was not over four inches high. He was thrown over the handle bars, lit on his head on a hard road, and received injuries from which he died a few days later.

One of our O. A. B. boys, beloved by his associates, has handed in his resignation and gone to join the great company of boys in another world. Edward Eberly, Secretary of the George Rings Company, No. 21, West Unity, O., died the morning of November 14, at the age of fifteen. Three of the boys of the Company were among the pallbearers at the funeral. He was a clean, Christian boy. Captain Merle H. Felger writes that the boys liked him very much and that they regret deeply their loss. Edward was hurt in a football game and died one week later.

June he was graduated at the Indiana State University. In 1901 he won the State Oratorical Contest, and later took fourth place in the Interstate Oratorical Contest in Iowa in a field of ten contestants. Young Tyler has made his way through school thus far by blacking shoes, working in a barber shop, and doing errands. He has resolved to go through the Harvard Law School, though he expects to have to support himself by waiting on table and other such employments that he may secure.

Shokichi Hata is the name of a brilliant young Japanese student who was graduated with high honors from Princeton Theological Seminary in May. Out of a class of thirty four young men he wrote the best thesis on New Testament literature, and thus won the fifty dollar prize offered by Charles Scribner's Sons. The young man has been in this country ten years. He was graduated from Wabash college in 1899.

David Robinson, sixteen years old, president of the Bootblacks' League of Boston, has proved himself to be a musical prodigy, and arrangements are being made to send him to Paris for a musical education. He has wonderful mastery of the violin. He will play only classical pieces, disdainful such music as "rag-time." The boy is a Russian by birth, but came to this country when a year old. He is described as a pretty boy with large dark eyes and the dreamy expression of the poet and musician.

Lawrence N. McNair, of Brown City, Mich., is gaining quite a reputation as a boy orator. He is a member of the Tenth Grade Brown City High School, and gives evidence of much literary and oratorical ability. Recently he spoke before the Maple Valley Farmers' Institute, held at Brown City, his subject being "The Men Behind the Guns," and for a fourteen year old acquitted himself remarkably well.

BOYS AND ANIMALS

ALBERT RAYLE, Lexington, Ga., writes that he has a horse that can trot a mile in three minutes, and that he and another boy are interested in raising Belgian hares. The boy is something of a photographer, too. He has a 5x7 camera which cost twenty eight dollars, and with it makes very good pictures.—LOWRIE HENDERSON, Henderson, Pa., is interested in raising goats. He wants to know if there is any book or paper treating of this subject. We know of none.—DONALD HOGARTH, Smethport, Pa., writes us his experience in keeping chickens. He and two of his friends have just completed a shanty, and they have good times in it. W. DOLPHIN, Harrison, N. J., wants to know where he can buy Angora goats. Let him write the editor of "Pets and Animals," Springfield, Ohio.—PRESTON MASON, Warren, Mich., with the help of his brother, is collecting insects and now has about 200 beetles, 100 butterflies, and fifty moths, besides a few other insects. They are also interested in collecting cocoons and larvae.—STEVEN CLATTY, 25 Broad street, New York City, keeps rabbits. The cage in which he kept them was not strong enough, and one day one of the rabbits was killed. He wants to know how he can keep cats from sticking their paws into the cage, and what is the cheapest and best form of a cage for rabbits.—HARRY JOHNSON, R. F. D., No. 1, Alliance, O., raises Belgian hares for market and finds it a profitable industry for boys who go to school. He has about forty of the animals. He also traps and tames large hawks and squirrels. Last winter he caught a hawk which measured about five feet from wing to wing. He also raises Buff Plymouth Rocks and finds the Plymouth Rock a "beautiful breed." He wants to correspond with boys who raise Flemish Giants, which he understands are larger than the Belgian hares.—ENOCH TEAGUE, Le-moore, Cal., is another boy who raises Belgian hares. He has twenty five, and feeds them on citrons, wheat and alfalfa. He has five young hares that have just got their eyes open, and two blue ones.—JOSEPH JELLY, Jelly, Cal., wants boys to tell him how to make good trout flies.—G. HAROLD BURR, Lodi, O., owns a cow and a calf, and half an acre of pop corn from which he expects forty bushels of corn.—RAY J. BYART, Marlboro, Mass., has a full blooded Scotch collie named "Shep," twenty pigeons, and one little squab. He has also a Tiger cat named "Teddy." He takes care of seventy five hens and several hundred chickens every day, having to get up at six o'clock in the morning in order to do so, as he goes to school at half past eight. Ray is fond of hunting and is about to purchase a shotgun.—MARK PORTER, Newark, N. J., wants to know where he can buy a Texas pony, and suggests that if any of our readers live in a region where there are Texas ponies he would like to hear from them.—RAY HARLAND, Norman, Neb., wants the name and address of the publisher of the best book or magazine on ornithology.

The Crab that Needs a House.

A most amusing and curious creature is the hermit crab. He belongs to the biggest crab family that there is. There are thousands of different kinds of him, and hermit crabs can be found in all waters, from the cold north to the equator. The hermit crab is shaped like a prawn or lobster. His head and upper part of the body are covered with a shell that is harder than that of most other varieties of crab. But his unfortunate tail end is

soft. And, unhappily for the hermit crab, there is no delicacy that the other sea creatures love quite as much as they do that soft tail. Under these circumstances the hermit crab has had to become a householder. He searches for a snail shell, and when he finds it he investigates it a moment to make sure that there are no other occupants, and then he backs in with funny, threatening motions of his big claws. If the shell that he selects happens to be occupied by the snail or other rightful owner, the hermit crab drags it away to some safe hiding place and then calmly thrusts his mighty shears into it and eats the unlucky resident. Having thus simply cleared the premises, he gets in himself. Occasionally a hermit crab cannot find a suitable shell in his haste. Then he takes anything that is convenient. As a result, hermit crabs have been found living in all kinds of queer habitations. One was discovered living with pride and comfort in the bowl of a tobacco pipe. Many of them live in sponges. The hermit crab is afflicted with an infirm temper and a constant desire to change. Consequently it happens often that one hermit crab, meeting another hermit whose house he likes better than his own, will essay to take it by force. Then there is a battle at once. No healthy hermit crab in full possession of its mind and faculties ever refuses a fight. Sometimes the crabs will seize each other like bull dogs and hang on for hours, each trying to pull the other out of his house. The hermits come in all sizes. There are many so small that they can live in a barnacle shell. Another species loves to eat the tiny black sea snails out of house and home, and move into their miniature apartments. Others are so big that the biggest whelks of the sea have shells only just big enough.

The New York Aquarium.

If any of our boys are at any time in the city of New York they should not miss an opportunity of going to the New York Aquarium, located in Battery Park, at the foot of Broadway, and easy of access from any part of the city. The aquarium is in an old building built way back in 1807 by the Government. It was originally known as South West Battery, and after the war of 1812 was called Castle Clinton. In 1824 it came into the possession of the city of New York, and it was then turned into a place of entertainment and known as Castle Garden. It was here that Jenny Lind made her first appearance in this country in 1850. Here also were received General Lafayette in 1824, and the Hungarian patriot, Louis Kossuth in 1851. Afterwards it came to be used as a receiving station for immigrants. In 1891 it was turned into an aquarium, and opened free to the public in 1896. Here the visitor finds himself surrounded by great tanks of water, through the glass sides of which he may see specimens of almost every kind of fish that inhabit the waters.

Elephants for the Exposition.

Carl Hagenbeck, of wild animal fame, is making arrangements to import eight Ceylon elephants for the St. Louis Exposition in 1904. One of these is to be a tiny baby, said to be about thirty two inches high.

"Kill Your Dog and Buy a Pig."

An exchange says: "Kill your dog and buy a pig with the dollar you save on dog tax. The scraps you feed the dog would make the pig weigh three hundred pounds, and then you could sell it and give your wife the money." Yes, kill your dear old faithful, mindful, thankful, trustful dog and buy a pig. But when you come home after a hard day's toll don't expect that same pig to meet you two blocks away with a joyful little cry of welcome at every jump. Sometimes when you feel unusually "blue" and it seems as if the whole world was "knocking" against you, don't expect it to nestle up to your side and laying its head within your lap, wag out its unalloyed sympathy. Don't expect it to forsake its meal of "scraps" just for the privilege of being your companion on a lonely drive or walk. Don't expect it to do any of these "little things"—there's a vast difference between your most constant friend and a pig.—Our Dumb Animals.

FROM A PHOTOGRAPH OF HONEY COMB.

J. N. McCurdy, Bucyrus, O., sends us a photograph of honey comb, to show the mathematical exactness of the little busy bee in placing the cells in such form that there is not a particle of loss in space.

THE BOY'S POULTRY YARD

An interesting letter on poultry has been received from Arthur Belmont, New Dorchester, Mass.

When the combs and the wattles of your fowls are of a bright red color it indicates a condition of health.

Hugh Fike, Birmingham, Ala., is a chicken fancier, having brown Leghorns, light Brahmans and black Spanish. In three days he got three dozen eggs from fourteen hens.

If you are going to get an incubator this spring get one of approved merit, as there is a great difference in incubators. You will find little difficulty with a good machine.

A letter comes from far-off Hilo, in the Hawaiian Islands, from Joe M. Mideros, telling of his experience in the poultry business. He says eggs are selling in Hawaii at six for twenty five cents.

It is surprising to see how much fine charcoal little chicks will eat. Keep it, with fine grit, before them all the time. It is a necessity, and is one of the best stomach correctives you can find.

Ray Glynn, Lebanon, Mo., sends a recipe for making hens lay. Mix a pound of red albumen with a pound of red or black pepper. Put two teaspoonfuls for every twelve hens in a gallon of bran. Pour hot water on it and mix well.

Small chicks suffer much during wet weather and should be protected. They must be able to find a dry spot for their feet during the day and a warm, dry place to sleep in. During wet weather you may put a small piece of gummed camphor in a piece of cloth, tie it to a small stone and put it in the drinking water. It will be a fine remedy for colds. Teach the chicks to go upon a roost as soon as they are old enough to leave the hen or brooder.

We shall be glad to receive letters from our subscribers giving their experience in poultry raising this spring and summer. We have no doubt a good many hundred boys will try it this summer for the first time. We wish them all manner of success. From experience we know that it takes patience and study to succeed in this business as in any other. Don't start out on too big a scale. Be satisfied with small beginnings, treat your stock right, keep an account of what you pay out and what you take in, and see if you can't show a profit by next Christmas.

There is no business in the world for boys so pleasant and so profitable, considering the amount of time and capital required, as the poultry business. There is scarcely a boy but has sufficient room in his back yard for some poultry stock. Boys on farms of course have a great advantage over the city boy; but there is no reason why the latter, if he has a little yard, may not succeed. Our word for it, it will give him a great deal of pleasure and will teach him very much in the way of management and money-making that will not come amiss in after years.

The best food for the chick's first meal is hard-boiled eggs, mashed fine, shell and all, mixed with an equal part of bread crumbs. The second meal should be bread crumbs or small, fine oatmeal. Too much water and too much sand are bad for chicks. If a supply of fresh water is kept constantly before them there is no danger; but if they are allowed to go so long without water as to gorge themselves when they get it, it creates trouble. Dry food fed on the sand is all right, but when wet or damp food is thrown onto the sand or earth the chicks are apt to get too much of the sand. It is better to give them all their damp or mixed food in a clean pan or small feed trough, or upon a clean board. Don't give wet or sloppy food of any kind. Don't feed them with sticky, dough-like paste, for it is to them as uncooked bread dough would be to you. Have the mixed food as dry and crumbly as possible. One of the very best foods for young chicks is well-cooked corn bread made with an egg or two, some baking powder, and mixed with milk, either sweet or sour. When cold crumble feed for them. As they grow older you may give them broken oats, wheat, very small cracked corn and a little millet seed. Don't give more than one-fifth millet seed, for many young chicks are killed by having too much of it. After awhile they can eat whole wheat and broken corn. When old enough to eat wheat, half their food should be of wheat and corn. Oats and barley are not of much value to growing chicks unless they are either hulled or ground.

FREE We give the premiums illustrated and many others, for selling only 18 packages of our Superior Blue. Absolutely guaranteed for years. Send full name and address. We send post-paid 10 Super Blue to sell at 10c. each; also large premium list. When sold, return us the money and we send at once above beautiful ring carefully packed in an elegant push-lined case. Boys as Money Makers

THEODORE C. JOHNSON, Hawkinsville, Ga., planted three-quarters of an acre of land in cotton, his father having given him the land to till. The boy did the chopping and hoeing and part of the picking. He hired some of the picking done, paying for the work with his old clothes. He paid for the plowing with the money that he got from the sale of the cotton and cleared ten dollars, and one of these dollars he sent for THE AMERICAN BOY. He says: "It taught me a great deal about the cotton and gave me experience."—VILAS H. JACKSON, Colfax, Wis., worked hard on his father's farm all summer. Besides helping his father he planted and cultivated a patch of potatoes, and planted potatoes and pop corn for himself. When he sold his crop this fall he used all his money to buy clothes so that he could go away to school, excepting one dollar, which went to pay for THE AMERICAN BOY.—CARL KUENTZ, Cleveland, O., worked for the American District Telegraph Company last summer as a messenger boy, earning \$34.17. With this money he bought a wheel, and bought winter clothes for himself and his two brothers. He has fifty dollars in all in the bank. Carl is fourteen years old and goes to business college.—HARRY M. MERWIN, Durham, Conn., works every afternoon delivering papers to 140 customers, traveling twelve miles to make his rounds. He clears \$6.50 a week. In the summer he uses a wheel, and in the winter his father's horse. He has bought a piano and is about to begin taking music lessons.—LAWRENCE GULLING, Beckwith, Canada, has been making money tending a logging gate, earning fifty cents a day and boarding himself. He has also worked some in a sawmill and earned \$1.50 a day. In the last year he has earned \$40, all of which he has given to his parents. He has to cut wood for the house, feed the chickens, take care of two pigs and a horse and carry the water, and in addition to this goes to school two miles. He is thirteen years old. His brother, who is nine years old, earned \$43 last summer tending a logging gate.—WILLIE DETTRA, Royersford, Pa., made money to pay for THE AMERICAN BOY by delivering milk. He says every one in his family is interested in THE AMERICAN BOY.—PETER J. SCHROEDER, Mountain Lake, Minn., paid for his subscription to THE AMERICAN BOY by working a day at threshing, having received for it one dollar, and fifteen blisters on his right hand. He ought to enjoy the paper, and doubtless will, for we always enjoy most that which we work hardest for.—WILLIE CAMPION, Horton, Minn., sold twenty five subscription books in three days and is only twelve years old.—BENNY HORCUS, Rossville, Ill., won a suit of clothes from a clothing store for writing the best advertisement.—CRESECEY McCUTCHEN, Adairsville, Ga., fourteen years old, together with his brother, made \$28.50 selling peaches this last summer.—ROSCOE BAILEY, Ashmore, Ill., earned eight dollars last summer picking berries. He bought his own clothes during the summer.—GLEN J. NOGGLE, Snyderville, O., has three dollars in bank and his father owes him ten dollars. He has a calf a year old which he is going to sell and with the money buy a horse. His mother gave him two hens and he set them and got eight chickens, which he sold for two dollars.—WILLIAM MORGAN TORREY, Akron, Neb., seeing a statement in our paper to the effect that there was money in raising pop corn, planted an acre to rice pop corn, cultivated it five times and took good care of it. He sold 160 pounds, shelled for four cents a pound, and the rest in the ear for one dollar a bushel, the field netting him \$35.—C. EMERSON WATSON, Beaumont, Cal., worked during the last vacation on a hay press and made \$64. He gave his father part of the money and the remainder he spent on clothes. He is fourteen years old and in the Sixth grade in school.—FLOYD GROTEVANT, Utica, N. Y., has been working on a milk route where he has earned \$15. He also delivers papers, having earned \$11.50 at that. He has loaned ten dollars of his money and put ten dollars in the bank and bought a wheel.—OSWALD FRISCH, Calistoga, Cal., made \$30 picking grapes and prunes. He lives at the foot of a large mountain, and the only snow that he has ever seen was at the top of this mountain. He says: "Every Christmas I go to San Francisco, and watch the great, mighty, high-rolling, foaming waves crash on the rocks."—WALTER McDANIELS, a twelve-year-old Omaha (Neb.) boy, writes the Omaha Daily News telling how he has made money. In addition to carrying papers after school and shoveling snow during the winter, he has learned how to use tools, and with these made some bookshelves for his mother. The neighbors liked them so much that they gave him orders, resulting in the sale of three sets of bookshelves, for which he received four dollars each. He also makes tables and fancy boxes and doll houses, for which he receives money.

Ideas Count.

One of the first questions that is asked when a young man is to be engaged for any department of business is whether or not he has any ideas. Men with ideas are wanted, and the world seems to have comparatively little use for those who have no ideas; and "idea men" seem to be a new class in the business community.

Boy Journalists

A Successful Boy Journalist.

The position of editor of a department of a publication which has existed for forty years or more is an achievement seldom credited to a boy aged fourteen years; but Leonard E. Meyer, a very boy-like lad, who lives at Jefferson, Wisconsin, has occupied such a position for two years. In addition to this work, the lad has written extensively for metropolitan dailies and Sunday papers, and is a regular correspondent for a large number of the great dailies in the western states. The Jefferson (Wis.) Banner, a bright weekly, is the paper on which young Meyer has done his work as a local editor. On school days he devotes his spare hours to his newspaper work. His vacations are not spent in fishing and such employments as boys are wont to engage in, but to newspaper work. Except for a week during each year, in the two years last past, he has taken no vacation. As a matter of fact, these two weeks were also partly devoted to journalism, for he spent them with a brother, who is a Milwaukee newspaper

LEONARD E. MEYER, Jefferson, Wis.

man, and during nearly every day of the "vacation" the young editor found time to grind out one or more columns of copy for the big daily on which the brother occupies a place. To say a little more to the favor of the boy, his copy needed not nearly so much editing as did that of some men who had been on the staff for many years.

For two years the youthful editor has been local man on The Banner, and his work has been surprisingly satisfactory; and there are promises by word and letter in the little editor's possession, which he prizes very highly, telling him that when he gets ready he will have little trouble in getting "on" with a daily. Leonard is now a junior in the Jefferson High School, where he is among the leaders in his class.

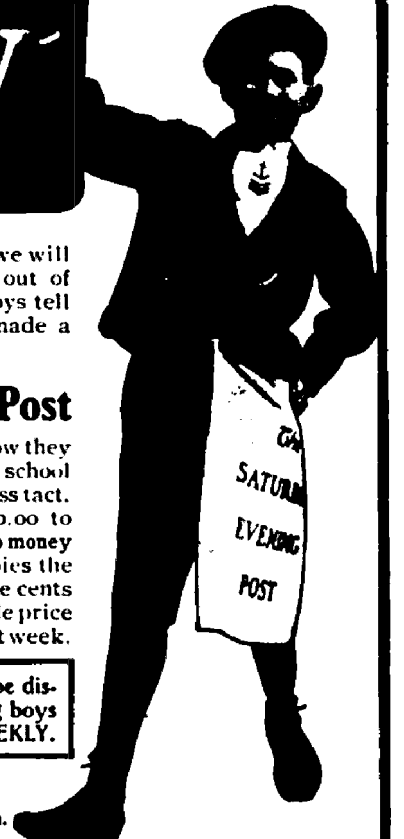

Advice to Boy Printers—Will S. Knox.

The boy printer will find it much easier to keep right if he starts right. With the printing business as with everything else, there is a right way and a wrong way of doing things. There should be a place for everything, and everything should be in its place. When new type is received, it should be at once carefully "laid"—each letter, figure, point and space put in its appropriate apartment or box. Do not throw the type into the boxes roughly, because their faces are delicate and easily damaged. When types are dropped upon the floor by accident, they should be immediately picked up and returned to their proper places. Tramping over them upon the floor destroys their usefulness, and allowing them to remain there is a sure sign of an untidy printer. When type is in a form, plane it carefully, and beware of striking the face of the letters with the quoin key or other iron or steel instrument. After a form is printed, clean it thoroughly with benzine. Never return type to the case unless it is thoroughly clean. Brass rules ought to be rubbed with a cloth and benzine before being put away, as they readily collect dry ink upon the sides, which in time impairs their usefulness.

The press should always be kept as clean as a pin. The ink plate should be kept clean and bright when not in use, and ink should never be allowed to dry upon it. The same may be said about the ink rollers. If they do not appear to have the proper "suction," or stickiness, before ink is applied, dampen them lightly with a sponge. Keep the press well oiled and covered when not in use. In presswork, have the "impression" just heavy enough to print evenly and clearly. Never let the type punch so that the printed sheet appears rough upon the back. Before taking an impression, be perfectly sure that

Boys who make Money

Any boy can do it

IN A DAINTY little booklet, which we will send to any boy free, twenty-five out of more than three thousand bright boys tell in their own way just how they have made a success of

SELLING The Saturday Evening Post

Pictures of the boys—letters telling how they built up a paying business outside of school hours—interesting stories of real business tact. Some of these boys are making \$10.00 to \$15.00 a week. You can do the same. No money required to start. We will furnish ten copies the first week free of charge, to be sold at five cents a copy. You can then send us the wholesale price for as many as you find you can sell the next week.

\$225 IN EXTRA CASH PRIZES will be distributed NEXT MONTH among boys who sell FIVE OR MORE COPIES WEEKLY.

If you will try it we will send the copies and everything necessary. The Curtis Publishing Company, 415 Arch St., Phila., Pa.

gauge pins and grippers are set properly and in no danger of mashing the form. In applying ink, be very careful not to use too much, or a blurred and smeared job will result. For instance, for printing cards, ink the size of two peas would be sufficient; for printing a circular or "dodger," as much ink as contained on the end of a knife blade would be necessary. In handling stock, always do so with clean hands. Give customers full count in all jobs done for them. Use good ink on all work; don't try to print a letterhead with a cheap news ink. Let all jobs remain spread out after printing long enough to become thoroughly dry. Wrap up the completed jobs carefully and always deliver in neat packages. Neatness always counts with a customer. It is good policy also to enclose a neatly printed card of your own in every package delivered; if your work is satisfactory, the card will remind the patron "to call again." In regard to prices, each printer should have a fair scale—and stick to it. To the cost of the stock, add sufficient to cover cost of composition, presswork, distribution and profit. Try your utmost to do good work—always seek to improve, and ask a good, fair price for your product. Don't be a "cheap" printer.

Visiting Cards Good quality, latest styles, for Ladies and Gentlemen, with any name desired, sent post paid, 50 for 25c., 100 for 50c. Samples and price list free. W. J. Howie, Printer, Beebe Plains, Vt.

Boys in Games and Sport

"Up in the World"

Photo by H. M. Harvey. Detroit, Mich.

best shots, the first going to Gustav Studel and the second to Charles Miller, both of New York City. Mr. Barrett writes us that he secured a dozen copies of THE AMERICAN BOY at the Boys' Congress held in New York, which, by the way, was attended by the editor of THE AMERICAN BOY, and that he sent them to the boys of the Bronx. "Your paper," says he, "is ideal. It strikes the heart of every real boy."

Mind Reading.

Mind reading is more in the nature of a trick than a game, but as anything that creates surprise or approaches the wonderful always proves attractive and entertaining, we introduce this plan of reading the contents of a folded paper by laying it across the forehead. The mind reader seats himself at a table at one end of the room.

Slips of papers, all the same size and shape, are then distributed among the audience, with the request that each one write thereon a short sentence, plainly and in English. While they are busy writing the mind reader or medium is preparing for the trial by first making sundry passes across his forehead, rubbing each arm slowly from shoulder to wrist, and then sitting calm and silent, staring at the wall. Each person folds his piece of paper carefully and they are all collected by some one who, standing next the medium, presses the first paper folded on the medium's forehead, who with closed eyes immediately reads the contents out loud, and then verifies it by taking, opening and re-reading it with his eyes open, and requests the writer to acknowledge it, after which the second paper is treated in a similar manner, thus continuing until every paper has been read and acknowledged.

The person who collects the papers is the medium's confederate, and should be selected from among the guests some time before the game is proposed, and thoroughly drilled, so as to make no mistakes. The confederate's part is very easy. It is simply to let the medium know what is to be written on his piece of paper, and be careful to leave that particular message for the last one to be read. On these two points depends the success of the experiment, for it makes no difference what the first message is. The medium reads out whatever the confederate was to write, and while pretending to verify it by re-reading with his eyes open he really is fixing in his memory the lines in the first paper, which he reads out as the contents of the second message. The second is read as the third, and so on through them all. —New York American.

Burning a Snowball.

You can mystify an audience by telling them that you can set fire to a snowball. Roll up the snow into a ball and show it to the audience. When they have returned it to you press it closer, and while so doing push into it a piece of crude camphor, leaving a very small end projecting. You will do this while you are pretending to roll the snow into a closer ball. Now hold the ball up, and lighting a match apply it to the end of the camphor. The ball will appear to be on fire.

How to Make a Stern Paddle-Wheel Boat Quickly.

The best fun in whittling and making things is to make things that will "get a move on" after they are made. Now, see here, boys, this isn't merely because you like the fun of seeing things go. It is more than that. It is the same desire that makes men successful in business life.

A man who is willing to waste his life in starting things—business affairs, for instance—that need him behind them all the time to make them go as they should, wastes much of his energy and life force in pushing matters that ought to go of their own motion after he has started them. The great business men of to-day meet success half way by planning things out so that, after they once start a business—whether it is a factory or a syndicate or anything else—it will go on of itself, and keep increasing, while they turn to still other matters.

It is a far cry from a great syndicate, apparently, to a stern paddle-wheel boat

A STERN PADDLE-WHEEL BOAT THAT WILL GO

SOMETHING THAT ANY BOY CAN MAKE WITH A CIGAR BOX LID—A RUBBER BAND—AND A JACK-KNIFE.

FREE TO YOU

This genuine Columbian Phonograph reproduces songs, speeches, etc., as finely as a 100 DOLLAR machine. We give it complete, with 5 LATEST RECORDS, for selling 36 of our jewelry novelties. Goods that sell—LADIES', GIRLS AND BOYS' can earn valuable presents, such as Sewing Machines, Ladies' Capes, Skirts, Hats, Gold Watches, Printing Presses, Magic Lanterns, Rifles, Etc. 50 OTHER PRESENTS TO CHOOSE FROM.

OF INTEREST TO YOU. READ THIS! Best Amusement for Boys

There is no end to the amount of amusements intended for boys, but the greater part contain some objectionable features. There is no subject which furnishes more lasting amusement and is more interesting to the boys than the art of magic. The writer is just completing the publication of a book on this subject which is valuable to boys of any age. This book contains many of the latest tricks known to the art, and are explained in the simplest manner possible. There is considerable difference between telling how a trick is done, and instructing one how to do it. One is theoretical, the other practical, and I believe that this production is of the latter variety. A majority of former productions on this subject have contained, almost exclusively, manipulations with cards, but the writer thought it advisable to omit all of such. No parents need hesitate in placing this book in the hands of their boys. Any one of the illusions contained in the book is well worth the price of the whole book. Some of the tricks require but little and most of them no apparatus whatever, and most boys will be able to make what apparatus is required. Price only 25c, pre-paid. Another book—a more extensive and elaborate production on this subject is sold at 50c. In this book—some parlor and stage illusions, requiring apparatus, are exposed which are sold elsewhere at from \$10.00 to \$50.00. Both books sent prepaid upon receipt of 65c. A descriptive catalogue of the contents of either or both of the books will be sent upon receipt of 5c to cover postage. Order now.

Vaccine and

—By Hugo Erichsen, M.D.

MOST boys have been vaccinated; but few know why, and many, having been vaccinated when infants, have forgotten all about it. Those that do remember it, have a hazy recollection of a stern old surgeon who performed the operation by scraping away a little bit of the skin from the upper part of their left arm, by means of a sharp instrument, which was followed by the application of what looked like pus, but was really vaccine. All of these lads have been told, in a general way, that the little operation was performed to protect them against smallpox, one of the most horrible diseases with which humanity is afflicted; but they are not at all certain that there was really any necessity for the painful proceeding and that it accomplished what it was presumed to do.

Without desiring to evoke argument, I can only say that after a careful study of the whole subject and a personal inoculation of hundreds of persons, I am firmly convinced of the efficacy of vaccination. Nor would it be difficult to convince others, if it were not impracticable to submit to them the enormous mass of favorable evidence that has accumulated, in the form of statistics, in the course of a

EDWARD JENNER VACCINATING A CHILD.
From a drawing by Professor Wm. Heinmueller.

patient. As they resisted the disease from this source, also, Waterhouse, being fully convinced of the efficacy of vaccination, remarked: "One fact in such cases is worth a thousand arguments."

The efficacy of recent successful vaccination has been proved over and over again. It will be noted that I say successful vaccination. Vaccination that does not "take" is no vaccination at all.

Lack of space prevents me from citing the many instances in which the protective power of vaccination has been proven beyond the shadow of a doubt. I will, therefore, only give one of the most recent ones. Dr. Wm. M. Welsch, who is in charge of the Municipal Hospital for Contagious Diseases at Philadelphia, states in "American Medicine," for July 12, 1902:

"Since the present epidemic began, about 125 persons, including physi-

Vaccination

Licentiate of the Royal College of Physicians and Surgeons, of Kingston, Canada. Foreign Associate Member of the Hygienic Society of France, etc.

Illustrations by courtesy of Parke, Davis & Co., Detroit, Mich.

cians, nurses, ward-maids, cooks, laundresses, and the like, have been continuously exposed to smallpox in the hospital, and not one has fallen with the disease. All those employed in the smallpox pavilion, except two or three who had the disease at an early period of life, owe their immunity to vaccination."

At the beginning, vaccine was frequently transferred from person to person, but of late it has been taken from heifers only, in order to avoid the transmission of some of the hereditary diseases, to which man is heir. A brief description of the method by which glycerinated vaccine is produced in one of the largest laboratories of the world may, therefore, prove of interest.

Only healthy heifers, about eighteen months old, and calves from one to three months old, are selected for the purpose. Each animal is subjected to a careful examination, on the part of a veterinary surgeon, and promptly rejected if it shows the slightest evidence of disease. Tuberculosis, or consumption from germ infection, is particularly guarded against. Animals pronounced healthy are next thoroughly scrubbed, from head to hoof, and taken into the operating room of the vaccine establishment. This is a large, well-lighted and well-ventilated apartment that is rendered thoroughly aseptic by the disinfection of floor and walls. As they are constructed of a solid material that will not absorb fluids, they are easily flushed with an antiseptic, or what may be called a liquid germ-destroyer.

A convenient contrivance, of which illustrations are given herewith, is employed to place the heifer on its back and hold it perfectly still, while its abdominal surface is being prepared for what is termed scarification by being lathered, shaved and thoroughly washed with sterilized water. By sterilized water is meant water that is absolutely pure and does not contain any disease germs.

Scarification is performed by drawing lines across the abdomen of the animal with a very sharp instrument, just penetrating the skin, but not cutting deep enough to draw much blood. So-called "Seed" vaccine, obtained from an animal that has undergone the process previously, is then rubbed thoroughly into the field of operation and permitted to dry.

After this the heifer is removed to the propagating room, or, as it might be called, the hospital of the institute, to await developments. Here the inoculated animals are kept in iron stalls, as shown in the illustration, for about five days. Trained men are continually on hand to keep this place scrupulously clean. At the end of the above named period the vaccine vesicles are generally fully developed and the belly of the animal looks as though it were studded with very small blisters filled with what resembles pus. The heifer is returned to the operating room, where its abdomen is thoroughly washed and disinfected, as before. The pulp of the vaccine

HEIFER READY TO INVERT.

century. I will, therefore, have to content myself with a mere mention of a few of the more prominent incidents in the history of vaccination.

Immermann states that long before Jenner introduced vaccination, it was known that cowpox (a disease of cattle similar to human smallpox) was communicable to man. In 1763 Hein noted that the accidental infection of individuals with cowpox protected them against small-pox. This is termed immunity. Von Humboldt, in the account of his travels published in 1803, spoke of this immunity among the natives of Mexico, and Brun noticed it in Beluchistan. Sutton and Fewster attempted vaccination in 1778, but failed. Benjamin Jesty, an English farmer, however, had successfully vaccinated his wife and children in 1774. But the discovery of the actual value of vaccination and its importance to the human race, is universally accredited to Edward Jenner, a British physician, who began his investigations in 1796 and published the result of them in 1799 and 1800. He noticed that milkers who contracted cowpox, by infection of their hands, did not get the smallpox, and this first attracted his attention to the subject, and formed the basis of his observations. On May 14, 1796, he had an opportunity to put his theories to a practical test by inoculating James Phipps, a lad about eight years old, with cowpox lymph. Six weeks later the decisive test was made, by vaccinating the boy with the virus of Smallpox, which as Jenner predicted, failed to produce its usual effects. A confirmatory experiment was not made until two years later, and then with equal success. In spite of the manifold objections at once raised against vaccination, the practice soon became widespread, extending from England to the continent and thence to the United States.

Dr. Waterhouse, of Boston, was the first person in this country who received vaccine virus in an active state from England, and with it he immediately vaccinated the members of his own family. About two months after his children had been vaccinated, he had them admitted into the smallpox hospital at Brookline, Mass., for the purpose of testing their immunity. Finding they did not take the disease from exposure to the germs of it, he had them inoculated with fresh matter, taken from a

is now carefully collected with a spoon-shaped instrument and placed in bottles that are known to be absolutely clean and germ free.

In the so-called biological laboratory, to which the virus is next taken, it is mixed with glycerin, which has the property of destroying disease germs without affecting the vaccine organisms. In order to do this evenly and thoroughly, this part of the process is accomplished by means of machinery. When microscopical examinations and tests on animals show that the vaccine is perfectly pure and reliable, it is filled in glass tubes, that are sealed to exclude the air, and stored in a refrigerator until marketed.

It might be well to say in conclusion, that heifers are subjected to vaccination but once and that their health is not impaired or lives endangered by the process.

"The Natick Cobbler."

Colonel A. K. McClure, formerly editor of the Philadelphia Times and a well-known figure in national and state politics, in his "Random Recollections of Half a Century," says of the "Natick Cobbler"—the late Vice President Henry Wilson, of Massachusetts:

"If I were asked by the young men of to-day whose record I would select from the most illustrious records written during the last half a century that they could study most profitably at this time I would name that of Henry Wilson, of Massachusetts, who rounded out a long public career on which there was not the semblance of blemish, and died when Vice President in the Vice President's room in the capitol. He was born in Farmingham, New Hampshire, on the sixteenth of February, 1812, with a parentage so obscure that I have never seen it noted in detail in any of the many biographies which have been written of him. The name of his parents was Colbath, and he was christened as Jeremiah Jones Colbath, but when he attained his majority he had his name changed by the Massachusetts legislature to that of Henry Wilson. His educational advantages were extremely limited, but he was a tireless student. He once told me that he had read over one thousand volumes that he had begged or borrowed while he was working for a farmer to whom he had been apprenticed to serve until he was twenty one years of age, when he started out on foot in search of work and to make a career for himself. He landed at Natick, Massachusetts, and found employment with a shoemaker, whose trade he acquired. By severe economy he earned enough money to gain an academic course. After a brief academic career he was compelled to abandon his studies and resume his trade as a shoemaker. In 1840 he came to the front and delivered a number of speeches in support of Harrison. He was then billed on the notices of the meeting as the 'Natick cobbler.'

A career like the one of this illustrious man conclusively proves that never before in the history of mankind have the doors of opportunity been so completely open to native worth and character as they have been, and are still, on the golden shores of America.

This obscure young man, by the sheer force of ability and integrity, rose from the cobbler's bench to a commanding and dominant position in the supreme councils of the greatest nation in the world, and was the companion of the immortal Ulysses S. Grant on the presidential ticket of the great republican party which was overwhelmingly victorious. Grant and Wilson—one a tanner from Galena, Ill., the other a cobbler from Natick, Mass. One the most illustrious and successful soldier of modern times; the other a spotless statesman and patriot, without fear and without reproach. Tanner and cobbler—soldier and statesman.

There is no doubt when we look upon the careers of men like these that much of the clamor against favoritism and classes is but mere moonshine, and that if a young man possesses ambition and character, the way is yet open for him to fulfill the utmost of his possibilities, to round out his destiny to its sublimest heights; and that instead of a malicious and unwilling world, if he but have caliber sufficient, and ample integrity and character, that men are glad and eager to recognize his ability and force, and to speed him to lofty pinnacles of honor and success.

MEN'S HAT NO. 2
In smooth finish. Colors: Black, Brown, Maple, Steel, and Pearl.

MIDDLETOWN HAT COMPANY, 52 Mill St., Middletown, N. Y.

A Boy Tried to Bribe Mr. McKinley.

HENRY S. PRITCHETT, PRESIDENT OF THE MASSACHUSETTS INSTITUTE OF TECHNOLOGY.

Our country is one in which there is entire freedom of speech. The newspapers discuss not only the public actions of our officials, but picture their private life and their individual failings with a completeness of detail known in no other land. In the main this newspaper criticism is doubtless a wholesome influence in our political life. But at times so much has been said of the shortcomings of our public men that many readers lose sight of their faithful service, and come to suspect the motives of all men in office.

When I resigned my government post under Mr. McKinley, the President, as he said a word of goodby to me, spoke of his interest in the boys of the United States, and of his wish that they might have a high appreciation of a life spent in their country's service.

"Some years ago," he remarked, "I had an experience with a boy of eighteen which made a deep impression upon me. I was in Congress at the time, and under the operation of the law an appointment to the Naval Academy at Annapolis was at my disposal. I was anxious to send a good representative, and looked about the district for a bright, capable boy, ambitious for a naval career.

"None of the candidates seemed promising, and I finally decided to submit the choice of a cadet to a competitive examination. A day or two after this announcement had been made and a date had been set for the examination I received a visit from a boy who desired the appointment.

"He was an alert, active, fine-looking fellow, who at once won my heart; and as he seemed most eager for the appointment and excellently qualified for the life, I sincerely regretted that I had not met him earlier, so that I might have given him the appointment outright. As it was, I urged him to enter the examination, and felt sure that with his fine preparation he would have no difficulty in winning the place.

"A few days later I received a letter from the young man, stating that he felt he would be most unhappy if he failed of the appointment, and requesting me to withdraw the announcement of the public examination and appoint him without competition. Enclosed in the letter was a check for several thousand dollars drawn on a New York bank to my order.

"Never," said the president, "in all my public life, have I suffered a moment of such humiliation as the reading of this letter cost me.

"When I felt that I could speak calmly," I sent for the boy, gave back to him his letter and his check, and explained that my relations with him were at an end.

"And now," said I, "let me ask you one question: What have you known of my life, public or private, and what have you known of other men in office, which could make you, at your age, imagine that a congressman of the United States would accept a bribe?"

"I was profoundly moved myself, and the boy was deeply affected, perhaps more by my manner than by the question. Amid his sobs he explained that he had desired a place in the navy beyond all other things; that he had read in some paper that all Congressmen accepted money for such appointments, and that he had consulted a politician in the neighboring village, who had assured him that the payment of such a sum as he had tendered would secure the appointment he sought.

"I sent the boy away," said the President, "with such words as I thought might minister to his self-respect, and might give him correct ideas of his relations with honest men. But the experience has ever since left a sore spot in my heart. I had never before realized how a bad man and a careless newspaper could pervert the ideals of a boy's mind.

"God knows there is enough of selfishness and greed in public life, as in all our human relations, but I wish there were some way in which boys in their school-days might be shown that these qualities are stumbling blocks, not stepping-stones, in the way to political success. I would have our boys taught that to serve the government faithfully is one of the noblest callings; I would like to see them led to some better appreciation of the service of good men in public life, and I would keep before their minds the fact that dishonesty and trickery work out the same consequences in political life, upon those who use them, which their practice brings in any other calling. I would have the boys of this country know that its public men are honest men, and that they have high ideals and noble ends in view.

BOYS Suspender-Garter

Suspender and Hose Supporter combined. Supports trousers and stockings from shoulder. No band around the body. No more "button off." Patent fasteners take the place of buttons on trouser's band. Metal studs in suspender ends spring into the fasteners. Small, light, easy to sew on (see small cut). Fasteners will not pull off or make buttons. Attach and detach easier and quicker. Worn either under or over shirt waist, as desired. When worn under, the studs carry the goods with the minute fasteners, just like hose supporters. No harm to the fabric. Elastic shoulder and garter part—latter renewable. Three sizes, small, medium, large. Price, 50 cents, with 1 set fasteners. Extra fasteners, 15c set, 2 for 25c. Send for sample or circular. The Invaluable Suspender Co., 58 Deahler Bldg., Columbus, O.

FREE 250-SHOT Air Rifle

BOYS we will give you this fine rifle—which shoots 250 times with one loading—absolutely without a cent of cost to you if you will sell 25 packages of Dr. Hall's medicated court plaster or other novelties at 10 cents a package, outfit free. The rifle is the finest you ever saw and the work the easiest you ever did. Other fine premiums on same plan. Write for free outfit and catalog. **GIRLS TOO** can earn equally fine premiums for similar work. **TWO HOURS WORK** will get you your premium. Try it! It is easy and costs you nothing. Write at once and we will send free outfit and catalog. FULLERTON MERCANTILE CO., 240 Fullerton Ave., Chicago, Ill.

BUGLER DUNN AND THE SILVER BUGLE GIVEN HIM BY QUEEN VICTORIA.

A Nation's Tribute to a Boy Hero—^{Joseph} Callister

With General Buller on his perilous march to Ladysmith during the Boer war was Bugler Dunn, a lad of fifteen years, of Manx birth and parentage. His father, a soldier in the British army, had received two bars for bravery in two engagements. The son's ambition was realized when he was accepted as bugler in the First Royal Dublin Fusiliers.

When Buller reached the Tugela for the first time, bugler Dunn's regiment was part of the advance guard of his great army. The intrepid Boers were strongly entrenched on the opposite side of the river waiting the advance of their formidable foe. When the English general ordered the attack, the young bugler ran ahead of the first officer of his regiment, crossed the river before the rest, and running up the opposite bank, put the bugle to his lips to sound the advance. Just then the Boers fired their first volley of shot and shell into the face of the enemy. The young bugler was hit in the right hand by a bullet, the bugle fell to the ground, but quick as thought he caught it up with his left and sounded the advance. His regiment, encouraged by such heroism, cheered lustily and rushed on, only to meet defeat.

After the smoke of the battle had cleared away, bugler Dunn was sent to the rear with his hand bandaged, and later was sent back to England on the first boat and placed in the British hospital at Netley. There he was visited by Princess Christian and Princess Henry of Battenberg.

When the story was told to Queen Victoria she requested that the boy be brought to Osborne House. The noble queen gave him a motherly welcome, presented him with a silver trumpet, and expressed a

wish that he might have a successful military career. Bugler Dunn, of Tugela River fame, thus became the youthful hero of England, and also of the English speaking world.

In 1900 he visited his native island. He then had £300 in the bank, the accumulated gifts of his admirers. A wealthy Brighton lady promised to give him a present each year on his birthday, and has kept her promise. One of the gifts bestowed is a fine goat. This goat has become a great pet with the drummer boys in the regiment to which its young master belongs. Opportunity came to this Manx boy to make himself a hero, and he embraced it. Opportunities of a different kind present themselves to each individual today to make himself a hero in honesty, benevolence and manly virtue.

"Frenchy"

(Continued from page 78.)

child told how deeply the talons were tearing into her flesh.

Seizing a big rock, without stopping his progress, "Frenchy" fairly flew onward, climbing with the lithe nimbleness of the tiger. When he was near enough to risk hurling the stone without endangering the child, he gathered all his strength and flung the rock with fearful energy at the bird. With a scream of pain, the gigantic creature loosened his clutch on the child, who fell crashing through the bush to the ground, while the wounded bird soared away.

"Frenchy" lifted the child gently in his arms, shivering as he saw her scratched, torn face, and the ugly wounds in her shoulder showing through the torn white dress. Carefully he picked his way down the steep mountain's face to the path, and then, more swiftly, he hastened toward the Dalton's cottage.

As he came in sight of the house, the trap with its load of gay picnickers drove up. At sight of "Frenchy" and his burden, Mrs. Dalton leaped from the trap and sprang toward him with a cry of anguish. Rose came running from the piazza, forgetful, for once, of the groom, and filled with terror at her own negligence and its possible consequences. At the same moment Bridget appeared and added her loud exclamation of distress to the general confusion. It was "Frenchy" who sped away to bring the physician.

After all was done, Mrs. Dalton's white lips asked, "Will she be all right, doctor?"

"I think so, madame. But it was a narrow escape. That boy there saved her life," he said, pointing to "Frenchy," who, in the confusion had followed the doctor into the house and stood breathlessly watching his every movement. He had utterly forgotten that his clothes were torn nearly off, and that his face and hands were bleeding. He started guiltily as the doctor called attention to him.

"I think he will be my next patient, Mrs. Dalton. His wounds must receive immediate attention."

It was Bridget who hastened away to prepare a room for "Frenchy's" reception, and to bring the warm water and the bandages which the doctor ordered. When the physician's work was finished, it was Bridget who brought the boy a delicious luncheon, with dainties enough to have made a well boy sick.

When Mrs. Dalton came into his room a little later, she took his bandaged hand in her white, jeweled fingers, and held it silently for a moment.

"I thank you, 'Frenchy,' I should have had no baby Bess tonight but for you."

"I think I be dead if you not give me some dinner one day!" he answered, impulsively.

Stand Erect—Frederick E. Burnham.

Occasionally, while passing the navy yard at Charlestown, I have paused for a moment to admire the splendid bearing of the sentinels on duty. There is something inspiring in their erect figures, and one needs not to be told that they are all attention and alertness, ready for instant action.

It is the want of this soldierly carriage and alertness that bars many a young man from the more desirable positions in the business world. We see them on the street corners, their hands in their pockets, leaning against anything they can find for support, the while grumbling about the hard times and the impossibility of securing employment. Their very attitude is a warning to any business man, telling him as plainly as though they had spoken—don't employ me; I'm tired; I'm willing to draw a salary, but I don't like work.

Some time ago a business acquaintance was telling me his experience in securing the services of a capable office boy.

"I inserted an advertisement in one of the daily papers," he said, "and when I arrived at my office the following morning there were four boys before the door awaiting my coming. Before I unlocked the door I had made up my mind that there were three of them who would not be wanted under any circumstances; the fourth one interested me.

"One of the three was leaning against the door, smoking a cigarette; another had his hands in his pockets, the while admiring the combination of dust and mud on his shoes; while the third one was standing on one foot, his coat-collar turned up and his hat pulled down over his eyes. The fourth one was standing erect, awaiting my coming with interest.

"I admitted this last one, at the same time telling the others that their services would not be required. A few questions on my part satisfied me that he was the boy I had been looking for, and I have not been disappointed in regard to him."

Business men the world over are constantly on the watch for that boy or young man who stands erect, walks with strength and vigor and is ready for instant action. It is a sign of ability and push that business men are not slow to recognize.

Stand erect!

What is the matter with the American boy?

There is nothing the matter with the American boy. He is all right as he is so long as his home and his school are all right.

Address all communications for this department, Uncle Tangles, care American Boy, Detroit, Mich.

Rules to be observed: Write in ink and on but one side of the paper. Sign your name to every page. Write your address in full on one page. Send answers with all new puzzles to be printed. Send original puzzles only. We cannot reply personally to letters.

J. Eustace Guest, Island Pond, Vermont, wins the prize for best lot of orig-

inal puzzles pertaining to Christmas and New Year.

Erval J. Newcomer, Palo Alto, California, wins the prize for best list of answers to November Tangles.

New puzzles or answers or both were also received from the following:

C. D. Salisbury, Charles C. Curtis, H. H. Smith, Harley Cannon, John L. Cape, Roscoe P. Strough, Otis D. Welsch, Harold Mortimer Case, Alonzo V. Heeter, Frank M. Holloway, J. B. Tiffany, Jr., James Irving Finnie, Chester G. Springer, Albert H. Heiby, Harry J. Button, Ragnar Lunell, Harry F. Blanchard, Kent B. Stiles, Burton F. Jennings, Harold E. Norris, Gordon Andrews, Robert Raymer, Walter T. Horton, Morris A. Bealle, Frank Miller, Harry H. Vannatta, Nels Kindgren, William B. Wrenn, Jr., Wyman brothers, and H. L. Basch.

A prize of two dollars will be given for the best list of answers to this month's Tangles received by January 29.

A new and interesting book will be given for the best lot of new and original puzzles received by January 29.

—J. Eustace Guest.

2. STORY OF THE STARS.

Build up the two Christmas stars from the seven-letter words that complete the following sentences:

If all the Tangles and their 3.....4 sought to 9.....10 their appetites at their uncle's table as a 11.....10 to the holidays, just think of the number of 1.....2 it would take to supply them all, and the many 5.....3 to divide the birds properly. And then think of the quantity of 7.....8 it would take to cover the boys' laps and the girls' new 6.....2 to keep them clean! But later, when the 6.....1 came on, with its various kinds of 5.....4 and many kinds of pudding, including 11.....9, followed by 12.....8 and 12.....7, wouldn't we be a jolly company? —Tom A. Hawk.

3. DOUBLE ZIG-ZAG.

The left side zig-zag spells what schoolboys and girls receive at the holidays; the right side, a month in which one holiday comes.

1. Founded in truth. 2. The ship of the desert. 3. Stomach-ache. 4. The four-spot in playing cards. 5. A rudely carved image made and revered by Alaskan and other Indian tribes. 6. A place of confinement. 7. The emblem of peace. 8. A trap. —Kent B. Stiles.

4. ILLUSTRATED REBUS.

A splendid motto for all American boys.

—Queen Zero

5. CHRISTMAS TEXT.

One word from each of the following bible verses will give a Christmas text from St. Luke:

Matthew vi. 38; Ezra vi. 5; Ezekiel xxxvi. 33; Acts xix. 34; Job xv. 7; 1 Timothy i. 15; Proverbs xxvii. 1; 1 Peter ii. 24; Revelation xli. 26; Genesis iv. 17; 1 Kings xvi. 27; 1 Chronicles xii. 8; Proverbs xxiv. 5; II Samuel xxii. 3; Zechariah ii. 8; Daniel ix. 13; Philippians i. 21; Amos vi. 4; Deuteronomy v. 11. —J. Eustace Guest.

6. PATRON SAINT PUZZLE.

The initial letter of each of the following works and characters in the works of Charles Dickens is to be written in the correspondingly numbered square. Use the first initial only, as "F" in "Florence Dombey." Then reading the letters in the squares by the king's move in chess, using each letter as many times as needed, find two names of the patron saint of Christmas.

1	2	3	4
	5	6	7
	8	9	10

1. The work in which Bill Sikes appears. 2. The lady whom Mr. Lillyvick, the collector of water rates, married. 3. The beautiful Christmas story in which Tiny Tim appears. 4. The gambler who won all the money from Little Nell's grandfather at the "Valiant Soldier" Tavern. 5. The work in which Arthur Clennam weds the heroine. 6. David Copperfield's second wife. 7. The work in which the Cheeryble brothers appear. 8. An uncomfortable character in "David Copperfield." 9. Mr. Pickwick's

About four years ago, I made up my mind to become an electrician. Not seeing my way clear to attend a technical school, I enrolled in the Electrical Engineering Course, and began my studies while still attending high school. Before completing the Mechanical Drawing Division, I secured my present position as assistant draftsman in the electrical department of the National Steel Company, at a good salary, which has since been considerably increased. I also have an excellent opportunity to learn more about my chosen profession.

WILL H. GRAY, 410 Pike St., Youngstown, Ohio.

servant. 10. The work in which Sidney Carton appears. —Frank Holloway.

7. HOLIDAY ACROSTIC.

Each word contains the same number of letters. The initials spell a holiday.

1. The largest city on the Loire. 2. A town of 23,000 population, in eastern France. 3. A large lake in Sweden. 4. A river and sea of China. 5. A town of 21,000 population, on the Seine. 6. A famous mountain. 7. A sea made famous by Moses. 8. An island compartment of Italy. 9. The European river that runs through the most countries. 10. The city where King George dwells. 11. A town and district of China. —Nels Kindgren.

8. CHRISTMAS WHEEL.

The tire from 1 to 9, reading to the right, spells something in common use at Christmas.

The spokes are as follows: 1 to 10, part of a sailing vessel; 2 to 10, abbreviation for this month; 3 to 10, a religious denomination; 4 to 10, to try; 5 to 10, to plunder; 6 to 10, to prepare for publication; 7 to 10, to blow a horn; 8 to 10, to leave out; 9 to 10, a cardinal point. —C. D. Salisbury.

9. COLLEGE COLORS.

What colleges, academies, seminaries and universities of the U. S. have adopted the following colors?

1. Mauve. 2. White. 3. Gold. 4. Gold and Silver. 5. Black and Gray. 6. Cherry and Silver. 7. Scarlet and Cream. 8. Dark Green. 9. Steel and Garnet. 10. Continental Blue and Buff. 11. Old Gold and Purple. 12. Dark Blue. 13. Light Blue. 14. Royal Purple. 15. Crimson and Gold. 16. Gold and Peacock Blue. 17. Orange and Dark Blue. 18. Dark Blue and Yellow. 19. Red and White. 20. Red and Black. 21. Red and Blue. 22. White and Blue. 23. Gold, Silver and Black.

What are the "colors" of the following institutions of learning?

24. Yale. 25. Harvard. 26. Vassar. 27. U. of Mich. 28. U. of Kansas. 29. Princeton. 30. Williams. 31. Armour Institute. 32. Bryn Mawr. 33. Vanderbilt. 34. U. S. Naval Academy. 35. Wabash. 36. U. of Wis. 37. U. of Chicago. 38. Brown. 39. Boston U. 40. Columbia. 41. Cornell. 42. Amherst. 43. Lehigh. 44. U. of Minn. 45. U. of Ill. 46. Union. 47. Iowa. 48. Leland Stanford, Jr. 49. Tufts. 50. Purdue. —Harold Mortimer Case.

10. POPULATION PUZZLE.

Use the 1900 census.

Add the populations of the following U. S. cities: The largest city in the state ranking first in population; the second largest city in the second largest state; the third city in the third state; the fourth city in the fourth state; the fifth city in the fifth state; the sixth city in the sixth state; the seventh city in the seventh state; the eighth city in the eighth state; the ninth city in the ninth state, and the tenth city in the tenth state. To this sum add the populations of the capitals of the same states. Subtract this total from the sum of the populations of the largest cities in these states. From this subtract the sum of the populations of the second and third largest cities in the U. S. From this remainder subtract the population of the capital of Portugal. Divide the remainder by the rank of St. Louis among American cities, and obtain the rank of the city of Memphis, Tennessee, among the cities of the U. S. —H. H. Smith.

A Heart of Gold.

(Continued from page 82.)

motherly efforts to protect the boy from further pain. Against his conscience he gave the clown a hope.

"You are right, Jimmy," he said, "rest and good nursing will do wonders. There's no telling when he——" then he broke off. He could not deliberately lie, not with those dark, earnest eyes of Joe's full upon him. "I'll be back soon," he said abruptly, escaping from the bedside.

From that day the questions began. "When will I be well?" "Fore long, boy," Jimmy answered. "Jes' you be good an' quiet an' it'll come out right."

He said this so often that he began to believe it himself. "Soon as you are well we'll give up this clown business," he volunteered earnestly, proffering with gladness what had once seemed a great sacrifice. If it would but bribe Joe to stand on his feet again.

The anxious, questioning look that came to Joe's eyes frightened Jimmy. Did the boy feel that he could never get well? Jimmy shook with panic, but Joe only said:

"Never mind, daddy. I don't care so much about the paint and tricks now. As he turned his face away his lip quivered.

It seemed a long time since he wanted to take care of daddy, and now it looked as if daddy must take care of him forever.

THE AMERICAN BOY

THE LEADING BOYS' PAPER OF AMERICA

Entered at the Detroit, Mich., Postoffice as second-class matter.

The American Boy is an illustrated monthly paper of 32 pages. Its subscription price is \$1.00 a year, payable in advance. Foreign subscriptions, \$1.50.

New Subscriptions can commence at any time during the year.

Payment for The American Boy when sent by mail, should be made in a Postoffice Money-Order, Bank Check, or Draft, Express Money-Order, or Registered Letter.

Silver sent through the mail is at sender's risk. Expiration. The date opposite your name on your paper shows to what time your subscription is paid.

Discontinuances. Remember that the publishers must be notified by letter when a subscriber wishes his paper stopped. All arrearages must be paid.

Returning your paper will not enable us to discontinue it, as we cannot find your name on our books unless your Postoffice address is given.

Always give the name of the Postoffice to which your paper is sent. Your name cannot be found on our books unless this is done.

Letters should be addressed and drafts made payable to The Sprague Publishing Co., Majestic Building, Detroit, Mich.

WILLIAM C. SPRAGUE, EDITOR.
GRIFFITH OGDEN ELLIS, ASSISTANT EDITOR.

H. & R. Calendar.

The Harrington & Richardson Arms Company, Worcester, Mass., whose advertisements are appearing regularly in the columns of THE AMERICAN BOY, have issued a pretty calendar for 1903, lithographed in twelve colors. They will furnish it free to any reader of THE AMERICAN BOY who will write to them for it, mentioning THE AMERICAN BOY, and enclosing six cents in stamps to cover postage.

A highly complimentary word for THE AMERICAN BOY has been uttered by Hezekiah Butterworth, known to everybody as one of the greatest of writers for boys. He says in a letter to the editor of date July 2: I like THE AMERICAN

BOY. It has an excellent name and publishes what boys most like to read. I am glad of the favor that it is finding with the public. It builds. It is just such a paper as the new public needs. There is a wide field for it.

Admiral Dewey Has a Big Heart.

Mrs. Wilkins, mother of the two boys whose excellent records for school attendance, accompanied by their pictures, was given in a recent number of THE AMERICAN BOY, writes that Admiral Dewey sent to each of her boys a beautiful letter of sound advice and congratulation. Admiral Dewey, she says, has a big, kind heart for the boys. The boys will treasure these letters as among their most precious possessions.

are given by SUCCESS than by any other magazine. Each month more than \$100 worth of prizes in Books, Guns, Cameras, Games, Athletic Goods, Musical Instruments, Printing Outfits, Household Articles, etc., are awarded to those who win in

SUCCESS CONTESTS

for Amateur Photographers, Stamp and Curio Collectors, Puzzlers, Amateur Journalists, Writers of Essays, Letters and Stories, Young Artists, in fact, our contests cover

Everything that boys and girls like to do. SUCCESS is a large illustrated monthly for every member of the family, but it contains more things of genuine interest to young folks than many juvenile publications.

KIRK MUNROE.

Announcement Extraordinary

What boy is there who does not know by reputation Kirk Munroe? Perhaps no writer for boys in this country has a better or wider reputation for his stories and books for boys than this writer. We are pleased to announce that Mr. Munroe will sail from America this month for Alexandria, Egypt, on a trip around the world during which he is to gather material for stories to be published serially in THE AMERICAN BOY. He proposes to visit Egypt, India, Ceylon, Borneo, China, Corea, Japan and the Hawaiian Islands. The first of these serials will begin to appear in THE AMERICAN BOY with the issue of December, 1903. Where shall its scene be laid? In which of the countries named are THE AMERICAN BOY readers most interested? The editor would like to hear from every one of you upon this question. State your preference and give your reasons. The most interesting of your letters will be published as guides to other readers who may not have made up their minds, and the result of this gathering of opinions will be communicated to Mr. Munroe upon his arrival at San Francisco next September. Thus guided, he will locate the scene of his first story in the country chosen by the greatest number. The story will run through six numbers. A second story by Mr. Munroe will begin six months later, and soon we shall ask the boys to choose the country that shall form the setting of this story. Mr. Munroe will drop us a line now and then during his trip, that our readers may not forget him nor the object of his travels. Perhaps no paper for boys ever engaged upon so important and so expensive an enterprise for the benefit of its readers as is this one, and we trust that every AMERICAN BOY reader will truly appreciate its importance.

THIS CYCLONE Sr. Camera FREE

Simply send us your name, NOT ONE CENT OF MONEY. We will send you 24 of "THE BEST" Skirt Supporters. Holds the skirt up, the waist down; gives the stunning "dip effect!" Nothing to sew on. Sells at sight. You can sell the 24 supporters in an hour's time among your friends at 25c each. Send us the money collected and we will send you the same day the money is received this 4 x 5 Cyclone Sr. Camera FREE from all complicated adjustments. Handsomely finished, compact and strong, equipped with especially constructed automatic shutters for time, instantaneous, and snap-shot exposures. We also give watches, clocks, jewelry, lamps, dishes, stoves, furniture, sewing machines, etc. We have the most valuable article and give best value in premiums of any house in the world.

Napoleon

A History Written for

CHAPTER XI.

NAPOLÉON CHIEF CONSUL—THE CROSSING OF THE ALPS—MARENGO.

THE legislative bodies having on November nineteenth adjourned until the following February, all power was now lodged in the three consuls and two small committees representing the Ancients and the Five Hundred. At the first meeting of the consuls Ducos and Sieyès proposed to Napoleon that he share with them in the division of \$160,000 which they (Ducos and Sieyès) had taken from the treasury and hidden away for themselves in anticipation of another revolution, but Napoleon flatly refused to touch the plunder. Of the three men, who were now virtually presidents of France, Napoleon was easily the master spirit, and it was well for his associates that they at once recognized it.

It will be impossible in the space at command to do more than outline the events of the days, momentous for France, that followed. Napoleon at once entered on the great task of restoring peace and prosperity throughout France. A regular system of taxation took the place of the income tax that had amounted to forced loans. The Bank of France was instituted. Tyrannical laws were repealed. Churches long closed were reopened for Christian worship—this last against the protest of Napoleon's friends and advisers. Twenty thousand persons were released from imprisonment. Exiles to the number of 140,000 were recalled and restored to the rights of citizenship, among them Lafayette and Carnot, the latter being at once placed at the head of the War department. Public improvements were inaugurated everywhere. Employment was given to men of all ranks. Rogues and speculators Napoleon despised, but practical men—men who could and would work, were sought for and given places of honor and emolument. Napoleon himself worked from twelve to eighteen hours a day. Of course the army was immediately strengthened, provisioned, equipped and paid. A new constitution was drawn up and submitted to the people, who ratified it by an almost unanimous vote, providing for three assemblies or legislative bodies and three executives to be known as Chief Consul, Second Consul and Third Consul, with Napoleon named as Chief Consul, Cambacères as Second, and Lebrun as Third. By the provisions of this constitution, which we cannot enumerate, the power of the state was practically lodged in Napoleon, the Chief Consul. In announcing the constitution to the people, the consuls declared that it was grounded on the principles of representative government, and the sacred rights of property, of equality, and of liberty. The French people saw the hand of Napoleon in it all, and recognizing that at last a great and strong man that could hold France to a settled course was at the helm, they rejoiced and looked to the future with unbounded hope.

On February nineteenth, 1800, barely four months after his return from Egypt, Napoleon took up his residence in the Tuilleries—the old home of the monarchs of France, threw open its splendid halls to pomp and ceremony, and himself adopted a dress of red silk. With consummate skill he grouped about him the ablest men of France, giving to each the post that he was best fitted to fill. Mutually jealous and suspicious of one another, each sought the favor of Napoleon and each did his bidding with more or less fidelity. There was the distinguished, though immoral, Talleyrand for foreign affairs; Carnot for the War department; Fouché, a profligate, but with a perfect knowledge of every faction and intrigue in France, for head of the police. Napoleon met all criticism with the cry, "Forget the bad in the past and remember only the good. We are creating a new era." Caste was abolished. Equality of all Frenchmen before the law was established. Every man must bear his proportion of the taxes, and every man was given to understand that he could aspire to the position for which he was fitted. It was about this time (December fourteenth, 1799) that George Washington died. On hearing the news Napoleon said, "The great light of the world has gone out," and at once ordered that crape be placed on the colors of France for ten days.

Having thus laid the foundation for peace and prosperity at home, Napoleon sought to establish that peace with foreign powers which alone would give tranquility to France; so on Christmas day, 1799, he wrote to King George III. of England, asking that the wars that had ravaged Europe for the eight years past might be put an end to. England could not forgive France for her revolution, and the answer she made to Napoleon's proposals for peace was that she could see no favorable opportunity at hand for making peace and that she could see none in the future, but through the restoration of the

PRINCE DE TALLEYRAND,
Minister of Foreign Affairs of France Under Napoleon.

Bourbon kings to the French throne. The answer of the French people was their finger pointed at the demand of the heir of the House of Stuart that George III. restore to him the throne of England, inferring that if the principle of legitimacy was to be recognized in England the English throne belonged to the Stuarts.

England's reply was virtually a declaration of war. On the very day of its receipt Napoleon issued a trumpet call to the armies of France, calling all the veterans who had ever served to form an army of reserve and making a levy of 30,000 new men. Already France had four armies in the field, stationed on her northern and eastern boundaries to hold in check the advance of her allied enemies, of which England and Austria were chief. Napoleon himself could not legally command the armies, being First Consul, but he could be present with them and, through his choice of leaders, could really be general-in-chief. As nominal general-in-chief he chose his friend Berthier. Massena, beloved by the veterans of many battles, had been sent to command the Army of Italy, which was now barely holding the last post of defense against the Austrians on the Italian boundary. Moreau, second in reputation only to Napoleon himself, was given command of the armies of the Danube and Switzerland, henceforth to be known as the Army of the Rhine, composed of 150,000 men. The army of reserve, composed of the old veterans, was to rendezvous at Dijon, ostensibly to support Massena and Moreau. But a far deeper plan lay in the brain of the First Consul, as yet known only to himself. While the Austrians were laughing and jesting over the little force at Dijon, troops were marching in every part of France on the roads leading thereto. The Army of Italy was in dire straits. That portion under Massena was besieged in Genoa by the Austrian General Ott. Nice was in the hands of the Austrian General Melas who, with 30,000 troops, was preparing to enter France, join the Royalists and win an easy victory. As stated, Napoleon had a secret—a tremendous, dazzling secret; none other than a purpose and plan to climb the seemingly impassable Alpine barriers of snow and ice and, rushing down like an avalanche into the plains and valleys of Italy, come upon the Austrians in the rear. The name of Napoleon, already world-renowned, was about to shine with an almost supernatural light. A Russian army a short time before had tried to scale the Alps and had failed after losing half its number. Napoleon was to creep with an army equipped with all the heavy munitions of war up and over giddy heights where only the most intrepid mountaineer dare make his way. He was to spring suddenly from these mountain fastnesses and overwhelm an enemy proud, victorious, and outnumbering his own; this, too, with an army two-thirds of whose number had never seen a shot fired in earnest.

On May seventh Napoleon appeared at Dijon, spent two hours in reviewing some 8,000 half-clad troops, then hastened to Genoa, where he received a report from a trusty officer who had explored the passes of the mountains. Napoleon asked, "Is it possible to pass?" The reply was, "The thing might be done." "Very well—then it shall be," came the prompt and decisive rejoinder.

Assembling the Army of the Rhine and the reserves of Dijon, Napoleon divided his force into four divisions which were to cross by four different routes. He himself took command of the main division of 35,000 men who were to perform the

Bonaparte

Boys by the Editor

herculean task of transporting themselves and the heavy artillery over the huge barriers of the great St. Bernard. The start was made May fifteenth, and in one week the prodigious task was accomplished. Cannon were grooved into the trunks of trees and hauled by the men—often a hundred to one cannon. Gun carriages, taken to pieces, were strung on poles and carried on men's shoulders, the wheels being bound to the backs of mules. Knee deep often in snow and ice, they pushed on and up through freezing cold and on the very brink of deadly precipices. Says one historian: "Extraordinary was their order, wonderful their gayety, astonishing their activities and energy. Laughter and song lightened their toils. Indeed, they seemed to be hastening to a festival." One little fort, at Bard, stuck up on the mountains offered resistance, but a goat path was found leading up and around it over which the army passed with immense difficulty. After five days Napoleon halted on the summit of the mighty St. Bernard at the convent of the Hospitallers. Here good monks, with their famous dogs, were devoting themselves to the work of saving the lives of travelers in the great mountains. Napoleon, with his usual foresight and fatherly care of his soldiers, had provided these monks in advance with the means by which they could meet every soldier as he passed with bread and cheese and wine. Thus cheered, the soldiers of France, with shouts of joy, began the descent into the fair fields of northern Italy, and soon the four divisions of the army were pouring out of the mountains toward Milan.

As stated, one division of the Army of Italy, under Massena, was shut up in Genoa, and another, under Suchet, was holding the very last line of defense on the old frontier of France. These were almost ready to give up. Indeed, the garrison in Genoa were in a state of starvation, the soldiers eating their shoes and their knapsacks. Had they known that Napoleon was coming they might have held out a little longer, but they did not, so on June fourth they surrendered to the Austrians on the condition that they be allowed to march out with arms and baggage and join their comrades under Suchet.

Napoleon did not learn of the surrender for some days later. On the first of June Napoleon, with his whole army, crossed the Ticino, entered Milan and re-established the Cisalpine Republic. Quickly the French then took Turbigo and Pavia and threatened Turin. Melas, commander of the Austrians, learning of Napoleon's arrival, assembled his armies at Alessandria to prepare for the battle that was to decide the fate of Italy. On June fifth, Napoleon, not yet knowing that Genoa had surrendered, sent Lannes with a division to attack Ott and relieve Genoa. At Montebello, Lannes came upon a strong force of Austrians and a bloody battle was fought resulting in victory for the French and the capture of 5,000 Austrians. This victory won for Lannes the title, afterwards conferred upon him, of Duke of Montebello. Then Napoleon, having heard of the fate of Genoa, sent word to Suchet to cross the mountains and march on the Scrivia, and he himself halted with his army at Stradella. Here for three days he awaited the enemy, but as it did not come he gave orders to advance and led the army down on to the plains of Marengo.

On the evening of June thirteenth nothing separated the two great armies of France and Austria save the river Bormida. The morning of the fourteenth saw the Austrians crossing the river and marks in history one of the greatest battles that was ever fought. The Austrians numbered 36,000 and the French 16,000. For hours the battle raged so close and so deadly that at times the muskets of the opposing forces nearly touched. Before the

MAP ILLUSTRATING NAPOLEON'S CAMPAIGN
That ended with the battle of Marengo. The four crosses indicate the position of the passes by which the four divisions of the French army crossed the Alps, Napoleon's own division with the heavy artillery crossing by the Great St. Bernard.

superior force of the Austrians the French at last gave way and started in mad retreat leaving all their artillery excepting twelve pieces with the enemy. But the star of Napoleon was still ascendant. The French general, Dessaix, who had been separated at the beginning of the battle by half a day's march from the main body, suddenly in the midst of the rout appeared on the scene with his reserves. Riding up to Napoleon he cried, "I think this is a battle lost." "I think it is a battle won," said Napoleon, and immediately he sent in the division of Dessaix, at the same time riding along the lines of the fleeing columns, whirling his sword, and crying, "Soldiers, we have retired far enough. Let us now advance. You know it is my custom to sleep on the field of battle."

Dessaix's brave men rushed upon the proud and victorious enemy and at the first fire the heroic Dessaix fell dead. Napoleon, coming up at this moment, embraced his dead friend and comrade of many battles and exclaimed, as his tears fell, "Alas, I must not weep now!" Then mounting his horse he pressed on with his now reinspired soldiers and aided by a sudden dash upon the enemy's flank by the splendid cavalry of Kellerman won a hard earned victory. At ten at night, Melas, the aged commander of the Austrians, after once winning the battle but now suffering a disastrous defeat, assembled with difficulty beyond the river the remnant of his magnificent army, and the following day gave up to Napoleon all of Italy that France had lost during the latter's absence in Egypt. Before the smoke of the battle had died away Napoleon dispatched a swift messenger to the Emperor of Austria pleading for a general peace.

On the seventeenth of June the victorious Consul entered Milan and received a magnificent reception at the hands of the people. Then leaving the command of the Army of Italy to Massena he returned to Paris, reaching there July second, having been gone less than two months. Paris, and all France, unprepared for his victorious coming, for they had heard a report of his defeat, were beside themselves with joy. Bonfires blazed everywhere. Men and women shouted and sang in the streets, and in every corner of the Republic the name of Napoleon was repeated with extravagant notes of praise. Pitt, Prime Minister of England, on hearing the news of Marengo, said, "Fold up that map (referring to the map of Europe); it will not be wanted for these twenty years." On July fourteenth, a great national fete day in France, the heroes of Marengo, dust-covered and bearing their bullet-torn banners, entered Paris. As they marched on to the field of Mars the demonstrations of joy and affection that greeted them were overpowering. Napoleon declared that these were the happiest days of his life.

CHAPTER XII.

PEACE—REFORMS—CONSUL FOR LIFE— WAR WITH ENGLAND—CON- SPIRACIES.

The Bourbons now sought by bribes in the hands of priests and fair women to induce Napoleon to restore the Monarchy. Failing in this, they determined to kill him, and in this they were aided by many an ardent republican who feared his ambitions; but plots were discovered, bombs burst at the wrong moment, and all came to naught.

The Austrians, though beaten at Marengo and though invited by Napoleon to make peace, encouraged by millions of money sent them by England, determined to keep up the war. Napoleon sent three armies against them which, winning victory after victory, marched nearly to the gates of Vienna. Only then did Austria break away from her alliance with England and sign a treaty of peace (February ninth, 1801) by which the Rhine was fixed as the boundary of France and by which France gained, among other territory, Tuscany, and obtained Austria's acknowledgment of the Bavarian Republic and the Cisalpine and Ligurian commonwealths.

Napoleon now at thirty three, supreme in France and powerful throughout Europe, held the proudest position which any European monarch had ever enjoyed. England alone now standing out against him, he formed a coalition against her of France, Russia, Prussia, Spain, Italy, Switzerland, Denmark and Sweden. This was rendered comparatively easy, for England had provoked nearly every European country by claiming and exercising the right of search of neutral vessels on the high seas. But Lord Nelson, by his great naval victory off Copenhagen, sunk a Danish fleet, and Denmark suddenly lost her admiration for Napoleon. Then followed the murder of Napoleon's friend Paul, the Czar of Russia, and the coming to the throne of his son Alexander, who was the friend of England. Thus the friendship of Russia was lost. Then, Kleber, whom Napoleon had left in command in Egypt, having been assassinated, the English and Turks, under General Abercrombie, reconquered Egypt.

Napoleon perceived the hand of his arch-enemy—England—on every hand, pulling down as fast as he

bullded. On learning the news of the French defeat in Egypt, he exclaimed, "Well, there remains only the descent on Britain." With him, to think was to act; in the course of a few weeks he had assembled 100,000 men on the northern coasts of France, while at anchor in the channel rode an immense fleet of flat-bottomed boats awaiting a favorable opportunity to transport the French army to the shores of England. The English sprang like one man to the defense of their country. The old war dog, Nelson, rode the seas watching, with practiced eye, every maneuver. Then followed negotiations for peace and the Treaty of Amiens (March, 1802) by which each nation made concessions, and universal peace, for the first time in ten years, reigned. Englishmen now flocked to Paris to see the workings of a European republic. Napoleon was the center of interest. The palace of the Tuilleries, under the hand of Josephine, seemed only another Court of Louis XVI. Napoleon's labors at this time were prodigious. He was more than a peerless soldier; he was a peerless statesman, a peerless worker, and a peerless administrator of public affairs. He wore out one secretary after another and himself hardly took time for sleep. Among the many great projects planned and executed was the establishment of a national system of education, which began with the primary school and ended with the polytechnic—a system which has remained to this day and has done so much for France and for the world. The codifying of a uniform system of laws, a gigantic undertaking resulting in what is universally known as the Code Napoleon, was accomplished. This system was based upon the theory that all citizens were equal before the law, and it remains today the best fruit of the French Revolution and the basis of the law of our own state of Louisiana. Thus did Napoleon become a second Justinian. He planned innumerable public works—canals, roads, bridges, aqueducts, museums. He banished from the court the notoriously immoral. He shut the door of the palace against the courtesan and fixed a loftier moral standard for France. He doubled the products of the farm, cleaned and beautified the market places, championed the cause of liberty on the seas, encouraged manufactures, and by direct subsidies to home industry cut off foreign competition. No drone could live in this hive. Government securities rose to unheard of values, and when threatened with a decline in price he went into the market and fought the bears himself. He originated the Legion of Honor, meeting the criticism of those who declared that ribbons and crosses were mere child's rattles by saying, "Child's rattles—be it so; it is with such rattles that men are led." By this means Napoleon sought to distinguish the man, be he soldier or citizen, private or officer, who was an honor to his country and contributed to her prosperity and glory. So strongly did the Legion of Honor appeal to the people that even after the restoration of the Monarchy it remained.

Napoleon now made what he afterwards declared with truth was a colossal mistake, and that was the signing of the Concordat, by which church and state were reunited as before the Revolution. By it the Pope was given the right to appoint to church positions, and France required to pay from her treasury church salaries to the amount of \$10,000,000 a year. No excuse can be found for this in the light of history save one: Napoleon would become a king, an emperor, and this ambition led him to use this means of winning the favor of the Pope and of Catholic Europe; instead, he gained little more than the suspicions of his friends and the universal hatred of his enemies. There was nothing to gain, there was everything to lose. He was already the idol of the people—a people ready and delighted to do his bidding; and by this one act he incurred hatreds and suspicions that were a mighty factor in his final undoing.

On January second, 1802, Napoleon received the honor of election to the presidency of the Cisalpine Republic. The French Senate then, as a mark of national gratitude, offered to extend his term as First Consul, which had only fairly begun, to another ten years. Napoleon refused to accept it unless by the vote of the people. At once the Senate proposed that his term be extended for life, and this being put to vote throughout the nation received an almost unanimous verdict of approval. On May fifteenth, 1802, he was proclaimed First Consul for life, and not three months later the Senate by edict empowered him to appoint by will his own successor. By these steps Napoleon was rapidly becoming absolute sovereign.

Then came further mistakes. He interfered between contending factions of the Swiss Republic and virtually made himself the ruler of that liberty-loving people. During the Revolution the black inhabitants of St. Domingo, a French possession, had thrown off the French rule, and under the heroic Toussaint L'Ouverture had formed a Republic on the model of France. Napoleon, urged on by the white inhabitants of St. Domingo, sent an army to recover it, and with partial success, the brave black leader dying in a French dungeon. Thus was the champion of liberty himself becoming the tyrant.

Much that Napoleon was doing in the name of freedom was indeed contrary to the Treaty of Amiens. Under that same treaty England had agreed to give up the Island of Malta to the Knights of St. John, but she had failed to do so. Each nation, therefore, accused the other of not having kept the treaty, and each with some just ground for its complaint. Finally the English, urged on by an abusive English press and misled by an exaggerated report made by her representative in Paris, and stirred up by a French report printed in a Paris newspaper and said to have been authorized by Napoleon, that six thousand French troops might reconquer Egypt, and by the publication of a book presented publicly to George III. representing Napoleon as the murderer of prisoners at Jaffa and poisoner of his own sick, declared war upon France, May eighteenth, 1803, and before the news reached France—indeed before May eighteenth—two hundred French vessels and \$15,000,000 of French property were seized by England. At once Napoleon retaliated by arresting all Englishmen then in France, numbering more than 10,000 persons.

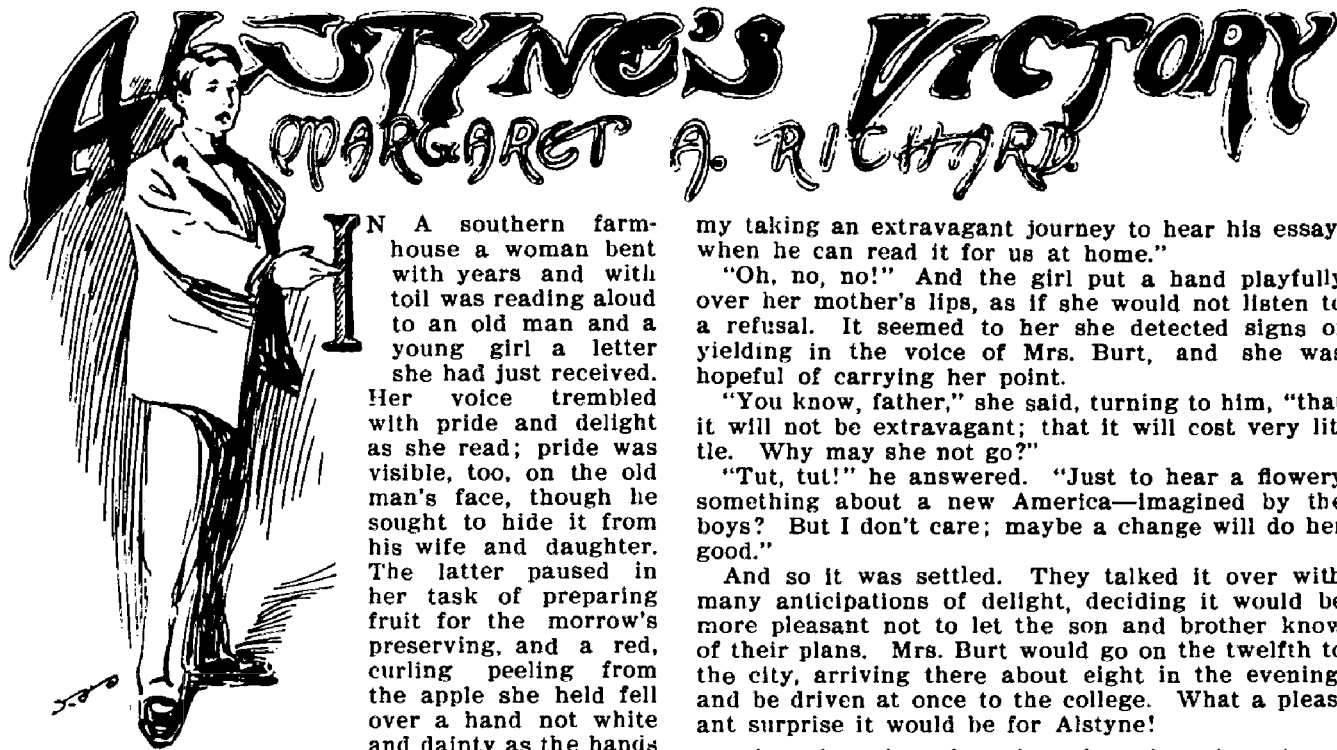

The act of England was inexcusable; that of Napoleon, in the eyes of monarchical Europe, and especially of England, was intolerable. England then seized St. Domingo and other French possessions. Napoleon saved Louisiana from the clutch of England only by selling her to the young republic beyond the seas—the United States. England then made war on Spain because she refused to join with her against Napoleon, but this drove Spain into the arms of France and put at the disposal of Napoleon the Spanish fleet and a million dollars a month in money. Napoleon marched into Holland and took possession of this part of the domain of George III., and, pouring his army into the south of Italy, occupied Naples.

Again preparations were made in France to invade England. Fleets were made ready and 160,000 men gathered on the northern coast. Across the channel beacons blazed on every hilltop, the English springing to the defense of their country with over half a million men under arms and five hundred ships of war cleared for action. Fifty men-of-war were being fitted out by Napoleon in various European ports which were to concentrate at a convenient point and sweep the channel, but the watchfulness of Nelson prevented the carrying out of the design and scarcely a ship was able to leave port.

Suddenly Paris was surprised with the news that a powerful conspiracy against the life of the Chief Consul had been discovered, with headquarters in London, in which one Georges Cadoudal was the leading spirit, supported by Moreau, the French commander of the Army of the Rhine, and Pichegru and other royalists, all aided and abetted by the foreign enemies of Napoleon. This news was speedily followed by the announcement of the arrest of the chief conspirators, and by the startling intelligence still later that a Bourbon prince, in many ways a good fellow, but guilty of treason and in the pay of the enemies of France, the duc d'Enghien by name, had been arrested near the borders of France, hurried to Paris, tried in a night and shot dead by the orders of Napoleon. The blood of the victim was royal blood, and a great horror spread throughout Europe. From this act Napoleon's name received a stain that was never washed away, and gave some excuse to posterity for calling him tyrant. On his deathbed at St. Helena Napoleon declared that he did the deed because it was necessary for the safety, the honor, and the interest of the French people at the time when the duc d'Enghien and his co-conspirators, by the admission of their chief, the Count d'Artois, had sixty paid assassins in Paris. A few days after the death of d'Enghien Pichegru was found dead in prison, and a little later Captain Wright, an Englishman, also lay lifeless in a French dungeon—mysteries that have never been cleared up, though the circumstances pointed to suicide. Moreau was brought to trial and banished for two years. Cadoudal, wearing about his neck a miniature of Louis XVI., and eighteen others were brought into court and were quickly adjudged guilty. All excepting seven who were of gentle blood were executed, the seven being banished. Thus did the "man of destiny" seek to confirm to himself the supreme power of France and to crush the hopes of the Bourbons and of monarchical Europe. Every important prince of Europe was now his enemy at heart, if not openly, but France was at his feet humble and submissive. He was now Consul for life, President of the Italian Republic, and virtually the ruler of Switzerland and Holland. But who, asked the people, shall rule when Napoleon is gone? What endless confusion must follow his death!

(To be continued.)

THE STORY OF NAPOLEON BEGAN IN THE SEPTEMBER 1902 NUMBER OF THE AMERICAN BOY. OUR READERS MAY OBTAIN COPIES CONTAINING THE STORY TO DATE BY SENDING US FIFTY CENTS. STAMPS WILL DO.

In a southern farmhouse a woman bent with years and with toil was reading aloud to an old man and a young girl a letter she had just received. Her voice trembled with pride and delight as she read; pride was visible, too, on the old man's face, though he sought to hide it from his wife and daughter. The latter paused in her task of preparing fruit for the morrow's preserving, and a red, curling peeling from the apple she held fell over a hand not white and dainty as the hands of idle maidens are, but

browned by indoor and outdoor labor and by exposure to sun and air. The rays of the lamp penetrated to the farthest corner of the big, unplastered kitchen, in which the stillness was unbroken except by the woman's voice as she read:

College.

June 7th, 1899.

My Dear Mother.

Just to think!—I will soon be home for the summer holidays. I can scarcely wait until the thirteenth to see you home folks, though I know the time will pass quickly, as we have so much to do between now and then.

Did I tell you that the Daughters of the Revolution have offered a prize—a gold medal—to the boy in college who shall write the best essay on the subject: "Young America?" We had to hand in our manuscripts last week, and from them the professors have selected the three they think best, which are to be read by their respective writers on the evening of the twelfth—just before the awarding of diplomas to the graduating class. A committee of ladies, members of the Daughters of the Revolution, will decide which of the three is deserving of the prize and the medal to be awarded that night. You will be surprised to learn that your humble servant is one of the fortunate three.

The boys are much interested in the contest, and anxious to know what the result will be. As for yourself, father and Sadie, I know what will be your hopes in regard to the outcome, but you must not set your hearts too much upon my success.

With much love for them, but the lion's share for yourself, I am,

Lovingly your son,

ALSTYNE.

"Pretty good for our Al!" said Mr. Burt, assuming an indifference he did not feel.

"Pretty good. Why, father," protested his wife (she had called him "father" ever since their boy came nearly twenty years before); "you should remember he won it over three hundred boys."

"Three hundred and twenty nine," corrected Sadie, who was always precise in her statements.

"I always knew," went on the mother, "that Alstyne would do great things if we gave him the chance. We must let him finish, father."

"Tut, tut! Are you not yet tired of tolling and scrimping for him?" And the man bent over to pinch the worn cheek of his wife as he added: "You are growing old and wrinkled planning and saving for him, when you ought to be spending something on yourself—ought to go off on a trip, or something."

At that Sadie sprang up, letting fall, as she did so, the pan of apple peelings; but she disregarded them entirely, and, kneeling before her mother, cried delightedly: "Oh, do, mother! Alstyne says he can scarcely wait till the thirteenth to see us, and he would be so glad if you would go to the city, and be at the college when he reads his essay. Please, mother!"

But Mrs. Burt shook her head. For years she had not been beyond the limits of their neighborhood, and felt she would be afraid in a strange place, among strange people.

"But Alstyne will be there," persisted her daughter, as though there was nothing to dread where Alstyne was, "and you need not go till the last day, and you two can come back together. Think of hearing Alstyne read his beautiful essay! I know it will be beautiful, for everything he does is as it should be. Is it not, mother?"

Mrs. Burt affectionately stroked her daughter's hair, as she answered: "We certainly have cause to feel proud of him, Sadie, but that is no excuse for

my taking an extravagant journey to hear his essay, when he can read it for us at home."

"Oh, no, no!" And the girl put a hand playfully over her mother's lips, as if she would not listen to a refusal. It seemed to her she detected signs of yielding in the voice of Mrs. Burt, and she was hopeful of carrying her point.

"You know, father," she said, turning to him, "that it will not be extravagant; that it will cost very little. Why may she not go?"

"Tut, tut!" he answered. "Just to hear a flowery something about a new America—imagined by the boys? But I don't care; maybe a change will do her good."

And so it was settled. They talked it over with many anticipations of delight, deciding it would be more pleasant not to let the son and brother know of their plans. Mrs. Burt would go on the twelfth to the city, arriving there about eight in the evening, and be driven at once to the college. What a pleasant surprise it would be for Alstyne!

At half past eight o'clock—the hour for beginning the commencement exercises—the auditorium of the college was very nearly filled. The rays from the electric lights overhead and on all sides flashed upon rich dresses and costly jewels, for the elite of the city were there. On the stage sat some prominent men of the state, the members of the college faculty, and those belonging to the graduating class, as well as the three students who were to compete for the medal.

Alstyne, handsome and manly looking, was letting his glances wander idly over the sea of faces before him, when a fellow-student touched him on the shoulder, and said with laughter in his voice: "Do look! Old country has come."

He turned in the direction indicated, and beheld an old lady, who seemed almost afraid of the vast assemblage of persons among whom she suddenly found herself when being escorted up the aisle. The common brown dress she wore, and the little plaid shawl which she never went without, even in summer time, seemed strangely out of place in that scene of fashion and beauty. Her bonnet, whose plainness was relieved only by loops of ribbon above the face, and by a scant bow under the chin, was not a *fin de siècle* affair, and caused smiles to ripple over the faces of thoughtless girls and women. She felt instinctively that she was attracting more attention than is usually given a newcomer, and looked vainly about for a vacant seat into which to sink and hide herself.

Alstyne, looking on, saw her being led almost to the very front; saw the young lady by whom she was finally seated—one to whom he had recently shown some attention—cast a meaning glance at her companion, then draw her dainty dress closer about her. His mother's eyes at that moment met his own, and the light of recognition illumined her face. She would have smiled a greeting, no doubt, but he turned quickly away, as if he did not know her. He did not mean to slight his mother, he told himself, but the fellow student who had called her "old country" was watching her, and might laugh should he now acknowledge her presence. He felt ashamed, whether of himself for his weakness, or of his mother's dress and appearance, he scarcely knew. He was debating the question within himself when his name was called, and he arose to face the audience.

He was so young compared with the two who were to compete against him, and there was something so attractive in his fresh and boyish appearance, that sympathy was at once enlisted in his behalf, and all listened attentively while he read. Without so winning a personality, however, he would have made his power felt—so thoughtful was his essay, so beautiful the language in which it was clothed, and so natural and earnest his manner of reading. Presently he came to a paragraph treating of the manhood of America, in which he said that youth is the time for decision as regards a life work, and expressed himself as grateful that so many noble colleges are accessible to the young men of our country, in which to make preparation for what they sought to achieve.

Then he paused for an instant, for something seemed to ask: "How came they accessible to you—a poor boy?" Like a flash came a picture of the farmhouse among the pines, and of the sacrifices they who dwelt there had made for him, that he might be prepared to make something of his future; of the mother's toil-stained hands and bent body; of the cheap dress and plain bonnet she had worn for so long, while he—what had he not had?

The paper fell to his side, and his voice became tense with feeling as he spoke of the mother of the American boy; of all she was willing to bear and

sacrifice to help her son to a place of honor in life. He knew then of whom he should have been ashamed a few minutes ago, and, forgetting all save that he would make amends to the poorly dressed woman who had borne him, he spoke such eulogiums of motherhood as brought tears to all eyes. The audience felt, and those who had read his composition knew that what he was giving expression to had never been put upon paper, but came spontaneously from the heart.

Mrs. Burt listened with feelings of mingled emotion. She knew that Alstyne must have seen her when she came in, but in her heart was no resentment for his not having recognized her. She heard the richly dressed young lady sitting next to her speak of him as a friend, and thought she could understand how his sensitive nature would shrink from having her know the woman at her side was his mother. She would not humiliate him; she would slip out quickly and quietly when the people began to stir, and never let him know her mother-heart was breaking because of this abyss which had suddenly shown itself as existing between them. She scarcely heard what the other two young men read; she scarcely knew when the diplomas were awarded to the graduating class; but she knew presently that the medal for the best essay was being presented to her son, and that he had never seemed more worthy of admiration.

The program was ended at last, and she turned her face resolutely toward the door, but could make no progress, because of the crowd about her. She did not see Alstyne come quickly down from the rostrum to make his way toward her; she did not hear when he asked the young lady to touch his mother for him, to attract her attention.

"Your mother?" she asked in surprise.

"Yes, my mother," he answered. "I would like to introduce you to her."

She leaned over, and touching Mrs. Burt on the shoulder, said respectfully: "Your son wishes to speak to you."

Then she acknowledged the introduction gracefully, and made room for the old lady to pass to the young man. Alstyne bent down and kissed her, then led her to the president of the college, with whom he was a favorite.

"This is my mother, Dr. Shuler," he said.

The president bowed low over her hand in greeting: "I am glad to meet the mother of such a son—a mother of whom he has just given a beautiful word-picture. It must have been a pleasure to you, Mrs. Burt, to be near him in his hour of triumph."

But, though they knew it not, Alstyne had triumphed over more than his fellow-students that night: he had gained a victory over self.

A NEW STORY BY HENTY

To Appear in America Only in

"The American Boy"

LAST December boys the world over learned that G. A. Henty, who during his life was the most popular of all the writers for boys, was dead, and in commenting on the fact THE AMERICAN BOY told its readers that there would be no more Henty stories. We were mistaken. A few days before his death Mr. Henty finished a story of 25,000 words. This story will comprise the last of the Henty books, of which there are eighty or ninety in circulation.

The publishers of THE AMERICAN BOY now have the pleasure of announcing to their readers that they have purchased of Mr. Henty's representatives the American serial rights in this story and that the story will begin in the March number of this paper and continue through the four succeeding numbers. We hope that the enterprise of the publishers will be received with enthusiasm by every reader of THE AMERICAN BOY, for, as it may be supposed, this story could be obtained by them only at the expenditure of a large amount of money. The story will appear in America only in the pages of THE AMERICAN BOY. It will appear in an English publication for British boys simultaneously with its publication in America. In a few weeks, therefore, English speaking boys all over the world will be reading the last of the Henty stories.

With this story to begin in March, and Kirk Munroe on his travels around the world seeking material for stories to appear in THE AMERICAN BOY beginning with December of this year, and the stories on hand from Harbour, Butterworth, Lisenbee, Ellis, and other distinguished writers for boys, we may justly claim that THE AMERICAN BOY is doing for American boys what no other publication in the world has ever done for them, that is providing for them the very best stories for boys that money can buy.

We are sure now that you are an enthusiastic supporter of THE AMERICAN BOY, and that you are urging your friends everywhere to subscribe and enjoy what you are enjoying and about to enjoy.

THE NEW STORY
BEGINS IN THE MARCH NUMBER

GEORGE WASHINGTON AND HIS HATCHET. SEE HOW GUILTY HE LOOKS!
FIRST PRIZE PHOTOGRAPH, BY WILLIS ELLIOTT, BUFFALO, N. Y.

GEORGE WASHINGTON'S SCHOOL DAYS

GEORGE WASHINGTON was born in the Washington homestead, at Wakefield, in Westmoreland County, Va., near the banks of the Potomac, February 22, 1732. When George was ten years of age his father died, and the task of the education and guidance of the future great man devolved upon his mother. When about twelve years old George entered the neighborhood school at Wakefield. He had already had some instruction at the parish school from a Mr. Hobby, who was the sexton of the Parish Church near Falmouth, on the Rappahannock. At Wakefield his teacher was a Mr. Williams, who had come from England, where he had been a teacher in Wakefield Academy in Yorkshire. Richard Henry Lee also went to school under this same Mr. Williams, as did also William Fitzhugh and Lawrence and Robert Washington, distant cousins of George.

While in Mr. Williams' school Washington drew up a code of rules of conduct. In these rules Washington pictures the boy whose manners should be avoided. Here is an exact copy, spelling, punctuating and all, of some of these rules:

"Do not Puff up the cheeks, Loll out the tongue, rub the hands or beard thrust out the lips or bite them or keep the lips too long open or Close.

Kill no vermin as Fleas Lice ticks &c., in the sight of others. If you see any filth put your foot Dexterously upon it. If it be on the cloaths of your Companions Put it off privately, or if it be on your own Cloths return thanks to him who puts it off.

Shake not the head Feet or legs rowl not the Eyes, lift not one eyebrow higher than the other wry not the mouth and bedew no man's face with your spittle by approaching him while you speak.

Put not off your cloths in the presence of Others nor go out of your chamber half drest.

SHIFT not yourself in the sight of others nor Gnaw your nails.

KEEP your Nails clean and short, also your Hands and Teeth clean, without showing any great concern for them.

WHEN you Sit down Keep your feet firm and Even without putting them one on the other or crossing them.

IF YOU Cough Sneeze or yawn do it not Loud but; privately and Speak not in your Yawning, but put Your handkerchief before your face and turn aside.

Spit not in the Fire nor Stoop low before it neither Put your hands into the Flame to warm them nor set feet upon the Fire especially if there be meat before it.

At Play or at fire it is good manners to give place to the last-comer, and affect not to speak louder than ordinary.

WEAR not your Cloths foul unript or Dusty but See they be Brush't once every day at least and take heed that you approach not to any uncleanness.

In your apparel be modest and endeavor to accommodate Nature rather than procure Admiration Keep to the Fashion of your equals Such as are Civil and orderly with respect to Times and Places.

BEING at meat scratch not neither Spit cough nor blow your nose except there be a necessity for it.

TAKE no Salt nor cut Bread with your knife greasy.

If you soak Bread in the Sauce let it be no more than what you put in your Mouth at a time, and blow not your Breath at Table but stay till (it) Cools of it Self.

Put not your meat in your Mouth with your Knife in your Hand neither Spit forth the Stones of any Fruit pye upon a Dish nor cast anything under the Table.

Put not an other bit into your Mouth till the former be swallowed let not the Morsels be too big for the jowls.

Cleanse not your teeth with the Table Cloth, Napkin, fork or knife, but if Others do it let it be done with a pick tooth.

RINCE not your Mouth in the Presence of others."

On Christmas day, 1779, the schoolhouse in which Washington had laid the foundations of his greatness burned to the ground, destroying the school-books, maps, etc., of Washington's school days. Schoolboys in those days wrote out in rude blank books maps, arithmetic tables and copies for practice in penmanship. This was largely because there were so few books to be had. About all the facilities Mr. Williams had were a big globe, a wall map, and a

geography as big as a family Bible. Each boy really had to write his own geography, and there is in existence the one that Washington wrote. Here is how he bounds America.

"America is bounded on ye East with ye Atlantic Ocean on the West with ye Pacifick Sea on the North without Bounds on the South by ye Megellanie Sea."

There are many pages of this geography. Some of them are filled with astronomy work.

As will be imagined from the rules of conduct we have quoted, Washington was a neat boy though not a fop. One of Washington's biographers, speaking of Washington's play, says that he could never endure trifling games such as marbles and tops. His delight was in a manly sort of game: jumping with a long pole, heaving heavy weights, running, wrestling, etc. In these he excelled. He early cultivated an accurate eye for measurement, and it is said that Mr. Williams was especially skillful in this and that a good part of his instruction lay in the measuring of distances with the eye. From Washington's manuscript books we learn that he studied arithmetic very thoroughly, even geometry and trigonometry. He left school just before his sixteenth birthday, the last months of his schooling being devoted to the study of higher mathematics and surveying.

The Twenty Second of February.

The first celebration of Washington's birthday is said to have taken place in Richmond, Va. That was during the life of General Washington. The following year the event was celebrated in Maryland and in several places in Massachusetts. After the War of the Revolution was ended and during Washington's first term as President, the twenty second of February was fixed upon for formal visits of congratulation, and balls were given to celebrate the occasion. By February 22, 1790, the day began to be widely celebrated, and the Society of the Columbian Order resolved forever afterward to commemorate the birthday of the "Illustrious George Washington." Soon after the War of 1812, public parades began to be given in honor of the twenty second of February, and the day has ever since held its place as one of the great days with American people at home and abroad.

First in the Hearts of American Boys—^{A sketch out} of memory

THE parsonage was but a mile from the farm homestead. Both were on historic ground. The Manor of Springton, of which they formed a part, was reserved for his own use by William Penn—the founder of Pennsylvania—when he offered for sale his land grant received from Charles II. The old homestead was called Springton Farm. Bordering its eastern edge ran the storied Brandywine. From a noble pool of its water the great wooden wheels of Springton Forge were driven, when in 1776 its trip hammers forged musket barrels for the patriot army.

Across Indian Run, and over Indian Town Hill where an Indian burial ground lies, down where the tick-tack and rumble of an old grist mill of 1756 responds to the romping swash of escaping water in its stone tail race, stands the parsonage. By its side on a fair sward, my father built a cottage schoolhouse, that the gifted daughter of our loved minister might have a place near her home to teach the children of the neighboring families.

It was during the "noons" of these school days, when I was a boy of nine that I met a grand old lady, tall, slender, dignified, with a face so kind, cheerful, encouraging that we who took our noonings loved to get her smile and have a word with her. She, with her two pretty granddaughters, annually visited our minister when the Brandywine Hills were loveliest in their summer clothing.

She was Mrs. Sarah Malin. With what interest, respect, almost awe, we greeted her; for our teacher had told us that when Mrs. Malin was a little girl she had known the great George Washington—the Father of His Country—and Martha Washington, his wife. She had been patted on the head by him and taken in the broad lap of his lady. She was far above all other women to us, save our own good mothers.

Two years later I went to school in her home city—Philadelphia. Once a month, on Saturday afternoons, I used to array myself in my very best and visit her home on Chestnut street. These visits were great treats, for there I had long talks with Mrs. Malin, and perhaps talks with her merry granddaughters added to the treat.

On these precious Saturday afternoons she told me stories of her early life that roused my patriotism and made my blood tingle. I remember her graceful presence, her face, and voice, and words as well to-day as when I was a lad in roundabouts, and plastered my hair as tight to my head as I could get it. It was the style in those days—the days of just half a hundred years ago.

She told me how, during the Revolutionary war—our war for independence—when she was a little girl, a party of British soldiers came into the front yard of her father's house and demanded something to eat. How her brave mother, with her arms bared, just from the bread she was baking, commanded them to stop where they were, and she would bring them fresh bread, but told them if they entered the house she would throw her whole baking in the fire.

They did not enter, but got the bread and went away without further molesting them.

She laughed as she told: "I remember that I was very angry at the sight of their red coats, and guns, and their tramping the grass in our front yard, and at their getting all our fresh bread. But I was not at all frightened; I was alongside of my mother. I remember thinking that if my father was at home he would knock them all down and throw them out of the yard."

But her fascinating, thrilling story was of when she, a girl of twelve, stood with twelve others, side by side with their good mothers, to give the Great Chief welcome and strew his path with flowers as he, on April 21, 1789, rode toward Trenton town and crossed its famous bridge.

"There were thirteen of us," she said, and her face lighted with delightful memories as she recalled the scene, "all dressed in white and wreathed with flowers. I was the youngest. Our mothers were with us, dressed in their very best and looking very proud and handsome. There were companies of militia with their guns, and officers with gay uniforms riding spirited horses; bands of music and plenty of drums. All the great families from the town, and the country about, were there in their gaily decked coaches, and crowds of men, women and children trigged out as for

GEORGE WASHINGTON.

a holiday. Our loved General was coming! He was on his way from his home at Mount Vernon to New York City, where he was to be inaugurated first President of the United States, on April 30, 1789. His road lay across the bridge in front of us—the wooden, covered bridge over Assumpink Creek, where twelve years before he had fought the Battle of Trenton, and whipped the British and Hessians and turned our once despondent people into glad ones.

"The women of Trenton had erected a great triumphal arch and decorated it richly with flags and flowers. On it was this inscription:

THE DEFENDER OF THE MOTHERS
WILL BE THE
- PROTECTOR OF THE DAUGHTERS.

"How the people shouted, the bands played, the guns rattled, the cannons boomed, hats rose in the air, handkerchiefs, flags, even bonnets waved, as

MARTHA WASHINGTON.

—From *Lewing's Cyclopaedia of U. S. History.*

Washington on horseback came out of the Trenton end of the bridge!

"How my heart throbbed and my cheeks tingled when I saw him sitting on his horse, bareheaded, his fine face in the bright sunlight covered with dust, his hat in his hand and bowing in his courtly dignified way to the people."

She rose as she spoke. Her tall figure grew girlish, her face earnest, her left hand seemingly held a basket; her right hand took flowers from it.

"As he approached the arch we sang two verses in his honor. I will sing them for you."

She sang in a sweet, low voice, trembling with age and excitement, her face glowing from the sublimity of her thoughts and joy in the privilege she had in being one to welcome the Chief:

"Welcome, mighty Chief, once more,
Welcome to this grateful shore.
Now no mercenary foe
Aims again the fatal blow,
Aims at THEE the fatal blow.

Virgins fair and matrons grave,
Those thy conquering arms did save.
Build for thee triumphal bowers;
Strew, ye fair, his way with flowers,
Strew your Hero's way with flowers.

"As we sang the last line we strewed flowers upon the ground for him to pass over and his horse to tread upon."

There, before me, she imitated her actions of sixty three years before, and strewed the parlor carpet with imaginary flowers. What a vision of Washington, as she saw him that day at Trenton Bridge, must have stood to bless her!

When she finished singing, she said, "I looked up as he passed. His face was covered with dust. Down his cheeks the tears made furrows in it." She sat a few moments in silence, and I saw that tears were coursing among the wrinkles of her own. Then she continued.

"As we ceased singing, the choir took up the music and sang the same verses. The whole scene was grand. Before General Washington left Trenton he handed a letter to a gentleman (the Reverend J. F. Armstrong) telling of his grateful feelings."

This letter is preserved as a precious heirloom. It reads: "GENERAL WASHINGTON cannot leave this place without expressing his acknowledgment to the matrons and young ladies who received him in so novel and grateful a manner at the triumphal arch in Trenton, and for the exquisite sensation he experienced in that affecting moment. The astonishing contrast between his former and actual situation at the same spot, the elegant taste with which it was adorned for the present occasion, and the innocent appearance of the white-robed choir who met him with the gratulatory song, have made such impressions upon his remembrance as, he assures them, will never be effaced.

"Trenton, April 21st, 1789."

She told me how, often, when she was passing General Washington's house, then on High (now Market), above Sixth street, Philadelphia, on her way from her nearby school, Madam Washington at her front window, by beckon or voice, invited her and her schoolmates to enter. She told of her gentle, motherly greeting, and entertainment most pleasing; and how, as they sat with her, she sometimes saw General Washington coming down the street with his friends, towering above them as he walked, for he was six feet two, and parting with them in most courtly manner at his door; how on his entrance he greeted his wife as if she was the queen of the land as well as of his heart, and herself as a child he loved.

It was told me by one near to her that when war broke out in our land, Mrs. Malin, aged, feeble, blind, requested to be taken to the State House—Independence Hall—and led to the old bell which proclaimed, as the legend upon its cracked substance tells, "Liberty throughout the land and to all the people thereof." Her wish was gratified. She then and there, placing her hands upon the bell, offered earnest prayer that "The liberty it had proclaimed to the United States of America might still be preserved and the nation carried safely through the first great trial which had come upon it."

Lafayette, the Brave and True Friend of Liberty—M. G. Spratley

NEXT to the "Father of his Country," no character in the history of the American Revolution is more worthy of love and veneration than that of the Marquis de Lafayette—the hero, patriot and philanthropist, who endangered life and property to aid the United States in their struggle for independence.

Marie Jean Paul Joseph Yves Gilbert Motier, Marquis de Lafayette, was born in the Chateau de Chavagnac, among the picturesque mountains of Auvergne, on the 6th of September, 1757. When an infant two months old, his father was killed in the battle of Rossbach, where Frederick the Great defeated the French and Imperialists.

LAFAYETTE AT TWENTY.

This picture represents the young French soldier at the time he espoused the cause of the American Colonies.

of the most distinguished of the nobility. At the age of seventeen, he won the heart and hand of the lovely Countess Anastasie de Noailles, daughter of the Duc d'Ayen, with whom he spent thirty three happy years of wedded life.

During the summer of 1776, while stationed at the citadel of Metz, on military duty, he attended a dinner party at which American affairs were discussed and the Declaration of Independence read. Across the Atlantic came the cry of a feeble colony, which groaned under the yoke of oppression. France, not loving England, heard and sympathized. Lafayette's soul was fired with enthusiasm and, throwing up his command, he hastened to Paris to offer his services to the American cause. Immolating domestic felicity and the pleasures of a gay court on the altar of patriotism, he hazarded life and fortune to help a foreign people. Silas Deane, the American envoy, objected to his youthful appearance, but Dr. Franklin, whose quick discernment seldom erred, was so forcibly impressed with his noble generosity that he favored his offer. The king, however, would not give his consent; the British minister protested; and Lafayette's family and friends entreated him to give up the wild project—but their efforts were in vain. This was in 1776, a time when a dark cloud overshadowed the hopes of the colonies. The defeat at Long Island, the evacuation of New York and retreat of the American army through New Jersey, pursued by a large British force flushed with victory, were enough to fill all hearts with dismay. The credit of the colonists was destroyed in Europe, it being the general opinion that the so-called rebellion had been nipped in the bud.

Lafayette's resolution, however, did not waver; other Frenchmen caught his enthusiasm and flocked to his standard. Mr. Deane told them the credit of his country was too low to furnish a transport. Then it was that the true nobility of Lafayette's character revealed itself. He said: "Until now, sir, you have only seen my ardor in your cause; and that may not prove at present wholly useless. I shall purchase a ship to carry out your officers. We must feel confidence in the future, and it is especially in the hour of danger that I wish to share your fortune."

He carried out his plan and, as his ship, the *Victory*, ploughed the deep, blue sea, Lafayette's thoughts lingered with his devoted young wife. He wrote to her on the voyage and with expressions of love patriotic sentiments were mingled: "From love of me," he said, "become a good American. The welfare of America is closely bound up with the welfare of all mankind; it is about to become the safe asylum of virtue, tolerance, equality, and peaceful liberty."

Strange words of prophecy, considering the doubtful destiny of the United States at that time! It seems, as with the eye of prescience, he saw a star-gemmed banner floating in triumph over a great country, which is indeed—"the safe asylum of virtue, tolerance, equality and liberty." On the nineteenth of April, 1777, the *Victory* arrived at Charleston, South Carolina. Lafayette proceeded at once to Philadelphia, and presented to Congress the letters from the American commissioners at Paris. Appreciating the disinterested conduct of the young patriot, Congress adopted the following resolution:

"Whereas, the Marquis Lafayette, in consequence of his ardent zeal for the cause of liberty, in which

the United States are engaged, has left family and friends, and crossed the ocean at his own expense, to offer his services to the United States without wishing to accept of any pension or pay whatsoever; and as he earnestly desires to engage in our cause, Congress have resolved that his services be accepted, and that in consideration of his patriotism, his family and illustrious relations, he shall hold the rank and commission of major general in the army of the United States."

Dr. Franklin felt such a warm regard for Lafayette, he wrote a private letter to General Washington, asking him, for the sake of the anxious young wife, to shield his life from danger as much as possible. This request, it seems, was useless, as the brave young officer always sought posts of peril. Washington was struck with the frank, unobtrusive manner of the marquis, who declined for some time to assume the rank Congress had bestowed upon him. When urged by the commander-in-chief to do this, he modestly replied that he was not as yet capable of discharging the duties of so important a post; that he must begin by being instructed himself and by learning to obey, before he could command. This admirable speech won the respect of General Washington, who soon loved him with parental affection. The suffering of the poor soldiers, with no means to give them necessary supplies, touched his compassionate heart and he presented sixty thousand francs for their relief to General Washington, who was deeply affected by this noble act of generosity. On hearing of the extreme want in General Moultrie's command, with his characteristic liberality he sent him uniforms and equipments for one hundred and fifty men. It is said he expended in the cause of American Independence 700,000 francs, and not only with his princely munificence did he give aid, but with wise counsel and personal influence both in France and America.

Lafayette shed his first blood for the cause on the battlefield of Brandywine. He was shot in the leg and refused to dismount from his horse to have the wound dressed, but remained on the field, acting

LAFAYETTE IN HIS LATER YEARS.

with great bravery until the battle ended. He was carried to Philadelphia for treatment, but, on the advance of the enemy, was removed to a safer place. So impatient was he to return to active service, he joined General Green in New Jersey before his wound healed. After this, he was in other contests, and General Green was so charmed with his gallant conduct that he made honorable mention of him in his official reports. Congress was so sensible of his meritorious behavior that it promoted him to the command of a division, consisting of 2,000 men, whom he armed and equipped, presenting each officer with an elegant sword and belt. He was with Washington at Valley Forge, participating in the severe hardships of that campaign, and aided many a poor fellow who was without shoes and scarcely any clothing.

While devoted to the cause he had so warmly espoused, Lafayette yearned to see again the dear one who held the first place in his heart. He had been absent about eighteen months, when Congress gave him permission to return to France and, in January, 1779, he sailed from Boston. Few could have borne, without vanity, the distinguished honors this young man of twenty two years received, for his heroism and unlimited generosity had carried his fame to all parts of the civilized world. On his

arrival in France, he was welcomed with great demonstrations of joy. Louis XVI. and Marie Antoinette, famous for her wit and beauty, bestowed on him many flattering attentions. The queen honored him with private audiences, and asked many questions concerning America. Afterward, on meeting Dr. Franklin, she merrily said: "Doctor, do you know that Lafayette has made me in love with your General Washington? What a man he must be, and what a friend he possesses in the marquis!"

Lafayette spent several happy months with his family at Auvergne, and again returned to the United States. Many of his countrymen accompanied him and, on the 26th of April, 1779, they landed at Boston, amid the roar of cannon, ringing of bells and a grand display of fireworks. A large crowd greeted him "as the patriot, hero, friend and benefactor of America."

In 1780, when Washington had his headquarters at West Point, then under command of General Benedict Arnold, the marquis was with him. It was at this time the conspiracy between Arnold and Andre, a gallant young officer of England, took place. Poor Andre was captured, but the traitor made his escape in the British sloop of war, *Vulture*.

When the British made their last stand in Virginia, Lafayette took a prominent part. The siege of Yorktown ended a revolution which has no parallel in the history of the world. In the nation's supreme glory, Lafayette's valuable services were not forgotten. The enemy also acknowledged his merit, as it is said Lord Cornwallis wished to surrender his sword to him, but the modest young hero declined, knowing to whom that honor belonged. With the plaudits of a grateful people sounding in his ears, Lafayette returned to France, in December, 1781, where he again met acclamations of praise. While relating to the king some of the stirring events of the war, so free was he from self-conceit, no allusion to himself was made. Louis observing this, facetiously inquired, "But, pray, sir, where were you all this time?" The journey to his home with his happy wife and little son, George Washington, then three years old, was one of continuous ovation—cries of "Long live Lafayette!" arising from the assembled crowds.

Three years later the marquis again visited the United States. He spent two delightful weeks at Mount Vernon, where he was regarded as one of the household. Washington accompanied him to Annapolis, where the final farewell words were spoken between these two illustrious men and devoted friends.

It is not the purpose of this sketch to follow Lafayette's career in his own country, where he reached the highest pinnacle of fame and then saw the bright star of his destiny dimmed by misfortune. There is an incident, however, worthy of mention which relates to the active part taken by a young American in attempting to rescue him from the prison of Olmutz. Lafayette had aided the king and queen in their flight from Paris to escape the fury of the mob, and he was also falsely accused of conspiring against the liberties of his country. The Jacobins had marked him as a victim, so he fled to Holland, intending to seek refuge in America, but fell into the hands of enemies and was carried to Olmutz, where, in a gloomy dungeon, five wretched years were spent. Great was the sympathy felt for him in the United States, and Washington, sorely grieved, did all he could in his behalf. His brutal treatment excited universal pity and indignation, but nothing equaled the daring attempt of two young men to procure his liberty. One was Henry Bollman, a young physician of Gottingen, Germany; the other, Francis Huger, of Charleston, South Carolina. As the prisoner was strictly guarded they did not know how to communicate with him, but gold is a sesame and—the way opened. Lafayette's physician represented to the governor of Olmutz that riding in an open carriage where he could get fresh air was necessary to the health of his patient. The request was granted with the proviso that the governor should always be with him. These rides had continued several weeks when, on a certain day, the carriage passed two horsemen who were riding very slowly. Lafayette did not know them, but when one drew from his pocket a white handkerchief, he did the same, as this was the signal agreed upon. When the carriage reached the appointed place, Lafayette, on some pretext, was permitted to get out and walk; then it was that the horsemen dashed forward, and Huger sprang from his horse to help him mount behind Bollman. In the meantime, the governor hurried to the scene and grasped the prisoner's arm, assisted by a guard, whom Huger caught by the hair and hurled to the ground. Lafayette thrust his handkerchief into the governor's mouth to stifle his cries for help, and had his hand severely bitten. He succeeded in mounting behind Bollman, and they had ridden eleven miles when they discovered they were on the wrong road. While returning to find the right way, they were captured by a party searching for them. Meanwhile, Huger had fled to a thicket where he was arrested by a peasant and, with hands tied

behind his back, was carried to the town and thrown into prison. They were tried, and the first sentence was imprisonment for life, afterward changed to a term of years. Finally, they were set at liberty, a large ransom having been paid to the government by their friends.

Lafayette's condition, severe before, was after this almost unbearable. He was put in irons, shackles being fastened to his feet and secured to the wall. Mental anguish equaled physical torture, as he could learn nothing of his family, nor of the fate of his two friends. Alleviation came at last when, through the influence of two noble ladies of Vienna, his wife and daughters, Anastasie and Virginia, were permitted to share his captivity. The Austrian government refused all demands for his liberation until Napoleon Bonaparte threatened to march to the prison and release him by force. This had the desired effect, and on the 25th of August, 1797, Lafayette regained his freedom. When he thanked his deliverer for interfering in his behalf, Napoleon said: "I don't know what the devil you have done to the Austrians, but it cost them a mighty struggle to let you go."

Lafayette lived in retirement many years, but, later, became interested again in public affairs, and took part in the revolution of 1830. After aiding in the establishment of a limited constitutional monarchy, and in the elevation of Louis Philippe to the throne, he withdrew from public life. Many invitations to visit the United States were received by

him and, on the 15th of August, 1824, he arrived in New York. A joint committee of Congress tendered him a formal invitation to visit the Senate and House of Representatives. He was received by the

LAFAYETTE'S TOMB. From Lowing's Cyclopedia of U. S. History.

members of the Senate and conducted by Mr. Barbour, chairman of the committee, to a seat on the right of the president pro tem., the Hon. John Gail-

lard, in the presence of the senators, all of whom were standing. The following day, Henry Clay speaker of the House while addressing the nation's guest, alluded eloquently to its gratitude. He said: "This sentiment now fondly cherished by more than ten millions of people, will be transmitted with unabated vigor down the tide of time through the countless millions who are destined to inhabit this continent to the latest posterity."

While Lafayette rejoiced in the marvelous prosperity of the country, he found cause for sadness—the friend whom he loved and revered as a father—the immortal Washington, had passed away. He went to Mount Vernon and, at the tomb of the dead patriot, paid the tribute of tears.

During this visit, on the 17th of June, 1825, the foundation of the Bunker Hill Monument was laid, the corner-stone of which Lafayette put into its place. His triumphant tour through the country, north and south, was one never to be forgotten. In every city aged veterans, youthful heroes and women cheered, while little girls scattered flowers in his pathway. It was the grateful homage of a nation's heart—a testimonial of its love for the great and good man who had made their cause his own.

In September, 1825, Lafayette was borne away from the land he loved in the frigate Brandywine. We can imagine what emotions stirred his soul as the shores of America were lost to sight. Nine years after, he passed into the great Beyond, leaving a fadeless name.

On the Hunt for "American Boy" Stories.

THIS MAP SHOWS THE ROUTE (BY DOTTED LINES) TAKEN BY KIRK MUNROE IN HIS TRIP AROUND THE WORLD FOR STORIES FOR "THE AMERICAN BOY."

Write to Kirk Munroe.

On January 3 Kirk Munroe started from Boston for a trip around the world, expecting to reach San Francisco, on his return, in September. His first stopping place is Alexandria, Egypt. He will have left there for the far east before letters addressed "Alexandria, Egypt," can reach there. The next place after that where letters will reach him is Hongkong, China. Letters written to him before March 1, should be addressed:

KIRK MUNROE, Care Hongkong and Shanghai Bank, HONGKONG, CHINA.

We are aiming to surprise Mr. Munroe with a big mail at Hongkong. You know he is to write two stories for us on his return, selecting two of the following countries, Egypt, India, Ceylon, Borneo, China, Korea, Japan and the Hawaiian Islands, as the countries where the plots will be laid. Will not the boys write him, at the address given, telling him what two countries they choose and telling him also what kind of stories they want. Imagine his surprise when he receives at Hongkong a bundle of mail numbering hundreds of letters from American boys. We are greatly mistaken in our idea of Mr. Munroe, if he will not be exceedingly pleased to hear from boys in every part of his native land. You must put five cents per half ounce postage on your envelope.

Captain Kidd.

Where is the boy who has not heard of Capt. Kidd, the pirate? Boys nowadays perhaps hear less of him than some of us who were boys years ago. His name, however, is still fraught with interest. Back in the sixteen hundreds, the Dutch inhabited what is now New York and its vicinity. In August, 1664, the Dutch of New Amsterdam surrendered to the English and the name of the town was changed from New Amsterdam to New York. In 1673 a fleet of twenty three ships from Holland conquered the English and New York again fell into the hands of the Dutch; but the following year, peace having been made between Holland and England, New York was restored to the English. At this time Captain Kidd, a rough, cruel pirate, with a large fortune, who had retired from his wild life on the seas, was living with his wife and children in New York. He had, to all appearances, adopted a peaceful, quiet life. Everybody knew him to be a skillful sailor; so when, in 1695, the English Government resolved to send a ship to the East Indies to put down the pirates in the Indian Ocean, Kidd was selected to command the expedition. Gathering a crew in New York, he manned a fine ship, "The Adventure," furnished him by the English, and in February of 1697 sailed away to become himself the most cruel and terrible of pirates, plundering

rich vessels and making enormous profits so that even his common sailors grew wealthy. His cruelty was awful, for he cut the throats of his prisoners or plunged them into the sea. In 1699 Kidd returned to New York with "The Adventure," laden with a cargo richer than any ship had ever brought to that city. Tradition relates that he deposited \$200,000 in gold dust and coin on Gardiner's Island, and that he buried treasure on Martha's Vineyard and lived in a cave still pointed out on its lonely shore. It is thought that he sunk his ship near Verplanck Point on the Hudson. The agents of the Government sought for him, and finally he was decoyed to Boston, carried to England, tried for piracy, condemned and executed. His miserable life ended March 23, 1701.

Look Ahead and Figure.

A writer in the New York Times gives some good advice to boys, some of which we take the liberty of quoting: Boys often make a serious mistake in not realizing the seriousness of life's problems. Nearly every one of them expects to rise to distinction and wealth, but no one fully appreciates the self-sacrifice and labor and steady application necessary, except the few who have traveled the road. These things do not come by chance nor by wishing. Boys, you ought to look ahead of you and see if you can figure out any reasonable and practicable plan for getting your bread and butter and clothes to wear during the long years you expect to live. There are a good many men fifty years of age who have hardly made a living. Many of them were as bright and hopeful as any boy can be. They have never truly realized that there is no excellence without great labor. Boys, there is no royal road.

You cannot half work and play hooky with destiny. People will not rush to be doctored by a trifler. What use to the farmer is good soil, and sunshine and rain, if he doesn't plant a crop and attend to it? You may want a job when you get out of school. Do you suppose any business man wants a smart Aleck about him? Do you think he wants a young man who has not trained himself to work? Do you think a boy who has a reputation for trickery, is too cute to be square, open and manly, can get a decent job? The young man who can be serious, obedient, manly, will easily secure a position in the counting room at a good salary, while the other fellow will be lucky if he secures a good job in a shop at low wages for hard, dirty, though not dishonorable, toil. Don't think that you will be an exception, a favorite of fortune. The world of business will pass judgment upon you, and it will be about as you deserve.

A boy said that he didn't care so much for the sun as he did for the moon. "You see," said he, "the sun only comes at daylight when we could see just as well without it, but the moon's some use—it shines at night."

An American who has studied English life says that one of the things that impressed him most about British boys was their stolid endurance—their habit of bearing pain, fatigue and privation without murmuring.

BROWNIE SURPRISE PACKET—Contains 50 varieties, each from a different country, Turkey, Egypt, C. G. H., etc. Easily worth 50c, my price only 10 cents. W. W. MacLaren, Box 188, Cleveland, O.

A PACKET OF STAMPS FREE

With our large 1903 price list of 1000 bargains. Send your name and address with 2c stamp for postage on the packet. We have stamps on approval at 50 per cent. H. L. DREW & CO., 7 Water St., BOSTON, MASS.

No Money Required FREE 100 Presents to Select from

SEND US YOUR NAME and address, without a single cent of money, and we will send you at once 24 Jeweled Scarf Pins, set with Rubies, Emeralds, Opals, Brilliants etc., very fine and hand some— Show them they sell on sight, —also a splendid premium list of the finest goods ever offered. Sell the 24 scarf pins at 5 cents each, and return \$1.20 cents to us. We send you the premium you select and are entitled to as per catalogue absolutely FREE. Write plainly. Send name at once. **EMPIRE SPECIALTY CO., 411 Canal St., Greenville, Pa.**

One Cent GREAT CROPS OF STRAWBERRIES AND HOW TO GROW THEM.

The best book on strawberry growing ever written. It tells how to grow the biggest crop of big berries ever produced. The book is a treatise on Plant Physiology and explains how to make plants bear Big Berries and Lots of Them. The only thoroughbred scientifically grown Strawberry Plants to be had for spring planting. One of them is worth a dozen common scrub plants. They grow

BIG RED BERRIES.

The book is sent free to all readers of THE AMERICAN BOY. You must mention this paper. Send your address to

R. M. KELLOGG, THREE RIVERS, MICHIGAN.

FREE GOLD WATCH

This watch has American movement fully warranted to keep correct time. The case is Solid Gold Plated, equal in appearance to a Gold Filled Watch warranted 20 years. We give it FREE to Boys and Girls or anyone for selling 20 pieces of our handsome jewelry at 10c each. Send your address and we will send the jewelry postpaid, when sold send us the \$2 and we will positively send you the watch and chain. **ERIE MFG. CO., Dept. 11 Chicago**

REPEATING AIR RIFLE EASILY EARNED BY 150 SHOTS

every boy in the U.S. Send name (no money) for 24 pins. Celebrated Violet Perfume, sold for 10c. Return the money and get rifle or other premiums for boys and girls. Sample for 10c. Write at once. **FRANK L. ROSS CO., Dept. B, Box 763, Cincinnati, Ohio.**

Free! Just what every Young Electrician Free! Midget Dynamo or Motor Free!

Will light lamps, run motors, ring bells, decompose water. Compares every feature of the big generator. All parts interchangeable and show just how it is made. You can do a thousand wonderful things with it. It is the most complete little generator made. Runs off a sewing machine. In order to advertise these we are going to give a number away to the three boys who send us the most words taken from the one word MANUFACTURER. You can use letters but as many times in each word as they appear in this word. The letters A U R can be used twice in a word, but all others but once. Start like this, fat, face, far, for. With your list of words you must send ten cents for our complete catalogue to make you eligible to a prize. List must reach us before March 30, 1903. If there are more than three having the same greatest number of words the first one received will get the dynamo. Put a few spare nights on this and get one of the prizes. Send your list early. **C. & T. ELECTRIC CO., Department A, No. 347 W. Fayette Street, SYRACUSE, N. Y.**

FREE COLUMBIAN GRAPHOPHONE RECORDS WITH 5

Why pay \$50.00 for a talking machine when you can get five Columbia Graphophones that reproduce songs, speeches, etc., with fine effect. We give it complete with 5 up-to-date records for selling only \$5 of our new Jewelry Novelty. Goods that sell—having genuine value and real merit. Send name and address, and **TRUST YOU** with 35 pieces you FREE, postpaid, and we will send you the Columbia Graphophone or give your own choice of 50 other reliable premiums. Each and every one as good or, if possible, better than this. There is no trick about this. We will forfeit \$100 to anyone who sends \$2.00 and can prove we do not send Graphophones at once. Send us your order to-day.

ROSE MFG. CO., Dept. 250, CHICAGO.

BOYS in the HOME, CHURCH and SCHOOL

Encouragement.

Maitland, Fla., May 19, 1902.
Publishers of THE AMERICAN BOY.
Gentlemen:—THE AMERICAN BOY comes to me all right, and I value it very highly. You are doing a noble and patriotic work for the young people of the country, and I wish you continued and ever-increasing success.
Yours fraternally,
S. HERBERT LANCEY,
Major-General Commanding Department of Florida—Grand Army of the Republic.

The Engineer.

BY WALTER WILLISSON STEPHEN.
(Age 12.)

When nestled close in the sleeper.
Listening to the wheels' wild song.
Do you ever think of the engineer
In the cab, as you speed along?

Lighted by the flickering gauge lamp.
On the throttle he has hold.
With hands all grimy with lampblack.
He is careful, brave and bold.

He has hundreds in his keeping.
He sees by the headlight's rays—
The dispatcher gives the orders,
He takes them and obeys.

When a Boy is too "Bright."

President Gilman, of Johns Hopkins University, in a magazine article, not long ago, condemned heartily precocious devotion to books and consequent introspection, casuistry, etc., etc. John Locke advised that when a boy was dull he should be sent out in the air and given something to do that will interest him; President Gilman wisely adds that when a boy is too "bright" he should be likewise diverted into a return to boyhood.

The Preparation.

A special education should have a general education at the foundation of it. Special preparation for a given pursuit needs to rest upon a general preparation for all pursuits, and the more comprehensive the general training the more fruitful and useful is the special. An education that is narrowed to the facts that concern a given occupation, defeats itself. In this country it is folly to narrow a boy's education to the groove of some one calling, where, as here, the different pursuits stand with open doors and neither the boy nor his parents know which one he will enter or how long he will remain. How many men are there at forty pursuing the work about which they dreamed when they were boys of fifteen? In other countries boys inherit occupations, or have them predetermined for them. It is not so here. If one can get a general education he can in the pursuit of it disclose to himself or to his instructor his peculiar bent of mind and genius.

A Boy's "Clutter."

Let us not scold our boys for the clutter they make, but give them a corner all to themselves where they can stow away their collections of stones, and buttons, and spools, and stamps and what-not and arrange their work to their heart's content, always bearing in mind the fact that bugs and butterflies, stamps, minerals, etc., like good books, are the safest of company.

In Far Off Lands.

Ellen Sobey, a teacher at Kalae, Hawaiian Islands, is helping to spread the name and fame of THE AMERICAN BOY in our far-off possessions. She us some of the articles in her school work, and the boys are beginning to talk about what other boys are doing, as described in these pages. She says: "When the boys begin to talk these things rather than whose horse will go fastest, there is some hope for them. The boys are so empty of anything that is worth while to use their activities on. While THE AMERICAN BOY teaches pure living and strives to arouse the boys to be good citizens, I shall always be pleased to help it along."

For Good Citizenship.

From W. J. Snyder, Brazil, Ind.: My son takes your AMERICAN BOY, for which I bespeak a great success. I feel that it is just what the American boys need, and if your magazine improves as rapidly in the next three years as it has during the past three, you should feel very much encouraged. The future of the American boy will depend very largely upon his environment and associations, and I am sure that the work you are doing will add very largely to the developing of splendid citizenship for the future.

ELECTRICAL ENGINEERING TAUGHT BY MAIL

Write for our Free Illustrated Book, "Can I Become an Electrical Engineer?" The electrical field offers the greatest opportunities for advancement. We teach Electrical Engineering, Electric Lighting, Electric Railways, Mechanical Engineering, Steam Engineering, Mechanical Drawing, at your home by mail. Institute endorsed by Thos. A. Edison and others. Electrical Engineer Institute, Dept. 24, 248 W. 24th St., New York

HOWE MILITARY SCHOOL, LIMA, IND.

Prepare thoroughly for College, Scientific Schools, or Business. Best advantages at moderate expense. Manual training (selective). Personal attention given to each boy. Fine athletic field and beautiful lakes. For illustration catalogue address REV. J. H. McKENZIE, Rector.

BE A LOCOMOTIVE FIREMAN

Thorough Home Instruction. Small Charge—Easy Terms. Railroads need thousands of instructed Firemen annually. GOOD PAY and chance to become an Engineer—the HIGHEST PAID EMPLOYE on railroads. Help to employment on proper qualification. NORFOLK & WESTERN RAILWAY CO. Bluefield, W. Va., No. 10112. The Railway Educational Association, Brooklyn, New York. Gentlemen—I have your favor of November 6th. In regard to qualifications of Mr. C. E. Beinkampen, and I have given him employment as locomotive fireman. I have to employ a large number of firemen, and would be glad to hear from you at any time you may have any bright young men who desire positions. Yours truly, F. LOAN, Division Master Mechanic. ENROLL NOW for the great winter increase of force on all railroads. PARTICULARS FREE. THE RAILWAY EDUCATIONAL ASSOCIATION, Station B-10, Brooklyn, New York.

PEN MIGHTIER THAN SWORD

If you have any literary taste, cultivate it, make it pay. Be an Editor, Critic, Reporter, Author. Write what you think, feel and see—turn it into money. We teach

Journalism At Home

Not newspaper work only; we give general instruction in literary composition—word study, reviewing, reporting, space writing, story writing, proof reading, etc. We give individual instruction. Write for catalog.

Spring Correspondence School of Journalism, 102 Majestic Building, Detroit, Michigan.

Working Drawings

for houses, Engines, Machines, Boilers, Motors, Dynamos, Automobiles, Bridges, Sheet Metal, Patterns, or anything you wish to make. We fit you for a position paying \$18 to \$50 a week. Write for our Art Brochure. It contains valuable information and tells how we will help you. State kind of drawing you want to learn, or send us sample of your drawing and we will advise the best course for you and send you sample lessons free. Address: THE SCHOOL OF DRAWING, 109 Masonic Temple, Kalamazoo, Mich.

LEARN TO DRAW

TELEGRAPHY

YOUNG MEN wanted to learn Telegraphy and Railway Accounting and prepare themselves for the Railway Telegraph Service. Write for free catalog. The Railway Telegraph Institute, Oshkosh, Wisconsin.

SHORTHAND TYPEWRITING and BOOKKEEPING

taught thoroughly by mail. Use of Remington or Smith Premier Typewriter included in stenographic courses. Consists of Shorthand, Typewriting, Spelling, Punctuation, Business Letter Writing, including all test books. Prices reasonable. Write today for catalog. E. A. STRAYER'S BUSINESS COLLEGE, Baltimore, Maryland.

"PROGRESS" MAGAZINE

one year \$5 cents. THE NATIONAL SYSTEM OF PENMANSHIP, \$1. Boys who solicit for "Progress" and act as agents for our Penmanship Lessons are earning fine salaries. Sample lesson and magazine free. Hoffmann College, Dept. W, Milwaukee, Wis.

TELEGRAPHY

Thoroughly and quickly taught. Full course scholarship. Telegraphy and Typewriting, \$40.00. Positions secured. EXPENSES LOW. CATALOGUE FREE. Karpis School of Telegraphy, Huntington, Indiana.

BECOME INDEPENDENT

and learn Watch, Clock and Jewelry Repairing, Engraving and Optics. In possession of this knowledge you can earn a large salary. Write for circular. St. Louis Watchmaking School, St. Louis, Mo.

BE A PROOFREADER

Work reduced, private, and educational. Women receive same salaries as men. \$15 to \$35 a week. Proofreaders always in demand. Send for free booklet, "PRACTICAL PROOFREADING," tells how. NATIONAL PROOFREADERS' ASSOCIATION, The Baldwin, No. 44, Indianapolis, Ind.

Young Artists.

Excellent pen and ink and pencil sketches have been received from the following: Ernest A. Wright, Stockton, Cal.; Stanley M. Scheidler, Cambridgeville, Ind.; Henry A. Loux, New York City, N. Y.; Frank Parratt, Oakfield, Wis.; Lee Mayor, Lindsay, Mo.; Fred Blair, Des Moines, Ia.; Guy McDowell, Des Moines, Ia.; Leo F. Kahler, Meadville, Pa.; Fred Kehr, Rochester, N. Y.; George Dowling, St. Regis, Mont.; G. C. Beaman, Pueblo, Colo.; David M. Wolff, Chicago, Ill.

A Young Violinist.

Herman Brede, of Brooklyn, N. Y., is a brilliant boy violinist who has just passed his twelfth birthday. He is a manly, ambitious little fellow, deeply in love with his art. He is methodical, too, and has posted in his room a code of rules which he follows with great care. At 6:30 in the morning he is out of bed and has breakfast and practices an hour. Then he studies an hour and is ready for school at 9. At 12 he has dinner, and at 3 returns to school. After school he takes half an hour for play, then two hours for violin practice, then supper, followed by a half hour's recreation. He goes to bed at 9, but not before he has had another hour of practice. Professor Hahn, of Columbia College, has recently undertaken the instruction of young Brede.

College Expenses.

The authorities of Columbia University have obtained figures from college students in various colleges east and west relative to the annual cost of college life. From the statistics it is evident that life at the western colleges is far less expensive than at the eastern, and further, that expenditures at the smaller colleges are less than at the larger ones. The average expense at Columbia is estimated at twenty one dollars a week, while twenty six dollars a week is termed a liberal allowance. In the majority of western state universities no tuition fee is charged. The maximum at Harvard is fixed at about \$85. Columbia and Harvard both exact tuition fees. West Virginia and Nebraska are universities that do not charge a fee to residents of the states. Two hundred and two dollars is termed a liberal allowance for West Virginia, and two hundred dollars for Nebraska.

Leadership.

Is a young man ambitious to be a leader by and by? He must be a leader now. He must possess the spirit of leadership and put it into practice in every walk in life. Does he aspire to be a great thinker? He must be a thinker now, and not thoughtless, careless, indifferent. He must feel the throbbing of his future greatness in his youth. He must cherish it. It must grow with his growth. It must be assimilated into his very being—Delos Fall, Superintendent of Public Instruction for Michigan.

Clarence Latshaw, Reading, Pa., age nine, has become remarkably proficient in playing the B-flat cornet. In three months' time after beginning the study of the instrument he was playing at entertainments.

Arthur T. Fried, of the East Denver High School, won first prize in the Inter-scholastic Oratorical contest held at Boulder, Colo., May 15, his subject being "Influence of the Minority." A second prize was won by John Booth, of the Colorado Springs High School, his subject being "The New Man."

Harry Brooks, the fourteen year old son of Mr. and Mrs. J. C. Brooks, of near Hinton, Ky., successfully passed the teachers' examination at Cynthiana, Ky., a short time ago with a general average of 75 per cent, which, but for age limit, would entitle him to a second-class county certificate. He is an extraordinarily bright boy.

Edward A. Hanchett, Dallas, Tex., through the representation of the choir-master and the dean of St. Mathew's cathedral, has been put on THE AMERICAN BOY Roll of Honor, he having been awarded the annual medal given to that boy of the Cathedral choir who proved himself the most generally useful and who excelled in choir work.

HAVE YOU DECIDED ON YOUR PROFESSION? WHY NOT STUDY ENGINEERING

INSTRUCTION UNDER MEMBERS OF FACULTY OF ARMOUR INSTITUTE OF TECHNOLOGY.

Electrical, Mechanical, Locomotive, Stationary, Marine and Sanitary Engineering; Navigation; Architecture; Mechanical and Perspective Drawing; Sheet Metal Work; Textile Manufacturing. Also 40 Short Special Engineering Courses.

Catalogue sent upon request.
American School of Correspondence AT Armour Institute of Technology, Mention American Boy. CHICAGO, ILL.

FREE PRINTING PRESS

BOYS here's a chance for you to get a free press free and to make money by printing cards, envelopes, etc., for other people. We will give you this press with outfit of type, ink, cards, etc., absolutely of first class cost to you for only \$1.00. We will send you 99 packages of "Credit Titles" per hour at 10¢ each. JUST TWO HOURS' WORK is all it will take you to own a press. We also send free with press full directions for printing, type setting, etc. Write at once for more and describe printing you "how to make money".
They're FREE.
E. A. STRAYER & SONS, 401 1/2 Fullerton Ave., Chicago

\$ BY \$ BOOKKEEPING, MAIL PENMANSHIP, SHORTHAND,

etc., taught successfully BY MAIL during your spare hours. Pay \$10 for tuition, books, etc. AFTER POSITION that pays \$10 or more per week is SECURED. Better than personal instruction at half the business college. Business men's original, copyrighted methods as the best. Price and strong testimonials in our 98-page "Booklet B" sent free. Address Cor. Department, DRAUGHON'S P. BUSINESS COLLEGE, Box D 3, Nashville, Tenn., U. S. A.

If you are Not Satisfied

With your income or your station in life, send for our free booklet, "Writing for Profit" tells how to improve both by study at home during spare hours; how to succeed as a newspaper-correspondent, magazine-contributor, and short-story writer. We teach Journalism and Story Writing by mail. Manuscripts sold on commission; also, criticized and revised. THURNTON WEST, Editor-in-Chief, founded, 1896. THE NATIONAL PRESS ASSOCIATION, The Baldwin No. 44, INDIANAPOLIS, INDIANA.

THE BEST SCIENTIFIC PAPER PUBLISHED for Amateurs and Students is the MODEL ELECTRICAL AND MECHANICAL ENGINEER.

Published Monthly. Single copies 10c. One year \$1.00. Send 10c for sample copy, to R. THISTLEWHITE, Publisher, Box 747, DOVER, NEW JERSEY.

LEARN BOOK-KEEPING and TELEGRAPHY BY MAIL—AT YOUR OWN HOME.

This is the chance of a lifetime for young men and women and you should not miss it. Up-to-date method, any one can learn it within 8 to 14 weeks and place you in position to earn good salaries at once. Thoroughly practical and remarkably inexpensive, our graduates secure good positions. Write to-day for full particulars. Michigan Business Institute, 124 1/2 East 12th St., Kalamazoo, Mich.

LEARN PROOFREADING.

If you possess a fair education, why not utilize it as a proofreader and uncredited profession paying \$15 to \$25 weekly? Situations always obtainable. Write for the original instruction by mail. HOME CORRESPONDENCE SCHOOL, Philadelphia

SHORTHAND—Learn the standard Isaac Pitman, adopted by "The American Boy," "Christian Herald," and N. Y. High School of Commerce, 24th Cent. Edition complete. "Short-hand Instructor," \$1.50. Trial Lesson Free. ISAAC PITMAN & SONS, 11 Union Sq., N. Y.

SHORTHAND SYSTEMS IN USE IN THE

40-page pamphlet sent FREE for 2-cent stamp. W. W. OGDEN, Pub'r, Rochester, N. Y.

1—Stripping eggs from the females.
4—Hauling the catch up on the wharf.

2—Drying the nets after a catch.
5—“Joseph” pulling in the net.

3—Sorting the males and females.
6—Starting out to set the net.

With Uncle Sam's Fishermen—J. Olivier Curwood

K IS not many years ago since all of the five Great Lakes were so thickly populated with fish that at certain seasons of the year countless thousands of them died of disease brought about by their overcrowding in the streams and shallow bays of the lakes. In those good old days, not twenty years ago, the author was a farmer lad living on a little farm whose acres stretched down to the sandy beach of Lake Erie, and it was not an extraordinary thing for this nine year old urchin to make a “catch” of more than he could carry, and that before breakfast. But all of that has changed. Each year has added a dozen or more new fisheries to the hundreds of old ones scattered along the lakes, until now the best fish have become so scarce that Uncle Sam has been compelled to establish fish hatcheries at convenient places in order to supply each year millions of artificially raised minnows to the natural stock in the waters.

Of all the finny tribes in the Great Lakes the whitefish is the most valuable, so when it became apparent that this species was threatened with extermination Uncle Sam began investigating the matter. The whole length of the great inland lakes was carefully examined, and it was finally determined to build the biggest whitefish hatchery in the world at Detroit, Michigan. Why Detroit was chosen instead of Chicago, Buffalo, Cleveland, or any other lake city, can be seen by a glance at a map. Each year whitefish make a “run” to their spawning grounds. That is, in shoals of millions, they seek out a shallow, sheltered lake or bay, where there is plenty of food, where they may deposit their eggs. It happens that Lake St. Clair, from which flows the Detroit river, is the favorite haunt of the whitefish during the spawning season, and as they had to pass up through the Detroit river to reach it the government concluded that the best place to fish for them with nets would be in that stream. So on Belle Isle, opposite Detroit and about five or six miles from Lake St. Clair, the big fishery that now restocks all of the lakes was built.

The day I spent with Uncle Sam's fishermen began cold and misty. Dawn had not yet begun to brighten the sky. The flickering lanterns of the fishermen twinkled here and there as they made the nets ready and harnessed a horse to each of the two big reels that pulled in the seines from the river. Then to “Joseph's” reel was fastened a rope some hundred fathoms long, the other end of which was firmly tied to one end of the huge net that was to be taken out into the river.

“A-lo-ah!”

Whatever the word meant it acted like magic. The gray December mist had hidden the shore line and everything but the glowing lanterns, but through it the beat of Joseph's hoofs as he wound up the slack rope, the creaking of the big reel, and the shuffling of rubber-coated men hurrying down to the river announced that the day of Uncle Sam's fishermen had come. Almost before the last echo of the cap'n's shout had died away across the river the long boat, with its great pile of net, had pulled out from the shore. A brisk wind was coming in from Lake St. Clair, bringing the chilling fog with it. The rain that had drizzled all night had ceased, but had left the air so cold and so uncomfortably damp that even the rowers continued to keep on their rubber suits.

“Goin' t' be a big ketch this mornin'!” said Cussy.

Although Cussy was down in black and white as Uncle Sam's oldest fisherman, and the only one among the lot who had not passed a civil service examination, he was ashamed of his name going abroad, and had it not been for a little confidence on the part of one of the rowers I probably would never have known the old man by any other appellation than that of “Cap'n Billy,” by which “the old cuss,” to quote one of his nicknames, is known at every place where whitefish are planted along the Great Lakes. Cap'n Billy is an old man, and he swears by everything that is sacred that his pipe is as old as he. He is grizzled and weather-beaten and as ignorant of the three R's as a South Sea Islander. The only reason why William Cussy annually pilots one of Uncle Sam's fishing expeditions, and that without having passed the civil service examination, is because from end to end of the lakes he is the only man yet discovered who can “smell” whitefish.

“It's goin' t' be a whale of a big ketch!” repeated Cap'n Billy, with some emphasis. “Th's millions of 'em under us, crowdin' thick. I can smell 'em!”

For a few minutes the rowers exerted themselves just enough to hold their own against the current, while Cap'n Billy strained his eyes to locate himself. The lights of Detroit were going out one by one as the mist lifted from the river, and soon Belle Isle began looming up, with the government's fishery faintly outlined against the dull gray of the woods. On the dock running a hundred feet out into the water a few shadowy figures could be distinguished, and beyond them standing out big and gaunt in the uncertain light, old Joseph, who has the honor of having pulled in more fish than any other horse in the world. When Joseph came into view Cap'n Billy began chanting “time,” the boat surged ahead, and the day's work began in earnest.

I crept up beside Cap'n Billy on top of the big net. There were twenty thousand square feet of it, piled up in folds so that it would slip off into the river without tangling. To be exact, if stood up like a tennis net it would have been five hundred and fifty feet long and forty feet high. In his arms Cap'n Billy hugged the brayl, an oak spar which spreads the end of a net. From this brayl the shore-line stretched through the water to the reel, now almost three hundred fathoms away, where Joseph stood ready to begin winding at the word. Up to this time none of the net had been set, but when the shore-line had almost drawn taut Cap'n Billy gave a lunge and the big spar plunged into the river. At the same time Cap'n Billy roared something unintelligible to me, and as he shoved me head over heels into the bottom of the boat I had a momentary vision of Joseph as he began to slowly wind the reel.

“I didn't know you was there, sir, or I wouldn't throwed it,” apologized the old man. “Likely as not you'd gone overboard w' th' net if you hadn't got down quick.”

A mystery was now unfolding itself before my eyes. I had often wondered how such a huge net could be set without becoming entangled. It was a simple matter to set pound nets out in the lake. But this was so different. Yet it was all clear to me in a few seconds. Imagine this great “tennis net” with its heavy spar piled up in the stern of the boat. As the first of the net slipped over Joseph and his reel began pulling it toward the shore, very slowly. At the same time the rowers redoubled their exertions,

circling out into the river, and then turning gradually toward the shore again. Between the two forces the net was continually kept taut. As the shore came in view again, a small rowboat shot alongside, and a shore-line exactly like the one attached to Joseph's reel was handed from it to Cap'n Billy, who in a trice had fastened it to the oak spar of the other end of the net. This line was attached to the second reel at the fishery. As this brayl was tossed into the river Cap'n Billy put his hands trumpet-like to his mouth and shouted back through the fog:

“Brayl ho!”

Almost a quarter of a mile away we could hear the cracking of whips, the excited shouts of the drivers urging on Joseph and his less famous mate, and the noisy creaking of the reels. It is easily seen how the big net was now being drawn in toward the shore, in the form of a great arc. It reached down into the water forty feet, so all the fish, or the majority of them, that were inside the arc would be captured.

“Th' ain't be'n a day like this for three years!” said the old man gleefully, filling his pipe from a rubber pouch of tobacco. “I bets we takes a ton!”

On shore, lanterns had been lighted and hung over the edge of the low wharf where the seine was to be dragged; but the mist and fog was clearing rapidly, and by six o'clock, when the net was half in, the day had fairly come. Faithfully old Joseph and his mate wound round and round at a dizzying jog, while men brought row upon row of crates and tubs, buttoned their rubber coats tight up about their necks, and then stood in anxious groups watching for the first sign of the incoming net.

As I stood with the others, Cap'n Billy came up beside me with a chuckle. “I never seen Josef pull quite so hard,” he grinned; “I bets we takes a ton!”

Soon we could see little dashes of spray whitening the end of the brayls. The net was almost in. A moment more and a score of hands were dragging it out upon the slippery low wharf. Cap'n Billy chuckled, rubbed his hands, puffed his pipe, and when the first sight of the freight met his eyes, turned back with the rowers to get a cup of coffee.

As more and more of the net came in, men in rubber boots met the fish almost before they were out of the water, and disentangling them tossed them into long floating crates. These crates were sixteen feet in length, five feet wide and five feet deep, and no more than 300 whitefish were placed in each. Occasionally pickerel and big, slimy carp came up with the others, and were thrown back on the wharf. Once there was a shout almost at my elbow, and the water at our feet boiled under the lashing of an enormous sturgeon. It is an unwritten law that the steak of a sturgeon caught in the net shall be divided among the fishermen. Almost in less time than it takes to relate it, half a dozen gaffhooks had dragged him ashore. I afterward found he tipped the scales at 108 pounds—a pretty good size for the river.

I followed one of the crates as it was towed to the “strippers,” and after a little Cap'n Billy joined me there. With a dip net the fish were taken from the crate singly, and barely touching it with his fingers an expert passed upon its gender. If a male it went into one tub; if a female, into another. A pipe was continually spurring fresh water into these tubs, and beside each sat a stripper, with two pans in front of him, and two other tubs awaiting the

half an hour, but oftener not until nearly a week has passed. Two black dots appear, which are the eyes of the coming fish; the vertebra follows, delicately coiled, the tail finally breaks through, the head becomes distinct, and a fish is born that some day will become the possible prey of the never-tiring Nimrod.

stripped fish. Cap'n Billy stood in front of one of these receptacles, and suddenly making a dive held up a large female for me to examine.

"He's green!" he explained, soberly.

I took the fish in my hands. It was big and handsome, and so firm and lively that it nearly flopped out into the little canal that led to the river.

"He's hard as a stun," said the old man, "an' green as grass!"

For a moment he peered into the tub again, made another dive, and handed me a somewhat smaller specimen than the other.

"He's ripe, sir!"

The fish was soft and flabby, and along its belly I could feel hundreds of tiny lumps like fine bird-shot. I returned it to Cap'n Billy, and he tossed it to the stripper, who in turn deftly tucked the head of the whitefish under his arm and ran his forefinger slowly along its belly. From the vent the ova exuded in a tiny stream.

"Twenty five thousand aigs fr' that one fish, sir!" said Cap'n Billy with an air of triumph. "Reckonin' on them that don't hatch, them as dies in transportation, an' them as is et by other fish before they grows old enough to take care of themselves, they'll be ten thousand good, eatable fish fr' them inside of two years." I looked askance at the stripper, who I knew had passed the Civil Service examination, but he nodded affirmatively.

"You see if we hadn't caught her, probably not ten per cent of her eggs would have been fertilized by the male," he said. "Then her spawning ground in St. Clair might not have been a good feeding

ground, and of the tenthousand hatched all but a few would have starved; and the majority of the few remaining would have fallen a prey to other fish while very small. We figure that every good female will produce ten thousand matured fish if attended to by the Commission, while if allowed to pass to the spawning ground probably not a score would live for the fisherman of 1904."

For a time after that my stripper was too busy to talk. If you have ever seen a man with a countryside reputation as a corn husker showing you stunts in the cornfield, you have some idea of how whitefish come and go in the hands of a man who knows his business at stripping. Not until three quarts of eggs were in the pan before him did he cease his exertions for an instant, and then only to select one of the biggest and finest looking males he could fish from the tub. The milt was added to the eggs, the whole placed in a ten gallon can partly filled with water, thoroughly agitated, and in something less than seven minutes the stripper told me 3,000,000 eggs had been fertilized, and were ready for the hatchery.

A modest, unpretentious-looking frame building, in suitable environment easily mistaken for a country church, is the United States fish commission's hatchery at Detroit, the largest in the world. To this plant the eggs are carried, and placed in thousands of glass jars, through which water is continually flowing with brookside melody. To the bottom of each jar runs a tiny spigot, and the fresh stream coming from this keeps the eggs dancing until the millions of wriggling little creatures spring to life. The eggs begin to swell, sometimes within

He now begins to take his first lessons in swimming. This is the period when in his native element he would almost surely fall a prey to his voracious kin. But here week by week he develops, grows stronger, and finally begins taking a trip of exploration all his own. A tiny stream of water is always coming up under him. So, some winter day, he struggles over the top of a jar. He is now in a bigger and a new world. It is a big trough, with a stream of water flowing through it. Naturally the baby whitefish heads upstream, and every inch of the way he loses he gives up with a struggle. Then he comes to another trough in which the water is still deeper and swifter. Still struggling to make his way against the current, he is borne along, until with a little splash he shoots into a great, black tank, big enough and deep enough for boys to swim in. Here through all the long winter he grows larger and stronger, and when the first days of April come he is an inch or more in length, and so strong and active that it is pretty certain he will never make a meal for any other fish.

The fry in the Detroit hatchery are tiny fellows now, but in the spring there will be 450,000,000 lively minnows for Michigan waters alone, and many million others for plants all along the Great Lakes. These latter will be distributed by the splendid fish-car Attikumaig, which is fitted out with troughs and tanks similar to those at the hatchery. Some conception of the magnitude of the operations at the Detroit hatchery may be had when it is understood that nearly three hundred bushels of fish eggs will be hatched this winter.

An American Barony.

JOHNSON HALL, the only structure in all America which can rightfully claim the honor of being a genuine baronial castle, is still standing, about a mile from the village of Johnstown, north of the Mohawk river, in New York. The tract of land in the midst of which this fine old-time mansion was erected was given to Sir William Johnson by royal grant.

William Johnson came to America in 1738, to take charge of land belonging to his uncle, Sir Peter Warren, in the region of the Mohawk Valley. He became a great favorite with the Indians, as he dealt honestly with them, learned their language, and conformed to their manners; indeed, in time he took Mary, a sister of Brant, a famous Mohawk chief, to his home as his wife. When the French and Indian war broke out he was made sole superintendent of Indian affairs, and his great influence kept the Six Nations from favoring the French. He attended grand councils of the Indians and was adopted into the Mohawk tribe and made a Sachem. In 1755 Johnson was appointed sole superintendent of the Six Nations, was created a major general, and led an expedition intended for the capture of Crown Point, then in possession of the French. In 1756 Johnson was knighted and the King gave him the appointment of superintendent of Indian affairs in the North. At the close of the French and Indian war the King gave him the tract of land referred to above, being one hundred thousand acres of land north of the Mohawk river. Its actual possession, however, came about in a most peculiar

way. Sir William was a man of singular force of character and great resources. He set about his business of acquiring power and influence by a profuse and charming as well as most original hospitality. Among his guests on one occasion was a powerful sachem of the Mohawk tribe named Hendrik. Johnson had a very beautiful embroidered coat which the savage chief set his heart upon possessing. So one morning he announced in the usual solemn sedate style of the red man: "Brother, me dream last night."

JOHNSON HALL.

"Ah," answered Sir William, "and of what did my red brother dream?"
 "Me dream," said the Mohawk laconically, "that the embroidered coat was mine."
 "Surely dreams are from the Great Spirit, are they not?" said the baronet.
 "Yes, oh, yes."
 "All dreams?"
 "Truly, all dreams."
 "Then," said Sir William devoutly, "of course the

coat is yours; take it, my red brother—my gift from the Great Spirit."

The sachem never moved a muscle of his imperturbable face, but doubtless chuckled far within at the ease with which he had imposed upon the pale-face. But in the long run the impositions are not for the simple savage. Sir William bided his time, and when, not long after he returned the chief's visit, he, too, slept, and in his slumber dreamed, or professed to dream a dream.

"What did my pale-faced brother dream?" inquired Hendrik, not doubting that he would be called upon to repay the coat with some trifling gewgaw, but wholly unprepared for the astounding demand that followed.

Sir William had dreamed to some purpose, no less than that a certain broad tract of land—the bulk, in fact, of the best lands of all the Six Nations—should be given up to him, to him and his heirs forever.

The discomfited Indian was at first inclined to demur to this inequity.

"What," exclaimed Sir William, "are not dreams from the Great Spirit?"

The Mohawk lugubriously enough, supposed they were.

"Then," said the wily baronet, "the land is mine." The Indian sat in stolid silence for a while; then, rising majestically, he answered: "Yes, brother, the land is yours, but you must have no more such dreams."

It was in the center of this great domain, thousands upon thousands of acres, that Johnson reared his stately palace, by far the finest and most lordly residence of colonial times—at least, north of Mason's and Dixon's line. The main building was of wood, while upon either flank—in what military men call "defensive relations"—were two block houses solidly constructed of stone and pierced with port-holes for guns.

The tales of what went on in this baronial hall, as handed down by tradition in the neighborhood, are worthy or rather unworthy of romance.

Top left corner, C. WIGGINS; below, HOWARD and CLYDE ODEN, and to right ARTHUR CLAY TON. Bottom, left corner, OTTO REAUME; right corner, HUGH BEAVER. Right center, CHAS. HAMMOND'S BROTHER, SISTER and GOAT; left center, E. H. LIGHTFOOT.

With the Boys

AUBREY BOND, Sodaville, Ore., has learned by experience that a boy may be suddenly thrown into a position of responsibility requiring of him a man's brain and a man's heart. What happened to him may happen to any boy, and we hope that all of our boys would have done as well as he did under the circumstances. He was one day carrying a telephone message to a house half a mile from town that was surrounded by woods. He discovered that the house was on fire and that no one was at home, but soon the lady of the house came running and screaming in her excitement. Aubrey helped get out a few of the things from the house when he discovered that the woman was nearly wild with grief. It became almost impossible to keep her from going into the fire. He finally succeeded in inducing her to go to a neighbor's; then he went to town and telephoned to the woman's husband, who was in another city. The lady afterwards said that Aubrey saved her life, and he says, "It makes me feel very happy." Aubrey has a small curio collection including a porcupine quill, a button from a Spanish marine's coat, a sea biscuit and a magnetic stone.—LEWIS MACHMAN, Sloux City, Ia., goes on our new Roll of Honor on the recommendation of the principal of the Irving School of that city. She asserts that he is a boy of excellent habits, always courteous, kind and respectful, is diligent in his tasks, and possesses those qualities that promise a good student, a good citizen and a good man.—HAROLD UNDERHILL, Onawa, Ia., goes on our Roll of Honor on the recommendation of his teacher, who states that he has not been tardy at school since January, 1897.—six years. She further says that he is courteous, obedient, faithful, and an excellent pupil.—HOWARD ODEN, Lindale, Tex., writes us a pleasant letter telling us the appreciation felt for THE AMERICAN BOY by himself and his brother Clyde.—CHARLES A. HINES, Brown's Summit, N. C., thinks himself entitled to go on the Roll of Honor for having won a gold medal in public debate at Jefferson Academy, McLeansville, N. C., May 22 last. The Roll of Honor for 1902 was made up before this letter was received, and the fact that the debate took place in 1902 does not permit of our putting the name on the 1903 Roll. Had he advised us a little earlier perhaps his name might have been recorded in the 1902 Roll.—CHESTER E. WHEELER, Lowell, Mass., is fortunate in having a mother who takes an interest in his reading, his work and his play, and she writes that THE AMERICAN BOY is shaping her boy's thoughts and life, and that she recommends it wherever she can. Chester owns a wheel that he bought with his own money made by selling papers, and he paid for the present year's subscription to THE AMERICAN BOY in the same way. He is careful of his money, adding to his bank account every month. He stands high in school work, his November standing being the highest in his class. He is careful of his health, and this is not a common thing with boys. He takes "lung exercises" night and morning, and to this, his mother says, they attribute his freedom from colds.—ARTHUR C. CLAYTON, age nineteen, writes a fine, manly letter from his home on a farm near St. Clair, Mich. He is a great admirer of THE AMERICAN BOY, and thinks it is a great help for boys to read of what their fellows are doing, whether successful or not. He speaks a good word for the English boy who wrote the letter published in our September number in which the English boy held up his own country as the best in the world. "Such boys," he says, "are of the right kind. I would like to know that boy," he adds. He also would like to hear from E. H. Clayton, Bayonne, N. J., as he suspects that they are of the

same stock. Although he never went beyond the tenth grade in school, he was always a great reader, and at the age of seventeen received a third grade teacher's certificate and has been teaching school for over two years. His aim, he says, at present is to support in comfort his two old grandparents who took him when an infant, his mother having died when he was but two weeks old and his father having had reverses of fortune, and took care of him until he grew up.—OTTO REAUME, Essex, Ont., is an amateur photographer and collector of stamps, coins and curios. He thinks that any boy looking for pleasure and profit cannot do better than to take up with amateur photography. He has about 800 foreign stamps and 56 coins. He has 10 and 25 cent pieces with King Edward's head on. These coins have just been issued and are being called in because the head on the coin is turned the wrong way, so that the few that remain out will be valuable. Otto is studying dentistry to make it his life work.—FRED G. SWANSON, Providence, R. I., writes a complimentary letter in which he shows that he is quite a reader, being very fond of the works of Henty, Stoddard, Butterworth, Optic, and others. He gets books from the Providence public library, but buys many books himself. Fred is fourteen years old and in the ninth grade in school. His class colors are blue and white; school colors, red, white and blue.—CHAS. C. HAMMOND, JR., Bellaire, O., sends us a picture of his brother and sister, the brother's goat and the sister's doll. These make a very happy looking family. We must reproduce it on this page for the edification of our readers, hoping that they will enjoy it as much as we have.—CAMERON VAN BUSKIRK, Bridgeton, N. S., says he has a large St. Bernard dog just like "Bob," whose picture appeared in the December number. His name is "Bernie." He also has a black two-year-old colt named "Black Beauty." This boy lives on a large farm with no boys of his own age near him, so that he particularly enjoys THE AMERICAN BOY, through which he becomes acquainted with many boys of his own kind. Cameron hopes that we will get over a million subscribers.—L. L. TAYLOR, Fossil, Ore., tells about his getting lost in the heart of the Blue Mountains while herding sheep, and of being three days without any food except a few grouse that he shot and some substance that he found underneath the bark of pine, fir and tamarack trees which he found quite edible and sufficient to stay hunger.—C. WIGGINS, who writes from Halifax, N. S., has just had a very long journey of 3,750 miles on the Canadian Pacific Railway. He has traveled over it from end to end twice. This boy came over from England in 1896, traveling by ship to Halifax and then via the Canadian Pacific to Vancouver, from there to Victoria by boat, and from there to Esquimault. He has now returned to Halifax. Although he is an English boy and knows what the English boys' papers are, he thinks THE AMERICAN BOY the best paper for boys he has ever read.—JOHN A. KILLIPS, 1117 N. Fortieth Avenue, Chicago, Ill., age seventeen, congratulates THE AMERICAN BOY on its success and tells us something about himself. He is employed in a machinery house and finds it a hard business to learn, but expects to persevere until he is successful. He belongs to a large regiment of boys of his own age who go under the name of the "United States Juniors." The regiment is divided into battalions of 200 boys each. They wear the regulation U. S. army uniform, and each battalion has its band and bugle corps. Our friend is Second Lieutenant, Company E, Second Battalion, First Regiment.—BENJAMIN FRANK, Brooklyn, N. Y., wants to know what is the best place to buy stamps, minerals, etc. Surely the pages of THE AMERICAN BOY will give sufficient information along this line. Any of the stamp or curio collectors whose advertisements we accept and publish will be found to be reliable.—OTIS WELSCH,

Sheboygan, Wis., we are informed, has attended school for eight years and has only missed school half a day.—WALTER BILGER, Meriden, Conn., writes about the St. Andrews' Boys' Club, which meets in the basement of St. Andrews' Church. In this basement are interesting games, a pool table, ping-pong set, etc. The club meets twice a week. Every Monday night is the business meeting. There is a game committee for looking after the games, an entertainment committee, and a committee for new members. The club gave a Halloween social on Halloween evening. One Thursday night in November a sculptor lectured for the benefit of the boys and the club received eleven dollars as the profit. It now has twenty five dollars in its treasury. Club dues are twenty five cents per month. Walter is treasurer. The following boys have sent us pen and ink or pencil drawings which show talent: Harry Holman, Collingwood, O.; Herbert W. Cable, Syracuse, N. Y.; Jimmy Anderson, Ocosta, Wash.; Albert H. Cary, Richfield, N. Y.; Harry Honeywell, Broadalbin, N. Y.; Harry S. Walters, Island City, Ore.; Dean Farran, Wamego, Kas.; William Wynne Lay, Hallettsville, Tex.; Elton B. Albro, Mayville, N. Y.—HUGH TERRILL BEAVER, age eleven, La Grange, Ill., woke up one morning with the notion that he could write poetry. He stole downstairs before any other member of the family and wrote the following verses on "Columbus." He said he had been awake four or five hours thinking it out. The family joked him about it and called in question his statement that he wrote it, but they soon discovered evidence in the boy's eyes that he really did it, and it is well done for a boy of eleven, and Hugh himself, as his picture indicates, is a fine specimen of American boyhood.

Columbus, the Italian.
He sailed across the sea;
He did not find the sought Indies,
But found a new country.
Columbus then returned to Spain.
The country from whence he came;
The king received Columbus,
With honor and with fame.
But when no gold Columbus found,
The metal the King did seek;
Columbus was sent to him in chains,
And not allowed to speak.
But good Queen Isabella,
Columbus's best friend;
Had all his chains removed from him,
But that was not the end:
Columbus one more voyage made,
Then he returned again;
Only to be laid to rest.
In the dark, cold ground in Spain.
So he it—he was laid to rest.
For gold Columbus should not seek more;
But he accomplished that,
Which no man had ever tried before.

A Portable Dark Room.

Ewart H. Lightfoot, Henderson, Ky., sends us a photograph of his portable dark room, which he says cost only \$1.50. Its dimensions are 6 1/4 x 32.3 feet ground measurement, and 6 1/4 feet high. The foundation is built of six 2x4 timbers, which cost 25 cents. The floor is built of boards that he got from a drygoods box, costing him 25 cents. The side braces are strips 1x2 inches, on which canvas is tacked. The strips cost him at a box factory ten cents. The sides and top are made of cloth, which cost 75 cents. The cloth on the sides and the top is covered by two coats of heated coal tar. Made in this way the house is light and waterproof. The window is made of two 8x10-inch glass and cost ten cents. Having some small car wheels he mounted the house on them, and can now wheel it from place to place. On the outside of the window is a shade operated by a string from the developing bench. The water supply is obtained by a device which he learned of a few months ago by reading THE AMERICAN BOY.

A Friendly Contest With a

DAISY RIFLE

Both girls and boys enjoy the sport of shooting with a Daisy or a Sentinel air rifle. They give lots of innocent amusement without danger, noise, smoke or powder.

Our rifles have walnut stocks, handsome nickel-plated steel barrels, improved sights and interchangeable parts. If your dealer will not sell you a

"DAISY" OR "SENTINEL"

send us his name and we will send any style from factory, charges prepaid, upon receipt of price.

No. 1, Daisy Repeater, shoots BB shot 48 times.....\$1.25
No. 2, 20th Century Daisy, shoots shot or darts.....\$1.00
No. 3, Sentinel Single Shot, shoots BB shot.....\$1.00
No. 4, Sentinel Repeater, automatic, 503 shot.....\$1.25
Darts, assorted colors, per doz, prepaid, 50c

Daisy button and illustrated booklet free.

The Daisy Mfg. Co., Plymouth, Mich., U. S. A.

BOYS Suspender - Garter

Suspender and Hose Supporter combined. Supports trousers and stockings from shoulder. No band around the body. No more "Buttons off." Patent fasteners take the place of buttons on trouser's band. Metal studs in suspender ends spring into the fasteners. Small, light, easy to sew on (two small cut fasteners, will not pull off like buttons). Attach and detach easier and quicker. Worn either under or over shirt or shirt-waist, as desired. When worn under, the studs carry the goods with them into fasteners, just like hose supporters. No harm to the fabric. Elastic shoulder and garter part—latter renewable. Three sizes, small, medium, large. Send 50 cents for sample with 1 set fasteners. Extra fasteners, 10c set, 2 for 25c. Give age. The Little Susceptor Co., 55 Dealer Bldg., Columbus, O.

Lucky Old Shoes Stick Pin

2 Shoes on a Pin. Two pins for 10c, by mail, with wholesale price. This is just the article for Agents. Also, SEA SHELLS, Gold Wire for wire jewelry, Tools, etc., for beginners. Large, showy Sea Shells for Dealers and Fairs, etc. 25 Sea Shells by mail for 25c, with Engraved List.

J. F. POWELL, WAUKEGAN, ILLINOIS.

DIAMOND RING FREE!

Magnificent, flashing Akah diamond, mounted in the famous Tiffany style setting. Finished in 18k. solid gold. Absolutely warranted for years. Send full name and address. We send post-paid 10 Heart Pins to sell at 10c each; also large premium list. When sold, return us the money and we send at once above beautiful ring carefully packed in an elegant plush-lined case. Write today.

BIRNIE JEWELRY CO., 121 Park St., ATTLEBORO, MASS.

ELECTRICAL UNITS FOR BOYS.

It is written so simply that every boy can understand something about Electricity. It answers such questions: What is a volt; an ampere; an ohm; a watt? It tells how to find the amount of wire, number of batteries, etc. required for any power. It explains magnetism, the dynamo and the motor.

Boys, if you want to know something about electricity send Ten cents for this valuable book. Catalog of Boys Electric Novelties for stamp. Address, R. W. HARDESTY & CO., 1120 A Central Ave., Newport, Ky.

MIRROR IN YOUR HAT

WITH YOUR NAME ON. Something entirely new; an elegant mirror and hat mark combined; will stick in any hat. This is the latest novelty and thousands are being sold daily. Agents make \$15 daily. Sample, 10c, postpaid and our mammoth catalog free. Address Ample Supply Co., Dept. D, 271 Broadway, N. Y.

Decorate Your Yard

The OUT DOOR ART CLUB, whose members like beautiful yards, has a model design for decorating the home yard. They will tell you all about it for a postage stamp.

Out Door Art Club, Box 16, Sta. F, Brooklyn, N. Y.

HIGH SCHOOL

Is a High School Paper for high school students. The only one of its kind in the country. Send 10c and mention this magazine and we will put you on our mailing list for one year. Address Manager, R. E. L., 214 Steinway Hall, Chicago. Do you want to try our MAGAZINE for ADVERTISING purposes? Send for sample.

BOYS Who Want MONEY

Can have it by working for us in spare time. Commissions in cash. No prizes or premiums. No letter chains but straight legitimate business. Write now for Book-let & Talcott Mfg. Co., Box 6, Station 2, 1st & 2nd Sts., BROOKLYN, N. Y.

The Agassiz Association

THE AMERICAN BOY is the only official organ of the Agassiz Association and should be in the hands of every member. All correspondence for this department should be sent to Mr. Harlan H. Ballard, Pittsfield, Mass. Long articles cannot be used. THE AGASSIZ ASSOCIATION welcomes members of all ages, and any one who is interested in any form of natural science is invited. Established in 1875. Incorporated in 1892. Short notes of personal observations are particularly desired for use in the A. A. department. Send illustrations when convenient. Questions are invited. Address H. H. BALLARD, Pittsfield, Mass.

How to Make a Cabinet.

In "Rollo's Museum," a charming little book by Jacob Abbot, we read that Jonas made an excellent cabinet for Rollo, from a large packing box. He stood it on end, fitted it with shelves, and closed it by doors attached by means of leather hinges, and fastened by a wooden button. Such a cabinet, neatly finished, looks very well, and costs almost nothing. To those who like to try their hands at something a little more elegant, we offer the following simple design:

The picture shows the cabinet complete, and the plan following it is drawn so that every measurement in it is one-sixteenth of the corresponding measurement in the finished cabinet. No nails are used. Wood of light color looks

well; chestnut is easily worked. The ends of the top and bottom are mortised into the sides. Close to the side boards, holes are bored through the projecting parts of the tenon; and wedges are inserted and hammered tight.

The frames of the doors are doweled at the corners, each joint being made by boring a hole through one piece into the next, and inserting a dowel coated with glue. The short dotted lines in the plan help to explain this. The glass should not be set with putty, but with narrow strips, beading or rattan, fastened with brads or needle points. Butt-hinges may be used, with ornamental hinge-plates set outside as shown. Hook one door to the shelf, and it will hold the other door shut.

The shelves may be made with raised edges, like trays—the front rims are not shown in the picture. These edges will keep the contents from rolling off when the trays are taken out. The shelves slope forward to show the specimens to better advantage, and they rest on dowels let into auger-holes in the side

boards. To prevent them from slipping, pegs are set in them underneath, resting against the backs of the forward dowels. The shelves may be put in flat, and may rest on screw-eyes screwed into the sides of the cabinet.

Metal ears are set on the back, projecting above the top, for hanging the cabinet, in addition it is well to drive a screw from the inside through the back into a stud in the wall.

The scalloping at the top of the back may be done with a fret screw. The hole in the center of each scallop is bored right through. The ornamental lines across the sides are made with a gouge, and should be covered with two coats of white shellac varnish. Those skilled in fret-sawing may like to set in the top the letters A. A., in old English text. If you are puzzled over any of the details, the nearest cabinet-maker will give you a hint.

Many Chapters, wishing something still more elaborate, have given various sorts of entertainments and earned money to buy cabinets, and in many cases the school authorities have generously furnished our young friends with them, and rendered them other substantial aid.

One of the most desirable kinds of cabinet is made like a shallow showcase, and the top is covered with a glass door, which may be lifted up. In a case for insects, this top may be tightly fastened down by means of thumb screws and may be rendered airtight by the interposition of strips of rubber.

Birds' Nests.

I can tell the genus of birds by their nests alone; for instance, a blue jay's nest is like a crow's, and blue jays and crows belong to the same family.—Roscoe S. Grant, Bement, Ill.

This is an interesting observation, and shows that Mr. Grant thinks while he looks. That similar habits, not only of nest-building, but of feeding, singing and flying, accompany similar bodily structure is one of the most significant facts in bird history. He would be a clever student, however, who could classify birds by their nests alone, and yet make his classification agree with that now accepted. With what family would he class the bluebird, judging from its nest in a hollow tree or post? Or how from its nest would he associate the oriole with the bobolink or black-bird?

On the other hand, the nests and white enameled eggs of woodpeckers afford one of the most striking instances of that racial similarity noted by our correspondent.

Flowers by New Zealand Road-sides.

In the annual report from the Nelson (New Zealand) Girls' College Chapter of the A. A., the Secretary, Miss M. D. Holloway, writes:

"The members of the club have had three field days, and have gone into the country with bulbs and seeds to plant by the roadside and in the bush."

This plan of beautifying the roads and forests by planting choice seeds and bulbs is exquisitely described in Mrs. Ewing's book, "Mary's Meadow," and Mrs. Ewing got the idea, partly from a very old book called, with a quaint pun on the author's name, "Paradise in Sole. Paradisus Terrestris" (or "Parkinson's Earthly Paradise"), written in 1629, by John Parkinson; and partly from Alphonse Karr's "A Tour Around My Garden." Little did Monsieur Karr think as he dropped that little seed thought by the dusty highway of French life that it would take root and spread over the world—to England, to New Zealand, to America!

Let us read once more his charming words: "I ramble about the country near my dwelling, and seek the wildest and least frequented spots.

"In these I scatter the seeds of my most favorite plants, which resow themselves, perpetuate themselves, and multiply themselves.

"Strollers find with surprise in certain wild nooks of our country the most beautiful double poppies, with their white, red, pink, carnation, and variegated blossoms.

"It affords me immense pleasure to fix upon a wild rose in a hedge, and graft upon it red and white cultivated roses.

"I have observed two young wild quince trees in the nearest wood; next spring I will engraft upon them two of the best kinds of pears.

"And, then, how I enjoy beforehand and in imagination, the pleasure and surprise which the solitary stroller will experience when he meets in his rambles with those beautiful flowers and these delicious fruits!"

The Witteboom, or Silver-Tree.

From New Zealand to South Africa is a long flight, but not too long for the strong wings of "THE AMERICAN BOY."

We acknowledge with thanks the receipt of some beautiful leaves from A. D. Vortenberg, of Cape Town. "I send," he writes, "a few silver leaves which grow on Table Mountain. I have tried to raise the tree in our garden, only two miles from the mountain, but it is of no use. It is called 'Pride of the Mountain.'"

We wish we could show these beautiful leaves to our readers. They are six inches in length by one and a half in width, and lanceolate, like those of the willow; but their peculiar beauty is in their bright, silvery sheen, caused by a thick covering of white, satiny hairs. Put a nasturtium leaf under water, and you will see just how they look.

Two-Headed Grass.

Mr. John Janzen, of Mt. Lake, Minn., sends us a specimen of Timothy grass, bearing two heads on one stem. This

suggests a valuable possibility for all cultivators of grain. If any one could produce a two-headed variety of wheat, for instance, he would have a fortune.

Follow the Keystone

When you buy a watch, first select the works and then tell the jeweler you want a Jas. Boss Stiffened Gold Case. To protect yourself from deception be guided by the Keystone trade-mark which you will find in every

JAS. BOSS

Stiffened Gold Watch Case

Better than an all-gold case because stronger; cheaper because no gold is wasted. The Jas. Boss Case is guaranteed for 25 years. Won't wear thin. Send for book.

The Keystone Watch Case Company, Philadelphia.

Proliferation of Inflorescence.

Strange, what big names are invented for simple things. What scientists mean by "proliferation of inflorescence" is merely the growing out of flowers into leafy branches. This curious phenomenon is well illustrated in a specimen of mourning bride, sent to us by Kenneth Trainer, of Sibley, Iowa. It is interesting as indicating the original development of flowers from leaves. The subject has been fully treated and illustrated by Maxwell T. Master's "Teratology," another hard word to signify unusual forms of growth. Sometimes these leafy branches growing from the flower produce also buds and blossoms.

Queer Poplar Root.

Lloyd E. Sawyer sends from Minong, Wis., the picture of a strangely twisted poplar root found by himself.

Myrtle Leaf Question.

IN the September number of THE AMERICAN BOY the question was asked, why a myrtle leaf held to the light appears to be full of pinholes. In the February number two answers were given, one stating that the holes were breathing-pores, or "stomata;" the other that they only appeared to be holes, but were really little masses of coloring matter, "chlorophyll;" and we found these two answers looking suspiciously at each other, and asked which was right—if either? The prize offered for correct answer is now awarded to Allen C. Conger, Israel Lipschitz and W. T. Brislin. Mr. Conger writes: "The 'pinholes' are merely transparent dots on the leaf, and have resin in them." Mr. Lipschitz says: "I took a microscope, and by careful dissection found that the thick dark green leaf is studded with numerous receptacles for oil. The translucency of the dots or 'eyes' is owing to the oil. I also noticed that if the oil is removed and the leaf dried, the fragrance leaves it. This makes me think that the fragrance of the plant depends upon this oil." Before sending the prizes, we submitted the question to a distinguished professor of botany, who writes in reply:

"Certainly neither stomata nor chlorophyll. Remember the extracts made from eucalyptus leaves. I have consulted Bentham and Hooker, De Caisne, etc., and feel sure we have resinous glands embedded in the leaves. The strong aromatic odor alone would lead to this conclusion." We still have an apparent choice between "oil" and "resin," but if you look up "resin" in the dictionary, the difficulty vanishes.

Albany, N. Y., Oct. 11, 1902.

To the President of the Agassiz Association:

Dear Sir—We are forming a Chapter as accessory to the Albany Boys' Club. The boys are quite enthusiastic. They are particularly fortunate in securing the good offices of the State entomologist, Professor Felt, who has already made several donations of especial value, and who has kindly volunteered to assist in the work.—E. J. Gibson.

The "Ivy" Chapter is most cordially welcome.

Our Cabinets prevent waste, save money, time, space, and worry. Place for everything. No kitchen complete without one. 25 styles, \$1.50 and up. We sell Cabinets, Furniture, Sewing Machines, Organs, Hardware, Stoves, Carpets, Household and Farm Supplies, Clothing, Millinery, Jewelry, Shoes and 10,000 other things. Tell us what you want. Ask for Catalog No. 247 and get wholesale prices. We save you money.

Caught by the Flames—William Murray Graydon

"TWO pounds of shot and a gallon of your best coal oil, and a pound of coffee, and—let me see—oh yes, two pounds of brown sugar, and I guess that's all for today, Mr. Williken."

Ned Selwyn rattled a bright silver dollar down on the well-worn counter, threw an envious glance at the dingy jars of stick candy on the shelf, and then wisely took himself out of reach of temptation to the porch where half the male population of the village were grouped on empty benches and soap boxes, awaiting the one sensational episode in the daily routine of their uneventful lives, the arrival of the morning train.

It was one of those parched, sultry mornings that are not uncommon in early April, when the landscape lies dim under a smoky haze, and the heat is painfully suggestive of midsummer.

"The woods are afire up on Shade Mountain," said old Nick Peterman, as he reflectively bit off a huge chunk of tobacco, and coolly stowed away the balance in his pocket without offering it to any of his expectant companions.

"An' what if it is? I reckon it aint agoin' ter do you any harm," said Sol Lambert curtly, as he saw his last hopes vanish with the plug of tobacco. "Thar aint nawthin' up thar it kin hurt much."

"It's liable ter make Pete Purdy skin outen that purty lively, if it ketches a good holt," resumed Nick, "thar's a heap o' dry tinder up among them rocks, what'll burn like will fire. We aint had no rain fur nigh onto two weeks."

A contemptuous sniff was Sol Lambert's only reply, and before any one else could take up the interrupting thread of conversation, a shrill whistle echoed among the mountains, and the train came in sight around a distant curve. The store porch was deserted when Ned came out a moment later with his basket and oil can.

On ordinary occasions, he would have lingered to hear the village gossip, but on this particular morning, he was in a hurry to get home, for after dinner he was going trout fishing, up along Spruce Run, and he had his bait to dig yet, and a fishing rod to cut.

As he passed along the brow of the mountain, he saw the smoke curling up in clouds from the young timber, and an occasional ruddy flash told that the flames were creeping summitward.

Far up on the very peak, he could see the little hut in which lived Pete Purdy, a rather eccentric old hunter who had chosen this strange place for his abode, and dwelt there winter and summer, making occasional trips down to the village to purchase what few supplies he needed, and dispose of game to the storekeeper.

His rude cabin was built among a cluster of rocks, and, to his surprise, Ned observed that the fire was beating rapidly in that very direction.

"Pete will have to move out of that pretty soon if the fire don't take a turn," he said, half aloud. "Old Peterman was right on that."

In a few minutes more as he passed around the base of the mountain, his house came in sight, perched high on the slope of the hill across the valley.

He turned for one more look at the smoking mountain in his rear, and a cry of surprise burst from his lips.

From the side toward the village, thick clouds of smoke were driving over the summit, and now from the other side as well flames were darting up in a dozen different places, and the two columns mingling at the top nearly hid from view the hunter's little cabin.

"Sparks from the mail train did that," muttered the youth, "and, by gracious, it looks as though Pete's cabin would have to go. He hasn't much time to get out of the way, either."

For a moment Ned stood there fascinated by the rapid progress of the flames, and then it suddenly flashed into his mind that the old hunter might be unconscious of his peril.

He often slept in the daytime. Perhaps he was asleep now. The thought made Ned's blood tingle. The flames were taking a zigzag course up the mountain, and in a very short time, if no change occurred, they would meet on the summit some yards back from the brow, and Pete Purdy's escape would be cut off. The rocky face of the mountain was still open it was true, but the most agile climber in the country could scarcely go down over those yawning precipices.

With Ned to think was to act. He could not shake off the belief that Pete Purdy was really in danger, and without pausing to reflect on his own peril, he hurriedly stowed his basket and can among the bushes and darted at full speed along the rude path that led up the valley. He never paused until he had gone a quarter of a mile or more, and then, perceiving that he had distanced the flames, he started straight up the rugged slope of the mountain.

It was a long, hard climb, but he pressed forward with untiring energy, leaping over

rotted logs and loose branches, and pulling himself from stone to stone by the ragged edges. Higher and higher he mounted until the sparkling Juniata seemed almost at his feet, and the little farm house far across the valley looked no larger than the palm of his hand. Fast as he was traveling, the angry flames were beating him. They were startlingly close to the summit, licking up every dried leaf and branch in their course, and the little cabin was hidden from sight by the dense blue clouds of smoke.

He was near the top now, and with a desperate plunge up the last few yards of broken rock and young timber, he gained the ridge.

One glance gave him a clear sense of his own peril. On each side, the hissing flames were very near the summit. There was time enough perhaps to reach the cabin a quarter of a mile distant, and get back before the two fires met. Assuredly there was not a minute to spare. A brief delay would be fatal.

He started on a run over the broken surface of the ridge. Curls of smoke drifted across his eyes, and the parched undergrowth cracked sharply in his ears, as the flames greedily licked it up.

Faster and faster he ran, tearing his

a sitting posture, with an exclamation of surprise. "How on airth did you get up here?" he cried: "It's Ned Selwyn, by gin-ger!"

"Get up!" shouted Ned, in great excitement. "Run for your life! The mountains are on fire, and in five minutes our escape will be cut off! There's only one way open now—the path along the ridge!"

The old man sank back with a groan. "An' is it as bad as that? I knowed the mountains was afire, but I didn't reckon it 'ud do me no harm. You'll hev to cut an' run for it, my lad; I can't walk. I sprained my ankle agoin' down to the spring yesterday evenin', an' I could hardly git back ter the cabin. Don't mind me; it's only foolin' time away to stay here; run fer it as quick as you kin."

For one moment the temptation was strong, and then Ned drove it from him.

"No," he said, "I won't leave you here to die. You must come with me. You can get along by leaning on my arm."

Pete Purdy crawled slowly out on the floor, standing on one leg. Then he sank back with a moan. "It's no use, Ned, I can't git away."

"You must!" cried Ned, and seizing the old man's arm, he dragged him to his feet again.

"Now, lean on me," he said, "don't be afraid," and, staggering under the burden, he led him step by step toward the door.

As they turned the corner of the cabin, a

tain was loose now. An explosion would bury the pine tree under a mass of stones.

Even then he did not lose his presence of mind. Breathing a silent prayer, he ran forward, and groped his way through the smoke into the cabin. He found the keg, and hugging it tightly to his breast, started out.

Blinded and suffocating, he staggered on. His throat was parched, and he could scarcely repress a cry of suffering as the flames leaped about his feet and ankles.

Once he stumbled, but he was up again instantly, pressing the precious burden to his breast. Through a rift in the smoke he discovered the edge of the mountain. A few yards more, and he would be safe. A dry bush leaped up in flames before his eyes. He plunged through it, feeling the smarting heat on his hands and face, and with one last desperate effort, flung the keg from him with all his might.

It struck the edge, toppled over and went crashing down through trees and rocks to the railroad, a thousand feet below.

Just how he descended that rope he never knew; but, when remembrance came back to him, he was tied securely to the heavy trunk of the pine tree, and Pete Purdy was straddling a big limb beside him.

They were rescued at nightfall. A party of villagers, concerned for the safety of the old hunter, made their way up over the heated rocks, and Pete Purdy's repeated cries for help drew them to the edge of the cliff.

The village sounded Ned's praises the next day, and when he recovered from his burns sufficiently to leave the house he found himself a hero.

Pete Purdy never went back to the mountain. His cabin had been burned to the ground, and, instead of rebuilding, he moved down to the village. He only lived two years after the accident described, and when he died, a snug little sum of money, which he had been storing away for years, was left to Ned, as a reward for his heroism.

ferce blast of hot air was driven in their faces, and with a dreadful fear at his heart, Ned saw that escape was already cut off. Thirty yards distant, the advancing flames were licking up the underbrush on the crest of the ridge, and down the mountain, on both sides, young trees were dropping with a dull crash, and sending up showers of sparks amid the yellow smoke. The only part of the mountain not on fire was the steep, precipitous face. A fearful death seemed imminent.

"It's no use," groaned Pete, "you've gone and thrown your life away to save an old worn-out carcass like me. Why didn't you run fer it when I told you? You might a had time to git away."

Ned made no reply. He was vainly trying to devise some way of saving himself. Already sparks were dropping about the cabin, and the heat was becoming intolerable. If anything was to be done, it must be done at once.

"Here, go inside, quick!" he said, and, helping Pete into the door again, he placed him on a rickety chair, and ran to the edge of the mountain.

The first break in the steep face of the cliff was forty feet below, and a pine tree towered aloft to within twenty feet of the top. Here was a chance for life. If he could only get old Pete down into the branches of that tree, and then follow him, they would probably be safe from the flames.

In an instant he was back in the cabin. "A rope!" he demanded eagerly—"have you got a rope anywhere, Pete?"

For answer the old hunter motioned toward a chest in the corner of the room. Throwing up the lid, Ned pulled out a big coil. He made a loop on the spot, and with a brief explanation, hurried the old hunter toward the edge of the mountain.

"It's no use," he muttered; "you'll never get me down thar, Ned—never in the world."

"If I once get you into the branches, can you hold on?"

"Yes, I reckon I kin."

"Then I'll do it!" said Ned.

A young tree grew a few yards back from the brow, and fastening one end of the rope to this, he secured the loop under Pete's shoulders. It was not such an easy matter to lower him over the edge, but presently he was swinging in midair, and inch by inch the brave boy let him down, until a loud shout told that he had reached the tree.

Ned turned and looked behind him. The air was red with the glare of the flames.

They were devouring the grass before the very door of the cabin, and the roof was blazing furiously.

As he reached for the dangling rope to go down, hand over hand, Pete shouted, "Great heavens! lad, there's a keg of powder in the cabin, under the bed! If it goes off it'll blow the whole face of the cliff down on us." A cry of terror burst from Ned's lips. They were lost, hopelessly lost. The rocky edge of the moun-

flesh on trailing thorn bushes, and tripping headlong on jagged rocks.

Then, with a sigh of relief, he saw the cabin looming out of the smoky mist ahead, and with all his might he hammered on the heavy door.

"Who's thar?" came a feeble response from within, and lifting the latch Ned rushed inside. The old hunter was lying on a rude pallet in one corner of the room, and when he saw Ned he raised himself to

Boys and the Garden

Plan Flower Gardens Now.

Seeds should be ordered early so that they may be at hand in good season to enable you to take advantage of the most favorable conditions for planting, and in ordering early you have more time in which to make your selections of what you wish to plant. Do not plant extensively of varieties with which you are not familiar, but rather make your main planting of flowers with the growth of which you are familiar and which you know from experience will succeed in your locality.

For the beginner, I would suggest the selection of those flowers which are most successful in your neighbor's garden and those which you most admire. Do not, however, pass over the new things entirely, but try them in a conservative way, for they have all been grown successfully and proven of merit and desirability if offered by a reliable seedsman. They may add great attractiveness to your garden, and it is always a source of gratification and pride to the gardener to show visiting friends some choice new flower with which they are not acquainted or have not as yet heard.

The modern seed catalog is a great improvement on its predecessors, which simply gave lists of flower seeds without descriptions, and in many cases even the seedsmen were not familiar with the growth or flower of what they offered. Now catalogs give a description of the habits of growth, generally with cultural directions, and the latter are also frequently printed on the packet of seed. Fuller cultural directions are also given with the rarer and newer flowers in leaflets or books, which are either sent free on request to customers or furnished as premiums with orders for certain amounts, so that the gardener may obtain a complete knowledge of the growth of the plant and the conditions under which it will succeed in advance of sowing the seed, and thus be enabled to plant with the best assurance of success.

One of the most important points in growing flowers from seed is the very moderate cost of the seed as compared with that of the young plants purchased from florists. In most instances the cost of a packet of seed containing from twenty five to several hundred seeds is about the same as the cost of one or two plants purchased from the florist, and with most varieties enough plants can be grown from a single

packet of seed to set a good-sized flower bed. To this should be added the satisfaction and pride arising from a garden which is entirely the result of your own skill and labor.—Supt. E. D. Darlington, Fordhook Seed Farms.

Boys and Flowers.

It is not uncommon to find misstatements in books, but of all the misstatements I remember at this moment, none are larger or more common than those about the barefoot country boy and his knowledge of nature. Whittier speaks of him as a bright-eyed, rollicking youngster, with his "turned-up pantaloons, and his merry whistled tunes." So far Whittier is all right; but when he goes on to sing of this boy's mental acquirements:

"Knowledge never learned of schools,
Of the wild bees' morning chase,
Of the wild-flowers' time and place,
Flight of fowl and habitude
Of the tenants of the wood,"

and all the rest. The dear old poet is dreaming—dreaming back into boyhood many of the pleasant lessons learned later in life; or else he was an unusual boy, and, indeed, he was.

Now, I have known many country lads, and known them well; gone fishing with them, and taken long drives and walks with them up hill and down dale, but I have never yet come upon a single one of these native-born naturalists. One of my latest boy chums was an unusually bright fellow of about sixteen years. He drove the stage for his father over an eight-mile route through some of the wildest and most beautiful scenery imaginable, along the bank of a roaring trout brook, over a road bordered by wild flowers, and bright and musical with insect life.

Alone in the old stage with him we soon fell a talking, and he told me about his home, and his school, and his stage business. Finding him, as I have said, uncommonly bright and responsive, I determined to test his "knowledge never learned in schools." "Purple asters were making the roadside gay." "What are those flowers?" "I d'n know." "Are there many kinds of flowers about here?" "Not as I know." "Lots of birds in these woods, I

suppose?" "I hain't never noticed 'em much."

And so it went on. He was easily interested in these matters when they were brought to his attention, and he would have been quick to learn, if anybody had cared to teach him, but as it was he knew little about flowers, birds, trees or fishes, and cared as little.

I have found the same to be true of all other boys in similar conditions, and when you think of it, how can it be otherwise?

A few men have been self-taught, like Thomas Edwards and Audubon, but, ninety nine times in a hundred, boys must be taught, or at least put on the track of learning by some one who knows.

How easily the interest of American boys in nature can be aroused is shown by the success of the Agassiz Association. The asking of a simple question in these columns is sure to bring replies from scores of boys in all parts of the country—replies usually incorrect or partial, but good, honest answers, showing awakening interest and effort. The promise of our pretty little badge and a card of membership is always enough to bring us a large number of letters telling of original observations, prompted by the mere suggestion.

We gave a few hints on insect study and asked a few leading questions. The result is two pigeonholes in our desk crammed with letters asking about caterpillars, and bugs, and ants, and telling of spiders, and wasps, and beetles—so many that if we should print them all, the whole AMERICAN BOY would buzz like a beehive, and be turned into nothing but a great bug paper!

How many wild flowers do you know? Can you name ten when you see them? Twenty? Forty? Try it. Write a list of all the wild flowers you know and send it to me. Don't look in a book! We will take your word for that! To every boy or girl who will send a list of at least twenty wild flowers that he or she knows by sight, we will send a badge of the A. A., and a card of membership; and to the one sending the largest list, we will also send the A. A. Handbook. All lists must be sent to me at the address printed below, and before March 1, 1903. Now is your chance, "barefoot boy with cheek of tan," to prove that I am wrong about your knowledge of nature! If I have slandered you, I'll take it all back and apologize. If I am right, say the word, and I will try to put you in the way of learning something about the beautiful and useful plants that grow wherever they have a chance to grow, and bless the world, and die. Address

H. H. BALLARD,
Pittsfield, Mass.

The Crown Prince of Siam.

The Crown Prince of Siam, who has been visiting this country, was educated at Oxford, in England. He began his

tuition there at the age of twelve, and now, at the age of twenty one, he is on his way home via the United States, where he has been getting a pretty fair notion of American hospitality.

The Prompt Boy.

"How I do appreciate a boy, who is always prompt—always on time," said John Wanamaker, the great dry goods merchant. "One soon learns to depend upon the boy who is never late in taking his place—who is never late in delivering a letter or a package—never late in going to meet a railroad train—never late in keeping an engagement of any kind. Such a boy will soon be trusted in weightier matters, be promoted at an early date to higher positions, and honored by the shrewd men of finance who will desire to be associated with him in important business transactions. Promptness is better than a big capital for a business man or woman, and is one of the most important elements of success in life."

From the Streets of Ponce to Harvard College.

Two years ago there was running about the streets of Ponce, Porto Rico, a ragged boy, by name Pedro A. Morales. The

PEDRO A. MORALES.

Spanish War Journal tells of the good luck that came to this Porto Rican lad. A Colonel Darling, with his soldiers, had been sent to Porto Rico during the course of the Spanish War. Our soldiers were not received with bullets at Ponce, but with flowers, for the enthusiasm of the natives, in view of the new turn of affairs, was boundless. The native boys paid marked attention to the American troops and voluntarily helped in the work about the camps. Colonel Darling one morning spied one of these boys cleaning up the ground about his quarters. Approaching him he asked, "What's your name?"

"Name? Ise Pedro."
"Yes, and what are you doing here?"
"Ise cleanin' up. Ise ord'ly."

"And who told you that you were my orderly?"

"I not told—I jus' ord'ly—others went to little ofers—I you ord'ly cause you big soldier."

Colonel Darling thought that the boy's enthusiasm would soon wane, but to his astonishment he found him at work day after day, and apparently with unabated ardor. Finally the Colonel began to be interested in the boy. One day he asked him, "What are you going to do when we go away, Pedro?"

"Ise goin' way, too—Ise goin' wid you."
Colonel Darling, by some inquiry, found that the boy was an orphan, fifteen years of age, the last remnant of an old Spanish family. The result was the Colonel told the boy that he might return to the United States with him if he would consent to go to school and be an obedient boy.

The end of the story is soon told. The boy is making rapid progress in his studies and is preparing now for Harvard College at the Allen School in West Newton, Mass.

The Boy Webster.

Daniel Webster as a lad is thus described by John Bach McMaster, the historian, in the first of his illustrated papers on the statesman, published in the November Century: "As the boy grew in years and stature his life was powerfully affected by the fact that he was the youngest son and ninth child in a family of ten; that his health was far from good; that he showed tastes and mental traits that stood out in marked contrast with those of his brothers and sisters; and that he was, from infancy, the pet of the family. Such daily work as a farmer's lad was then made to do was not for him. Yet he was expected to do something, and he might have been seen barefooted, in frock and trousers, astride of the horse that dragged the plow between the rows of corn, or raking hay, or following the cows to pasture in the morning and home again at night, or tending logs in his father's saw-mill. When such work was to be done it was his custom to take a book along, set the log, hoist the gates, and while the saw passed slowly through the tree-trunk, an operation which, in those days, consumed some twenty minutes, he would settle himself comfortably and read."

Secret of Success.

I've often been asked what I think is the secret of success in business. To my mind it's one that a good many of the young men of to-day don't seem to learn. It's to pay your debts, keep your word and be a good collector; not to take anybody else's word, but to use your own judgment. I never made a dollar on anyone else's steering.—John Dunfee.

40 BEAUTIFUL FLOWERS FREE

SEND US 25c. to cover cost of packing and postage, and receive this grand "cash" collection of Beautiful Flowers, our new catalogue containing the most liberal offers ever made, and a CASH CHECK for 25c., giving you every back.

Company News.

CUBA ATHLETIC CLUB COMPANY, No. 7, Cuba, N. Y., held its election of officers recently with the following result: Captain, Ralph Wheeler; Secretary, Lawrence Prouty; Treasurer, Raymond Brown. This Company has rented a room for a gymnasium and is fitting it up, and the Captain promises us a picture of it when completed.—**OLD COMFORT COMPANY**, No. 33, Jackson, Mich., held its first meeting at the home of Captain Max B. Loomis. He writes: "I received the charter and badges and we are very proud of them."—**SANTA LUCIA COMPANY**, No. 10, San Luis Obispo, Cal., at its first meeting elected the following officers: Captain, Thomas H. Hourihan; Secretary, Almon H. Nichols; Treasurer, Eugene H. Steinback; Librarian, Harvey Greenfield; Field Day Captain, Harold McCurry. Meetings are held every other Thursday at the homes of the various members. Monthly dues, twenty five cents.—**GOLIAD COMPANY**, No. 11, Leonard, Tex., holds its meetings every Friday at the home of the Captain. The boys expect to go pecan hunting some Saturday on the banks of a creek eight miles from town.—**"HONEST ABE" COMPANY**, No. 26, Merrill, Mich., resumed its regular meetings on September 1. The following are its officers: Captain, A. E. Wright; Vice Captain, Roy A. White; Secretary, James Daley; Treasurer, Guy White. The following are extracts from the Merrill MONITOR of different dates: "Last Saturday night the O. A. B. Band of this village appeared on the streets in a full dress parade." This was a comic parade, and part of the members were dressed in the most laughable costumes. After the parade the boys were entertained at the home of the Captain, where refreshments were served and all had a good time. "Last Wednesday evening the O. A. B. of this village spent an enjoyable evening in Carnwell's woods. After building fires they had an old-fashioned corn roast to which all did their duty. "Didn't the O. A. B. look swell yesterday (Field Day)? They are a good crowd, and don't smoke, chew, drink, or swear."—**TIMOTHY MURPHY COMPANY**, No. 1, Cobleskill, N. Y., spent a week camping at Summit Lake in August. Some of the boys were unable to go for the whole time, but ran up at different times during the week, and on Sunday many visitors went up from Cobleskill, taking the boys a supply of provisions. Most of the time was spent in hunting, fishing and reading. During the Fair held in Cobleskill by the Agricultural Society, the members of this Company conducted a lunch room and cleared about \$14. Meetings are held at the homes of the various members. At a recent meeting the following question was discussed: "Resolved, That the Government should own and control the coal mines." The boys are looking forward to a good time skating this winter.—**BRANT COMPANY**, No. 30, Brant, Mich., holds its meetings on Saturday evenings at 7:30. Company dues, five cents per month.—**JOHN BROWN COMPANY**, No. 4, Saratoga, Cal., resumed its regular meetings in November, and from that time on meetings have been held every second and fourth Saturday evenings. The Company has moved into its new club room, which is a fine one, where the boys can spend their winter evenings, the club room being open to members at all times. The boys were planning for some games to be held Thanksgiving afternoon, in which several of the town boys were to take part.

CHARLEY ROACH,
Captain of Bengal Tiger Company, No. 10, Lisbon, Ia.

The Order of The American Boy

A NATIONAL NON-SECRET SOCIETY FOR AMERICAN BOYS.
UNDER THE AUSPICES OF "THE AMERICAN BOY."

Object:—The Cultivation of Manliness in Muscle, Mind and Morals.

The object more definitely stated: To promote mutual and helpful friendships among boys; to give wider circulation to high class boy literature; to cultivate in boys physical, mental and moral courage, and develop them along social, intellectual and moral lines; to cultivate purity of language and actions; to discourage idleness, and encourage honest sport and honest work; to cherish and emulate the examples of great and good men; to inculcate lessons of patriotism and love of country; to prepare boys for good citizenship; to cultivate reverence for the founders of our country, and to stimulate boys to all worthy endeavor.

Boys desiring to Organize Companies may obtain a Pamphlet from us containing Directions. It is sent for a 2-cent stamp.

GILES GIBSON,
Captain of Brant Company, No. 30, Brant, Mich.

They are going to have a "feed" before long, at which all members will be allowed to eat their fill. The gymnasium is growing rapidly and much interest is being taken in athletics and physical culture. The Captain writes: "The boys are all very proud of the club, and the citizens of the town speak very highly of it."—**MOUNTAIN HOME COMPANY**, No. 28, Otsego, Mich., holds its meetings at the homes of the various members. Dues, five cents per month. A fine of one cent a word has been imposed for the use of profane language during meetings, and a fine of three cents for absence from meetings without good excuse.—**LITTLE GIANT COMPANY**, No. 34, Carney, Mich., is an athletic company. No more meetings will be held until January 1, 1903, when it will organize a track team and also a baseball team, and the boys will start in training for the Field Day sports. The Company colors are red and white, and it expects soon to have a flag.—**COYOTES COMPANY**, No. 3, De Smet, S. D., held its regular semi-annual election of officers the evening of November 14, at which time the following officers were chosen: Captain, Curtis C. Brown; Secretary, Claude Stockwell; Treasurer, Lester Carpenter. It recently purchased a second-hand set of boxing gloves for \$2.00, and will buy more athletic goods as soon as it has money in the treasury.—**WILLIAM T. SHERMAN COMPANY**, No. 24, Lancaster, O., has its club room only a few blocks from the birthplace of the man for whom it was named.—**JOHN BROWN COMPANY**, No. 6, Paola, Kas., held its first meeting in its new rooms the evening of October 29, when a very enjoyable time was had. After the meeting adjourned the boys boxed for half an hour.—**EMPIRE STATE COMPANY**, No. 18, Lorraine, N. Y., holds its meetings once a week in its club room. Company dues, ten cents per month. It has a small library consisting of books and magazines contributed by the members. The boys are very proud of their charter and hope soon to have it framed.—**U. S. GRANT COMPANY**, No. 9, Eureka, Cal., recently elected the following officers: Captain, Carl Gustafson; Treasurer, Roland Wight; Librarian, August Gustafson. It has a club room, but expects soon to move into a new and better one.—**PROF. F. B. WILLIS COMPANY**, No. 3, Ada, O., has not been holding regular meetings since September 1, because all the members excepting one are in the Senior High School Class. The boys have five studies, namely, Latin, Literature, Rhetoric, Geometry and Bookkeeping, and the Captain says, "It keeps us hustling to get them." Meetings will be held whenever it is possible to do so.—**JOHN HARRIS COMPANY**, No. 10, Harrisburg, Pa., is getting along finely. The boys are about to finish a sail wagon at which they are working and the Captain promises us a picture of it.—**DANIEL BOONE COMPANY**, No. 3, Wayne, Neb., has had exceptionally hard luck. It had a nice club room, with nineteen members and about sixty books in its library, and was getting along nicely, when some outsiders broke the door in and stole the books, the pictures on the wall, the charter, and, in fact, everything excepting the carpet, chairs, tables and bookcases. Up to that time meetings had been held every week when a fine program was rendered. This happened last spring, and the boys are very much discouraged, but hope to hold together.—**JAMES LANE COMPANY**, No. 8, Yates Center, Kas., is progressing nicely and rapidly increasing in membership.—**GENERAL PHILIP SHERIDAN COMPANY**, No. 3, Newberg, Ore., is an athletic company. This Company is doing good work and expects to add more

Headquarters Offices

56 LUDGATE HILL

LONDON, E. C.

8. 12. 1902

The British Boys Empire League with 6000 members, and 100 flourishing branches sends fraternal greetings to the Order of the American Boy. The Boys Empire League, is working for the same objects, as the American Order, and wishes all the members of the Order of the American Boy a happy Xmas, and a truly prosperous, and successful New Year.

A Greeting From British Boys.

The foregoing is a photographic reproduction of a letter from the headquarters of the Boys' Empire League, of London, England, written to THE ORDER OF THE AMERICAN BOY December 8 last, and received in Detroit too late for insertion in either the Christmas or the January number of this paper. The greeting of the six thousand British boys to the boys of THE ORDER OF THE AMERICAN BOY will be received with no less pleasure from having been thus delayed. The President-General of THE ORDER OF THE AMERICAN BOY is in correspondence with the Organizing Secretary of the Boys' Empire League, endeavoring to bring about the co-operation of these two great organizations of American and British boys, with the special purpose of obtaining for every boy of the Order in this country a British boy correspondent in some part of the world. Recognizing the importance of the boys of the two great English-speaking nations coming to know one another and growing to manhood with enlarged and liberal ideas and broad sympathies, we believe that we are on the track of a project that will accomplish great good for the boys themselves and for the great countries they represent. We shall have something further to communicate regarding this matter in our March number.

Organizing the Boys.

We are daily receiving answers to the questions asked on page 88 of the January number of THE AMERICAN BOY with reference to the conditions surrounding boy life in American towns and cities. Any reader of THE AMERICAN BOY, whether he be a member of the Order or not, who has not answered these questions should set about doing so at once. From the answers received we are making a list of men and women in American towns who are said to be ready to do anything within their power in the way of assisting THE AMERICAN BOY in the improvement of boy life and the bettering of conditions surrounding boys in their vicinities. To each of these persons we are sending a circular letter containing six suggestions as to how to go to work, and before the winter is over we should have the work of organizing boys' clubs along moral, social and intellectual lines well advanced. There are thousands of men and women who are ready to help boys if they are told how to do it. We are endeavoring to give the information. All we need to know is the conditions in the town and the names of men and women who are ready to help.

How We Boys Went Wild—Westing—Mattie M. Boteler

ALL of this happened three years ago; though I suppose, if we boys hadn't gone over to Pittsburgh to see Diamond Charlie's Wild-West show, it would never have happened at all.

We three, Tony Loomis, Billy Gandy and I, had been together a good deal that summer. Though, for that matter, the Loomis farm joined ours and Tony and I had been together pretty much all of our lives.

Billy Gandy was an orphan, and worked for old Gabriel Swartz. He was older than Tony or I, but he was quite a little fellow, dull looking, and slow in his movements. Yet, in spite of all this, he could jump farther, run faster, and pull a trigger with greater precision than any other boy in the township. At the Thanksgiving hunt he had won a rifle, over a lot of big fellows, for bringing down more game than any of the rest.

As we walked home from the show that night, excitement ran high over the exploits of Diamond Charlie. Tony had bought Diamond Charlie's book called "The Peerless Pirate of the Plains" and we agreed to meet the following night in our barn and take turns at reading it aloud.

The book was very exciting, and I went about my work feeling that cutting corn and digging potatoes was tame work indeed. I remember, the night that we finished the book (leaving the scout, his way strewn with dead Indians, bears, and smaller game, all brought down by his rifle), that Tony spoke up and said: "Boys, let's form ourselves into a band of scouts and strike out for the west."

"What would we do when we got there?" Billy spoke up more quickly than he was in the habit of doing. "O, shoot Indians and bears," Tony answered, rather indefinitely.

"Well, I'd like to bring down a few bears," Billy replied, "but I dunno as I've got any call to shoot Indians."

At this juncture, I remarked that "I didn't believe our folks would hear of it."

"Who's goin' to ask their folks?" Tony answered, giving me a withering look. "We'll leave at black midnight, swearing to divulge to no one our whereabouts till we have become famed as the 'Terrors of the Borders.'"

Although I knew that Tony had taken this word for word, from Diamond Charlie's book, it was not without its effect upon me; and I fell readily in with his plans, ashamed to acknowledge that I had ever thought of anything else.

Billy, however, was not easily won over. To be sure, we might have gone without him, but going west without Billy and his rifle didn't come up to our ideas at all. We decided to take only our firearms and such provisions as we could conveniently carry. The firearms consisted of an old revolver, for which Tony had traded all of his school-books, a rusty flintlock that had belonged to my father, and Billy's splendid, new rifle. Our purse which was to be the common property of the company, contained just sixteen dollars and forty cents, though almost ten dollars of it had been Billy's contribution.

Tony informed us that his name was to be "Antonio the Terrible."

"An' what's Billy an' me to have?" I asked, feeling that this wasn't exactly fair.

"Er—let me see," Tony mused, "how'd 'Wild Cat Billy' do?"

At this I burst right out laughing. For Billy really looked more like a meek old Thomas cat. This made Tony so mad that he refused to go on; so I was doomed to remain plain Ned Smith to the end of the chapter.

The first few days out, we got on very well. We managed to keep clear of the towns, and informed inquisitive people that we were going over to the next county for a few days' shooting.

When we had been out about ten days, things began to look rather discouraging, and Billy proposed that we make for the nearest railroad town and take our chances at stealing a ride. When we reached Lacombe, we were a sorry looking set indeed. As we sat in the freight yards waiting for night to come on, Tony suddenly nudged me, exclaiming in a loud whisper: "Diamond Charlie!"

And there was coming toward us, not Diamond Charlie, but a young man with flowing hair, wearing a black sombrero, top boots and a brace of pistols. He came right up to where we were, and after a few minutes' conversation, remarked that he had come down to Lacombe to organize a band of scouts to go with him to Mexico. At the last minute, however, some of his men had disappointed him. Tony spoke up boldly: "Stranger, would you take me an' my partners?"

The young man looked us over doubtfully for a minute, and then answered: "If the gentlemen could make their arrangements to start tonight."

"We can start this minute, if you say so," Billy broke in bluntly. "Oh, but my private car doesn't leave until 11:10, he replied, consulting his heavy gold watch. "There is one thing," he added, glancing carelessly at our traps, "we take no baggage of any description."

"Then we don't go," said Billy decidedly.

"As the gentlemen please," the

stranger answered indifferently, "though I was about to add that the special freight, carrying the baggage belonging to my men leaves in a few minutes. It is under heavy guard and, if you desire, I will take whatever valuables you have over to the car."

I noticed that Billy handed the baggage over rather reluctantly. I, however, would have handed him the pocket-book, had not Billy sharply commanded me to put it back into my pocket.

"You will please to remain here until I return," he said suavely, as he turned away. "I want you to meet my partner and dine with me at my hotel."

As we sat waiting his return, a train rolled past. With a howl of rage, Billy jumped to his feet, pointing to the car where, at an open window, our young man sat fanning himself with his broad hat.

"Has that train gone?" Billy panted, rushing up to the station master. "Looks like it," the man answered coolly.

"C—can't you stop it?" Tony shrieked. "That fellow with the wide hat and pistols stole our baggage."

"You don't say!" That was Jim Cowles. I knew he was a thief; but I didn't think he'd steal from a passel o' children."

Children indeed! To Tony and me, this was worse than the loss of our traps.

About midnight we managed to board a freight, but we were put off about twenty miles out of Lacombe. It was too dark for us to go on, so we wrapped ourselves in our blankets and lay down a little distance from the railroad.

In the morning we saw that some one was camping by the stream about half a mile away; and, on going over, found a man getting breakfast and an old white mule grazing near by. After some conversation, the man proposed to sell us the mule.

"Gentlemen," he declared, "I would'nt part with Nance, but I'm going to finish my journey by rail, an' I can't take her with me."

We all went over and looked at the mule and, after a good deal of talk, the owner offered to sell her for five

Tony sent spinning across the grass.

dollars and throw in his bag of potatoes and bacon.

"We'd better take her," Billy advised; "if we take a claim, she'll come handy about the farmin'."

Farming indeed! That wasn't what Tony and I had come West for. But, as our store of provisions were about exhausted, we consented.

We took turns that day in dragging Miss Nancy; and I'm sure we didn't travel over ten miles. When we awakened the next morning Nance and the provisions were nowhere to be seen.

We soon struck the trail and, after a weary tramp, found Nance quietly grazing on the ground where we had first made her acquaintance.

Tony looked so sick and tired that Billy and I insisted that he should ride the mule, while we took turns at dragging her. When darkness came on, we had not yet reached the place where we had camped on the previous night. We decided to take turns at watching the mule, Tony taking the early part of the night.

I had just fallen asleep, when I was awakened by a commotion and, just in time to see Tony sent spinning across the grass and Nance disappearing in the distance. We did what we could for Tony, bringing water from the stream and bathing his wounds. The poor fellow seemed to be in great pain and moaned constantly.

"There's an empty box car on the switch about a mile back. We must carry Tony down there," Billy remarked briefly. We made a bed of dry grasses in one end of the car and, late in the afternoon, carried the sick boy and placed him upon it.

By this time, Billy and I were completely worn out; so taking our provisions and a jug of water, we crawled into the car and were soon asleep. Toward daybreak, we were awakened by a dreadful jar. I sprang up and, was about to open the car when Billy shook me, saying:

"Be still! They're hitching us onto the train and, if we keep still we'll soon be out of this."

At the first station, a brakeman came and peered into the car. Billy gave him a beseeching look and, pointed to the sick boy. The man closed the door and went away, but he came back after a while and slipped a paper into the car. It contained several slices of bread, and on the paper was the writing:

"These cars are being taken to headquarters. Keep still and I'll get you through."

Toward the end of the second day our good friend came to the car and managed to whisper:

"I've got to leave you here, an' I think they'll drop your car at the next station."

I wanted very much to ask him where we were, but he was gone before I could speak. Tony's condition was becoming, every hour, more alarming. His legs were badly swollen, and the greater part of the time he lay in a kind of stupor.

All day it had been growing colder and the snow was beginning to sift into the car. As we sat shivering in the darkness, Tony roused up and spoke in a weak, husky voice:

"Boys, I'm going to die. I've been a pretty bad fellow, but I want you to tell mother that I'm sorry. Tell her if I'd lived to get back to the old home—" here his voice failed him. I don't know what Billy did, but I know that I broke right down and cried like a baby. Just then the train came to a stop, and after considerable delay, went rumbling on, leaving us standing upon the side track.

We pushed open the doors and looked out. It was very dark, but we could see lights, apparently not far off. I climbed out of the car and started in search of help.

After climbing several fences and falling into a ditch, I came to the back of the house from which the light came. I stole up to the window and looked in. For a minute I thought I must be dead

KLIP-KLIP

The Widow's Valentine—Nelson Roberts

The Widow Gray lived alone in a small house on the outskirts of Clinton. She was about forty years of age, and had spent the last ten by herself. Her small garden earned for her a living in the summer, and in the winter she "took in washing" and knit stockings and gloves for the stores uptown. Her life was a hard one, at best, and many were the times when her thoughts went back to her happy childhood, so free from all care and worry, and to the time when she married "shiftless Jack Gray," as he came to be called, and troubles came thick and fast, for "shiftless Jack" died the death of a drunkard, and she was left with nothing but the little house in which she lived. It cost her a great deal for wood, and food, and clothing. In the winter, and her weary hands plied the needle day after day in the struggle for existence.

As in other villages, Clinton possessed a lot of sport-loving boys; and, although their pranks were often of a thoughtless nature, they were good boys at heart.

On this particular winter, the boys were worse than usual. "Tick-tacks" were placed on the minister's window, water was poured down the schoolmaster's chimney, and numerous performances of this sort were indulged in night after night. The local paper published an article on the "Boys of Today," in which they were characterized as outcasts, demons, toughs, loafers, thieves—in fact, degenerates. Promptly, that night, the editor stumbled over a wire stretched in front of his residence; his hat was battered, and his right eye suffered a trifle from connecting with the stone walk. During the holiday vacation the boys were especially active. Down in the hardwood lot, owned by Jack Barrett's father, they erected a shanty of logs and bark, and there they held their councils of war.

One night in early February, when the boys were returning from school, they noticed in Hilbert's drug store the usual assortment of comic valentines. Here was another chance for some fun at someone else's expense, so the boys repaired to the shanty to make the necessary preparations. Jack Barrett had eight cents, Billy Gordon dug up a nickel, Sam Dudley added three cents, Pete Forbes produced seven, and Artie Wellman, the "Kid," finished the collection with a single copper. Pete Forbes was made treasurer. With the twenty-four cents, they could buy eight valentines, eight stamps and eight envelopes. Then Jack drew a pencil and notebook out of his pocket and wrote down eight names. The Widow Gray's name headed the list.

That evening the boys purchased eight envelopes and stamps at the post office and eight valentines at the drug store. The one that they selected for the widow was a hideous picture of a tall, gaunt washerwoman. In her apron pocket was a huge flask, presumably of whiskey.

The words beneath the picture were worse than the picture itself, and below the words was written:

From your friends,
THE BOYS.

The valentine was placed in an envelope and mailed with a two cent stamp. The letter, for such it appeared to be, presented a bulky appearance; and, for this reason, the boys expected that the widow would be greatly interested in its contents. They were not disappointed, either.

At seven o'clock that evening, the widow came to the druggist's and purchased a little camphor. As soon as she left the drug store and entered the post office, the boys hurried in the direction of the little hut in which she lived and waited. Shortly after the object of their fun arrived. On one arm she carried a bag, evidently full of washing, and in the other she had two chunks of wood. Entering the cabin she placed the wood beside the stove and dropped the bag in a chair.

After starting the fire, the poor widow took off her hood and cape, and produced the bulky envelope from her pocket. Her face was pale as she hesitatingly tore the end of the letter open. Even then she paused as if fearful of what it contained. She stood facing the little window, so that the boys outside could see every move within. At last she drew the valentine out of the envelope and looked at it. Over and over, she read the words. She was too old to appreciate the fact that it was only a joke, and then, too, the picture and the words brought back to her the memories of the past—of her husband and the life he had lived. Her dim eyes filled with tears, and she fell on her knees beside the little cot. The boys gazed intently on the scene before them; then suddenly Jack turned and started up the road, the rest following silently and in single file. Straight to the shanty Jack went, and its rough walls heard the noblest consultation that the boys had ever held.

The next night, armed with saws and axes, the boys cut up a large pile of hardwood; and, during the following week, each boy worked at odd jobs in a way that surprised and mystified the villagers.

Late on St. Valentine's night, Sam Dudley arrived at the shanty with old Nance hitched to a single bob, on which the wood was loaded in two great piles. Then Jack produced a neat buckskin sack, fringed and beaded, and each one of the five boys dropped into it two bright twenty-five cent pieces.

It was ten o'clock before the wood was unloaded and piled beside the widow's house, and the buckskin sack was hung on the door latch, with these words written on it:

A VALENTINE,
From your friends,
THE BOYS.

Boys Books Reviewed

ON THE FRONTIER WITH ST. CLAIR, by Charles S. Wood. This story is by a new writer, and he has produced a thoroughly wholesome book. It treats of the pioneers of the early days of Ohio, and of the eventful times of Governor St. Clair. There is much of stirring adventure and just the kind of reading of which all healthy, vigorous American boys are fond. There are good illustrations by Chas. Emerson. 352 pages. Pictorial cover. W. A. Wilde Co., publishers.

THE YELLOW VIOLIN, by Mary A. Denison. This is a nice story about a little girl, who is left friendless and has to sell newspapers for a living. She attracts the notice of a professor of the violin, who becomes her teacher and afterward turns out to be her long lost father. There are several pleasing characters in the book and also several disagreeable ones, but the book is worth reading. 311 pages, with pictorial cover. Price \$1.00. The Saalfeld Publishing Co., publishers.

THE MONCASKET MYSTERY and **How Tom Hardy Solved It,** by Sidney Marlow. We have spent more time in reading this book than upon many others which have been sent to us during the past few weeks. There is something true and wholesome about it, and the interest keeps on growing as one reads, that we confess to a feeling of gratitude to the author for having lifted us out of the flat, stale monotony which characterizes so much of the literature for boys now flooding the market. The characters in the book are portrayed with fidelity, there is never any confusion in the reader's mind as to "which is which," and the plot with all its details is carried on to a conclusion with striking success. Tom Hardy's fun, combined with his ingenuity, courage and pluck, will delight all who read the book, and it contains lots of baseball, fishing and other things to claim the attention of the average American boy. The book has such a clean, healthy and inspiring tone about it, without the least shade of prosigness, that parents will be glad to see it in the hands of their boys. 374 pages, good paper, clear type with attractive cloth cover. Price \$1.25. The Penn Publishing Co., publishers.

THE AMERICAN GIRL'S HANDY BOOK, by Lina Beard and Adella B. Beard—

Surely the girl will be hard to please who does not find in this volume what she wants in the way of sport, pastime, or healthful and artistic work. Even the mothers will renew their girlhood days when taking part in some of the games and exercises appropriate to Easter or All-Hallow-Eve. Each season of the year has been provided for and no girl can possibly lament at any time, "I have nothing to do." The barest mention of part of the contents of this fascinating and delightful book can only be given. Wild Flowers and Their Preservation, The Walking Club, Easter Egg Games, How to Make a Lawn Tennis Net, May Day Sports, Midsummer Eve, Games and Sports, Sea-side Cottage Decoration, A Girl's Fourth of July, An Impression Album, Picnics, Burgooos and Corn-Roasts, Botany as Applied to Art, Quiet Games for Hot Weather, How to Make a Hammock, How to Make Fans, All-Hallow-Eve, Nature's Decorations and How to Use Them, Nutting Parties, How to Draw, Paint in Oil Colors and Model in Clay and Wax, China Painting, Christmas Festivities, Making Christmas Gifts, Games for the Holidays, Golf, Bicycling, Swimming, Physical Culture, Girls' Clubs, Seashore Games, etc., etc. The book contains over 550 pages with 500 illustrations by the authors, and in addition an alphabetical index which adds to its value. Price, \$2.00. Charles Scribner's Sons, publishers.

Boy Journalists

Notes.

THE CONVENTION NUMBER of The United Amateur, the official organ of The United Amateur Press Association, is a very interesting number for active amateurs, both on account of its reading matter and its portraits and biographical sketches of prominent amateurs. Erwin B. Ault, 115 Sprague avenue, Spokane, Wash., publishes it for the Association, being its official editor.—THE CHUM has removed from Sweet Springs to 421 East Seventh street, Sedalia, Mo. Paul H. Appleby is the editor. While not very well printed and consequently not so neat looking as some other amateur papers, the Chum is still a meritorious publication. Though the mechanical part of publishing an amateur paper should be secondary in importance to the literary part, still the editor should take a pride in the appearance of his paper, and if his printing facilities are not sufficient should never rest until he has improved them.—THE STYLUS for September, Foster Gilroy, 16 Rigby avenue, Lansdowne, Pa., editor and publisher, is an especially neat, artistic and commendable piece of printing. A good word for the editorial matter would not be out of place.—THE HUSTLER, published by H. Flemming and G. Moore, 264 First street, Newburgh, N. Y., is well named. It has eight pages and a cover, three pages being advertising. With such a good advertising patronage The Hustler ought to at least pay its own way. There is no reason why amateur papers should not get advertising from local merchants, and thus help out expenses, if the publishers will work for it.—DEANE S. KINTNER, Hanoverton, Ohio, deserves credit for The Scribbler, which he prints with a lead pencil. "Where there is a will there is a way" is a motto that boys who have no printing presses, but want to edit papers, may well remember.

FOSTER GILROY,
Lansdowne, Pa.
Vice President N. A. P. A.

MR. BUTLER'S DEFENDER

RODNEY BURTON

this little Mr. Butler would manage the school better than a bigger man could manage it."

Nannie admitted that this might be true, and Lucy added:

"He speaks 'as one having authority.' I like that ring in his voice, and I'll warrant you that he won't give up to Si Barton without a struggle. If it wasn't for that Si Barton what a nice school we might have. Si is at the bottom of all the mischief in this school."

This was true. The Happy Hollow school would have been easily governed had it not been for the evil influence exerted by Si Barton, a big boy of nineteen with the tendencies of the born bully. He was an idle boy and as evil as most idle boys are apt to be. It was his proud boast that the teacher "never wore shoe leather" who could "boss" him. He regarded it as being "bossed" if he complied with the most ordinary and reasonable rules of the school, and he was sure to set these rules at defiance before he had been in the school two weeks. He felt that it added to his laurels when he had succeeded in "running a teacher out" at the end of a month, and he rejoiced in the fact that he had compelled no less than three teachers to give up the school because of his conduct and the conduct of other large boys under his influence.

Si and a number of other large boys in the district did not enter the school at the beginning of the term. They were needed on the farms on which they lived, and the school would sometimes be in session two or three weeks before all of the pupils in the district were in attendance.

The remarks of Si Barton when he first saw Mr.

Butler were not at all complimentary to that gentleman.

"Gee whizz!" said Si, in a tone of what he supposed to be withering scorn, as he gathered some of his fellows around him on the playground at recess time the first day Si came to the school. "I wonder how long that little chap thinks he can run this school? And I wonder if he really thinks that us big fellers are going to be bossed by him. Why, some day I'll just march up and take him by the ear and lead him to the door and tell him to git! But I'll come the good little boy act first and make him think I'm skeered of him so as to jar him all the more when I waltz him out. Of all the pulin' little chaps that ever set up to boss it over a school he is about the worst!"

Si enjoyed the novelty of going to school in a barn so much that he graciously condescended to behave very well for the first two or three weeks of the school. He wanted, moreover, to give the teacher a complete surprise when he made what he laughingly called his "bad break."

"You fellers needn't take no hand in it," Si said to Jerry Dunn and two or three other large boys who would have been very tractable but for Si's bad influence over them. "I can manage this little affair all by myself when the time comes. Some day when you and our own dear little teacher are least expecting it all this 'love and harmones' business will come to an end, and they'll have to trot out a new teacher for old Happy Holler school. I'm getting kind o' restless and am fairly spoiling for a fight, although I reckon I won't have much of a one with little Sissy Butler. If he should git sassy and s'prise me by trying to put up a fight I'd have to turn him over my knee and give him a downright spankin' before the whole school."

One morning, when the school had been in session about a month, Si intimated to his chums at noon when they were on the playground that it was probable that "something might happen" before night. He leered and grinned as he made this announcement, and jerked his thumb over his shoulder in the direction of the schoolhouse, in which the teacher was showing a dull boy how to solve some problems in "partial payments."

Si had never been more affable than on this particular day, and the teacher had begun to think that the stories he had heard about Si's capacity for mischief must have been greatly exaggerated. With the exception of one or two little outbreaks of impudence Si's conduct had been very good, and Mr. Butler, who had been kindness itself to all of the scholars, felt that he had really won a victory over the bully of the school.

When Mr. Butler rang the bell at the close of the afternoon recess Si did not come in with the other scholars, and the teacher said:

"Where is Silas Barton?"

"Here I be!" Si replied, and at that moment a door leading from the schoolroom into the barn opened and Si appeared leading a big, sleepy looking white mule Avery Sharp had recently purchased. A wild shout went up from the boys in the room, while several of the older girls gave expressions of indignation. The smaller boys and girls sitting near the door fled shrieking to a remote corner of the room.

"Whoa, Emmy!" bawled out Silas, and when the mule manifested some disinclination to enter the room Si tugged away at the halter and said: "Come along, Moses!"

Mr. Butler rose from his chair with his blue eyes flashing and his face aflame with indignation.

"What does this mean, Silas Barton?" asked the teacher.

Si grinned and winked impudently at the boys before saying:

A TRAMP who had made himself a bed of hay in the Happy Hollow schoolhouse was responsible for the fire that burned the house to the ground on the Saturday night before the school was to have opened on Monday. It was supposed that a spark from the pipe of the tramp had ignited the hay, and in a short time the house was in ashes. There was no money with which to build a new house, and it was at first thought that the district would not have any school that winter. Avery Sharp lived within a short distance of the schoolhouse site. He had just completed a barn larger than he would need that winter, and he offered the use of a part of the barn for a schoolroom for the fall and winter term of the school. The offer was accepted by the school board, and on the Monday after the fire a number of the men in the district went to Avery's house to get the barn ready for the school. A room about twenty feet square was partitioned off, rude seats and desks were made of unplaned pine boards, a very large stove, bought in the town six miles distant, was set up in the middle of the room, three windows were set in the wall, and the barn was ready for occupancy by the school.

This hastily improvised schoolroom was quite as comfortable and much cleaner than the old schoolhouse had been. The novelty of going to school in a barn pleased the children, and we were all in good humor when the school "took up," as we called it, the next Wednesday.

"If Si Barton and Jerry Dunn, and the other big and bad boys will only behave themselves when they start in we can have a lovely school this winter," said Lucy Drewe to Nannie Ross at recess time on the first day of the school in the barn.

"Yes, 'if' they only behave themselves. It provokes me so to see the way those rowdies act."

"Don't it, though," replied Lucy. "I wish that we would sometime get a teacher who would and could sail in and give that Si Barton the best thrashing a boy ever got in his life! He is the leader, and if he could be made to behave himself the teacher could probably get along with the other boys."

"But," said Nannie, in a lower tone, as she glanced toward the schoolhouse, "you can see for yourself that Mr. Butler cannot make Si Barton behave himself, if Si takes a notion not to do so. I don't see why the directors ever hired a little, delicate looking man like Mr. Butler to teach our school, when they know that even that big Mr. Shaw we had last winter could not manage Si."

"Well, you know that they didn't set out to hire Mr. Butler in the first place. They had a man named Dryden engaged, a regular fighter, so they say; but he fell and broke his leg last week and this Mr. Butler came along and they gave the school to him because there was no one else to give it to. I heard Jonas Hites, one of the directors, say to my father yesterday that you couldn't always judge a man by his size, and that it might be that

"Now, my friend, you are goin' to mount this royal steed whether you will or no."

"Well, it means that you are going to get a free ride!"

"Take that mule right out of this room!" commanded the teacher.

"Aw, yeas," drawled out Si. "To be shore! All in due time, me friend, but when this mule critter goes out you'll go astraddle of it! Ketch on?"

This was such a colossal piece of impudence and such a daring scheme that it amazed even the boys most familiar with Si's boldness.

"Hope you ain't no objection to riding bareback," said Si. "If you have, there is a sidesaddle in the barn that I might put on for a ladyfied young gent like you!"

The teacher's voice had a note in it that thrilled most of the pupils as he said:

"Silas Barton, I command you to take that animal out of this room!"

"You command me!" said Si with a sneer. "I'll command you to git astraddle o' this mule critter in a minute or two, and if you don't do it I'll be under the necessity of picking you up and setting you astraddle of him, embarrassing as that would be to both of us. Come along here, Moses!"

The teacher whipped off his coat and pushed back his sleeves. He knew that he was no match physically for the bully before him, but he was not to be intimidated on that account. His voice was perfectly steady as he said:

"I give you warning, Si Barton, that you will be sorry for this!"

"Aw, please don't lick me, teacher," said Si, affecting a whine that made some of the boys laugh.

"Silence!" commanded the teacher, in a voice that caused even Si to wonder a little.

"The fact is, Mister Teacher, that things have got kind o' dull in this school and I propose to liven them up," said Si. "Then I have come to the conclusion that you ain't just the person I want for teacher of the school. I want somebody that there'd be some glory in me lickin' once in awhile, an' there wouldn't be no glory in lickin' such a sissy as you. I a, I could do you up with one hand tied behind me. Wwoa, there, Emmy!"

The mule had pulled back again and Si gave the animal a cuff on the head with his palm.

Si knew that there would be no interference on the part of Avery Sharp, for Avery and his wife had gone to town that afternoon and there was no one in the farmhouse.

Leading the mule forward until it stood in front of the teacher's little table, Si called out to Jerry Dunn:

"Say, Jerry, you come and hold this royal charger while I assist our young friend to mount, seein' that he will probably decline to mount the beast of his own accord."

Jerry came forward with a grin on his face, and when he had taken the halter in his hand Si whipped off his own coat and said:

"Now, my friend, you are goin' to mount this royal steed whether you will or no. And before you do so you might as well take a fond adieu of your beloved scholars, for I can tell you that this is your last day as their dear teacher."

He said this with a leer, and stepped on the platform to lay hands on the teacher. To his amazement and to the surprise of the whole school Mr. Butler stepped forward, drew back his right arm and planted a blow squarely between the eyes of Silas, who gave a yell of rage and pain as he staggered back directly behind the mule. Then there was a still louder yell from Silas, for the old mule suddenly let one bony hind leg fly out and Si went reeling to the wall of the schoolroom, where he fell in a heap, crying out:

"O-o-o-o-h! He's killed me! He's killed me! O-o-o-o-h, my leg, my leg!"

The teacher was on his knees by the side of Si in an instant. Every trace of anger and resentment was gone from his voice as he said:

"I'm sorry, Silas! Are you badly hurt?"

Suddenly there was a yell of pain from some one else who had also been hurt. Frightened by the yells of Si and rebelling against the entire situation, the mule had suddenly caught Jerry Dunn's arm between its big, yellow teeth and had bitten him until Jerry dropped the bridle and began to howl with pain. The mule, now free from restraint, would probably have made sorry work in the schoolroom had not the teacher suddenly jumped to his feet, caught the animal by the bridle and called:

"Whoa!"

There was something in his voice that compelled obedience, and the mule stood quietly as the teacher stroked him gently for a moment, and then led him to the door and turned him loose into the barnyard. Then Mr. Butler gave his attention to Silas, who was still lying on the floor writhing in pain, as well he might, for after a hurried examination the teacher said:

"Well, Silas, I fear that it is you instead of I who will have to say good-bye to the school for a while, at least, for your leg is broken and I fear that it is a very bad fracture. We'll get you home as soon as we can and one of the boys must go for a doctor. Let me see what has been done to you, Jerry."

Jerry had dropped into a seat, grasping his arm and wincing with pain. There were holes in his sleeve caused by the sharp teeth of the mule. When he had taken off his coat it was seen that his shirt sleeve was soaked with blood, and the teacher feared for a time that the teeth of the mule had fractured the bone of the arm, but this did not prove to be the case.

"You'll have a lame arm for a long time, Jerry," said the teacher, "and I advise you to go home at once and have your arm attended to. I shall have all I can do looking after Silas. He must be taken home at once. School is dismissed for the rest of the day."

Mr. Butler, assisted by some of Si's thoroughly subdued chums, hitched one of Avery Sharp's horses to a wagon, the bed of which they filled with hay. They lifted Si into the wagon and Mr. Butler himself took the reins and drove to the home of Si's father. It was after dark before the doctor arrived from the town four miles distant, and it was nearly midnight before the teacher got away from the Barton farm. He went to see Si nearly every day, and long before the injured boy was on his feet again he had become one of Mr. Butler's firmest friends.

There was peace and harmony in the school from the day of the advent of "the new scholar," as some of the children laughingly called the old mule. The fearful bite he had received and the unexpected exhibition of "grit" and muscle on the part of the teacher, had so subdued the cowardly Jerry that he was as tractable as any five year old boy in the school; and with Jerry and Silas both under subjection the teacher had nothing at all to fear from any of the other pupils.

The remainder of the term was one of the most delightful in the history of the district, and when a handsome new schoolhouse was built the next summer it was the unanimous vote of the school that Mr. Butler should be the teacher. He accepted the position and never before had Happy Hollow been such an appropriate name for the school.

LESSON VI.—THE HALVING PRINCIPLE.

As a thorough knowledge of the alphabet is essential to the student, the same should be written out from twenty-five to fifty times every day until the student is perfectly familiar with the various signs.

We now come to a highly important and, at first sight, perhaps, rather difficult principle of our art—that of halving a consonant to express the past tense of verbs, or the addition of *t* or *d*. In order that you may thoroughly and easily master this important principle, we must ask your earnest attention to the following comments, illustrations, and exercise. Referring to the remarks on page 81 of the "Teacher," we find that a thin consonant is made one-half its usual size to indicate the addition of *t*. A thick letter when halved expresses the addition of *d*.

A vowel before a half-sized consonant is read before both letters, as *cast* — *ast*. A vowel after a half-sized consonant is read next to the primary single, double, or treble letter; thus, *God*, *est*. The half-length consonants are named *ket*, *jeut*, *art*, *elt*, *emt*, *end*, *wilt*.

The half-lengths *w*, *n*, *l* and downward *r* written thick, express the addition of *d*; thus, *mate*, *made*. *ld* and *rd*, like all the other thick letters, are written downward, but are not used when a vowel intervenes; *lt* and *rt* are most frequently written upwards, and the upward form of the latter letter is used in preference to the downward character, as a much better dis-

inction is thereby obtained in quick writing; thus, *felt*, *fold*. Such words as *lead* and *read* should be written *l* *r*.

When a circle *s* follows a half-sized consonant it must be read after the *t* or *d* added to the primary letter; thus, *pat*, *pats* (not *past*). No final vowel can be placed after the *t* or *d* added by halving. This rule requires the learner's particular attention.

Here you should make yourself an exercise by writing out two or three times all the letters of the phonographic alphabet that may be halved for *t* or *d*. This exercise will suggest such words as *pat*, *pet*, *pit*, *pot*; *chat*, *art*, *late*; *mat*, *mad*, *nut*, *mid*, *rud*, *dr*. Wherever possible, form words by inserting a vowel rather than leave a mere consonantal outline.

The halving principle for the expression of *t* or *d* applies equally to hooked and unhooked letters; *pat*, *prate*. In each case the added *t* or *d* is read last, that is, as a final sound. A consonant with a circle *s* or loop *st* prefixed or suffixed, or even with circle *s* at both ends, may be halved.

Work for this month to end of Exercise 58. Those of our readers who are desirous of taking up this valuable course of shorthand lessons can do so by purchasing the "Phonographic Teacher," "Key to Phonographic Teacher," and six "Phonographic Exercise Books." These works will be sent postpaid by Isaac Pitman & Sons, 33 Union Square, New York, to any address on receipt of one dollar.

The Wanamaker Store

THE New Spring Cottons

THE new cotton dress goods have appeared, with the most gorgeous burst of beauty such early Spring blooms ever presented. Not only are the designs the most beautiful ever produced in printed cottons, but the mercerizing process has made such progress that cottons have almost been turned into silk.

Another feature of the collection is the array of fancy and self-colored linen fabrics that mingle with the cottons.

The best choosing time is right now, before choicest designs are picked out. The best wearing time is before others have seen or secured the crisp, fresh beauty-things ready for you now at Wanamaker's.

We'll be glad to mail samples anywhere; but will appreciate it and serve you better if you let us know about what price you wish to pay, and what colorings you prefer.

Here are hints of the new fabrics now being shown:

French Printed Organdie Raye,	40c.	Scotch Shirting Madras,	50c.
French Printed Plumetis,	50c.	Scotch Linen Suitings,	37½c. to 75c.
French Printed Nette,	45c.	German Fancy Linen Suitings,	37½c. to \$1.50.
French Printed Nainsook,	40c.	American Fancy Silk Gingham,	65c. to 75c.
French Printed Piqués,	37½c.	American Fancy Swiss Muslins,	25c.
French Printed Batiste,	37½c.	American Fancy Gingham,	12½c. to 25c.
French Printed Louisine,	25c.	American Printed Batiste, Dimities,	
Fancy Embroidered Swiss Muslins		Dotted Swiss Muslins,	12½c.
at 37½c. to \$1.25 a yard.		American Fancy Oxford Suiting,	12½c. to 25c.
Printed Irish Dimities,	25c.	American Madras Shirting,	18c. to 25c.
Printed Irish Linen Lawns,	35c.		
Scotch Fancy Mercerized White			
Shirt-Waist Fabrics,	37½c. to 75c.

Pluck and a Stone Fence—Will Lisenbee

CHAPTER I.

A BLOW ON THE CHEEK.

"**T**ELL ye, Zeb Quigley, I hain't got the money, an' don't see how I'm goin' to git it," said Abe Benton, turning uneasily on his pillow. "If I hadn't a' got down with these rumatiz agin, I might a' had it for ye 'fore this, but the prospect looks perty blue now."

"You are unfortunate, I must admit," replied Quigley, in a smooth tone; "yet I'm not responsible for your misfortune and will have to insist on having my money."

A distressed look came over Abe Benton's face.

"I can't see how I'm to git it," he replied, after a pause. "Ye orter be easy on a friend an' neighbor."

"From a philanthropic standpoint—yes," observed Quigley, casting his eyes toward the ceiling; "but the fact is, I'm a little pressed for money myself, at present, and can't afford to indulge my conscience in any charitable enterprises, however worthy."

"I ain't askin' for no charity!" exclaimed Benton with some vehemence, moving on his pillow and fixing his gaze on the visitor; "I only ask ye ter give me a chance an' I'll pay ye every cent—every cent."

"Of course, I don't dispute your intentions, but if I should undertake to hearken to every voice of distress and misfortune, I'd soon be an object of charity myself or the next thing to it—a very unpleasant situation I take it, as you can doubtless testify."

"Then ye'd have me sell the place ter pay off the mortgage?"

"Really, now, it's not my place to suggest a remedy. You understand the situation and must make your own arrangements. There are three hundred and thirty dollars due, principal and interest, but if you can raise the thirty dollars of interest by tomorrow, I'll wait till you're up before calling on you for the principal. That is the best I can do, and it is only to oblige a neighbor that I depart from my usual method of doing business."

"I'll do what I can," answered Benton, "an' I'll send Tom over tomorrow an' let ye know how I succeed."

"Very well," and with this Mr. Quigley took his leave.

As soon as his visitor was gone, Abe Benton turned on his pillow and looked at his wife, who was sitting by the open window busily engaged in stringing a mess of beans for dinner.

"I don't know what's goin' ter become of us now," he said in a dejected tone. "If Quigley insists on havin' his money we'll haf ter sell the place, an' it won't bring more 'an the mortgage calls for."

"Tain't no use to git discouraged," said Mrs. Benton, in a hopeful tone; "we've been in as bad fixes before, and allus got along somehow. We might sell the cow er one of the horses for enough to pay the interest—that would be better than partin' with the place. I think we can find some way out of the trouble."

"Ye're allus hopeful, Liza. Mebby we can manage to pull through some way, but it looks perty blue for us now, an' if somethin' don't turn up we'll haf ter sell the place."

A year before the opening of our story Abe Benton had moved with his family from Illinois to Southwest Missouri and bought forty acres of land among the flint hills. The land was not the best, but being situated in a secluded place, and surrounded by wide stretches of rocky ridges, it afforded an outlet for stock on a valuable range. The little valley where the Benton farm lay had once been known as the Barker Lead Mines, and had been worked with considerable profit many years before. But long previous to Benton's advent into the valley the mines had all been worked out and abandoned.

All the money that Mr. Benton had possessed he had paid on the farm, and was then compelled to mortgage it for three hundred dollars to complete the payment. Zeb Quigley, who owned a large farm in the valley two miles away, had loaned him the money and now held the mortgage.

Mr. Benton had hoped to be able to pry off his indebtedness in the fall when his corn was gathered, but misfortunes had conspired to render this impossible. The crop of corn proved almost a failure, and early in the summer he was attacked with his old malady, rheumatism, which rendered him incapable of work. And this is the situation of affairs at the Benton farm on a day early in October when our story opens.

The Benton family consisted of four persons, the parents and two children, Tom and Bessie. Tom was an industrious lad of seventeen, and afforded great assistance to his father tending the crops and doing general work about the place. Bessie, who was some five years younger than Tom, made herself useful in helping her mother with the housework, and pulling weeds in the garden back of the little log shanty in which the family lived.

While the interview between his father and Mr. Quigley was taking place, Tom Benton was busy at work repairing a broken place in the stone fence that ex-

tended along the south side of the little twenty-acre field.

When the lead mines, which were situated along the base of the hill that skirted the field, had been worked out, huge piles of light red rocks taken from the mineral holes were dumped along the edge of the valley, leaving the ground in a bad condition for cultivation.

It required months of work to free the valley from the masses of rock that encumbered the soil, but the task was at last accomplished, and the rocks had been made to serve a useful purpose in forming a fence along one side of the field.

It had fallen to Tom's lot to perform most of the work of building the fence, and while engaged in moving the rock, he made the discovery that there were lumps of lead ore scattered here and there among the waste piles, and he resolved at once to gather as many of these as he could while engaged in the work. He remembered having seen the "scrappers" gathering bits of mineral from the dump-piles in the Joplin mines, and it occurred to him that he might make it profitable to collect the mineral from the waste piles he was working on.

He knew that it was worth three dollars and thirty cents a hundred in Joplin—a town only ten miles away—and when the work was finished he calculated that he had at least five hundred pounds of mineral. Placing it in a depression in the ground at the edge of the hill, he covered it with dead leaves, expecting to haul it to town as soon as he could find time to do so. He said nothing about the matter to his parents, intending to surprise them with the money when it should be needed the most.

Tom was just lifting a large rock into place in the stone fence, when the sound

He struck at Tom's face with his riding whip.

of approaching hoofs came from the road that led by the field, and looking up, he beheld Paul Quigley coming, mounted on a handsome gray pony. He was a youth of about Tom's own age, of graceful bearing, but owing to his foppish ways and an air of superiority which he invariably assumed, he was not popular among his acquaintances. Being the only son of the wealthiest man in that vicinity, he considered himself a superior kind of mortal to whom the greatest deference should be paid.

"Hello, Tom!" he greeted in a familiar tone, riding up and reining in his pony beside the stone wall; "mending the fence, I see—well, it needs it."

"You are right," Tom replied. "There were some cattle in the field this morning, and I'm trying to fix the fence so they won't bother us again."

"I hope you'll keep the fence in as good repair as possible," went on young Quigley, stroking his pony's mane; "the governor says the place is to be mine as soon as the mortgage is foreclosed, and I'd like to have it looking as if someone had lived here."

"Would you?" replied Tom, a feeling of resentment coming over him at the young upstart's assurance; "perhaps you had better save yourself the trouble of assuming the responsibility of superintending the place till it is really yours."

"Oh, the matter is all settled between the old man and me. I expect to have the old house you live in torn down and taken away. It hurts the looks of things."

"I wouldn't have it torn down today if I were you," observed Tom, dryly.

"What do you mean?" asked the other, feeling that he was being guyed by Tom.

"You wouldn't want to turn us out of doors, would you?" responded Tom, assuming a grave tone.

Paul looked sharply at the speaker,

evidently not satisfied whether Tom was serious or only poking fun at him.

"Of course you couldn't expect me to furnish you a house to live in," he said, after a pause. "But it wouldn't be any loss to me if you took the old rat-trap of a shanty with you when you leave."

"I shouldn't advise you to dispose of the house," remarked Tom, an odd twinkle in his eye.

"Why so?"

"Because it isn't yours."

"Isn't it? Well, just wait and see."

"Remember there's many a slip,"

"Yes, but there isn't any 'slip' about a mortgage. The old man will fix that up all right, and I'll advise you to be more careful how you speak to me while you are so much in debt to me."

"To you? You have nothing to do with the case—it is simply a business matter between your father and mine—no affair of yours whatever."

"I suppose you mean to say that it's none of my business, then?" cried Paul, an angry flush mounting his face.

"You can take it just as you see fit," answered Tom, coolly.

"If I were in reach of you I'd chastise you for your insolence!" exclaimed young Quigley in a loud, angry tone, shaking his ivory-tipped riding whip at Tom. "I have a mind to do it anyhow!"

"Well, I'm not going to run away or climb a tree," replied Tom significantly.

"Oh! you dare me, do you!" cried Paul in a rage. "I'll show you how to insult a gentleman—take that!" and leaning quickly over the wall, he struck at Tom's face with his riding whip. The tip end of the lash just touched Tom's cheek, causing a red spot to appear and almost bringing the blood.

Not a word escaped Tom's lips, but with a spring like a panther, he leaped across the wall toward his antagonist. Paul Quigley saw his danger, and quick-

ly wheeled his horse with the intention of riding away, for with all his bravado he was a coward at heart and dreaded an encounter with Tom. But before he could put his intention into execution, Tom was at his side and had grasped his bridle rein. The next instant Paul was dragged from his saddle and landed upon his back in the middle of the road.

Tom and assuming a threatening attitude. "Dare to lay hands on my son and I'll thrash you within an inch of your life!" Then turning to Paul, he continued, "Get on your pony and go home; I'll attend to this fellow."

Paul was only too glad to obey, and catching his pony that was cropping the grass by the roadside, he mounted and rode away.

Then turning to Tom, Quigley caught him by the shoulder and said in a harsh tone:

"Now, you young outlaw, I'll punish you as you deserve."

Tom made a desperate effort to shake off the grasp of the enraged Quigley, but he was held powerless in an iron-like grip. He was a youth of great strength and activity, but he was no match for the burly man who now held him in his clutches.

In his struggles to get free the boy was jerked from his feet and thrown violently to the earth.

"I'll teach you a lesson you'll not soon forget, you vagabond," panted the enraged man, throwing himself upon the prostrate youth.

Tom would have undoubtedly fared badly in the hands of the exasperated Quigley had not unexpected assistance arrived. At that very moment a horseman galloped upon the scene. It was Nathan Kirby, a neighbor and friend of the Benton family. He was a low, heavy set man some fifty years of age; of a kind disposition, yet he was known as a man who possessed a wonderful amount of nerve and cool courage. He carried a crutch across the saddle in front of him, having lost one of his lower limbs while serving under Grant in the late war of the rebellion.

"What in the name of common sense aire ye doin' thar, Quigley?" he exclaimed, reining in his horse beside the combatants. "Ye aire old enough to know better than to jump on a boy like that!"

"The rascal has been assaulting my son on the public highway," answered Quigley, "and I'm about to teach him a lesson he won't forget in a hurry," and he grasped a hickory club that lay within his reach, and was about to carry his threat into execution, when Kirby lifted his crutch in a menacing manner over the man's head and said:

"Don't ye strike that boy, Zeb Quigley!"

"What! Do you mean to say that you'll interfere in this affair?" blurted Quigley, in a rage, releasing the youth and rising to confront the speaker.

"Ye heard what I said," observed Kirby coolly.

"Perhaps you'd like to take the thrashing in his stead!" snapped Quigley, advancing toward the horseman threateningly.

"I hain't no objections to yer tryin' it," retorted Kirby; "but I'm under the impression that thrashin' boys is more in yer line."

With a muttered imprecation, Quigley strode forward as if to strike the speaker, but something in the cold glitter of Kirby's eye caused him to pause. Domineering bully though he was, he was lacking in that cool courage that characterizes the man of nerve. Seeing that he could not bluff Kirby by his bluster and bravado, and fearing a personal encounter with him, he changed his tactics, and said:

"Of course, I only meant to frighten the boy, though he deserves a severe punishment for his behavior."

"I never knew Tom to be quarrelsome," remarked Kirby, "an' if he attacked yer son I reckon he must 'a' had some cause."

"He struck me with his whip before I offered to molest him," spoke up Tom, showing the mark upon his face.

"I thought so," commented Kirby.

"I don't wish to have any trouble with anyone," observed Quigley, mounting his horse, "but I usually understand my own business and attend to it." With this he rode off down the road in the direction of his home. When a few yards away, he turned in his saddle and continued:

"I shouldn't advise you to continue to meddle in my affairs, Mr. Kirby; I am not a man who easily forgets an affront, and it may be to your advantage to keep this in mind."

"Much obliged ter ye," called out Kirby. "An' I'd advise ye to let boys alone and do yer fightin' with men."

Quigley muttered some unintelligible sentence and galloped away.

"I thank you, Mr. Kirby, for protecting me from that man," said Tom, addressing his protector; "he certainly would have used me roughly if you had not come up."

"Taint worth mentionin'," replied Kirby. "It's a pleasure to be of service to ye. I reckon that feller will not bother ye agin." Then he rode off, leaving Tom standing in the road by the stone fence.

It was now twelve o'clock, and taking his coat from the fence Tom walked in the direction of his home.

Now that the excitement was over, he regretted the encounter he had had with Quigley and his son, for he recognized the fact that they might work some harm to his father.

On reaching home he related the circumstance to his parents.

"I hate it that ye had trouble with that man," said Mr. Benton in a regretful voice. "He's got the advantage of

CHAPTER II.

THE STRANGER.

"So you would strike me and run like a coward, would you?" exclaimed Tom, his face white with anger. "I have a mind to thrash you till you'll remember it as long as you live."

As he spoke he grasped the frightened Paul by the throat and jabbed his head against the ground with a vigorous shove.

"Let me up!—help—murder!" shrieked Paul at the top of his voice.

"Hold, there, you young vagabond! How dare you lay hands upon my son?" came a gruff voice, and looking up Tom beheld Paul's father, who had just ridden up and was hastily dismounting.

"He struck me with his whip," explained Tom.

"Is that any reason why you should murder him?" demanded the exasperated father, approaching and grasping Tom by the shoulder, and pushing him aside.

"I'll have a warrant out for you this very day, you young ruffian."

"He had no right to strike me," said Tom. "He assaulted me first."

"He is lying," whined Paul, rising and brushing the dust from his clothes. "He tried to kill me simply because I spoke about the mortgage on the place."

"Take care!" warned Tom, advancing a step; "don't you dare tell me I lied!"

"Stand back, you young beggar!" thundered the father, stepping in front of

us in holdin' the mortgage on the place, and it ain't likely he'll neglect to make use of it now."

"I am sorry that it happened," said Tom; "but Paul struck me, and I couldn't take that."

"It won't make no difference with that old Quigley, any way," spoke Mrs. Benton. "He's goin' to do all he can to beat us out of the place—I could see that when he was here."

"He's got ter have the thirty dollars interest to-morrow," said Mr. Benton, "an' I can't see how we're goin' to git it. He said he'd wait for the other if I'll git him the interest."

"He wouldn't 'a' said that if he'd 'a' thought we could git it," replied Mrs. Benton. "It's only a plan of his to keep us from seein' what he's up to. He knows we hain't got a cent in the house."

Tom's heart gave a great leap as he thought of the scrap mineral he had been saving. This would bring part of the money necessary to pay the interest, at least, and he resolved to start to Joplin with it at once.

In a few brief words he told his parents about the stuff and of his intention to take it to town and sell it that evening.

"It is the hand of Providence," said Mrs. Benton, stooping to kiss Tom's cheek.

As soon as the boy had eaten his dinner, he hitched up the team of sorrel mules to the old lynch-pin wagon and drove down to the field and loaded up the scrap mineral. There was a great deal more of it than he had supposed, and he felt sure there were eight or nine hundred pounds at least.

Then, mounting the seat, he drove into the road, and flourishing a long dog-wood switch over the backs of the lazy animals, went lumbering on his way toward Joplin.

The road over which he was compelled to pass was very rough, being rarely used, and he was forced to travel very slowly. It was almost four o'clock when he drove up and stopped his team in front of the Moffet & Seargent Smelting Works at Joplin.

The weigher came out and after examining the mineral in the wagon box, he said:

"I can give you thirty two dollars per thousand for this; there is a little dirt mixed with it and I can't pay the full price."

"All right," answered Tom. "I'll take thirty two."

When the mineral had been weighed and thrown into one of the bins Tom followed the clerk into the office.

"What name?" asked the clerk.

"Thomas Benton," replied our hero.

The clerk wrote out a check and passed it to Tom.

"There were twelve hundred and eighty pounds," he said; "forty dollars and ninety six cents."

Tom could hardly believe his senses. Forty dollars seemed a very large sum to him, and he could hardly realize that there had been so much of the mineral. Yet there was the check for \$40.96 as positive proof of the fact.

I might add that Tom's miscalculation regarding the weight of the mineral is a common one with those unaccustomed to handling it.

"Take the check to our office on Main street, and it will be cashed for you," said the clerk, and with a polite "thank you," Tom left the office. He had little trouble in finding the paying office, and soon had a roll of crisp bills in his hands. As he emerged from the building onto the sidewalk, he noticed a rather seedy-looking individual standing by the door who eyed the bills greedily as Tom thrust them into his inside coat pocket.

After making a few purchases of some articles for his mother and sick father, he went to the post office and called for their mail.

A letter addressed to "A. Benton, Esq., Joplin, Mo.," was handed to him. It was post marked at St. Louis, and on the corner of the envelope was the card of one of the leading hotels of that place. "I wonder whom it can be from," mused Tom as he left the office; "I don't know who would write to father from St. Louis."

As he pondered over the matter a sudden thought came to him. Perhaps it was from the stranger that had come to their house some weeks before, and had gone away in so mysterious a manner. But who was he, and why should he write to his father?

Tom had often wondered who the stranger was, and what business brought him to that neighborhood. He was a man some forty years of age, was well dressed and seemed to have plenty of money. He had come to the Benton cabin one morning on horseback, and had asked a good many questions about the watercourses and grazing land in that vicinity.

He inquired if he might leave his horse there while he took a tramp across the hills to the nearest creek where he expected to spend the day fishing, though he carried no tackle with him. In the evening he returned, complaining of a severe headache. That night he was taken with a congestive chill and it was over four days before he was able to leave his bed. During this time he was

taken care of in the kindest manner by the Benton family, and Tom had brought a doctor from Joplin for him. For all these attentions he insisted on paying in a most liberal manner.

As soon as he was able to ride, he mounted his horse one morning and rode away, saying he would probably not return till night, and that was the last they had ever seen of him.

It was not strange then that Tom should connect the stranger in some way with the mysterious letter.

Thrusting the missive into his coat pocket, the lad hurried back to where he had left his team, and climbing into the wagon, started the mules into a brisk trot in the direction of home.

The sun was low in the horizon now, and he knew that it would be dark long before he could reach his destination.

As he turned in a side street, he saw the seedy-looking individual he had noticed by the office door walking at a rapid rate along the sidewalk.

Quickening his pace, the stranger approached the wagon.

"Kin yer let a feller ride with ye a ways?" he asked as he drew near; "I've walked about twenty miles ter-day, an' I'm almost petered out."

Tom hesitated a moment before answering. He did not like the man's appearance, and did not fancy having him for a traveling companion, yet it would look mean for him to refuse to let anybody ride when he had no load.

The stranger saw the look of doubt on Tom's face, and said in a pleading tone:

"It would be a great favor ter me if ye'd let me ride, but if ye have any objections ter ridin' with a shabby feller like me—"

"Get in," said Tom, and the man obeyed with great alacrity. Seating himself beside the youth, he began to talk in the liveliest manner, but Tom had very little to say, and could not but feel sorry that he had allowed the stranger to ride with him.

It was almost sunset when Tom turned into the dim wooded road that led to his home. There were still four miles of rough road before him—a road that wound about through a range of rocky hills, and he could not suppress a feeling of impending evil that stole over him as the sun went down and night settled rapidly over the lonely hills.

He had just entered a narrow valley where the trees threw their black shadows across the road, when suddenly the stranger turned and grasped him by the shoulder, and said in a gruff voice: "Give me that money."

(To be continued.)

THE MEDICATED CROUP NECKLACE

OR AMULET is a simple and effective safeguard against that dreadful disease, CROUP.

The Original and Only Sure Preventive. It is worn next the skin, forming a medicated barrier and close protection to the Croup centre. The medication is absorbed into the system of the child, by contact or inhalation. It is used by adults having throat trouble. The Croup Necklace or Amulet is endorsed by leading physicians, and is indispensable to every home. Send for circulars. Read our testimonials and order by mail a Medicated Amulet for Your Child.

PRICE, 25 Cents.

MEDICATED CROUP NECKLACE CO., Goshen, Ind.

The Boy Photographer

THE AMERICAN BOY offers twelve prizes of Two Dollars each for the best Amateur Photograph received during the twelve months in the year, one prize for each month, also a second prize each month, of one dollar, for the next best photograph, the competition to be based upon the originality of the subject and the perfection of the photograph. The contest is open to subscribers only. Photographs will be returned if stamps are sent for the purpose. All photographs entered in the contest and not prize winners will be subject to our use unless otherwise directed by the sender, and fifty cents will be paid for each photograph that may be used, the prize photographs in any event to be our own, without further payment than the payment of the prizes. Write on the back of the photograph its title, with a description of the picture, and the full name and address of the contestant, who in every case must be the artist who took the picture.

Snap Shots on the Streets.

With the ordinary shutter, amateurs who attempt to take street scenes nearer than twenty five feet to the camera are apt to be disappointed. With the object fifty feet away, say, a little movement will not be discernible on the plate if the shutter is set to the highest speed; but when nearer than that a moving object—and there are always moving objects in street scenes—will be almost sure to spoil the plate. The only exception is when the object is coming directly toward or going from the camera.

One must learn to hold the camera both horizontal and perpendicular in taking street scenes, and should not be under the necessity of looking into the "finder" to know what will appear on the plate. After practice, which to be sure is costly but worth the price, the "camera fiend" will in time be able to so quickly adjust his camera and make the exposure that the picture is secured almost before anyone is "onto" the trick.

Good Lenses.

Very few manufacturers will admit that their lenses are not good, though with close questioning they might be willing to say that some lenses are better than others. Probably as satisfactory a lens for amateur work and within economical limits as can be secured is a rapid rectilinear. Such a lens gives images of straight lines, and does not distort. A lens should not show color at the edges of the image either. It should be achromatic. The amateur, on the send-off, need not bother himself about "verastigmat" and "anastigmat" and other big words. Each means something, to be sure, but they are not always essential, even to good photography. Many a prize-winning picture has been made with a single cheap lens.

Rapid Developing.

The more rapid the developing the more precise must be the timing of the negative. This is why metol is out of favor with many professional photographers. They like pyrogallol because it gives them time to see what they are about. But some insist on having a rapid developer, and to such it is suggested that they use the formula of a member of the London society who developed several negatives before that body in the short space of five seconds each. It is as follows:

- NO. 1.
- Hydroquinone 20 grains
 - Metol 20 grains
 - Auduroil 40 grains
 - Sodium sulphite 48 grains
 - Water 8 ounces

- NO. 2.
- Potassium bromide 10 grains
 - Sodium hydrate (caustic soda) 120 grains
 - Water 8 ounces
- Equal parts of Nos. 1 and 2 are used without further dilution.

This developer will fog some make of plates unless it is kept cool.

BE A LEADER. Second prize photo: Nick Broehl, Sherwood, Wis.

Getting the "Hypo" Out of Prints.

It is reported that if prints are squeezed after each washing. It will greatly facilitate getting rid of the hypo in the fixing bath, which is the object of all the washing. This will be welcome news to those who do not have running water, and so are compelled to put their prints through a dozen or more washings. If the hypo is not all removed, the prints will in the course of a few months begin to turn yellow.

Getting Clear Pictures.

It is generally a surprise to the amateur photographer to find that it takes less time to get a picture of a distant object than of one near by. To be told to shorten the exposure as the distance increases, seems just the opposite of what it should be. But if the owner will study his camera he will see that when the camera is focused on a distant object, the plate is nearer the lens, and so nearer the light, than when the object is in the immediate foreground. So it stands to reason that with plate and lens together the light is strong, while when they are apart, the light is by that much weakened.

Supposing you have two objects, one near and the other at a considerable distance, and you desire both to be in focus. The right thing to do is to leave the stop wide open, and then focus on the nearest object, taking care that it is perfectly clear on the lower margin, as that is the nearest point to the camera. Of course the distant object will be out of focus, but this is easily remedied by then "stopping down" until everything on the plate is in focus. The stopping down will not alter the focus on the near by object, but it will remedy the other defect by cutting off the rays of light that come from the edges of the lens; and in proportion as the rays are direct will the focusing be accomplished.

It is a mistake, however, to want everything in every picture sharp. In landscape work it is pleasing to have the distance somewhat hazy, just as it is in reality, except in high altitudes. This is accomplished by focusing on the near by objects, and then only stop down sufficiently to give distinctness to the middle distance. That will help to convey the idea of distance. It will also fasten the attention of those looking at the photo on the objects in the foreground, which are generally supposed to be of most interest.

"Do not study sharpness in the center only," says one writer on photography, and this is good advice. Still in portrait work it is necessary that the center should be sharp, and the margin somewhat indistinct. Indeed some of the high-priced lenses will, unless stopped down, have the nose in, and the ear out of focus. There are special lenses made for work that requires great clearness all over, as in architectural photography.

Avoiding Pyro Stains.

As has before been remarked, one of the chief objections to pyro developer by amateurs is the fact that it stains the hands, particularly if more than one or two plates is developed in the same quantity of developer. To avoid these pyro stains on the hands all that is necessary is to wash the hands in a diluted solution of citric acid, and when dry rub them well with glycerine. Under this treatment, it is said, the pyro will have no effect on the hands.

The Industrious Queen

FRANK H. SWEET

Thousands of years ago, when men were carving their records on wood and stone, this queen was manufacturing a firmer and more durable paper than even the Egyptians, who built the pyramids and made so many wonderful carvings, could make. And all through the intervening years, she has continued the manufacture, in the same old way, and even now, with all our progress, her work commands our wonder and admiration. We examine the different qualities, and marvel at the delicate, lace-like appearance of one, and at another which is like stout cardboard. And through them all can be traced the long interwoven fibres which give the paper its strength, and which, strangely enough, the Egyptians never learned to substitute for their short fibres.

She has helpers, of course; but she outlines the work, and has it well under way, often before the helpers are born. Some warm day in spring, perhaps even before the snow has left the ground, she creeps from the sunny hole or crevice where she has passed the winter, and after a half-hour or so to stretch her wings and get accustomed to the light, begins her life work. She selects a suitable spot to found her kingdom, perhaps the low branch of a pine tree, and hunts about for old wood or fibres of plants to convert into the paper which is to be her building material.

She has a very strong pair of mandibles, or jaws, this industrious queen, and with them she tears off and gnaws tiny particles of the decaying wood, which she chews and works with her jaws until she has reduced the particles to a pulp by mixing them with the juices in her mouth. This pulp she forms into a column, with an umbrella-like attachment beneath which she builds a few cells, of finer texture than the outside covering. As the cells are finished the queen deposits an egg in each, which she glues firmly in place. Then, as the weeks go by, she builds more cells and deposits more eggs; and she provides food for the babies which will be very ravenous when they first make their appearance in the world. This food is insects, stung into numbness, but not killed.

But not until the eggs hatch, the young develop and go into that wonderful sleep from which they awaken perfect wasps, are they ready to help their mother, the queen. Then, for the first time in her busy life, she withdraws from active work and becomes a queen in reality as well as in name.

One of the Central American species makes a nest shaped like a sugar-loaf, of firm, white cardboard. This she manufactures from cotton-down, sometimes making as many as sixteen layers to give it strength to withstand the violent rainstorms of the tropics. An Australian cousin builds a very elaborate nest shaped like a Mexican water bottle turned upside down. She kneads the mud of which it is made until it is very fine and plastic. The neck of the bottle with its neatly-turned rim forms the doorway.

Some of the wasps prefer building in holes in the ground or hollow trees. The steel-blue wasps excavate homes in the muddy banks of rivers. But all of them, like well-behaved children, go to bed at sunset. They will sting, of course, if molested, but their good points easily outweigh their bad. In the summer they destroy an immense number of insects which would otherwise be very injurious to our fruits, vegetables and flowers. Some housekeepers even welcome the wasps into their kitchens, as they destroy so many flies.

The structure of wasps is wonderfully adapted to their work. They have two pairs of gauzy wings, the framework of which, and the heavy lines running through them are tubes filled with air. This gives the wasps buoyancy and explains why they are so strong on the wing as to be able to seize moths and butterflies larger than themselves. When at rest the wings of the true wasps are always folded lengthwise. On the front part of the wasp's head is a little triangle with a toothed edge. This is for flattening the pulp bar into sheets of paper by patting and pressing them. There are very powerful muscles connected with the wasp's jaws, to enable her to tear and bite the wood and fibres of which she makes her paper. The lower jaw is provided with strong teeth.

But on the first approach of cold weather the wasps lose all their vitality and soon succumb, only a few of the young queens living through the winter, to found other colonies.

Owls That Live in Holes Dug in the Ground.

Birds make all kinds of curious nests; still, surprising as some of them are, they generally are alike in one thing, and that is that they are suspended in the air in some manner.

But Florida has a bird that digs its nest deep in the ground. It is the little Florida burrowing owl, called by the neat and dainty name of "Speotyto cunicularia floridana" by scientists, who love to find names like that for the beasts and birds and fishes of the country.

The burrowing owl does not live underground because it is too stupid to build a nest above ground. It is a very wise little bird, much wiser than most of its feathered relatives, and its knowing appearance is fully borne out by its brain. The owl burrows because it prefers to live that way.

The birds dwell together in large colonies. Thus their homes form real bird cities. They prefer an open prairie land for the site of the settlement. Having selected the location, they pitch in suddenly some night and by the time dawn comes the town is open for business, each house finished and all the inhabitants snoring comfortably, from four to eight feet under ground.

Like the prairie owls in the west, which also live in burrows, the Florida owls are as quick as a wink in diving into the holes of their gloomy homes on the first sign of danger.

The burrowing owls are not satisfied with a burrow unless it is deep enough to furnish them reasonable protection against rattlesnakes, which dote on owls' eggs, and will not hesitate to squirm into an opening in the ground if they think that a feast of fresh eggs is waiting for them at the bottom.

Sometimes a rattlesnake will worm its horrible body into a nest and drive the little owls out, eat their eggs and then add insult to injury by dwelling in the burrow itself.

When the birds are ready to build their underground mansion the male bird pecks at the ground with his bill till he has marked out a circle about six inches in diameter. It is wonderful how well he can do this. The circle that he "pecks out" is much more perfect than any that most children could draw.

When the circle is completed, the male and female begin to delve away at once. First they dig with their bills, until they have broken up the top layer of the ground enough to give them a foothold. Then they begin to use their claws.

When the scratching begins the dirt begins to fly. It would make barnyard hens turn green with envy if they could see how the burrowing owls can scratch. Indeed, it is lucky for us that chickens can-

not scratch one-tenth as well. If they could the entire United States might be scratched off the face of the earth in a few years.

The burrows extend in a straight line. When the birds have worked out the circular shaft they must make a big vaulted dwelling room at the bottom. This parlor is circular in shape and large enough to accommodate both papa and mama owl and all the little owls. It is so deep below the surface that rains cannot seep into it. The little family, gathered there throughout a stormy day, can sleep as comfortably as if there were no such thing as tempest.

The burrowing owls' eggs are beautiful little spheres, perfectly round, pure white, and not more than an inch in diameter. After they have been laid and until they are hatched out, the little father stands constantly at the mouth of the burrow, watching most fiercely that no enemy shall approach too closely.

When he is standing sentry he rests on one leg and never moves any part of his body except his head, which he twists around in all directions, forward, backward and sideways, as if it were set on a pivot. Let danger threaten and that movable "tottoleey" head is thrust forward, the bill opens alarmingly and the yellow eyes grow immense—so immense that most animals are frightened when they see them.

Spare the Birds.

It is estimated that 5,000,000 birds are annually required in America alone to fill fashion's demand. In one winter in Florida one party killed 130,000 birds. Forty thousand terns were destroyed at Cape Cod in one single season. Prof. E. E. Fish, of Buffalo, referring to birds, says: "It is estimated that they save to the farmers annually in the United States over \$100,000,000."

Think of this when you go to kill a bird!

Lions "At Home."

The lions of Bronx Park, of Greater New York, are to have a new home which is to be 170 feet long, sixty feet wide and the finest in the world. Here they will be healthier and happier than they have been heretofore in the stuffy air of their smaller home.

THE BOYS Poultry Yard

The Way Chicks Are Made in the Shell.

An egg is neither more nor less than the raw material for a new organism put into a neat and handy parcel. The yolk furnishes sulphur and phosphorus for brain and nerves, lime for bone-building, as well as a remnant substance for nutrition. The white, pure albumen, is for flesh and muscle forming. The transformation is effected through the joint action of warmth and the living germ.

This germ lies hid within a small whitish semi-transparent slot attached to one side of the yolk, just where it lies against the white. A fresh egg has the yolk perfectly balanced in the middle of the white. Unless it remains thus balanced the chances are decidedly against hatching. Brooding hens understand that. In fact when filling the nest, a hen turns over all the eggs in it before she quits it after laying a new one. She knows instinctively, too, that in hot weather the sun will addle her eggs, so chooses a shady nest-spot. But in winter, a stolen nest is often made where the fullest sunshine streams into it.

Brooding is throughout full of quaint surprises. Eggs will hatch if kept at blood heat—98 degrees. But they hatch more certainly, and turn out stronger chicks if the temperature is a degree or so higher. Just how it is done nobody knows, but mother hens some way contrive to raise the normal heat of their bodies to the requisite pitch. Further they strip the whole breast of feathers, so the eggs may have the benefit of full heat. Twice a day they turn over every egg in the nest, cuddling them separately up underneath their beaks, making little soft half-creeps, chuckling noises the while. They are also most uncalculating egg stealers. All in sight will be drawn into the nest, though the stolen eggs may crowd out those legitimately there. Still in a way, hens take stock of what they brood. With few eggs they sit prim, with trimly folded wings. With too many they sprawl all over the nest, wings loose enough to let light between every feather, and frequently turn themselves about reaching for uncovered eggs, and drawing them underneath the breast. A hen of average size cannot profitably cover more than fifteen eggs. In cold weather thirteen is a better limit, although in mid-summer the same hen might brood and hatch twenty. Left to themselves, the unchecked instinct of egg-thieving is apt to result in a nest full of spoiled eggs, with maybe one or two feeble chicks.

Twenty four hours of brooding makes hardly a perceptible change in an egg. Sometimes in warm weather, there is the least reddish tinge beside the whitish clot. After thirty six hours the clot shows a well defined drop of very red blood. In two days more a ghastly eyeball is visible, further the blood-drop has spread to ragged veins and arteries. A little later the veins and arteries are well established. One main channel runs straight out to the shell. Inside the shell there is a delicate membranous lining. In this lining other veins develop from the point of contact with the big vein. They spread all over the membrane in fact, and through them the forming blood is oxygenated. Eggshells are full of minute pores, through which the embryo gets air.

At the end of ten days the head is fairly well formed, though the trunk is still ragged. In two weeks the chick is recognizable as a chick, and if the shell envelope is broken will quiver all through and feebly move the head. It has, however, no vestiges of the fine down coat it will wear a little later. The coat forms rather rapidly. The period of incubation for a chick is twenty one days, and for two days before leaving the shell the young fowl is practically perfect. Notwithstanding it would not live were the shell forcibly removed. It spends the last two days gathering vital force to make its own way out into the world. It lies snug within the shell, the head bent upon the breast, in such a position as brings the beak full against the shell. The beak is armed with a tiny detachable piece of horn, flint-hard, and set upon the very tip of the upper mandible. At full hatching time the chick presses this triangle against the brittle shell and breaks a triangle hole in it, possibly a quarter inch across. An hour later, the chick having turned itself slightly slightly presses the beak against a new spot, and makes a fresh break. As more air comes in the little creature grows stronger. It writhes still more strongly in its prison, turning always from left to right. In two hours or ten it breaks the shell in two, and slips out into the nest, a wet and weary sprawler. But the turning in the shell meant more than the breaking out. The motion twisted in two the parietal blood vessel, connecting with the veins in the lining membrane. If it had not been thus gradually severed the young chick would have been in danger of death.

Old eggs, with shrunken whites, have this lining membrane so thick and leathery that although the chicks may form in them all right enough, they rarely ever live to come out of the shell. At pipping time, when the chick begins turning, the tough shrunken lining clings hard. The shell may be brittle enough to part for one or two pipings, but the skin garment sticks—the poor chick rolls out a wrinkled discolored ball, and dies whether or no he is helped out.

200 Egg Incubator

For \$12.80

The simplest, most perfect incubator made in the world. This is a new one at a remarkably low price. It is an enlargement of the famous

WOODEN HEN

and made as thoroughly good as any incubator on the market. It will hatch every fertile egg, and stand up to regular usage as well as the most costly.

BOYS AS MONEY MAKERS and MONEY SAVERS

A Young Butter Maker.

Wesley Adams, formerly of Clarion, Pa., age seventeen, has made a good record as a butter maker, scoring 92 points out of a possible 100 in securing

WESLEY ADAMS.

a prize therefor at the annual meeting of the Iowa State Dairy Association in 1902. Ninety seven. It is said, is the highest score ever made at these meetings. Wesley and his parents have lately moved to Rega, N. D., and Wesley is ambitious to succeed in stock raising.

Could You Get a Bond?

The Interior says: "Under old business methods a young man who sought employment in some great house must appeal to his friends for 'bonds.' Today he must appeal to a guaranty company; and the first question asked him is, 'Do you gamble?' The second is, 'Do you drink?' If he cannot answer 'No' to each, and back up his reply by the evidence of his friends, he may pound stone, but he cannot handle cash. The Sunday school has now a powerful assistant in the packing-house and the bank. The area in which a young man may sow wild oats is being narrowed every year, and the young man who 'must have his fling,' may have it out on the levee, but not on Wall street. Fathers and mothers do not send detectives to the race track to see who is betting on the horses there, but the bond companies do; and many a young fellow who sneered at his mother's tearful entreaty has listened very humbly to the words of the president of the company which holds his future in its hands."

Good Sound Advice to All.

Many boys see the typesetters in a country printing office sitting on a stool, doing nice clean work, and they want to learn the printing trade right off. The first day they put you to distributing "pl." and you think you have struck a snap, but the next day you get the second degree and have to wash the rollers, and wash the forms, carrying the dirty water down three flights of stairs and carry the clean water up, and you do the rolling; and when you go home the second night, there is ink on your white shirt and clean up to your hair, and when you get home your mother will not own you. You want to quit the printing business right off. You supposed it was all setting type and editing the paper, but you will find that you have got an apprenticeship of years of dirty work before you reach that point, and to be a success you have got to enjoy it, and forget that sometime another boy will take the ink degree, and you will be advanced. If you have it in you, and take the various degrees in the employment you seek, you will, some day become the grand master, and you can have your hands clean. The Sun's advice to you, boy, would be to pick some trade that you think you are fitted for, put on some old clothes, and tell them that you want to begin at the bottom and learn it clear to the top, and then don't you ever miss a note or shirk anything, and when you are graduated you are in a position to teach others. There is no trade that you can learn that will let you remain at the top and keep clean and make you easy, except that of inheriting a fortune, but that trade is already overrun and there are few openings. Learn something, and learn it well, and when you are at the head of a business, with gray in your hair, you can enjoy thinking of the days you were dirty and disgusted.—Peck's Sun.

Boys at Work.

BUD JONES, Novi, Mich., fifteen years old, has laid the foundation for a fortune by selling The Detroit Evening News in his town. He has been acting as an agent for the News for five years. In that time he has sold more than 75,000 copies, and yet Novi has a population of only 250 persons. Bud has bought a house and lot with his savings. The boy began with thirteen customers and his profit was less than six cents a day. When he got \$300 in the bank he bought a small house on an acre of ground in the village. He had to pay \$400 down. He took his money from the bank and borrowed \$100 from his father, thus making up the price. He then spent four dollars for fire insurance and another dollar for cyclone insurance. Then he rented the house to a man who paid him \$52 a year, which was 13 per cent on his investment. He reserved the back part of the lot, which had on it some fruit trees. On a patch of this ground he planted sweet corn and beans and looked after them himself. He expects to get at least fifteen dollars out of his apple crop. We are accustomed to hearing of poor boys doing extraordinary things in the way of making money, but Bud's case is one of a boy whose father has money and position, getting out and hustling for dollars for himself. It is an example which the sons of rich fathers may well emulate.—LEO E. DUFF, Jersey City, N. J., age thirteen, earned the money to pay his subscription to THE AMERICAN BOY by collecting bills for his father on commission. He says, "I would like to hear from other subscribers to this juvenile paper. It's a peach."—HARRY DINKEL, age fifteen, Chicago, Ill., earns money working in a coal office after school hours. He saves his money and buys his own clothes and other needful articles. The dollar for his subscription to this paper he earned. He plays the violin and belongs to two orchestras, and the money that he earns playing in the orchestras he pays out for music lessons.—CHARLES E. WELLS, Yale, Mich., has made and put in the bank \$104.75 within the six weeks prior to December 4, by printing a cook book called "Yale's Pride." Each woman in the town gave a tested recipe with her name signed to it and agreed to take a book at 25 cents. He then obtained advertisements from several of the home merchants. The book contains forty pages and was printed by himself on a 3x5 Kelsey Excelsior press. Charles is seventeen years of age and is Captain of Apollo Company, No. 31, ORDER OF THE AMERICAN BOY.—CARSON TAYLOR, Cedar Falls, Ia., age twelve, worked last summer on the farm and earned fifteen dollars. He has loaned it at 8 per cent interest.

Two Boy Barbers.

Chester A. Spath, of Lewiston, Mo., and Joe Muscia, of Allegheny, Pa., the former thirteen years old and the latter eleven, are two boys who have undertaken to become tonsorial artists at a very early age. Chester learned the trade at Monticello, Mo. He began it at the age of eleven under the teaching of his father. The father noticed that the boy was naturally inclined to do things about the barber shop and so allowed him to take a hand at the

JOE MUSCIA.

CHESTER A. SPATH.

simpler part of the work during his spare time after school hours, and in a surprisingly short time the boy mastered the trade and now holds a regular chair in his father's large shop, a platform having been built around the chair so as to allow him to do the work with ease. Joe Muscia also works in his father's shop, which is on Washington avenue in Allegheny, Pa. Joe began at the age of nine. He is a nice-looking, rosy-cheeked boy, and seems perfectly contented with his trade. During the day he attends school, but as soon as

Any bright boy who reads this advertisement can start in business next week selling

THE SATURDAY EVENING POST

He can do it after school hours on Fridays and on Saturdays. The work is pleasant, as well as profitable. The only qualification necessary is a willingness to work—no money needed. We provide the capital. Ten copies of the magazine are furnished free of charge the first week. These are sold at Five Cents a copy and provide the necessary money to order the next week's supply.

\$225 IN EXTRA CASH PRIZES WILL BE DISTRIBUTED NEXT MONTH AMONG BOYS WHO SELL 5 OR MORE COPIES WEEKLY

If you are willing to try it, we will send next week's supply and everything necessary for making a success, including booklet showing photographs and describing methods of successful boy agents.

THE CURTIS PUBLISHING CO.
415 Arch Street Philadelphia, Pa.

school hours are over he puts on his apron and goes to work. He, too, has had a platform built about his barber's chair so as to bring him up on a level with his work. Joe has little time for play and is seldom seen with his schoolmates on the streets.

Learn to Do Only Work that Pays.

Digging in the soil and chopping wood is hard work, but it requires no special skill, hence the wages paid are the smallest. The pay increases in proportion to the thought and skill required. Learn a good trade and it will be with you when your friends and money are gone. Few boys take to tasks that require thought and persistent effort. Yet skilled work is the only employment in demand. Hod-carriers and common laborers glut the market everywhere. The tradesmen and artisans are the ones that get the easiest jobs and the most money. The others are always hunting work. Should they accidentally stumble upon a job they cannot hold it. A superficial knowledge will not do. It must be thorough. Boys, learn a trade while young. After you are twenty years old few will be found who will take time and trouble to teach you one. When you are that old you will want a man's pay. If you don't know anything you won't get it. Know-nothings work at odd jobs and are paid the lowest scale.—The Gem.

HERE'S A MONEY MAKER
AGENTS Our Automatic Carpet Stretcher and Tacker
Sells itself. Works on an entirely new principle. Operator stands in stretching and tacking carpet. Can stretch and tack two thicknesses. Stretcher draws your weight with the carpet. Don't pound fingers or wear out knees. Drives 50 tacks per minute. Every machine guaranteed. Special price to agents on samples, express paid. Columbus Tack Feller, post-paid 20c. Write for terms, catalogue and Good Co. Splendid seller. Other items. One agent sold 25 stretchers in three days. Now is time to take orders. E. O. Pierce Specialty Co., Solist, Wis. 451 2nd Street.

HOW TO MAKE MONEY Invest 1 cent by writing us a postal card and we will put you in a position to earn \$1,000 a year. This is no fraud. Many now in our employ will vouch for the truth of this statement. We are willing to guarantee any honest, energetic person, without previous experience, from \$700 to \$1,000 a year sure money. Write to-day.
J. L. NICHOLS & CO., Naperville, Ills.

Boys in Games and Sport

Table Golf for Winter Evenings—Myra Kline.

All the principles of the fascinating out-of-door game of golf are retained in table golf, though, of course, the means employed are very different. To begin with, you should have a good-sized table. If the dining table is an extension one, with leaves, extend it to its utmost. It must be covered with a thick, springy cloth. If the cloth is not of the right thickness itself, lay something on the table first, like a very thick blanket and then put the cloth over that. This will enable you to "drive" the counters with which you are to play and which are to represent not only the ball, but the driver, brassie, cleek and niblick all in one.

The rules which govern the game may be, if you wish to follow them, exactly the same as in golf on the open links; but if it be found confusing to keep track of all the small strokes, the better plan is to proceed as in playing croquet, that is, playing your opponent stroke for stroke, and the one who gets round the links first wins.

In arranging the links a good deal of ingenuity may be displayed, but it is well not to make the course too difficult at first. For holes, use whatever may be agreed upon; a teacup will answer, or an egg-cup, or a book laid flat, as shown; it is not so easy to flip the counter on to the book as may be imagined. The most important part, of course, is the judicious placing of the obstacles. It is a good idea to place the first bunker at such a distance from the tee, that it requires a good shot to pass it. A very good bunker is made by placing two books on edge, leaving an opening between them, through which the drive must be made. If the tablecloth be rucked up, just beyond, it makes it still more difficult, as if you lift the counter by accident into that bit of brushwood, then it may take several shots before you are out of it, and ready to take the next bunker and then "put" for the first hole.

The "putting" of course does not consist of rolling a ball into the hole as in real golf, but in flipping the counter onto a book or into the cup. Duck ponds may be saucers of water and if you happen to get the ball into one of these do not attempt to play it out, you will only lose by that method; the quickest way out of that trouble is to take it out and to lose a stroke. A very good bunker is a wide book set on edge, as seen in one of the illustrations. This is another bunker that looks simple, but it is not

so easy as it looks; it requires considerable knack to give the counter the right pressure to send it up and straight over the book, so that it falls on the other side in a good position for the player to make for the "putting green." Also this bunker is on the very edge of the table, so that there is a chance of the shot going wrong and the counter going off the table, in which case the shot is lost, and you must go back to the place where you struck your ball, or counter, and lose the turn.

Now let us follow a game around the links we have arranged. It is a good plan to make the first shot from Tee No. 1, a long one; the player's aim must be to clear the duck pond and "drive" through the ravine represented by the two books on edge; if you go too hard you are apt to land in the brushwood beyond, which, in this case, consists of the tablecloth rucked up; if you don't go hard enough you may lose your ball in the duck pond or hit one of the books on the side, in which case you may lose several shots in getting back again into the front of the ravine so that you have a straight shot through.

If you are so unfortunate as to get into the brushwood you may find it very hard work getting out again, and lose a good many shots. If too much tangled up in it, the best plan is to lose a shot and take it out. Assuming that you do that, you have got to take a shot on the near side of the brush and clear that and leave yourself well-placed for the shot over the next bunker (the book on end) and having cleared that, you "put" for the first hole, or cup.

Then starting from Tee No. 2, you have another pond to get over. Hole No. 2 is near the edge of the table and it is a flat book, which makes it not such an easy matter to flip the counter thereon and have it stay. Just beyond Tee No. 3, there is another stretch of shrubbery; this consists of a silk handkerchief or a feather boa, and the player must clear this and yet not go so far as to get off the edge of the table. Having passed this you "put" into the third or last hole. The first one around the links, of course, wins the game.

As to the number of players, there is no limit if the room and table be fairly large. Two or more may play and it may be by taking sides, or all against all. If after a little practice it is desired to make the game more difficult, many things will suggest themselves whereby this may be accomplished, but perhaps it may be well to mention one way which I have found to prove admirable. Use two tables, the second

of the Period

THE ELGIN

With ordinary care and usage—anywhere, at any time—

Through heat and cold, or jar and jolt—

The Elgin Watch will never fail in its faithful performance of perfect timekeeping. Guaranteed against original defect.

Every Elgin Watch has "Elgin" engraved on the works. Booklet free.

ELGIN NATIONAL WATCH CO., Elgin, Illinois.

need not, of course, be so large as the first, place them at a distance apart which will require a very good drive to cover the distance that separates them. On the other table there may be other bunkers and a hole or two according to the size of the table. After passing around the second table, it is necessary to cross the yawning chasm between the two tables in order to get back to the original links, which will require the very best "stroke" the player can make. The counters with which the game is played are the small discs of celluloid, about the size of a quarter, which are used in other popular games. The plan is to use one as the ball and to hold another between the thumb and first finger. By pressing one on the edge of the other the latter may be made to fly in any direction and to any distance desired.

Progressive Games.

"Hale House" is a club house for boys and girls in Boston, which has the oversight of 260 young people. Mr. G. W. Lee, of the Hale House, sends us a copy of the House "Log" in which the doings at Hale House are reported from time to time in printed form. He calls attention to an article printed by him on "Progressive Games," which are table games in which the winning players "move on" when the bell rings. "Progressive Games" is a semi-annual event at Hale House. The games used on the last occasion (October 24) were the following: Conette (a small catapult throwing a projectile into a net marked off with numbers), ring-a-peg (a modified tiddledy-winks), magic wells (a harmless hammering game, mostly luck and particularly popular), niloe (a first-letter game, which we regard as one of our old "stand-bys"), cube anagrams (a word-guessing game, with dice-throwing, fish-pond (old as the poles, but unique, dominoes (still older, but with modern methods of play), foxy Grandpa (an adding game with cards), and snap (after the manner of snap-jack).

The writer of the article suggests the following as an additional list of games that may be used in this way: Magnetic Jackstraws, go-bang, miniature pool, crokinole, shunette, target game toy, tiddledy-wings, fascination, table football, ports and commerce, and loto (the last four being games of luck).

Prizes are given in the Hale House games. There is no head table, and no time limit between bell ringings. It is found more satisfactory to have all winners move on each time, with the playing interval to be determined by the slowest game. These progressive game parties afford much entertainment to the boys.

Some Simple Tricks.

A few simple tricks may be thus described:

Tell a boy that you can make a circle round him with a piece of chalk out of which he cannot jump. The chances are that he will say you cannot do it. Draw a circle with the chalk around his jacket, and say, "Now, jump out of it."

Ask a boy whether he thinks if he clasped his hands together he could walk out of the room. He will, of course, say that he could. Request him to pass his arms around the leg of the table or piano, join his hands, and walk away.

Fill a small glass with water, cover it with a hat, and say you can drink it without touching the hat. Take the glass and the hat, put your head under the table, make a noise as if drinking, rise and wipe your lips. Some one of the company thinking you have drunk the water will certainly take up the hat to see. As soon as the hat is removed pick up the glass and drink its contents. You can now drink the water without touching the hat.

Wind some clean thread tightly around a small pebble and secure the end. Now if you expose it to the flame of a lamp or candle the thread will not burn; for the heat runs along the thread without remaining in it and attacks the stone. The same sort of trick may be performed with a poker around which is evenly pasted a sheet of paper.

Learn to Draw

THIS BOOK as shown in illustration is a self-instructor for home study and practice in the art of MECHANICAL DRAWING for ENGINEERS, MACHINISTS, ELECTRICIANS, METAL WORKERS and all interested in drafting for shop practice, and has been prepared in plain practical language and illustrated by the author of HAWKINS' EDUCATIONAL WORKS. The book is divided into 28 different subjects which comprise the fundamental principles of drawing, each heading being thoroughly treated.

There are 320 pages, 300 illustrations and diagrams. The book is handsomely bound in green cloth, gold edges and title, size 7x10 1/2 in., printed on fine paper. Upon receipt of price, the book will be sent to any address pre-paid, money returned if not as represented. Order to-day.

The Boy Stamp, Coin and Curio Collector

Answers to Questions. The Numismatic Sphinx.

V. W., Madison, Indiana—Your stamp is catalogued at 2 cents.

G. W. B., Springdale, Washington—The stamp is catalogued at 30 cents unused if the envelope is entire.

W. G., Chicago, Ill.—The \$1 second issue revenues catalogues 10 cents, and the \$1 and \$5 third issue 6 cents and 75 cents respectively.

R. W. A., Blair, Neb.—Your stamp is not a postage stamp, but a revenue stamp. It is issued by some of the countries of South America, we believe.

J. C. D., Goldfield, Colo.—The three cent Agriculture is catalogued at thirty cents unused and the twelve cent Agriculture catalogues a dollar and a quarter unused.

T. J. F., Clinton, Mass.—The stamps of the Transvaal, formerly the South African Republic, are issued in the currency of Great Britain. A penny is equal to 2 cents American money.

H. D. L., Germantown, Pa.—The stamp you illustrate is a Roman States issue. Counterfeit stamps differ from the genuine in many minor details. Stamps that are engraved are often counterfeited by lithography.

J. V. F., Elizabeth, N. J.—The 2-pence brown South African Republic surcharged "E. R. L. Half-Penny" can be purchased for 3 cents, and the same stamp surcharged "V. R. I." can be purchased for 10 cents.

A. W. L., Philadelphia, Pa.—The 59 cent present issue U. S. can be purchased for 6 cents. Postal card heads have no value. The card is collected entire. Nearly all the "Baby Heads" of Cuba are worth more used than unused.

C. W. O., Plainfield, Indiana—The stamps mentioned in your letter, in the order given, are: Italy, Russia, Greece, Dutch Indies, and Spain or some of the Spanish colonies. The one "with the head of the young man and nothing else" is from Greece.

R. H., Newark, Ill.—The revenue stamp described is from Great Britain and is not catalogued in postage catalogues. The 8s Norway of 1856-57 is dull lake in color and catalogues at 10 cents. The same stamp issued in 1863 is rose in color and catalogues 15 cents.

W. H. V., Raleigh, N. C.—The 3 cent Canada stamp with the maple leaves in each corner surcharged 2 cents is catalogued at 3 cents; the 2 cent U. S. surcharged Porto Rico catalogues 3 cents, and the same stamp surcharged Puerto Rico catalogues 2 cents.

F. H., Chicago, Ill.—The surcharges for Cuba on the current U. S. stamps are catalogued as follows in used condition: 1c, 2 cents; 2c, 3 cents; 2 1/2c, 5 cents, 3c, 8 cents; 5c, 6 cents; 10c, 15 cents. They are seldom offered at one-half catalogue, 25 per cent from catalogue being the usual prices asked by dealers.

D. R., Stephenville, Texas.—The best way to start a collection is by the purchase of a packet of all different foreign. A packet of 500 all different can be purchased for \$1.50. Write any of the stamp dealers advertising in THE AMERICAN BOY and they will send you a price list of packets, sets and single stamps free.

F. A. C., Clare, Mich.—The easiest way to remove stamps from the envelope is to place them in cold water. Never use hot water. If the stamp is in a color that will fade from contact with water, lay the envelope on a wet cloth, with the face of the stamp up, and in a few minutes the stamp will peel easily from the cover without injury.

G. E. H.—Pre-cancelled stamps are stamps canceled with the name of the office selling them, the cancellation being done by printing the name of the office by a printing press in place of handstamping them. They are sold to large mail order firms and save the time of the office in canceling them. Zechmeyer's continentals refer to the name of the dealer putting the stamps on the market.

The Numismatic Sphinx.

P. L.: Your coins are all common.—1853 three cent pieces sell for fifteen cents.—The 1827 dime sells for a quarter.—The 1849 gold dollar sells for two dollars. This was the first year of its issue.—The 1854 and 1862 gold dollars sell for two dollars each.—C. H.: See answer to C. L.—W. K. S.: Your copper is a common 1 kreutzer of Austria.—The 1841 quarter sells for fifty cents at the dealers.—The half-penny Nova Scotia, 1832, sells for ten cents.—The half cent of 1854 sells for fifteen cents.—The 1808 half dollar sells for eighty five cents; 1829 dime, twenty five cents.—The 1813 half cent is worth twenty five cents. Your others, no premium.—The 1834 half dollar sells at the dealers for seventy five cents.—The Mexican dollar of 1852 is only worth face value.—Gold dollars now all bring a premium. None of them are worth less than \$1.50.—R. Y. M.: Your rubbing is from a Virginia half-penny of 1773 and sells for fifty cents.—The 1818 and 1834 half dollars sell for eighty five and seventy five cents each. 1827 dime, a quarter.—A gold dollar of 1867 that has been mutilated is worth but bullion value.—R. S. S.: Your rubbing is taken from a Jackson token or cent of 1841. It sells at the dealers for forty cents.—W. F. H.: Your rubbing is from a Scotch penny of Alexander III. (1249-85) and it is worth about two dollars.—The dime of 1830 sells for a quarter. The quarter eagle of 1834 hardly brings a premium.—The 1829 half dollar sells for seventy five cents. 1855 half dime, no premium.—G. B. D.: Your rubbing is from an ecu of Louis XV. of France (1726). It sells for \$1.75.—E. W.: Your drawing is from a rectangular silver coin of Japan, called bu. (1818-68), and is worth seventy five cents.—G. M. G.: The 1830 half dollar, seventy five cents. Your "one penny" with sun above and balance beneath, is no doubt a Masonic penny.—P. K.: Your rubbings are all from very common coins which have no premiums.—The 1847 cent sells for five cents.—R. H. E.: Your 1810 Spanish 8 reals of Ferdinand VII. was struck in Mexico, and is worth only face value. The 1825 half cent sells for fifteen cents.—H. B.: Your rubbing is from a current Japanese sen. What you call a snake on the coin is the Japanese dragon. The coin is very common.—C. G.: The coin of which you send a rubbing is a Spanish 4 real of Charles IV. It, with the other coins you mention, have no premium.—W. B. S.: The cents and half cents you mention, if in good condition, sell at from five to ten cents each. All are very common.—L. M. H.: Your coins are all common. The cents of 1838 and 1848, if in good condition, sell for ten cents each.—The 1852 cent, five cents; Porto Rico, 1856 5 centimos, ten cents; 1832 half dollar, seventy five cents; Spain, 1879, 5 centimos, five cents. Other coins face value only.—H. W. B.: No premium on the 1864 two cent coin. Cannot make out from your description what your 1794 coin is. Send us a rubbing of it.—L. R.: Your American coins sell for about five times their face value. Your foreigners are all common, as is also your \$10 Confederate bill of 1864.—W. B. K.: Your 1 rigsmont Skilling is from Denmark and sells for five cents. The 1819 cent is worth ten cents. Your other coins are mostly Civil War tokens and are common.—W. H. B.: Your coins are all common. 1829 dime sells for a quarter. Your coin with the III, 1851, is a common nickel three cent piece.—R. E. A. sends us a fine drawing of a Continental Bill of Feb. 26th 1777, for five dollars. This particular specimen is common, the dealers selling them for a quarter each.—The "bit" in the south and west is equal to a shilling of twelve and a half cents. The old Spanish reals being of that value were called "bits." The term is still used in sections of this country; twenty five cents equals two "bits," etc.—C. L.: The Spanish silver as a general thing is worth only bullion or face value. Yours is an 8 reals or dollar, and was issued at the Mexican mint.—A good 1801 half dime is worth \$5.00. The 1802 is the rarest of the series, and a fine specimen easily brings \$100.00. The half dollars of 1826 and 1827 sell at seventy five cents each.

UNUSED Packet No. 69, 255 var. unused for, no reprints, \$3.00.

MOTHERS! FATHERS!

Do you want an interesting and instructive amusement for your children? Stamp Collecting gives a liberal education. It instructs by interesting the collector in history, geography, biography, zoology, etc., represented by the stamps of the different countries. It educates the collector in business, buying, selling, trading and correspondence. The varied colors, oddity and beauty of designs attract the eye, while the arranging of the stamps in albums gives delightful home employment for the long winter evenings. One mother tells us that she would not take \$1.00 for the knowledge that her son has gained through his stamp collection. Let us start you with some of the following bargains on receipt of 50 cents.

For 50c. An album holding 200 stamps. A packet of 20 varieties, all different. 1000 faultless stamp hinges.

For \$1. An album holding 400 varieties. A packet containing 300 all different stamps. 2000 faultless hinges.

For \$2. An international album with spaces for all stamps. 20 Varieties stamps. 2000 hinges. Millimeter scale and perfection gauge.

MILTON G. AILES.

ROBERT T. HILL.

ROBERT WYNNE.

CHARLES O'NEIL.

Boys of the Past; Men of the Present—Crittenden Marriott

THIRTY years ago, the men who are now conducting the great business affairs of Uncle Sam were boys; some of them were very little boys and others might be termed men, but all were young, ambitious, and abounding in vigor. Noting the steps by which they rose, the boys of today may study their example and rise in turn to the posts they now occupy. For, as sure as the Republic endures, some of the boys of today will hold these posts thirty years hence. And if we can judge the future by the past, those who hold them then will have earned them, as those who hold them now have earned them, by hard work.

THE ASSISTANT SECRETARY OF THE TREASURY.

Thirty years ago, the Assistant Secretary of the Treasury was a mere baby; fifteen years ago he was an "assistant messenger" in the department in which he now stands next to the head. Milton G. Ailes was born in a backwoods district in Shelby County, Ohio; he walked to school two miles through woods filled with wild animals; his whole family lived in a poverty endurable only because all the neighbors underwent similar privations. When he was sixteen, he went to Washington to get work and finally obtained it, as has been said, as assistant messenger in the Treasury. His duties were to sweep the floors, carry in the coal, and generally speaking, to "polish up the handle of the big front door." He polished it up so carefully that he attracted the attention of the chief of his division, who advised him to study law, and put his law library at his disposal.

Ailes studied law, but he did not neglect his most important elective—the study of the department in which he worked. When any clerk was sick or away on vacation, he would ask to be allowed to do part of the work, thus left without attention; usually he was permitted to do so, and in time, came to be familiar with the work of every desk in his bureau. So, when a vacancy occurred, he got it.

It was a small promotion, but still it was a promotion. Later he passed an examination in typewriting and stenography and received another promotion; later still, he took an examination for a law clerkship, and was appointed to that. These various promotions caused him to be transferred from division to division about the big building and in each he learned all the duties of all the clerks. Consequently, when Secretary Gage wanted a private secretary some six years ago, who could there be more suitable than the man who knew all the routine of the department. Again, two years later, when the post of assistant secretary became vacant, there was no one better qualified to discharge its duties than the quondam "assistant messenger."

THE CHIEF OF ORDNANCE OF THE UNITED STATES NAVY.

Admiral Charles O'Neil, chief of ordnance of the United States Navy, is older than most of the others discussed in this article. When the civil war be-

gan, forty two years ago, he was a sailor, a mate of a sailing vessel, and had been knocking around the world on salt water for five or six years. He had had little education in the general sense of the word, but seamanship he knew from the beginning to the end. No trick of the tide, no treacherous current by day, no squall by night, found him unprepared to meet it. He had learned his business thoroughly.

When the war began he was appointed an "acting" lieutenant, that is to say, he was to hold office until the close of the war and then be mustered out. Thousands of others were similarly commissioned and were mustered out, but "Charley" O'Neil was not. He had improved his spare time in study, and when the word went out that acting officers who could prove their fitness on examination might remain in the navy, he was ready. He is one of four or five men now in the service who have not been through the Naval Academy.

Possibly it was the fact that he knew "Jack" through and through that carried him to success more than any other one thing. He had spent years before the mast and knew all the workings of Jack's mind; hence he knew how to manage him. Harassed officers who had gotten their crews into a snarl

were only too glad to call on "Charley" to help them straighten things out. Before long, he was known as the best disciplinarian in the navy—a man whom the most restive obeyed because they liked and trusted him.

His technical knowledge of ordnance has all been acquired late in life, but has been so thoroughly burned into him that he has discharged the complicated duties of chief of ordnance with such success that American gun work is famous all over the world.

ROBERT T. HILL, GEOLOGIST.

Thirty years ago, Robert T. Hill, one of the most eminent men on the staff of the Geological Survey, whose work has made for the United States a reputation in this kind of work second to none, was a cowboy and a peripatetic typesetter in Texas, where he had wandered from his native state of Tennessee. But he was more than either a cowboy or a printer; he was an ardent student of geology—a science then in its infancy. Whether "riding herd" or bending over a printer's case, he spent all his spare time in chipping at the rocks around him. When Texas found that he was not looking for gold, it promptly dubbed him the "crazy printer." When he decided that he wanted a college education and started east without a dollar in his pocket to get it, Texas was absolutely sure of its wisdom in so naming him. Having so decided it forgot him—for a time.

Hill made his way east by slow stages, stopping along the route to stick type in order to pay his way farther. Finally he reached Cornell, where he got a position on a local paper and worked nights to pay his expenses while he went through college. When he was graduated, he read a thesis on the "Geology of Texas," which made him famous in the scientific world. It was promptly printed as a bulletin by the United States Geological Survey, whose Director sent for him and offered him a post, from which he has risen to his present enviable standing.

It would take too long to rehearse the story of what he has done, but it may be mentioned that he was one of the three experts sent by the government to examine into the conditions in Martinique when Mount Pelee did such awful damage. It may be mentioned, too, that Texas has been slow to change its estimation of him, despite the honors heaped upon him by learned societies all over the world. Some years ago, being stationed in the Lone Star State, he accepted the newly established chair of geology in the Texas State University, but was compelled to resign—and his chair was abolished—because Texas, of all places in the world, was horrified at the teachings of geology, which it declared were subversive of all religion. Texas has learned better since then, however.

THE CHIEF CLERK OF THE LIBRARY OF CONGRESS.

Something more than 30 years ago, Thomas G. Alvord, now chief clerk and executive officer of the magnificent new Library of Congress, was just about to enter college. Suddenly his father died, his fortune was swept away, and he himself left penniless.

EDWARD A. MOSELEY.

Temporarily abandoning his hopes for the future, he went to work in a grocery store. While there he mastered bookkeeping to its last detail. His employer failed in the financial storm of 1873 and Tom went to sea, where he learned the life of the common sailor of the United States merchant service. After three years of this, he brought up in Texas as a cowboy and learned the life of the plains at first hand. It seemed a waste of time, as did everything else he had been able to do, but he did it faithfully, nevertheless.

Then came the turning point. He began to write for the papers, drawing on the material he had accumulated in past years. His work "caught on" and he was invited to go to Albany, New York, and take a place on a paper there. Thence he soon moved up to the New York Herald, on which his experience made him invaluable. Whether it was a big failure, or a yacht race, or an unexplained rise in the price of meat, his special knowledge enabled him to discuss it ably. For years he represented the Herald and then the World in Washington, resigning from the latter to undertake the management of the administrative details of the magnificent library, leaving the Librarian free to attend to the more purely literary features of the work.

THE FIRST ASSISTANT POSTMASTER GENERAL.

Thirty years ago, "Bob" Wynne, second in command in the post office department, was a stenographer and typewriter in Washington. Even then, he was famed for his stick-at-it-iveness. Once started on a piece of work, he never let go until it was finished, and finished well.

Later, he became a newspaper correspondent, in which work his persistency served him excellently. When he went after a "story," his man might as well surrender first as last, for surrender he had to sooner or later. He made a special study of financial matters, and during the last two years of President Harrison's administration was private secretary to the Secretary of the Treasury, a post of considerable importance and responsibility. Here he earned the gratitude of his chief by the ability with which he made the

THOMAS G. ALVORD.

most of every incident connected with the big department, which might tend to avert the panic that all the country knew was impending. It was a conspicuous piece of persistency that called

President Roosevelt's attention to him and that probably brought about his final appointment to the office he now holds. This was nothing less than his positive refusal, as correspondent of the New York Press, to stop "booming" Mr. Roosevelt for the Vice-Presidency. "But I don't want the place," said Mr. Roosevelt. "That makes no difference," rejoined Wynne. "The party needs you and you have got to take it."

Later, when Perry Heath resigned, the President could find no one better fitted for his place than the man who had refused to abandon what he believed to be for the best, for any consideration that could be brought to bear on him.

THE SECRETARY OF THE INTERSTATE COMMERCE COMMISSION.

Thirty years ago, Edward A. Moseley, Secretary of the Interstate Commerce Commission, a body made up of the ablest lawyers and charged with the supervision of the gigantic railway systems of the country and the application to it of the vast mass of complicated law, was a cabin boy on a sailing vessel at sea. That he ever got much beyond a cabin boy is due to his abounding vitality and the energy with which he threw himself into everything he undertook.

While a sailor, he carried mahogany from Hayti to the United States; later he went mahogany hunting in Central America; later still he worked at logging in the Maine north woods and in time established a lumber firm at Portland.

Some years ago, he took up the cause of the railway brotherhoods in their efforts to secure safety devices on the railway cars in order to stop the frightful waste of life that takes place annually. To him more than to any other one man was due the passage by Congress of an act compelling this.

His labors in this direction led him to study the railway system and laws of the United States, and, when the Interstate Commerce Commission was established, to be appointed its secretary, a post he has since held. Today, he has a more comprehensive knowledge of railway conditions than perhaps any other man in the country.

Top or Bottom—Which?—By Archer Brown of Rogers, Brown & Co., New York

A Study of the Factors Which Most Contribute to the Success of Young Men

[BEGUN IN SEPTEMBER.]

X.—ROOM AT THE TOP.

Every boy who has any stuff in him wants to succeed. By success he means high position, big salary or income, reputation, influence, power. Sceldom is the higher success that results from lofty character, irrespective of wealth or fame, taken into account. So, for this concluding paper, I will deal with pure worldly success, the kind that men are recklessly struggling for the world over.

If the average boy approaching manhood were to analyze his ambition and define his goal twenty years ahead, it would be the presidency of a bank or great corporation, the head of a rich firm, the foremost place in the chosen profession of law, medicine, or the ministry, a seat in Congress, or perhaps the mayoralty of his town.

And here comes the surprising and encouraging truth that these great prizes of a life are not hard for the well-equipped man to attain. The competition for them is not severe. Indeed, strange as it may seem, the big place is usually hunting for the man. There is room at the top. The bottom is crowded with those struggling fiercely for the small prizes. The top has ample elbow room for the few who are up there.

To explain a little. Every corporation or firm that employs men knows how hard it is to find just the right material for responsible positions. It is easy enough to fill the routine places where brains and character are not essential; but commence to look for a man above the ordinary, and the trouble begins. One man available is honest, industrious, faithful, but lacks a trained mind. Another is capable, energetic, hard working, but there is a shadow of doubt about his moral strength under temptation. Another is honest, bright, true, but lacks industry or the power of application. Still another seems to possess every needed thing, but is without health and endurance. And so on through the list. It is next to impossible to find one who combines in himself the necessary qualities for a high and responsible position, unless there is mixed up with them some shortcoming or failure. The well-rounded man, morally, intellectually, physically, is a prize in the business world, and those controlling great interests are grabbing for him. He commands the highest pay while he serves others, and in due time you find him at the head of his own great interests.

Now turn from the top downward. With each descending step in the scale the number of those competing for place increases in geometrical ratio, until at the very bottom you find the greatest crowd of all. The lower the pay, the more menial the work, the greater is the scramble for it. For example, take a great manufacturing corporation. Its president dies or retires. The salary is perhaps \$25,000 a year. The

directors begin the search for a successor, and if they find two or three broad, able and forceful men from whom to make a selection, and who have not already better positions, they will be fortunate. But suppose the vacancy is that of assistant bookkeeper or bill clerk at \$40 a month. A hundred men—yes, a thousand, if it is in a great city—can be had in a day's time. And the \$25,000 man is cheaper than the \$40 a month man. I was told the other day of a vice-president of a great corporation in New York who had by a timely, sagacious stroke made his company \$600,000 in a single year. It was enough to pay his salary of \$30,000 a year for twenty years in advance. The president of the Pennsylvania Railroad died some years since, leaving a \$50,000 position to be filled. There was no scramble for the office. One man was available who had mounted every successive round of the ladder, but he practically had no competitors. I know a man who started as a poor German boy in the night schools of a western city, working step by step through the mechanical departments of a large manufacturing business, proving himself master in each place, until the management of a great enterprise came to him unsought at \$25,000 a year. I know a railroad president who, coming from a small town in Maine, by sheer force of brains and character reached a commanding position. To one high office was added another, until his combined salaries equal that of the President of the United States.

Let us ask a few questions. Is it natural brilliancy or luck that puts one man so far ahead of his fellows? It is neither. Analyze the character of the men in highest places. You will find they attained their positions by preparation, mental, moral, physical, technical; brains well trained, energy well directed, work well sustained. Study the steps in the character of Gladstone, of Benjamin Harrison, of Carnegie, of Rockefeller, of Wanamaker, of P. D. Armour, of C. M. Schwab, and prove the statement.

Are the qualities of success attainable by a man of ordinary natural abilities? Unquestionably, yes. First the character; then the preparation; then the opportunity. The latter comes to most men sooner or later, but rare is the man who is ready to seize it. U. S. Grant as a boy in Ohio built his character. At West Point and in the Mexican war he made his preparation. In the Civil war he found his opportunity. Here are a few of the essential qualities which will win against all the powers of so-called ill luck:

1. Absolute, unswerving integrity. Is that unattainable?
2. Brains, mental grasp. Given a fair mind, what is that but education and discipline?
3. Energy and force of character. This is a question of exercise of will to overcome laziness and love of ease.
4. Capacity for work, executive power.

the ability to bring things to pass. This is the product of industry by system or method. It is energy conserved and well directed. It is the art of making every stroke count.

5. Personal manners, engaging address. What is this but the result of close, unselfish adherence to the rules for making a gentleman?

All these qualifications are not easy, it is true, but they are not impossible. It is therefore your own choosing whether you will be among the richly rewarded few at the top, or the hungry multitude at the bottom.

[The End.]

Magnanimous Boys.

Horace Mann says: "You are made to be kind, boys; generous, magnanimous. If there is a boy in school who has a clubfoot, don't let him know you ever saw it. If there is a boy with ragged clothes, don't talk about rags within his hearing. If there is a hungry one, give him part of your dinner. If there is a dull one, help him to get his lessons. If there is a bright one, be not envious of him; or if one boy is proud of his talents, and another boy is envious of them, there are two great wrongs, and no more talent than before. If a larger or stronger boy has injured you and is sorry for it, forgive him."

SPECIAL 60-DAY OFFER To introduce Our Latest Large, Powerful Achromatic Telescope, The Excelsior.

FACE TO FACE WITH THE MAN IN THE MOON!

NEEDED ON FARM, SEA OR RANGE.

POSITIVELY such a good Telescope was never sold for this price before. These Telescopes are made by one of the largest manufacturers of Foreign telescopes closed 15 inches and open over 1-1/2 feet in 5 sections. They are BRASS BOUND, BRASS SAFETY CAP on each end to exclude dust, etc., with POWERFUL LENSES, optically ground and adjusted. GUARANTEED BY THE MAKER. Heretofore, Telescopes of this size have been sold for from \$1.00 to \$4.00. Every journeyer in the country or at seaside resorts should certainly procure one of these instruments; and no farmer should be without one. Objects miles away are brought to view with astonishing clearness. Sent by mail or express, safely packed, prepaid, for only 99c. Our new catalogue of Watches, etc., sent with each order. This is a grand offer and you should not miss it. We WARRANT each Telescope JUST AS REPRESENTED or money refunded. WANTS ANOTHER? Brandy, Va. Gent.—These and another Telescope, money enclosed. Other was a bargain, good as instruments costing many times the money.—E. C. ALLEN. Send 99c. by Registered Letter, Post-Office Money Order, Express Money Order or Bank Draft payable to our order, or have your storekeeper or newsdealer order for you. EXCELSIOR IMPORTING COMPANY, Dept. B, 296 Broadway, NEW YORK.

HOW TO BUILD AN ICE YACHT

By A. Neely Hall.

With illustrations by the Author and Norman P. Hall

Probably no winter sport can be found that is more enjoyable than that of ice-yachting.

By following the plans here outlined, any handy boy can readily construct an ice-boat at a very small outlay of money. With one of these great speed may be obtained.

The framework consists of two planks, one of which is four feet long, the other eight feet long. Fasten the shorter plank crosswise upon the longer one about one foot from one end, and bore a large hole where the two planks intersect at O, for the mast. Bore another hole at P for the rudder to pass through.

In figure 1, A, B, C, D are side-stays, consisting of wires fastened to screw-eyes placed at E, F, G, H, I.

Three old skates make good runners. Fasten one of these to each end of the crossplank. To do this, bore holes through the plank at J, K, and run straps through them and around the skates. To make the skates real firm, drive staples through their tops. (Figure 2.)

For the rudder, use a block of wood about ten inches long and two inches thick, and fasten the third skate to it in the same way that you did the other two. Make the rudderpost similar to L

boom as shown in figure 4. At R and S bore a small hole with a gimlet and after slipping the crotch around the mast, run a wire through these holes and fasten the ends securely.

Make the sail out of stout drilling.

You had better secure the help of your mother or sister in making this in order to have a neat job.

Cut a board about three feet long by eighteen inches wide for a seat and nail it to the center plank. (See N in figure 1.)

If the work has been properly put together and in a substantial manner, you will have an ice-yacht that will be the envy of all your boy friends, and something to be proud of.

In figure 3, boring a hole in it large enough to admit the tiller M, after which nail it firmly to the ten-inch block. The tiller is a broom handle about eighteen inches long. To make the construction of the yacht more simple, the steering apparatus may be omitted, the steering in this case being done by a boy who skates behind the yacht, holding on to a board attached to the stern for the purpose. If the boat is controlled in this manner, fasten the third skate to the stern, like those in front.

The leg-of-mutton sail is best adapted to a small ice-boat like this, although

any other style of sail may be used. Use a spruce pole about ten feet long and two inches in diameter for the mast, and another, eight feet long, for the boom. After fastening the mast in the hole bored for it, steady it with stays run from the peak of the mast to the screw-eyes at F, G and I. (See figure 1.)

Cut a crotch from the limb of a tree and bind it with cord to one end of the

The Rudder Publishing Company

One thing I want to impress upon the young athlete is not to overdo at the start. This mistake has been the undoing of many a youngster who would have developed into a big, strong athlete if he had not started out with the wrong ideas of how to train.

Different people need different kinds of work. A frail, delicate boy cannot stand as vigorous work at first as a big lusty chap, yet the little chap has just as much chance as the big one if he only goes about things in the proper manner.

Good health is the first essential of an athlete. If one is not healthy, then he must go about to build himself up in this direction before starting in on any course of physical exercise.

This can only be done by laying down certain rules and following them strictly. These rules are very simple. In brief, they are as follows:

- Don't drink.
- Don't smoke.
- Don't chew.
- Get all the sleep you can.
- Get all the pure, fresh air you can.
- Eat plain, wholesome food, and lots of it.
- Stick to these rules and gradually, but surely, you will find yourself getting stronger and stronger. Finally the day will come when you will never know a sick moment.

Then is the time to begin your exercising. At this stage another duty presents itself. You must find out your weakest physical points. Then these must be built up so as to correspond with the rest of your body. If your back is weak, it must be strengthened; if your arms, your legs, or your chest are weak, you must pay particular attention to these parts until you feel that they are perfect.

Good Physique.

Frank M. Lowe, a thirteen-year-old Irving schoolboy of Kansas City, Mo., is possessed of a remarkable physique. On his thirteenth birthday he was examined by the physical director of the Y. M. C. A. at Kansas City, who pronounced him to be the best developed boy for his age of any he had ever examined. He has never worked in a gymnasium, but has taken exercise at home without an instructor. He is an expert bag puncher and has one trick which is all his own—that of lying on his back and punching the bag with his feet. The boy scarcely ever eats meat, living almost entirely on fruit, cereals, vegetables and nuts.

The following is his record: Weight, 145 pounds; height, 5 feet 7 1/2 inches; depth of chest, 7.3 inches; neck, 13.8; chest, contracted, 33.4; chest, expanded, 37.5; waist, 28.6; right forearm, 10.6; right upper arm, down, 10.4; right upper arm, up, 12.8; left forearm, 11; left upper arm, down, 10.3; left upper arm, up, 11.10; right thigh, 21; right calf, 13.6; left thigh, 21.2; left calf, 13.6; lung capacity, 310 cubic inches; grip of right hand, 122 pounds; grip of left hand, 122 pounds; back lift, 432 pounds; legs and back lift, 872 pounds.

Arab Boys Play Marbles.

The boys of Arabia have a curious way of playing marbles. The marble is placed in the hollow between the middle finger and the forefinger of the left hand, the hand being flat on the ground and the fingers closed. The forefinger of the right hand is then pressed firmly on the end joint of the middle finger, which pushes the middle finger suddenly aside and the forefinger slips out with sufficient force to propel the shooter very accurately.

To Become Strong Men.

In the Chicago American the noted boxer, Robert Fitzsimmons, gives the following good advice to boys:

The great secret of proper training for all kinds of athletic feats is to use plenty of common sense. This is the keynote of success for all athletics. Common sense in eating, common sense in exercising, common sense in sleeping, all form a combination that wind up in success.

A TRICK WITH COINS

The following illusion, although it may seem very simple, will, in order to meet with the very best of success, require more or less practice on the part of the performer. Do not infer from this that the trick is complicated or beyond the possibilities of any. Practice until you have satisfied yourself as to your capability at performing the trick, and you will invariably succeed. It may be very successfully played in a room before a small company of observers. The appearance of the trick to an observer is as follows: Standing in the midst of the group the performer will roll his sleeves up to his elbow and at the same time borrow a gentleman's hat from one of the company. This he holds in the left hand, and immediately turns it over, showing it to be empty. He now requests that the members of the company supply him with a number of twenty-five cent pieces, which he says are needed to perform the trick. In very few instances, if any, will he be able to secure and make your first appearance in the act of pulling at the right coat sleeve, holding the right hand open. Ask for the hat immediately, continuing to pull at the right coat sleeve until you hold the hat in the right hand. Now place the hat in the left hand, rim upward, the fingers protruding down into the hat, and the thumb outside. In placing the hat in the left hand allow one of the coins to drop into the right hand. The coins are now next to the hat, held by the fingers, and by the use of the forefinger may be made to drop one by one into the hat. Here it is that you turn the hat over, showing it to be empty, at the same time grasping into the air with the right hand, and here exhibit the quarter. You now pretend to place the coin in the hat, allowing your hand to enter the hat, but instead of doing this it is retained in the right hand and one of the coins in the left hand allowed to drop into the hat. These movements are repeated until the coins in the left hand are exhausted, and the last one (which has never left the right hand until now) is thrown up and caught in the hat. Each time a coin is produced the hat should be lowered, showing it contained one more coin. The foregoing was contributed by Harry W. McMillan, of Stafford, Kansas. Mr. McMillan has made the art of magic a study for a number of years and has published two books on the subject, written especially for readers of the American Boy. Reliable literature pertaining to the art of magic is scarce, and when such a book may be obtained for a trifling cost, it is a rare exception. Here in this book you cannot, with a reasonable amount of practice, perform sleight-of-hand tricks successfully. If our readers could realize the amount of real amusement contained in these books, for your friends as well as yourself, you would not hesitate in ordering either or both of them. The book "Primary Magic" contains some of the simpler and easier tricks to perform and is sold, when bought separately, at twenty-five cents. A more extensive production entitled "High Magic" contains many of the seemingly superhuman marvels of late origin and is sold at fifty cents. Both books sent prepaid to any address for sixty-five cents (postoffice money order). A descriptive catalogue of the contents of the books will be sent upon receipt of five cents to cover postage. Order early and insure prompt delivery. Address all orders and communications to Harry W. McMillan, Publisher, Stafford, Kansas.

A HANDSOME WATCH GIVEN AWAY

Our premium watch has a GOLD laid case, handsome dial, dust proof, adjusted to position, patent escapement, expansion balance, quick train, and is highly finished and remarkable watch. We guarantee it, and with proper care it should wear and give satisfaction for 20 years. The movement is an American make, and you can rely upon it that when you own one of these truly handsome watches you will always have the correct time in your possession. Do you want a watch of this character? We give it free as a premium to anyone for selling 30 cases of our everlasting Perfumery at 5c. each. Simply send your name and address and we will send you the watch. The only catch is that you must send us one dollar, and we will forward you the watch. We trust you and will take back all you cannot sell. We purpose to give away these watches simply to advertise our business. Address W. S. SIMPSON, NEW YORK CITY.

THE AMERICAN BOY

THE LEADING BOYS' PAPER OF AMERICA

Entered at the Detroit, Mich., Postoffice as second-class matter.

The American Boy is an illustrated monthly paper of 32 pages. Its subscription price is \$1.00 a year, payable in advance. Foreign subscriptions, \$1.50.

New Subscriptions can commence at any time during the year.

Payment for The American Boy when sent by mail, should be made in a Postoffice Money-Order, Bank Check, or Draft. Express Money-Order, or Registered Letter.

Silver sent through the mail is at sender's risk. Expiration. The date opposite your name on your paper shows to what time your subscription is paid.

Discontinuances. Remember that the publishers must be notified by letter when a subscriber wishes his paper stopped. All arrearages must be paid.

Returning your paper will not enable us to discontinue it, as we cannot find your name on our books unless your Postoffice address is given. Always give the name of the Postoffice to which your paper is sent. Your name cannot be found on our books unless this is done.

Letters should be addressed and drafts made payable to The Sprague Publishing Co., Majestic Building, Detroit, Mich.

WILLIAM C. SPRAGUE, EDITOR.

GRIFFITH OGDEN ELLIS, ASSISTANT EDITOR.

Vol. III. of The American Boy.

We have about one hundred copies left of Volume III. of THE AMERICAN BOY, handsomely bound in cloth, suitable for library table, which we will sell at \$1.50 each, delivered.

Bind Your Copies of The American Boy.

The only way to preserve your papers and keep them neat and clean is to put them each month in a binder. We have had made especially for your benefit an American Boy Binder, so arranged that you can slip your paper into it each month as received. The manufacturer's regular retail price for this binder is \$1.00. We will furnish it to our subscribers for 75 cents, and we will prepay the delivery charges. You ought to have one.

Passed the 100,000 Mark.

It is with great pleasure we announce that on Jan. 1, 1903, THE AMERICAN BOY passed the one hundred thousand mark in its circulation, and that we are compelled to print for this issue 105,000 papers. We know that every reader of this paper will rejoice in its unrivaled prosperity. A bona fide circulation of 105,000 in three years and three months is a heretofore unheard of achievement by a publication in this field. Furthermore its advertising patronage, worked up without advertising solicitors in the field, and solely on the merits of the publication, is noteworthy. The paper is strongly entrenched in the esteem of the best boys and of friends of this class of boys everywhere. Recently the organ of the boys' branches of the Y. M. C. A. made a comparative statement of the number of copies of each prominent periodical subscribed for by the various associations, and found that THE AMERICAN BOY—the youngest of all—stood fourth in a list of publications numbering about one hundred. Of the three ahead of it, one (the leader) is 76 years old, one 30 years old and one (not a youth's publication, by the way), 6 years old; and then, too, THE AMERICAN BOY was only 12 copies behind the leader. Are we justified in our pride?

Boys' Books, Pictures, Music.

We publish some things of special interest to boys. We offer them with confidence that they will please. Our own reputation is at stake in what we offer over our own name.

BOOKS

- THREE BOYS IN THE MOUNTAINS, A Beautifully Bound Book of Mountain Adventure..... 75 cts

The American Boy

March 1903

Work Hard = Play Hard

Theodore Roosevelt to Schoolboys

Boys:—You are here to study, and while you are at it, study hard. When you have got the chance to play outside, play hard. Do not forget this, that in the long run the man who shirks his work will shirk his play. I remember a professor in Yale speaking to me of a member of the Yale eleven some years ago and saying, "That fellow is going to fail. He stands too low in his studies. He is slack there and he will be slack when it comes to the hard work on the gridiron." He did fail.

You are preparing yourselves for the best work of life. During your school days and in after life I earnestly believe in each of you having as good a time as possible, but making it come second to doing the best kind of work possible. And in your studies and in your sports in school, and afterwards in life in doing your work in the great world, it is a safe plan to follow this rule—a rule that I once heard preached on the football field—don't flinch, don't foul, and hit the line hard.

Napoleon

A History Written for

CHAPTER XIII.

EMPEROR—DEATH OF NELSON—AUSTERLITZ—
JENA—EYLAU—TREATY OF TILSIT.

The favorable opportunity had come, and on the thirtieth of April, 1804, the Senate adopted, with scarcely a dissenting voice, a measure afterwards ratified by the people by a vote of over 4,000,000 to 3,000 by which Napoleon assumed the title of Emperor of the French. On December second, 1804, by one of the most imposing ceremonials ever enacted, Napoleon was crowned in Notre Dame Cathedral by Pope Pius VII., who had come all the way from Rome to lend dignity and solemnity to the event. On the following May twenty sixth, by the unanimous call of the Italian Republic, he was crowned as their King at Milan. At the coronation ceremonies Napoleon took the crown from the hands of the Pope and placed it on his own head and then he crowned the kneeling Josephine, as if recognizing no one, not even a Pope—the vicegerent of God on earth—as fitted to do him honor. Likewise at Milan he placed the old iron crown of Charlemagne on his own head, repeating the words used by the Lombard kings of times past—"God hath given it me; beware, who touches it." We now hear only of Empire, of Emperor and Empress, of Princes and Princesses, of High Constables, Grand Admirals, Grand Marshals, Grand Huntsmen and Masters of the Horse. The Empire was to descend in the male line of Napoleon's descendants, and in case of his having no son he might adopt a son or grandson of his brother's. The members of his family were declared princes of the blood of France. The army received the change with applause. Flattery and devotion met the Emperor on every hand. Every crown in Europe, excepting Russia, Sweden and England, congratulated him, and many princes came in person to pay their respects.

Scarcely had Napoleon returned from his coronation in Italy before he learned that a new coalition had been formed against him by England, Russia, Austria and Sweden, with a half million men ready to take the field. The Czar Alexander of Russia was even then on his way to Berlin in person to win Prussia over to the alliance. Napoleon wished for peace, so on January 27, 1805, he wrote a magnanimous letter to George III. of England, whose weak excuse, given through his minister, was to the effect that it was impossible for him to negotiate without the consent of Russia.

Let us not make the mistake of thinking that Napoleon's wars up to this time had been of his own seeking. The honest reader of history must see at the heart of all these struggles the determination of England and the continent of France to put down republicanism and re-establish the Bourbons on the throne. The kings of Europe could never rest so long as a plebeian without ancestry sat in one of the high places reserved for the aristocracy. What might have been the history of France had Napoleon been left to carry out his gigantic purposes and plans with reference to her internal prosperity, we can only dimly imagine. Napoleon wanted peace that he might devote his time and energy to building up France at home, and his most bitter enemies tell us that even when in the saddle during the most arduous campaigns he was planning and putting into execution great projects for the improvement of the condition of his people.

In the war about to desolate Europe anew, Napoleon's old antagonist, Austria, was to take the lead. At once she marched her armies into Bavaria, and though that comparatively feeble country wanted to remain neutral, she was treated by Austria like an enemy. The armies of France were, as we have seen, scattered along her northern coast. With incredible celerity Napoleon marshaled them into six great divisions and almost before his enemies realized that he was on the move he had pushed across the Rhine. Within two weeks twenty thousand prisoners had fallen into his hands, and within twenty days the Austrian army of 80,000 men was utterly destroyed. The approach of the invincible Napoleon at the head of 186,000 men burning with enthusiasm was too much for the Austrian General Mack, shut up in Ulm, and, incredible as it may appear, without waiting for reinforcements and without striking a blow he surrendered the fortress with 36,000 men. Napoleon, with his staff, stood for five hours and watched this great army march out from the ramparts of Ulm and thus he addressed their officers: "Gentlemen, war has its chances. Often victorious, you must expect sometimes to be vanquished. Your master wages against me an unjust war. I say it candidly, I know not for what I am fighting."

Massena, who had been sent by Napoleon to fight

his way into Austria by way of Italy, was equally successful, driving, in a few weeks, the Archduke Charles and 60,000 men out of Italy and in full retreat toward the Austrian capitol. Marshal Ney, at the head of another division, was successful on the Upper Rhine against the Archduke John, and now these three great divisions of the French army were rushing on to Vienna. The Austrian Emperor and his household fled, and on November 13, 1805, Napoleon entered the capital of the Austrian Caesars and took up his residence in the palace of Emperor Francis.

For a moment we turn from this theater of warfare to another. Spain had declared war on England and had put her fleet at Napoleon's disposal. A battle took place off Cape Finisterre with the allied fleets of France and Spain, consisting of twenty sail of the line, 350 ships and four frigates on the one side, and the English fleet, with fifteen sail of the line and two frigates under Sir Robert Calder on the other. The English gained a nominal victory, though they captured but two of the enemy's ships. The latter made at once for Cadiz. Admiral Nelson, of whom we have heard before, then took command of an English fleet composed of twenty seven sail of the line and three frigates. The combined fleets of France and Spain now numbered thirty three ships of the line and seven frigates and carried four thousand troops besides their regular crews.

On October twenty first, 1805, took place the battle so famous in history known as the Battle of Trafalgar, off Trafalgar on the coast of Spain. The ships of the allied forces were drawn up in double line; those of England came on in two columns, that of the Admiral displaying at her masthead the signal that all the world has read, "England expects every man to do his duty." When the smoke of battle had died away nineteen ships of France and Spain were in the hands of the English and seven that had escaped had been rendered unserviceable; but victory was at the tremendous cost of the life of the brave Nelson, who fell mortally wounded, exclaiming, "Thank God, I have done my duty."

Napoleon remained but a few days at Vienna and then pushed on over the Danube into Moravia, fixing his headquarters at Brunn, two miles from Austerlitz. At Brunn the Austrian and Russian forces were concentrated under the eyes of their two Emperors, Alexander and Francis, and on the second of December, 1805, were prepared for battle. At midnight of the first Napoleon laid himself down for much needed rest. In one hour he arose, mounted his horse and set out to reconnoiter. He strove to escape observation, but the soldiers recognized him, and springing to their feet they received him with shouts of enthusiasm. Lighting fires of straw and fixing them to their bayonets, the whole line

blazed in welcome, while shouts from 80,000 soldiers rent the air. Napoleon asking the meaning of it was told that it was the anniversary of his coronation. He then retired to his tent and issued a stirring proclamation to his troops: "Soldiers," he said, "I will myself direct all your battalions. I will keep myself at a distance from the fire if, with your accustomed valor, you carry disorder and confusion into the enemy's ranks; but should victory appear for a moment uncertain you shall see your Emperor expose himself to the first strokes. Victory must not be doubtful on this occasion." With such an appeal the veterans of France were roused to the highest pitch of frenzy.

By four o'clock the Russian columns were in full march to surprise the French. Napoleon was at once on horseback, a bugle sounded, and, as if by magic, the French army was in battle array. At first a fog obscured the field, then a ruddy glow appeared in the eastern horizon and the sun rose with unaccustomed brilliancy, producing a deep impression on the imagination of all. This was known afterwards as the "Sun of Austerlitz," and the veterans of this campaign in after years when beholding a brilliant sunrise recalled the one of this momentous day.

Riding along the line on a fleet horse Napoleon cried: "Soldiers, we must end the campaign today with a thunderbolt." The answer he received was the universal shout, "Long live the Emperor."

The Russians, by the advance of one wing of their army, had weakened their center. Napoleon on seeing it, declared: "In twenty four hours that army is mine." With the speed of the wind the French force poured in upon the weakened point in the Russian advance. With stubborn bravery the Cossacks held their positions. The battlefield looked like a prairie on fire. Two such magnificent armies had never met. Then Murat, the intrepid leader of the French cavalry, galloped upon the field with thousands of gleaming swords in air, and before the eyes of the Emperors of Austria and Russia the center of their armies was broken. Their right was surrounded and forced into a hollow, whence they attempted to escape over the ice that covered a few small lakes. The French gunners poured a storm of

The whole line blazed in welcome.

shot upon the ice and broke it, and here died 20,000 men. The two allied emperors, with the shattered remnants of their armies, fled in terror from the scene. Thus ended the "Battle of the Emperors," Napoleon taking 20,000 prisoners, forty pieces of artillery and all the standards of the Imperial Guard of Russia. After the battle the Emperor Francis of Austria called on Napoleon, promised never to fight against him again (a promise he did not keep), and obtained from him permission that Alexander of Russia might withdraw to his own dominions.

Prussia at this time had 200,000 men ready for the field. Alexander of Russia had endeavored in person to persuade Frederick William to join the coalition but without entire success, though the two Emperors, before the tomb of Frederick the Great, took an oath to sustain the cause of the allied kings. There can be little doubt but that if Napoleon had been defeated at Austerlitz Prussia would have thrown her splendid army against him. As it was, she intrigued and evaded month after month. Frederick William's beautiful Queen, Louise, fanned the indignation and zeal of her people and, dressed in the uniform of the regiment that bore her name, she rode at its head; but still Prussia held back. There can be little doubt, too, but that Napoleon bribed Frederick William into an attitude of inaction by the gift to him of Hanover.

We cannot name the results, momentous as they are, of the Battle of Austerlitz. By it Napoleon became virtually ruler of the greater part of Germany. Austria gave up to the kingdom of Italy her Venetian territories and transferred to Bavaria her possessions of the Tyrol and Vorarlberg. Eugene Beauharnais, the son of Josephine, who had been made Viceroy of Italy, took in marriage the eldest daughter of the King of Hanover. Napoleon proclaimed that the Royal House of Naples had ceased to reign forever and proclaimed his brother Joseph King of Naples. Principalities were conferred on Napoleon's sisters, Eliza and Pauline. His brother Louis, who had married Hortense, the fair daughter of Josephine, became the King of Bavaria. A confederation was formed by the Kings of Wurtemberg and Bavaria, the Grand Duke of Berg, and other sovereigns of West Germany under the name "The Federation of the Rhine," with Napoleon as "Protector." This confederation was bound to place 60,000 soldiers at Napoleon's command. Thus was the Germanic Empire torn to pieces. Sweden, on the news of Austerlitz, suddenly became quiet. Napoleon then returned to Paris, signaling his return by creating a new order of nobility known as Princes, Dukes and Counts, and granting to his appointees extensive estates in the newly conquered country.

Prussia was now to fall under the displeasure of Napoleon and to reap the same reward that Austria had reaped before her. The friendship of Prussia had been a purchased friendship. She now looked upon the Confederation of the Rhine with suspicion and sought to bring about such a coalition of the

other Germanic states as would offset that of the West. The Czar of Russia was quick to take advantage of Prussia's state of mind. Again he visited Berlin and promised the assistance of his army. England was there with promises of money. Napoleon, with his usual farsightedness, knew that war must come and determined to strike a blow before Russia could march her armies to the assistance of her ally. The Prussians made the mistake of taking the field before reinforcements had come from their eastern neighbor. Advancing into Saxony, they compelled the Elector of Saxony to ally himself with Prussia, and then took up a position on the Saale, in front of the French army which came on in three great divisions. The Prussians made the further mistake of extending their line too far and of so placing it that their stores and magazines were back of their extreme right. Napoleon at once grasped the situation and, sending in his forces upon the enemy's right, turned it, took possession of the stores and magazines and blew up the latter. The Prussian King, finding himself about to be surrounded, formed his army into two divisions, and one, under his own leadership, retreated toward Nuremberg, the other, under General Molendorf, toward Jena.

On the evening of the thirteenth of October Napoleon arrived at Jena and found the enemy ready to meet him. Napoleon's own heavy train of artillery was thirty six hours' march in the rear, but, nothing daunted, he ordered his men to work all night in cutting a road through the rocks and in drawing up on the neighboring heights their light guns. Both armies were closing in battle the next day before the sun revealed to either commander the divisions of his foe. As soon as the sun had risen Napoleon, with his glass, saw where a bold charge would decide the battle and ordered Murat to advance with his cavalry. These brave horsemen leaped to the contest, dashed through the enemy's lines, spreading havoc on every side. Twenty thousand Prussians were either killed or taken prisoners, and 300 cannon, sixty royal standards and twenty generals were the trophies of

French victory. Thus was defeated an army that started out with 150,000 men, led by kings and princes, and thus the Prussian monarchy lay at the feet of Napoleon. One after another her strong fortresses fell into the victor's hands, and he himself, on October twenty fifth, entered Berlin. Frederick William of Prussia having fled to Konigsberg.

While at Berlin Napoleon visited the tomb of Frederick the Great, where Frederick William and Alexander had sworn allegiance against France. Napoleon, it is said, took from the mausoleum of Frederick the Great the sword and orders of the Great Frederick and sent them to Paris, saying, "These orders and sword shall witness no other scene of perjury over the ashes of Frederick." He sent to Paris also the best pictures and statues of Berlin and Potsdam. Thus he laid the foundation for the seemingly undying enmity that has existed for generations between the German and the French.

Napoleon was now the master of the whole sea coast of continental Europe excepting only that which bordered the territories of Russia and Turkey. At Berlin he announced what is known as the Decrees of Berlin, in which he sought to punish England by way of her commerce. In these decrees he declared the British Islands to be in a state of blockade and that any intercourse with that country would be considered treason against himself. At this time a deputation from Paris came to Berlin to congratulate him. They carried back with them the trophies of his victories and a demand for a new levy of 80,000 men.

Napoleon now advanced to meet the Russians, who were still unconquered and in the field. Between Russia and Germany lay stricken Poland. Napoleon allowed Poland to believe that her saviour was at hand. Kosciusko wrote a stirring appeal from Paris and the Polish officers of the French army wrote glowing accounts of the high character of Napoleon and promising that the great conqueror would restore to them their ancient grandeur; so thousands of brave Poles rushed to swell the army of the conqueror. The French army reached Warsaw, the capital of Poland, November 28, 1806. Soon it encountered the Russian army under Bennigsen and drove it back from post to post until it made a stand at Pultusk. Here the French charged and met with a repulse which was nothing less than a disaster, 8,000 French, among them Lannes, being either killed or wounded. Had the Russians followed up their advantage, defeat must have come to Napoleon. As it was, the French quietly retired into winter quarters, the emperor taking up his residence in Warsaw and stationing his army in the towns round about. But the Russian army was not idle. They were better able to stand the severe cold of this latitude, and in detachments they struck telling blows here and there upon the French outposts. Napoleon, therefore, determined to move before spring. His first attempt was to get in the rear of the enemy and cut them off from a retreat toward Russia.

Battle of Austerlitz.

CHAPTER I.

ON THE northwest frontier of India stood the little fort of Darlinger. It was occupied by three companies of a Punjabi regiment under the command of Major Ackworth. It had been erected two years previous to the opening of this story, and was intended to check the incursions of the fierce tribes across the frontier. One of these incursions had recently been made, and the major was about to start with two companies and a field gun to punish the invaders. He was a strict officer but not unpopular, being very particular about the comfort and well-being of his men. In other respects he was a silent and reserved man. He had lost his wife a year before and this had completely broken him down; the only being he seemed now to care for was his daughter Nita. Nita's mother had intended to return to England with her daughter just before death put an end to the plan.

The major talked again of the necessity of sending Nita home, but so far it had only been talk. "I have quite made up my mind at last, Nita, when I return from this expedition to pack you off to your uncle in England; you are getting a great deal too old to be knocking about in a barrack yard. I know that you are a favorite with all the officers, but that only makes matters worse. You have been a regular tomboy for the last five years, and it is quite time that you were taught to behave as a young lady."

"I can behave like that now when I like, father, and I am sure I don't want to grow up a young lady like the colonel's two daughters, who walk about as if their feet were pinched up in wooden shoes, and simper and smirk whenever any one speaks to them. Then there is Captain Mann's wife, who seems to think of nothing but dress, and expects to be waited on by all the officers."

"That is all very well," the major said. "I admit that they are not favorable specimens of their sex, and I by no means advise you to take them as models; you know well enough that I should not be sending you home to England unless I was absolutely convinced of the necessity for so doing. I shall miss you very sorely and shall count the days till, in three years' time, I shall take my leave and come home to you, to bring you out again when I return. You must admit yourself that your accomplishments are not strictly feminine in their character. You are as good a pistol shot as there is in the regiment, you can fence very fairly, you have a very good idea of cricket, but you know nothing of music."

"Well, father, you know you have said so many times that you don't like musical women."

"No, I am not fond of them," the major said shortly, "but I like a woman who can play an accompaniment to a good old English, Scotch, or Irish song; but as for a woman who is always strumming on a piano, I think that she is a bore of the worst kind, so we won't say much about the music. Then you could not make a garment for yourself to save your life, and there is no more necessary accomplishment on the frontier than for a woman to be able to make her own clothes. You can cook very decently, I admit, but as for anything else you know no more than a child of ten. I am afraid that your uncle will be sadly shocked at your ignorance of everything except barrack life."

"I wish I had been a boy instead of a girl," Nita said.

"I rather wish so, too, Nita; but even if you had been, you would have been obliged to go home and work desperately hard to get a commission. No, I think you had better be contented with matters as they are, and if we can't turn you out a soldier we can, at least, make a lady of you."

Nita made a little grimace which showed that the prospect did not delight her. "What is the use," she said, "of my being able to hit the ace of diamonds ten times following at twelve paces?"

"It is not impossible that it may be of use if you come out here again. It is more than probable that you will be a soldier's wife, and in a country like this it is by no means impossible that skill with a pistol may be of use to us. You remember at the mutiny how women stood at the side of their hus-

bands. There has been more than one massacre since we have been here, and such an event might occur again. At the present moment the tribes are restless, and may break out in a general insurrection at any time. However, that is as it may be. Young Carter will take his leave and go down country in a month's time, and I shall place you under his care."

Nita laughed. "I should rather say, father, that you would place him under my care, for he is the most conceited young fellow in the regiment."

The major smiled. "He is not liked, Nita, but he is an honest young fellow; he doesn't say much, certainly, but as you talk a great deal I have no doubt that you will get on very well when you are once in a railway carriage on your way down South, and he will be able to look after you when he gets to Bombay, and see all about your cabin, and make general arrangements. I do not know any one in the regiment to whom I would rather trust you."

"Well, father, as you say so, of course I must go. If it were only for six months I should not mind, for

have been settled there for some time. The great thing is to make the best of things. You are a big girl for your age. You are as tall as many village girls at sixteen, and if you are bright and cheerful you will soon make yourself liked. Naturally in every school there are one or two disagreeable girls but there will be no reason why you should quarrel with them."

Nita threw back her head. "They had better not quarrel with me," she said, "you know that Lieutenant Carter has given me lessons in boxing."

"Why, you little savage," said her father, "you don't suppose in a finishing school they use their fists against each other! I gave you permission to learn to box for I think it well that every man or woman should be taught how to protect themselves from a street ruffian. Moreover, boxing gives quickness of thought and doubtless improves the poise and figure. If you were to hit a girl at school, it would lead to your instant expulsion. Women fight with words, not with deeds. I think after your constant verbal skirmishes with the officers that you will be able to hold your own."

"I think so, father," Nita said, "oh, yes. I think I shall get on very well at school."

On the following day the major marched away with his two companies, and he half told his daughter that he should probably be back in a fortnight; then she turned and began to make her preparations for her journey. "Take care of yourself," he shouted as he waved his hand before giving the order to start. "I expect to hear when I come back that you have been doing junior subaltern's work to Lieutenant Carter."

As soon as the force were beyond the gate she went up to Carter: "You heard, sir," she said, saluting in military fashion, "that my father has deputed me to act as your sub?"

The young man looked at her in surprise. "I understood that the major was joking, Miss Ackworth."

"Partly in jest, partly in earnest, sir," she said calmly, "one white officer to fifty men is quite enough under ordinary circumstances, but it might not be enough here if we were attacked in great force by the Pathans. I might not be of any use in directing the men's movements, they have their own native officers, but in case of trouble I could keep watch and carry orders for you and act as hospital nurse, and do no end of things."

"I trust that there will be no necessity at all for your efforts in any direction."

"Look here, Charlie," she said, "if that is the way you take my well-meant offers, I shall withdraw them." This she said in a tone of indignation.

"I think you are quite right to do so, Miss Ackworth, I do not think there is the most remote chance of your services being called into requisition."

"I don't know," she said, "somehow or other I have a sort of uneasy conviction that there is trouble brewing in the air."

The lieutenant's face changed its expression instantly. "Have you any reason whatever for such an idea?" he asked, with a sharpness and directness differing widely from his usual manner.

"No, I cannot quite say that I have, still there are some little things which might afford some foundation for it. To begin with, you know that thirty of the camp followers went off a week ago. Why should they have done that? They are always well treated. There has been no grumbling among them, and yet, without a moment's notice they stole away, just before the gates were closed at night."

"Yes, Miss Ackworth, we talked that over among ourselves and came to the conclusion that the men thought they wanted a change and had gone off to their villages."

"Yes, of course, it might have meant that. I heard you talking it over when you were sitting in the veranda outside the bungalow. I thought you were all very stupid, because you only seemed to have one idea before you. Why, I could have given you several ideas at least."

"The men all belong to the hill tribes, and, I have no doubt, had an inkling that an expedition was going to start, and so went to join their friends. They took, I heard, half a dozen rifles with them which would certainly seem to show that they had no intention of returning here."

"You heard, sir, that my father has deputed me to act as your sub?"

I want to see the sea, and the big ships, and, of course, it will be all new to me in England. I have no doubt that my aunt will be very kind and make allowances for my deficiencies, but it will be terrible work saying good-bye to you when we have never been separated even for a day. I will promise you that I will do my best to be trained up to be a lady. Shall I have to go to school?"

"Certainly, dear, I shall ask your aunt to find a first-rate finishing school to which you can be sent for the three years that you are in England, except for your holidays."

"The girls will all think that I am a little savage. I have heard you say that they go out for walks two by two, like an awkward squad being drilled, and they never run races, but have to walk along with their arms the reverse side, and their feet turned out. Oh, dear, it will be dreadful."

"Not so bad as that, dear; I believe there are schools now where girls play games—hockey, football, and cricket, and have gymnastics; and I shall ask your aunt to choose a school of that sort."

"That will be better," Nita said, more cheerfully; "at any rate I think that I shall be able to hold my own."

"I dare say you will feel very happy when you

"Well, that is one solution. The other is that the raid that my father has gone out to punish is really a feint to get him to take the greater part of the garrison away, so that during his absence they might fall upon us tooth and nail."

The young lieutenant looked at Nita gravely. "What you suggest is quite possible; I never thought of it before, and I don't think the major can have done so, or he would have left some more of his force here. I beg your pardon, Miss Ackworth. I see that in case this supposition turns out true, you will make me a very useful subaltern, and I at once accept your offers in that direction. I trust sincerely that your fears will not come to anything, but at any rate I will at once take every precaution in my power—forewarned is forearmed, you know."

"That is right, sir," she said, saluting again; "I hope that when you are assigning a place in the defense to others that you will also give me a place. I should not be much good with a rifle, for my father considers it altogether out of my province—still, I very often fire one down at the butts, and certainly think that I could not miss a man if he were coming up close to the wall—but as you know, I am a pretty sure shot with my revolver, and if it came to close fighting, could calculate upon bringing down a man with each shot."

"I will remember," he said, with a slight smile, "but I should say that to begin with, your place would be in one of the officer's bungalows, which we would turn into a hospital. There will be plenty of work for you there, if we are attacked. I again apologize for having treated your first proposal so lightly."

"Oh, never mind about that, Charlie. I am glad that it is you that they left behind, for most of the other officers would only have chafed me, and then I should have got into a rage."

Greatly satisfied, she returned to her father's bungalow, and set herself to going through her father's belongings and putting aside all old garments she could find that could be torn up and used for bandaging.

Charlie Carter at once called up the two native officers and told them that he did not consider the fort safe from attack while the troops were away. The soldiers were formed up, and with these they made a tour of the walls, telling off a man to every twenty yards, and additional men at the points that were weakest and most open to attack. "You will put half the men off duty every day, and see that the others are posted at nightfall; there will be no occasion for them all to remain on guard all night, so you will station a third of them at their posts, and change them three times during the night. The others will all sleep with their loaded muskets close at hand, so as to be ready to open fire if the alarm is given. You will each by turns be on night duty, and see that the sentries are vigilant, and that all is going on quietly. The troops who are off duty will, of course, be ready to take their posts on the wall as soon as the alarm is given."

The officers appeared in no way surprised at the orders. There had been some discussion among them on the previous evening about the fort being left so slenderly guarded, and they were pleased to see that their commander was determined not to be caught napping. A tour of inspection was made, and each man was instructed in the position that he was to occupy in case of assault. The weakest spot was the gateway which was commanded by a native mosque, a hundred yards away, that was surrounded by several low buildings.

"I wish I could pull this place down," he said to Nita, "but it is more than I can dare to do when we have really nothing to go upon. The major has always said that if we were going to be attacked he should not hesitate to level the whole place to the ground, but he could not venture to do so unless the danger were imminent, as its destruction would be bitterly resented by all the people round about."

"Don't you think, Charlie, that if we were to plant a couple of barrels of powder under it, and lay a train from which it could be fired, that it would smash it up pretty completely? We have a large store of powder, and can spare two or three barrels for the purpose."

"It is a capital idea, Miss Ackworth, and I will carry it out tonight when the people in the village are all asleep. Upon my word, if it were in accordance with military discipline, I should feel disposed to hand over my command to you, for your brain works quicker than mine does, by a long way."

"I am quite content to serve under you," she said; "I dare say I shall have other suggestions later on to make; some, no doubt, will be possible, others the contrary, but I shall submit them for your approval or rejection, knowing very well that some of them would be impracticable. Now, look here, I shall find it frightfully dull taking my meals by myself, and I don't suppose you will find it lively, so I wish you would join me on the veranda of the bungalow."

"I don't know, Miss, whether your father would quite approve of that."

"Nonsense!" the girl exclaimed with a laugh, "you know I am not in any way to be regarded as a young

lady yet; besides, my father was going to send me very soon down to Bombay, and from there to England under your escort, which shows that he considers you a prudent and trustworthy officer and guardian for me. If I am at home all day by myself I am sure that I should get the jumps. My brain is always busy, and, as father's representative here, I think I ought to be able constantly to confer with you, and I am sure it will be more pleasant for you to sit in our veranda and smoke your pipe and put up with my chatter, than it would be for you to be moping by yourself in the anteroom. If you like I will promise to talk as childishly as I can, and with all due respect to you as commander of the garrison."

Carter smiled. "Very well, Miss Ackworth, it would certainly be a great deal more pleasant for me, and you must take the responsibility when the major returns."

"I will do that," she said; "my father must see that it would be ridiculous for us each to be taking our meals alone all the time that he was away."

"Do you know, Charlie," Nita said on the second evening, "I have always thought you rather slow, and now I see that you are really nothing of the sort."

Carter laughed. "I am quite conscious that I am slow. Miss Ackworth, I am slow in taking in ideas, and in expressing my own ideas. I often wish that it wasn't so, but I have lately been getting better. I can't chaff as most of them can, but I find myself able to join in general conversation more easily. Some day, I dare say, I shall become quite a conversationist."

"How very serious you are," she said.

CHAPTER II.

"Have you got another uniform, Charlie?" the girl asked on the following evening.

"Certainly I have," Carter answered in some surprise.

"Well, I wish you would send it over here."

"Send it over here, Miss Ackworth, what on earth do you want it for?"

"Well, it is this. It is as well to be prepared for all contingencies. I certainly do not mean to be carried away, if the fort should be captured, and made the slave of some Afridi chief. If I find things going badly I shall run back here and put on the uniform, cut my hair off short, and then go out and fight it out to the last. It would be a thousand times better to be killed fighting than to be captured."

"Certainly it would," the young officer said gravely, "it would be a hard lot for a woman to be carried off as a captive by these Afridis."

"Very well, then, you will lend me a uniform?"

"Yes I will, Miss Ackworth, but I should advise you to keep the last bullet in your revolver for yourself."

"I mean to," she said, "but something might happen; I might fall seriously wounded and be unable to use it, and then, if they found me lying wounded, they would fire a bullet into me and finish it."

"God forbid that it should come to that," he said, "though it is as well to make provision against it. I am now quite of your opinion that there is a possibility of our being attacked. For the last two days many of the villagers have abandoned their homes and cleared off. There must be some reason for this, and the only reason that I can see is that the men are aware that we are going to be attacked. They have no ground for complaint against us, we have always paid for everything that we have had of them. There has been no enforced labor, and we have every reason for supposing that they are well content to have us established here, as it places them beyond the reach of an Afridi raid. This move on their part certainly is ominous. Should we be driven from our walls, which, I hope, will not take place, I suppose that we must rally in this house and make our last stand here. The walls are solid and I have this morning set some of the men who know something of carpentering to make thick shutters to all the windows and to store the house with provisions. I think we could make a stout defense here."

"I think it is a very good plan, Charlie; a bugle call would bring all the men down from the walls in no time. There are no buildings around, and the enemy would have to attack us across the open; I believe if only twenty men got here in safety we ought to be able to drive them off."

"We will have a good try for it, anyhow," the young lieutenant said; "they will know that it will not be many days before the major is back, and after one or two sharp repulses might deem it expedient to move off lest they should find the tables turned upon them. You are rather a bloodthirsty little person, Miss Ackworth!"

"Do you think so? I hope not; I know very well that if we are attacked it will be a very serious matter, and I fear great loss of life. But I do think that if they made a trifling attack, and drew off, I should enjoy the excitement. But I certainly do hope that there will not be any regular attacks.

Still, if there is I do think that I should, in a sort of way, enjoy it. It would be very wrong, I have no doubt, but I don't think that I could help it."

"I think that is the way with all soldiers, Miss Ackworth. They may feel nervous before, but when they are once in it, they lose all sense of fear and their great anxiety is to get hand to hand with the enemy. If it were not for that feeling I fancy that very few attacks would ever succeed. The man who deliberately says to himself, 'no one could live under such a storm of bullets as this,' would not be likely to march steadily through it."

"It is a funny thing, isn't it, that men should be so fond of fighting as they are?"

"It is. I have wondered over it many a time. All savage races love fighting, and certainly our own people do. If there were a great war, hundreds and thousands of men would volunteer at once. I am afraid this instinct brings us very near the savage. I think no other nation possesses it to anything like the same extent as the British race. The Germans are fine soldiers and fight well, but they do it purely because they are commanded and have to obey. The Frenchmen are nearly the same, and I think it is the same with the Russian. The Italian is by no means a courageous soldier; I fancy you may say the same for the Spaniard. The Turk, now, is a thorough good fighter, and with him it is a matter of religious fanaticism. It is curious that our Indian subjects, for the most part, go into battle with the same feelings as do our people. There are no finer fighters in the world than the Sikhs, the Punjabies, and the Ghoorkhas. They are all magnificent, but are equalled in Africa by the Hausas and other tribes from whom we draw our soldiers. All these people go into a fray as if they were going to a feast."

"I expect," said Nita, "it is because we have that feeling that we always win our battles."

"No doubt that is so, and I only hope that the feeling will not be knocked out of us by school boards and other contrivances of that sort."

Nita shook her head. This was beyond her. "Why should it do so?" she asked.

"The school board trains up the boys to despise their fathers' callings. I am afraid they all want to go into shops, or to get some small clerkships, and to struggle, in fact, for anything where they can wear black clothes, instead of fustian. Still I hope they won't lose the old courage that goes with the old fighting feeling. At any rate a very large number of young fellows who have been to board schools become volunteers afterwards, and I thoroughly believe that the volunteers would turn out as one man if we had a very serious war, say, with France or Germany."

"That would be a serious war," Nita said. "Those nations have tremendous armies, so I have heard my father say."

"They have; but they are, in my opinion, too tremendous. If they were to fight in a solid body against us, they would be literally swept away. If they fought in the open order, which is now the rule with us, the battle would extend over fifty miles, and no general in the world could work an army of such an enormous length. I should say that from a hundred to a hundred and fifty thousand is the greatest body that could be efficiently worked. I don't think the French are ever likely to fight us. The way they backed down after Fashoda showed that the men who govern them have a very poor opinion of the fighting power of their army. When we licked them at the beginning of the century we had a population of five or six millions, while the French had six times that number. Now our British Islands have something like forty millions, and are every day increasing, while the French are stationary, if not going back. Besides, if there were a big war, I believe that the colonies would, if we were hardly pushed, send us half a million fighting men. Between us and Germany the matter is different. They are entering the field as our commercial rivals, and they fret that we should hold almost all the land in the world where a white man can work. I except, of course, North America. The Germans are uneasy in themselves. Democracy is making great strides, and the time may well come when a German Emperor may be driven into war with us in order to prevent civil war at home. At present, however, the power of the press is supreme. Germany is adding to her navy, for without a powerful navy they could not hope to get into contact with us; but while they build one warship we build three, so that we need not fear our supremacy at sea being threatened save by an alliance between France and Germany and Russia, an alliance which there is little fear of coming about, for the Germans hate the Russians and the Russians hate the Germans. You might as well think of an alliance between a dog, a cat and a rat, as that those three powers should pull together. No, the next war, when it comes, may be between us and Russia, and as it is certain that the little Japs would join us, I think that between us we should make things pretty hot for her. There, Miss Ackworth, I have been giving you a sort of lecture on the politics of the world. I hope that you did not find it dull."

(Continued on page 144.)

A Boy's Garden in the South

Dr. Hugo Erichsen

DR. HUGO ERICHSEN.

Honorary Member of the Detroit Florists' Club.

MAKING floricultural recommendations to my boy friends in Dixie-land, I will assume that they have had no previous experience in raising flowers and vegetables, but that they are fond of gardening and delight in nature. A garden is its own reward, aside from the pecuniary profit it affords when properly cultivated. It enables lads who must needs turn time into money to earn something during their vacation and leisure hours from the sale of the products of their garden, for which even small towns provide a ready market. People everywhere prefer fresh vegetables, just taken from the soil, to the stale offerings of the grocer, no matter how temptingly the latter may be displayed. The large hotels of winter resorts also afford an opportunity to boys for earning pocket money. In the course of the season they require an enormous quantity of vegetables and eagerly welcome any addition to the supply of their floral table decorations. People do not go South, while Jack Frost rules supreme in the North, to eat canned goods. And, as for a floral display, they have a time-honored idea that the South and flowers means practically one and the same thing.

Fortunately the establishment of a garden is not expensive. All that is required, in addition to a suitable piece of ground, a few low-priced tools, and an assortment of inexpensive seeds, is an abundance of what an old farmer aptly termed elbow grease and what American boy, North or South, lacks muscle? A garden, it may be well to say in passing, is no place for a lazybones; it means work, and work that cannot be put off indefinitely. If the plants are not promptly watered today, they may be dead by tomorrow, and no amount of self-reproach will restore them to life.

The spade, hoe and rake may be considered indispensable tools in the home garden and will suffice for all the gardening operations a boy may be called upon to perform. If means permit, a cultivator and weeder may be added to this outfit. But a hand weeder will do, in the absence of a more complicated contrivance. It does not matter how the work is done, as long as the soil is thoroughly cultivated—with the emphasis upon the next to the last word.

But what, I hear you ask, of the boys who do not turn gardeners for the sake of profit? The healthful exercise and pleasure obtained from the pursuit will be their compensation, in addition to the gratification they will experience in providing flowers for the decoration of their home, in which flowers are appropriate anywhere except in the bedrooms. Even here a bouquet may be placed occasionally to welcome a newly arrived guest, but be sure to remove it before he goes to rest, as its presence does not conduce to good health. This is due to a curious phenomenon. Plants breathe, like human beings. During the night they exhale carbonic acid and take up oxygen from the atmosphere, a process that goes on all the time in our own lungs. Hence, after nightfall, they encroach upon the very element we require and should be excluded from our rooms.

In the South, the gardening season begins much earlier than it does with us. In fact, in many sections of that part of the country, it may be said to go on forever, bringing with it a never ceasing round of duties for every month in the year. This has the advantage of not crowding the bulk of the work into the early spring and late fall months, and of distributing it more evenly.

Those of my Southern boy friends who have neglected to plant annuals and perennials during the past two months should not put off this work any longer. Annuals are plants that must be sown every year and that perish in autumn; perennials are hardy and will live for many years. The seeds of annuals should be scattered very thinly, where they are intended to bloom, as they transplant

very poorly in the latitude to which this article relates.

Among the annuals that I would particularly recommend are: Sweet Alyssum, various kinds of poppies, sweet peas, lobelia, Chinese pinks, candytuft, centaureas, Drummond's phlox, and foliage cinerarias. All of these are easily grown without previous experience. But a word of caution may not be amiss. Be careful to secure good seed. Purchase from reliable houses only. Do not buy seed because it is cheap. With inferior seeds, your efforts will be wasted.

The Oriental poppy is the queen of her family and, like all of her sisters, easily raised from seed. Her large cup-shaped blossom, with a black splotch in the center, is intensely scarlet in color and very striking in appearance. This is the plant, by the way, from the seed-pod of which the opium is secured that relieves so much human suffering.

It is not yet too late to establish a pansy bed. I like the so-called Trimar-deau pansies best, on account of their large, showy blossoms. The pansy is fond of partial shade, where it will escape the hot afternoon sun; therefore the pansy bed should be located on the northern exposure of a house or in the proximity of shrubbery and trees.

Among the perennials I would mention, particularly, delphiniums, phlox, Sweet William and hollyhocks, the latter two being really biennials, that is to say blooming the second year. A good way to plant these is to place them next to a fence, in the background as it were, arranging the annuals in the forepart of a border. Or, if it is proposed to lay out a series of garden beds, the perennials may be placed in the center and the annuals on the outside.

If cannas, caladiums, chrysanthemums, and dahlias, require division, they should be taken up without delay, separated and re-planted. Now is also a good time to plant gladioli and tuberose bulbs, the planting of which may be extended throughout this month and the next to secure a succession of bloom. It occurs to me that a great many of my readers may not be acquainted with the plants above referred to. To them the floral catalogues will prove a boon, as they contain a detailed description of the plants offered, that it would be impossible for me to give in the limited space at my command.

Roses, in the South, thrive best when planted in the fall. In the meantime, however, it would be well to prepare a

bed for them in rich, deep, clay loam, to which well-rotted manure is added at the rate of one part in four. Salvias, heliotropes, pyrethrum, asters, petunias and verbenas are easily ruined by heavy spring rains, against which a cold-frame will afford protection. A cold-frame is merely a bottomless box, set on the ground and covered with a sash. If you find an old window on the home premises, it will answer admirably for the cover of a frame of that kind. Of course, the plants will have to be transplanted later in the season, when they are large enough and strong enough to bear the change in location.

Salvias make a good showing when massed, that is to say planted in one place and not scattered throughout the garden. For brightness of color—cardinal red—they are equalled only by the Oriental poppy. Asters continue to show improvement from year to year and I believe the time is coming when they will resemble the Japanese chrysanthemum to such an extent that it will be difficult to tell the two apart.

Annuals for summer blooming may be sown as late as April, at which time the bright-hued foliage coleuses should also be planted. These are best arranged in beds, in various color combinations. The

LOTS OF PROFIT-MAKING SEED FREE

81 RARE VARIETIES FREE! This Famous "Great Northern" Seed Collection has Productiveness, Quality and Profit-Making bred into every variety. In order that you may test them, we make the following Liberal Offer: **SEND US ONLY 10 CENTS**, to help pay packing and postage, and we will send you 11 Luscious Melons, 13 Prize-Winning Beets, 15 Superior Lettuces, 14 Magnificent Tomatoes, 15 Earliest Radishes and 16 Gorgeously Beautiful Flowers—81 Best Varieties of Vegetables and Flowers in all. Address **GREAT NORTHERN SEED CO., 230 Rose Street, ROCKFORD, ILLINOIS.**

EVERY VARIETY A PROFIT-MAKER

so-called carpet beds in our public parks are of this description.

During the summer months the plants should be watered and weeded regularly. Diligence in this respect is the price of flowers. It is also advisable to stir up the soil between the plants, so as to prevent it from caking, which interferes with root-action.

September is the time to sow annuals that overwinter in the South. Calliopsis, calendulas, galliardias, primroses, godetias, are among these. It is also a good time to sow perennials and biennials and to plant lilies. But the weeding must continue, for during this month the winter weeds put in an appearance.

The so-called spring bulbs (tulips, hyacinths, narcissi and lilies), are planted in October and November. In December, when the Japanese Camellias are in bloom, the season is concluded in the flower garden by the pruning of shrubs and roses, which should not be done indiscriminately, but with some degree of judgment. If you have not done this kind of work before, find out how it is done from somebody who has. You will probably experience no difficulty in discovering at least one experienced pruner in the locality in which you live.

Where the gardening season is extended throughout the year, a small area, fully occupied and thoroughly cultivated, will suffice for a vegetable garden. In such a garden, of course, it would be impracticable to give up space to crops requiring much room, such as, for instance, corn and potatoes. Even cucumbers would have to be excluded, if it were not for the fact that there are varieties that may be trained on a trellis against the fence, where they are out of the way. They should be planted this month, in hills four feet apart. When the plants put in an appearance, they should be thinned to six in a hill, this number being still further reduced to one or two when the plants begin to get rough leaves. Some more cucumbers can be sown in June and those intended for pickling as late as July.

The time to transplant lettuce has gone by. The plants would probably go to seed, if an attempt should be made to transfer them to some other location in the garden. But they may still be sown in rows and eventually thinned to about one foot apart. During the summer months it is difficult to get lettuce seed to sprout. For this reason it is best to plant it in a shallow box in the house, where it will germinate readily if kept moist. As soon as the seed has sprouted, it may be sown, but the rows should be watered if this is done during dry weather.

Beans may be sown in ridges during March and the following five months; level culture in the South does not produce good results. Early peas may be sown this month and the next, but no later; the late varieties are raised in October and November.

After the fifteenth of this month egg-plants may be sown out of doors, if a sheltered spot is selected. At the same time a sowing of Okra can be made, in rows three feet apart. Every Southern boy knows, of course, what Okra or Gumbo is, but for the benefit of Northern lads it may be well to state that this vegetable is used extensively for soups and pickles. Okra may be sown as late as June and seems to thrive in hot weather.

In the latter part of this month tomatoes may be sown in the open ground for fall fruiting. It is too late now to secure early tomatoes, as these should have been sown in a hot bed in January and transplanted during the past month. During May, June and July the summer varieties of radishes will thrive. Melons, squashes and pumpkins take up too much room and must, therefore, be debarred from a small garden, which means the average garden. The main sowing of cabbage and cauliflower should be deferred until August, but even these vegetables will probably occupy too much space and have to be excluded for that reason. Where there is no lack of space, sweet potatoes, set out in June or August, will yield a satisfactory crop.

The following vegetables may be sown in October and November, for a winter supply: Carrots, corn-salad, Brussels sprouts, broccoli, beets, kohlrabi, parsnip, salsify and spinach.

The gardening year concludes, in December, with the sowing of peas, radishes, lettuce, endive and some early York cabbage.

As a parting admonition, I would say to my young friends: In order to achieve success in the garden, be tireless in weeding and cultivating. If you tickle the earth with a hoe, it will laugh.

Napoleon Bonaparte—

A History Written for Boys by the Editor

CONTINUED FROM PAGE 139.

In these maneuvers the French soldiers suffered terribly, living part of the time on frozen roots. Finally the soldiers demanded battle. Death was better than the horrible suffering they were undergoing. The Russian army numbered 100,000 men and was located at Eylau. Napoleon reached there February seventh, and on that day fighting took place in and about the town with great loss on both sides. On the eighth the French charged at two points but were repulsed. A fierce storm arose at mid-day, the snow blowing into the eyes of the Russians. The neighboring village of Serpallen took fire and dense smoke rolled over the battle field. The conflict raged till ten at night and was the longest and fiercest Napoleon had yet fought. After fourteen hours continuous fighting the two armies held the same positions they held at the beginning. Fifty thousand corpses lay upon the frozen ground, fully one half of whom were French, and twelve French standards were in the hands of the Russians. The battle ended without victory for either side, the Russians retiring toward Konigsberg with their captured standards and the French not pursuing. Five days later Napoleon offered to Frederick William a nearly complete restoration of his dominions if he would accept a separate peace; but Frederick William refused the offer.

On February nineteenth Napoleon retired on the Vistula and summoned new forces from France. Dantzic, which had held out up to this time, was taken on May seventh, and then Napoleon took the field again with 280,000 men. After a few smart engagements with the Russian army of 90,000 Napoleon, on June thirteenth, came upon the main body of his enemies on the west bank of the Aller, opposite Friedland. Napoleon deceived the Russian general, who with his army was on the west bank, into thinking that

he was in the presence of but a small body of French, whereupon the Russians sent a small detachment across the river to the attack. Napoleon, by a pre-conceived plan, retreated, and by so doing drew a greater and greater force across the bridge until finally the whole Russian army had crossed and had the river at their back. At ten of the morning of the fourteenth the battle of Friedland began, and at five in the evening, after a general assault, the French were victorious and the Russians in retreat. On June twenty first an armistice was agreed upon and on the twenty fifth Napoleon and the Emperor Alexander met on a raft in the river, embraced, and retiring under a canopy held a long conversation in secret. Then Tilsit was made a neutral town and here the two Emperors lived for a time on terms of intimacy. Frederick William also came to take part in the negotiations, but Napoleon received him with scant courtesy. The treaty made at Tilsit gave up to Frederick ancient Prussia and upper Saxony, but Frederick was to remain the vassal of Napoleon. The Prussian dominions of lower Saxony and on the Rhine, with Hanover and other states, became Westphalia, with Jerome Bonaparte as its King. This Jerome had been under the displeasure of Napoleon by having married a Miss Patterson, of Baltimore, in the United States. Now he was reconciled, having consented to marry a daughter of the King of Wurtemberg. There could be little doubt but what there were secret articles in the treaty at Tilsit by which Europe was to be divided between Napoleon and Alexander. It was the discovery of these that led England a little later to fan again the flames of war. The following August Napoleon returned to Paris to receive the homage of a people delirious from oft-repeated victories.

(To be continued.)

KIRK MUNROE.

Now making the circuit of the globe for material for American Boy stories to begin in this paper next fall.

AT THE NATIONAL CAPITAL.

What Postum Did There.

A well-known figure at the National Capital is that of an attorney-at-law and solicitor of patents, who has been practicing before the courts and the Department of the Interior at Washington for more than twenty five years. The experience of this gentleman with coffee is unusually interesting for it proves that although the ill results from coffee are slow they are sure. He says: "I have consumed coffee at my meals for many years, but of late years have been annoyed by deranged stomach and sleeplessness, pains in my head, nervousness and confusion of the mind. About eighteen months ago I quit coffee and commenced to use Postum Food Coffee and have experienced the most pleasing and beneficial results therefrom.

"It has aided my digestion, increased my appetite for healthy food, appeased my stomach, invigorated my brain, cleared and quieted nerves and mind, and enabled me to sleep soundly eight hours out of the twenty four. It has imparted buoyancy and cheerfulness to my daily life and caused me to look on the bright side of things in general. It has fitted me to do more brain work than ever before, and I would consider it a calamity to be deprived of its use.

"I look on Postum as an absolute cure for the ill that coffee causes. It not only cures the ravages of coffee, but stimulates to vigor and healthy action the brain and all the organs of the human body. It has with me and with many of my friends and this is my authority for the statement." Name furnished by Postum Co., Battle Creek, Mich.

Boys Books Reviewed

CHATTERBOX, for 1902. Edited by J. Erskine Clarke, M. A. This warm favorite of the boys and girls is fully equal in quantity and quality to any of its predecessors. The stories, poems and illustrations with which the book abounds are sure to please its readers, both old and young, and the lessons of self-sacrifice, pluck, endurance, helpfulness and kindness taught will appeal to every right-minded American boy and girl. 412 large pages. Dana, Estes & Co., publishers.

THE BOYS OF WAVENEY, by Robert Leighton. This is a first-class book dealing with English public school life, although the boy whom we would call the real hero of the story is an American. From cover to cover there is something stirring which will interest the reader, and the lessons of fair play, courage and christian manliness it teaches will be appreciated. It is nicely illustrated by Gordon Browne. 323 closely printed pages, in good, clear type; ornamental cover. Price, \$1.50. G. P. Putnam's Sons, publishers.

PICTURES OF PAINT-BOX TOWN, by Douglas Zabriskie Doty. The idea of this book is one which we feel sure will prove interesting and instructive to the little ones. It is a story book and paint-book combined, the full page outline drawings being described in verse on the pages opposite, the rhymes giving also instructions as to the proper colors to use on the drawings. Both mamma and the children can thus be fully occupied, the one in reading the directions and the latter doing the painting. 39 pages, long 8 vo. Good, strong paper and well bound. Price \$1.00 net. E. P. Dutton & Co., publishers.

DOG TOWN, by Mabel Osgood Wright. Those who have read "Tommy Anne" will be delighted with this continuation of the account of the Waddles family, and those who have not, but are lovers of dogs, will feel their hearts grow warmer toward their canine friends. Mrs. Wright has written a book full of fun and humor, and with a charm which enhances her already deservedly high reputation as a writer of animal stories. In regard to the many illustrations it need only be said that they are from actual photographs of the animals and scenes which the author describes. 405 pages. Printed on excellent paper. Gilt top, in good, clear type and with ornamental cloth cover. Price \$1.50 net. The Macmillan Co., publishers.

THE BEARS OF BLUE RIVER, by Charles Major. We believe that Mr. Major with this book has scored as big a success with the boys as he has already done with the "grown ups" by his "When Knighthood Was in Flower." The stories in this volume are just the kind a boy wants where there is combined the excitement of hunting and shooting with interesting instruction as to the nature and habits of wild animals. What American boy will not envy Balser and his killing of the big bear on the log where he was fishing, or the blackberrying adventure in which he saves his little friend Liney,

AT THE LAKE OR DOWN THE RIVER

THE SUPERB HAMILTON RIFLE will prove to be the finest companion imaginable. For every 22 CALIBER HAMILTON RIFLE description of small game and target practice it is unequalled. It is absolutely accurate; is well made, strong, durable, and weighs only two pounds. Our New Model No. 19 is as perfect a 22 caliber rifle as it is possible to make; and the price is ONLY \$2.00. Ask your dealer for a HAMILTON, and if he cannot supply you, we will send by express, prepaid, upon receipt of \$2.00. Write for Illustrated Circular: THE HAMILTON RIFLE CO., Box 16, Plymouth, Mich.

"short" for Pauline Fox, from the Indian who was carrying her off. The fun which the boys had with the two bear cubs, Tom and Jerry, will make the most dyspeptic boy laugh. But we haven't space enough to tell, much as we would wish, of "The One-Eared Bear," "The Wolf Hunt," "The Fire Bear" and "The Castle on Brandywine," which the boys made and in which they camped and had a glorious time hunting and trapping and fishing. You must just get the book and enjoy it for yourselves. 277 pages and a lot of fine illustrations by A. B. Frost and others. Handsomely bound. Price \$1.50. The Macmillan Co., publishers.

There has been sent us from The Hoffmann Metropolitan Publishing Co., Milwaukee, a copy of THE NATURAL SYSTEM OF PENMANSHIP, the author of which is O. A. Hoffmann. From the examination we have made of it we believe it justifies all that is claimed, viz., "simple, plain, yet practical and effective." It does away with all useless lines, variety of styles, shades and flourishes, which are not attractive embellishments in business letters. The book, which measures 7 1/2 x 10 1/4, is ably and artistically gotten up, and shows by illustration and plain directions, what is required of the student. It contains 60 lessons and 100 model letters sufficiently varied to meet every kind of business correspondence. It is dedicated to the Public Schools and the Youth of America, and should have a wide circulation.

SWITCH LIGHTS, by Ed. E. Sheasgreen, engineer on the Minneapolis & St. Louis R. R. While this little volume will appeal more particularly to the men at the switch and the throttle, there is an attractiveness about Mr. Sheasgreen's poetry, which the general reader will find most pleasing. There is apparently a great deal of sentiment and homely philosophy about the life of a railroad engineer unknown and unthought of by the outsider, and the author has caught and embodied in simple, yet sincere and often beautiful, expressions all the varied experiences, the lights and shadows, the comedies and often the tragedies of life on the iron rail. Space forbids us quoting from the book, but there is not one of the nearly ninety poems in the book but is worth reading. Most appropriately illustrated throughout its 150 pages, with marginal sketches and cuts in black and white, by P. J. Carter. Iron Trail Publishing Co. Price \$1.00.

\$5.90 FOR THE GREATEST BOYS' BARGAIN EVER KNOWN

To secure new customers we offer the following Boy's Outfit which we believe to be the Greatest Bargain ever given for the money:

- 1 Boys 2-pc Suit, \$10.00
- 1 Hat or Cap, 1.25

American Mail-Order Co. Ref.—Any Express Co. or Merchants Bank, Chicago.

Free! Just what every Young Electrician Free! Will light lamps, run motors, ring bells, decompose water. Comprise every feature of the big generator. All parts are interchangeable and show just how it is made. You can do a thousand wonderful things with it. It is the most complete little generator made. Runs off a sewing machine. In order to advertise these we are going to give a number away to the three boys who send us the most words taken from the one word MANUFACTURE. You can use letters but no many times in each word as they appear in this word. The letters A U R can be used twice in a word, but all others but once. Start like this, fat, face, far, for. With your list of words you must send ten cents for our complete catalogue to make you eligible to a prize. List must reach us before March 30, 1903. If there are more than three having the same greatest number of words the first ones received will get the dynamo. Put a few spare nights on this and get one of the prizes. Send your list early. C. & T. ELECTRIC CO., Department A, No. 347 W. Fayette Street, SYRACUSE, N. Y.

EARN A PRINTING OUTFIT

Here is a chance to get a Printing Outfit, with which you can print cards, envelopes, note paper, and many other things, and sell them, books, papers, etc. Start in the printing business. Make money doing work for your friends. A whole winter's instruction and profitable entertainment in this outfit, which you can get without costing you a cent, by mailing only one dollar's worth of our goods. Send no money in advance. We'll trust you. The goods will be sent your friends will get them to help you earn this valuable premium. Write today. We send the goods immediately on hearing from you. STANDARD CO., Dept. 846, Omaha Bldg., Chicago.

A FLYING MACHINE AT LAST

Scientific kite-flying within the reach of all. A marvel of simplicity. Any boy or girl can fly it. Tantalizing delight both young and old.

Special Introductory Size by mail, 10 cents, 5 for 25 cents.

Agents wanted everywhere.

Zimmerman Flying Machine Co., 15 Wood St., Fremont, O.

THE BANDELORO TOY

Is a simple contrivance consisting of a wheel and a cord, which affords great amusement to children of all ages. Can you make it run up the cord? It is easy when you know the proper twist. A slight motion of the hand does the trick.

Sent postpaid for 10c; 5 for 25c.

BANDELORO TOY CO., P. O. Box 62, DETROIT, MICH.

FREE OUR SOUVENIR

TO EVERY BOY AND GIRL IN UNITED STATES

A very useful article. Send name and address by return mail. MONDAY MFG. CO., Dept. K, Rochester, N. Y.

IF YOU STAMMER

I can absolutely cure you for life. I cured myself after stammering nearly 30 years. Write for my FREE book, "Advice to Stammerers." BENJ. N. HOGUE, 18 PORTAL BUILDING, INDIANAPOLIS, IND.

REPEATING AIR RIFLE 150 SHOTS EASILY EARNED by every boy in the U. S. Send name and money for 20 pkgs. Celebrated Violet Perfume, sold for 10c. Return the money and get rifle or other premiums for boys and girls. Samples for 10c. Write at once. FRANK L. ROSS CO., Dept. B, Box 728, Cincinnati, Ohio.

TOM CRANE, LOAFER (Story) you should read. In neat booklet with other good original reading matter. Sent to anybody for Stamp. Brown—Boys' Own Toy Maker, 10c. How to Train Animals, 10c. (Carried over from Nov. 1st issue.) Show, 10c. THE ERICSON CO., ELOY, WIS.

THE "EVER-READY" FOUNTAIN PEN, 42c

Nicely engraved rubber barrel, with 14 kt. gold plated pen, guaranteed to give perfect satisfaction to bankers, bookkeepers, business men or students. Will not leak. Equal to a \$1.50 pen. PRICE, 42 cents, prepaid. THE BERLIN NOVELTY CO., Berlin Heights, O.

CANFIELD EVERY BRAKE FULLY GUARANTEED

COASTER BRAKE

LEARN TELEGRAPHY

ALL GRADUATES AT WORK

Only school in the world that operates a MINIA-TURE RAILROAD in its connection, securing the student actual experience. Photographs of SCHOOL mailed for 10 cents in stamps. Catalog FREE.

Train Dispatchers School of Telegraphy, Detroit, Mich.

Nita—A Tomboy Soldier

CONTINUED FROM PAGE 141.

"Certainly not," Nita said. "I am very much obliged to you. Of course, I have heard these things talked over before, but never in such a way that I could exactly understand them. It seems funny to be talking of such matters up here on the frontier with the chance of being attacked every hour."

"Well, I must go my first rounds. Good night, Miss Ackworth. I hope your sleep will not be disturbed."

"I hope not, indeed," the girl said. "I have slept soundly every night so far. There has been so much to be seen and done that I go to sleep as soon as I lay my head upon the pillow."

Four hours later she sat suddenly up in bed. It was certainly a rifle shot that she heard. This was followed almost instantaneously by a heavy roar of musketry. "It has come!" she exclaimed as she leapt out of bed and hurriedly dressed herself. She paused a moment as she looked at the suit of uniform and then muttering, "There will be time enough for that later on," she proceeded to put on her own clothes. She put a box of pistol cartridges into her pocket, and with a revolver in her hand sallied out. It seemed to her that the place was attacked on all sides at once, for flashes of fire spat out round the whole circle of the walls, but this was as nothing to the roar outside. By the sound, she assured herself that the main attack was directed on the gate, and here the fire of the defenders was also exceptionally heavy. She made her way up to the top of the wall. Here she found the greater part of the men who had been in reserve, although some of them had, as arranged, hurried to other points on the wall.

"Fire steadily, men, fire steadily," Lieutenant Carter shouted. This told her where he was stationed and she made her way to him. When his eye fell on her he said, "You ought not to be here, Miss Ackworth. If things were going badly with us I should say nothing against it, but at present, at any rate, you are quite out of place here and I must ask you to retire at once. What do you suppose the major would say if, on his return, he found that you had been killed by a chance shot on the walls. I must really beg of you to retire at once."

Never before had Nita heard the young lieutenant speak in such a tone of command and determination. "All right," she said, meekly, "just let me have one peep over the wall and then I will go down."

"You may take just one peep, but there is nothing to see. They have failed in the expectation that they would take us by surprise. At present they are lying down and using up their ammunition."

Nita took a hasty glance over the parapet and then descending the steps made her way to the building, which it had been decided had better be used as a hospital as it was a bullet-proof building, although less well ventilated and comfortable than the bungalow would have been. She set to work to light the lanterns ranged along the wall, to get out bandages and to prepare for the reception of the wounded. Two of the men had been told off to assist her, and these were already there when she arrived. It was not long before the first patient was brought in. He had been severely wounded in the head while firing over the parapet. Nita shuddered, but putting on a thick, white canvas apron, which she had made on the previous day, began her work. The surgeon had unfortunately gone with the expedition, and she felt that the responsibility was a heavy one. She knew a little of bandaging, having been present on two occasions when men who had badly injured themselves had been attended to, but this was a case altogether beyond her. She could only bathe the man's head and then put a bandage round it. She gave him a drink of water and then sat suddenly down on the next bed, faint and sick. She held out her hand to one of the men for a glass of water, drank it up, and then with a great effort got on to her feet again, and waited for the next patient.

Five or six more men were brought in during the night; all had been hit either in the head or shoulder, some of them, however, were only gashed in the cheek, and these, as soon as their wounds were bandaged, took up their rifles and went off again to the wall. So the night passed; the fire had slackened a good deal and it was evident that the Afridis had abandoned the idea of taking the fort by assault. Although it was two o'clock when the attack had begun, the night seemed endless to Nita, and she was grateful indeed when the first tinge of daylight appeared in the east. Presently Carter arrived. "You have done well, indeed, Miss Ackworth," he said, "and have been far more useful than you could have been on the wall. It required a deal of nerve to carry out the work, and your looks show what a strain it has been. I beg that you will go and lie down for a time. Half the men have come down from the wall, and a good many of them are adepts in the art of bandaging wounds, having been enlisted among fighting tribes. Your bandaging has been really effective, but these men will make a neater job of it."

"How are things going on?" she asked.

"Very well. They have fallen back now to the mosque and village, and no

doubt will spend the morning in consultation."

"You have not fired off the barrels, then?"

"Oh, no, I shall keep that as a pill for them when matters become more serious. Now, please go and lie down. Of course, if there is a fresh attack you will wake and come out again."

Nita walked slowly across the yard to the bungalow. "Why are my legs so ridiculously weak?" she said to herself; "I am sure that I have not been afraid, and as to the work of bandaging those poor fellows, it was nothing. I suppose it was the sight of blood and having to wait so long for something to do. I am sure that I should have borne it ten times better if Mr. Carter had left me standing on the wall. I should not have thought that I could have been overruled by what he said, but he spoke so sternly and sharply that I seemed to feel that I must obey him. I would not have believed that Charlie could have spoken so. I shall not be so quick in forming an opinion about people again. I think I spoke of him as 'stupid' when father said he was to take me down country, but I see that there is nothing stupid about him. He is very quiet, certainly, but he takes the command as if he had been accustomed to it all his life. I am quite certain that if any one can defend this place he can. How stupid of me, I forgot to ask him what was the strength of the force attacking us. However, that will keep till I get up."

So saying, she laid herself down on the bed, dressed as she was, and in two minutes was fast asleep. It was eleven o'clock when she woke. "I did not think that I could have slept five minutes," she said indignantly to herself; "here I have slept nearly six hours." She dipped her face in water, brushed her hair and

made herself as tidy as she had time to. When she went out Lieutenant Carter was talking to the two native officers; she waited till they both saluted and retired, then she went up to him. "Please tell me a little more about it, Mr. Carter. How many are there of the attackers? What do you think they are going to do? Did you kill many of them?"

"Three questions at once," he said, with a smile, "and to none of them can I give you a satisfactory answer. In the first place, they are very strong; we have put them down as being fifteen hundred men. As to their intention, I can tell you nothing yet, for there has been no development. Thirdly, I think that we must have killed fifty at their first rush at the gate; but that is pure surmise, for they carried off the bodies as fast as they fell. I am waiting somewhat eagerly to see what their next move will be. We have heard outbursts of yells twice in the last hour, and I expect that we shall soon see the result."

"It is long odds," the girl said.

"Very long," answered the lieutenant; "for there is no doubt that it is a preconcerted thing. An attack was made on that outlying post two hundred miles

away, probably only with the intention of getting our garrison to march away, while all the assembled tribes came down upon us, feeling, no doubt, that with the benefit of a surprise, and knowing how small our garrison must be, that it would be carried at the first rush. Now that that has failed they will, no doubt, adopt some quite different tactics. I have had the men at work ever since day-break, piling up sacks full of earth against the gate to within two or three feet of the top, where I have made some loopholes so that our men could lie down behind the sacks, and keep up a close fire. That is all that I can do at present until we see what game they mean to play."

"That is capital," the girl said; "if they make a real attack, that is the place where I shall place myself. There will be no chance of my being hit there, and at that distance I could calculate on bringing down an enemy at every shot."

"I am afraid that you are a very wilful young person," he said, with a smile; "but as I know how good a shot you are, I shall not refuse your aid in case of extremity."

(To be continued.)

Some Achievements of Boys

ROBERT B. BUCKHAM

Every now and then we are astonished and delighted at being brought face to face with some remarkable and truly admirable achievement accomplished by a boy. No one has ever yet been able to fathom the genuine boy, or to place metes and bounds upon the extent of his possibilities. He is to us in a great measure an enigma, and often outruns our utmost expectations in ability and understanding. We would do well to have a care how we lightly pass judgment upon his capacity or hold his undertakings in little esteem. Some very good illustrations of this fact are to be found in the following incidents:

A BOY'S BOOK.

In almost any public library, as well as in many scientific collections, will be found a treatise on ornithology, entitled, "The Land and Game Birds of New England." It is a thoroughly prepared, well written and valuable authority upon this subject of so much interest to both young and old students of birds. But perhaps the most remarkable thing about it is the fact that it was WRITTEN BY A BOY LESS THAN SEVENTEEN YEARS OF AGE!

The particulars as to how it came to be compiled are as follows: Its young author, Henry D. Minot, was born in the town of Roxbury, Mass. His father's farm, comprising about thirty acres of land, was situated on the edge of the wooded and open country stretching away to the town of Dedham on the west, and the Blue Hills on the south. Naturally this was a famous place for birds, almost every variety native to eastern Massachusetts, as well as the only occasional visitors, being found here.

From early childhood, young Minot showed a great fondness for nature, and her influence and charm increased with every added year of his boyhood. He never wearied of wandering through these woods and fields, exercising his habit of keen and patient observation, and unconsciously the lad trained himself to be an ornithologist. Nature was his teacher, and he proved himself an apt pupil.

It is related of him that he wrote with facility, and soon formed the habit of recording his observations daily. In this way he collected a large amount of manuscript, out of which he prepared the text of his book. After much hesitation, he submitted it to his eldest brother and asked his opinion of it. He was astonished at its thoroughness, accuracy, and originality, and procured its publication. The book was well received, sold rapidly, and was soon out of print.

A YOUNG ENGINEER'S RUSE.

It is related that during one of the campaigns of the famous military strategist, Napoleon, while passing through an unfamiliar country, the army came suddenly and quite unexpectedly upon a wide and deep river, effectually barring farther progress with its waters. Napoleon chanced to be in the very front ranks of the army, and among the first to arrive at the river's bank. Instantly he turned, and in no happy mood at being thus summarily brought to a standstill, petulantly called out to a group of his engineers, nearby: "Tell me the width of this river!"

They looked from one to the other in dismay. What should they reply. Their instruments were packed away and in the baggage train in the rear of the army. "Tell me the width of this river!" again called the great commander in tones that struck consternation to the hearts of the discomfited engineers. At this critical moment, a young fellow, not much more than a mere boy, employed in some menial capacity by the engineers, stepped forward and respectfully touching his cap, ventured, "I can tell you its width, Sir." Napoleon turned to him with a look of mingled impatience and amusement. "Well, what is it?" he replied.

Now it so happened that a ruse which he often used to put to the test in his sports with his young companions had occurred to him, the moment that this difficulty had arisen; a mere boy's amusement, but not without its scientific principle, nevertheless. Standing perfectly rigid, he drew down his cap until its visor was in a direct line with his eyes and the opposite bank of the river. Then turning steadily about, he noted the distance thus indicated along the bank on which he was standing, paced it off, and announced the result to the astonished general. It goes without saying that promotion came rapidly and frequently in his case, and yet it was but a boy's pastime which won him his advancement.

A BOY'S CHURCH.

In the historical records of early times in Massachusetts, there is to be found a remarkable incident, in which a boy endowed with plenty of the pluck and spirit so characteristic of youth, set an example of manhood to a whole colony of grown men, as well as inspired them with the fortitude to attempt an undertaking which none of their own number could do. In one of the smaller towns on Cape Cod, a meeting of the inhabitants had been called for the purpose of planning for the erection of a church building in the town.

It was the sense of the meeting that they ought to have such a building, but after much discussion all seemed to agree that the idea must be abandoned on account of the expense involved. No one felt able to contribute largely enough to insure its completion, and no one could be found who was willing even to start a subscription list with a generous offer of funds.

Finally a boy stepped into their midst, and exclaimed, "I will head a subscription list, and will give one hundred dollars! Who will be the next?" The lad was known to be a poor boy of the town, and none was able to imagine where he was to get the money, but not one dared ask him the question, and rather than be outdone by a boy, one after another came forward with his subscription, until at last money enough was subscribed, and the erection of the building was assured. The best of it all was that though the lad at the time of the meeting had not a cent to his name in all the world, yet he borrowed a boat and went to fishing off the cape, sending his catches to market, and thus managed to pay his subscription to the last dollar, as he had agreed to do. The completed edifice might well have been designated as a boy's church, since it doubtless never would have been built without his assistance.

A BOY'S POEM.

William Cullen Bryant, the famous American poet, began writing verses at the early age of eight. His father was a doctor, being also very fond of the study of botany, and had accumulated quite a complete library of volumes devoted to these two subjects. Young William was a great reader, devouring everything that came in his way, and of course very early explored the contents of this library. Thus he was introduced to the study of nature, but it was the subject of death, with which he was confronted in the medical works, which made the most profound impression upon him. So deeply was he stirred by its consideration that he composed a poem, for which he coined a name, calling it "Thanatopsis, or a View of Death."

After having completed it, why he do not know, he did not show it to anyone, but hid it away in his father's desk. Doubtless he soon forgot its whereabouts, for soon afterwards he left home, to study law, and then to practice his profession in a neighboring town, never having disturbed the composition. Meantime the North American Review had been started, and Dr. Bryant happening to find the poem in a pigeonhole of his desk, sent it to the editor of the new publication. He was delighted with it and showed it to the well known critic, Richard H. Dana. He immediately exclaimed, "You have been imposed upon! No one on this side of the Atlantic is capable of writing such verses!"

But, of course, it soon became known, that this famous and inimitable poem, so well known and dear to all, the equal of which, it is claimed, has never been written by one so young, was composed by young Bryant before his departure from home, and when he was but a boy, less than nineteen years of age.

VALOR WITHOUT A PARALLEL.

Perhaps the most remarkable exhibition of valor which history recounts occurred as follows; briefly told. Two immense armies were once lined up opposite each other, and a battle seemed imminent. But it so happened that one host had among its numbers a warrior of gigantic size and enormous strength, and well knowing that it would be difficult indeed to find his match, tauntingly offered to send him out and let him fight single handed with any one the opposing force chose to send against him, the terms being that all should abide by the result of the combat.

No one could be found so go out against him, clad in his heavy armor and terrible to look upon with his huge spear and sword, until at last a mere boy arrived in camp, and desired permission to go and meet him. At first his request elicited nothing but ridicule, and he was told to return home; but so persistent was he that he at length gained permission to make the attempt, and went out to fight the giant.

The reader well knows the rest; how that David, for it was he, advanced to meet Goliath with nothing but a sling in his hands, and as the huge fellow advanced upon him, confident of success over such a diminutive enemy, hit him in the forehead with a smooth stone from the brook, and cut off his head with his own sword; at sight of which the enemy fled in dismay.

Boy Mechanics and Artisans

Ralph Teeter, Electrician.

It doesn't seem possible that a twelve-year-old boy could make an automobile. About two years ago Ralph's father, who is the president of a manufacturing concern at Hagerstown, Ind., built a shop for his boy in the back yard of the home in the hope of keeping him out of the factory, where he was taking up the time of the men misplacing tools and working machines that little boys have no business with. This shop is equipped with a three horse gasoline engine, which is used to operate lathes, saws, and other machinery. He has a work bench of regular size and a complete outfit of tools for working in both wood and iron. There are dynamos in the shop from the smallest size to the practical, powerful kind, some of them having been made by the young electrician. Ralph has fitted up an electric call-bell between his home and his shop. About a year ago the boy became deeply interested in the subject of automobiles and read everything he could find on the subject. When school closed last spring he went to work, and the result was the automobile shown in our picture. It

J. FRED KELLY, 115 York Street, New Haven, Conn., says he has a motor of 110 volts. He wants to know whether caustic potash batteries can be used, and if so, how many cells it will require. He also wants to know how to make this kind of a cell.—GEORGE W. ROOSA, Buffalo, N. Y., is an amateur electrician and takes great pleasure in making his own apparatus. He says he is very much interested in THE AMERICAN BOY. He relates that he and a lad across the street nearly have a fight every time the paper comes; that this lad reads his copy but never lends him any of his own, but as the lad has no papers to lend it is not strange.—REX ROBERTSON, Fergus Falls, Minn., made type by cutting a rubber hot water bag and stamping letters on the rubber and then cutting them out and pasting the rubber letters on blocks of wood. By this means he obtained a set of rubber type.—HARRY P. FISHER, Ness City, Kas., has a woodworking shop of his own and a fine set of woodworking tools. He owns a Barnes velocipede gig saw, with which he makes wooden wheels, brackets, etc. He has constructed a narrow gauge railway one hundred yards long with wooden rails and a chain driver and car. He has

RALPH TEETER AND THE AUTO HE MADE.

will carry two or three persons and make about fifteen miles an hour. The steering device and fuel and water tanks on the machine were designed and constructed by the boy. Ralph is thinking of exhibiting it at the St. Louis Exposition. He is a regular attendant at the schools of the town and is particularly fond of reading and studying the lives of great inventors. He will be heard from.

BUILDING BONES.

Of Great Importance That Children Have Proper Food.

A child will grow up with weak and small bones or strong and sturdy frame, depending on the kind of food given. That's why feeding the youngsters is of such great importance. The children do not select the food—the responsibility rests with the parent or guardian, or with you if you select the food for a boy or girl. The scientific selection of this food should begin as early as possible. That's when the delicate little plant needs the tenderest care. A well-known lady of Callatoga, Calif., says: "About two years ago my little niece was taken sick. When medical aid was called one physician pronounced the case curvature of the spine; another called it softening of the bones and gave but little hope of her recovery. For weeks she had been falling before her parents thought it anything but trouble from her teething. "She had been fed on mushes and soft foods of different kinds, but at last her stomach could retain scarcely anything. At this time she had become a weak little skeleton of humanity that could not much more than stand alone. "The doctors changed her food several times until finally she was put on Grape-Nuts which she relished from the first and ate at almost every meal, and her recovery has been wonderful. She has been gaining ever since in strength and weight. "She has eaten dozens of packages of Grape-Nuts in the last year and a half and the child is now a rosy-cheeked and healthy little girl, still clinging to her Grape-Nuts. "It is plain the food has saved her life by giving her body the needed material to keep it well and the bone material to build with." Name given by Postum Co., Battle Creek, Mich.

also made a complete threshing outfit with which he can thresh blue grass, foxtail, and other light grasses. He runs the threshing machine with a Jumbo windmill, which he says produces quite an amount of power when the wind blows hard. He is now working on an elevator for his shop that can carry him and his tools and materials from the first to the second floor. He takes great pleasure in experimenting with electricity. He has learned to telegraph, and some day expects to get a position as an operator.—ALBERT L. ALLEN, Worcester, Mass., wants directions for making a small gasoline or electric motor of one-half horse power.—JAMES IRVING FINNIE, Clinton, Mass., with another boy, had a booth at the Clinton Fair held in September, and stocked it full of their own home-made electrical apparatus, winning first prize of five dollars and a diploma. Part of this money he sends us for a subscription to THE AMERICAN BOY. Clippings from local papers indicate that the boys' display attracted great attention. The boys were each under sixteen years of age.—HANS BURKHOLZ, Milwaukee, Wis., reading the request of H. V. Christian, says the best kind of battery that he knows of is the Mercury Fuller battery, two volts each. They are strong and last a long time. To Gilbert H. Gavits he would say, send for Rubler Publishing Company's catalogue of motor and dynamo castings and how to make an electric motor. They are at Lynn, Mass. Price ten cents.—GEORGE BEIER, Dubuque, Ia., is learning the printing trade and sends us some very neat specimens of his work. He earns \$4.50 as a press feeder

RALPH TEETER IN HIS SHOP.

and has been working at it nearly five months. He improves his spare time in learning how to do odd jobs about the office, and in time no doubt will be an expert printer.—HERBERT P. SNYDER, LOUIE TIDBALL and PLYMON TUTTLE, living near Garrettsville, O., and each sixteen years of age, bought a half mile of wire, which they stretched between their homes, using poles which they had cut in the woods. They also bought three telegraph instruments. After using the line about a year GEORGE and LEON WATERS joined with them and another mile of wire was bought and two more instruments. They made their own batteries. This scheme has enabled them to learn very much about telegraphy and has given them much amusement as well.—ANSON M. PHILLIPPE, Campbell, Cal., lives in the little Santa Clara Valley, which is known far and wide for its yield of splendid fruit. Anson is interested in steam engines. He has a one-fourth horse power engine, and wants to correspond with other boys interested in engines.—LEROY HENRY and WEBB WILDMAN, Radcliffe, Ia., have fitted up a telegraph line which is half a mile long. It is constructed of common wire and put up on home-made poles. Seven gravity cells are used to operate it. They have printed some telegraph blanks on a printing outfit which they made.—HAROLD H. THURSTON, Anoka, Minn., wants to know what chemicals should be used, and the amount of each ingredient, to make a good primary dry battery.

CYCLIST FACED BY MOTOR CYCLE WITH WIND SHIELD.—From Literary Digest.

WALDO K. HARRIS, Neosho Falls, Kas., wants to know how to put in electric door bells and where he can get books on electricity. Write the Ohio Electric Works, Cleveland, O.—DAVID CREEKBAUM, 24 E. 2nd St., Portsmouth, O., wants to know how to make a telegraph instrument.—C. KIRKPATRICK, Montreal, Canada, wants to know if telegraphy is a profitable line of work. In general, we would say that telegraphy is a trade that pays well and in which an expert can always obtain employment.—GEORGE REID HEMENWAY, Manchester, Vt., is another boy who is an expert with the scissors in cutting out figures. Samples of his work are before us and they are excellent—indeed, remarkable. He has been doing this work since he was five years old. The cutting is done without the use of pencil in drawing outlines first.—CHARLES TIMBON, Chicago, Ill., wants to be recommended to a paper that deals with amateur work on model engines. Send us \$1.00 for a year's subscription to the Model Electrical and Mechanical Engineer (monthly), a journal for amateurs.—RAY GALLANT, Champaign, B. C., wants to see articles on scientific kite making.—TOWNSEND JONES, Cherry Valley, Ill., is interested in railroad engineering. He wants to know what books he can get on the locomotive and would like to correspond with other boys on the subject. An engineer friend of his permits him frequently to ride with him and help in the management of the engine.—RALPH GILLILAND, Washington, D. C., wants to have plans for building a skiff.—EARL BACON, Medford, Mass., is interested in electricity. He has a room in which he keeps his electric apparatus, which includes a switchboard, an electric railroad, etc.—LAWRENCE A. JOHNSON, Savannah, N. Y., wants directions for making skees.—WILLIE TREUMANN, Grafton, N. D., sends us a picture of a combined writing desk and bookcase that he made himself and which he now has in his room. The pencil sketch of it which he sends is excellent, and if the desk is as good as the sketch he has a fine article of furniture that he may well be proud of.

Watch Accidents.

will happen! That's why your watch works should be protected by a strong case. Gold alone is soft and bends easily. It's used for show only. The JAS. BOSS STIFFENED GOLD WATCH CASE resists jar and jolt. Keeps out the dust. Reduces the expense of repair. Adds many years to the life of your watch. Every JAS. BOSS CASE is guaranteed for 25 years by a Keystone Trade-mark stamped inside. You must look for this trade-mark.

Consult the jeweler. Write us for booklet.

Pluck and a Stone Fence

WILL LISENBEE

SUMMARY OF CHAPTERS I. AND II.

Zeb Quigley holds a mortgage on Abe Benton's little farm, and as Benton is poor, Zeb thinks the mortgage will not be paid and he will be able to get the farm by foreclosing the mortgage and buying it in. There is \$400 principal and interest due, and Abe doesn't know how he is going to raise the money. The Benton family consists of four persons, the parents and two children; of the latter, Tom, is a lad of seventeen. One day Zeb demands his money. That same day, while Tom is repairing a stone fence on the farm, Paul Quigley, Zeb's son, taunts Tom with reference to his poverty, and, goaded to anger by Paul's manner and words, Tom resents it, whereupon Paul strikes him with a riding whip that he is carrying. Paul's father comes along just in time to save Paul from a thrashing. The man would have dealt roughly with Tom had not Nathan Kirby, a neighbor, happened along in time to rescue him. Tom has been collecting some lump of lead ore that were scattered about over the farm, and now makes up his mind to take it to town and sell it for what he can get in order to help his father pay the money due on the place. He receives \$40.96 for the ore. At the postoffice the day he sells the ore he receives a letter addressed to A. Benton, Esq., postmarked St. Louis. With this letter and the money he received for his lead ore he starts on his return home. He wonders whom the letter is from, and finally makes up his mind that it is from a man who had been at the Benton house some weeks before inquiring about the farm. When on the road home Tom is accosted by a rough looking fellow who asks for a ride. Tom tells him to get in, and together they ride for some distance. Finally, at a point where the road runs through the woods, the stranger suddenly turns on Tom, grabs him by the shoulder and orders him to give him the money that he has in his pocket.

CHAPTER III.

THE MYSTERIOUS LETTER.

It would not be the truth to say that the sudden action of the stranger was anticipated by Tom Benton, yet the event was not wholly unexpected.

"Give me that money," repeated the stranger, tightening his hold on our hero's shoulder. As he spoke he ran his hand down into the boy's coat pocket and drew forth the roll of bills, and also the letter which Tom had just taken from the office at Joplin.

Both had risen and were now standing facing each other. The lines had dropped from Tom's hands and the team was going at a slow walk. Up to this moment the youth had remained perfectly passive, not offering the slightest resistance, but now as he fully realized his situation and knew that he was about to be deprived of the money which had cost him so much labor, and the loss of which would entail such disaster to his plans and expectations, a daring and desperate resolve took possession of him.

Scarcely had the robber taken the bills and letter from the youth's pocket, when, with a quick movement, Tom snatched them from his hand, and at the same moment leaped forward, throwing his whole weight against the robber, and forcing him backward over the side of the wagon.

So sudden and unexpected was the attack that the robber was taken completely off his guard, and before he could recover himself he was forced backward to the side of the wagon, where he lost his balance and fell with a crash into a thicket of brush that skirted the road.

Without waiting an instant, Tom leaped to the ground on the opposite side of the wagon, and darting into the brush, ran with all his speed down a narrow ravine. Scarcely had he gained the cover of the brush when he heard a bitter imprecation escape the outlaw's lips; then the crack of a pistol broke the stillness, and a bullet whizzed through the underbrush, passing within a foot of the youth's head.

Tom recognized his peril, and knew that should he be overtaken by the miscreant his life would doubtless pay the forfeit, and he strained every nerve to put as much distance between himself and his pursuer as possible before the latter could recover from the shock of being thrown from the wagon.

Tom was a swift runner, and before the robber could disengage himself from the tangled thicket into which he had been precipitated, the youth had penetrated so deeply into the woods that there was little chance of his being overtaken.

But not wishing to take any chances of again falling into the hands of the now desperate outlaw, Tom continued his rapid pace for a full quarter of an hour before venturing to slacken his speed. Then almost exhausted with his long race, he paused and listened intently; but hearing no sound of his pursuer, he continued his flight at a more leisurely pace.

After traveling a half mile farther, he changed his course and proceeded in the direction of his home, which he knew to be not more than a mile away. Presently he arrived at the edge of his father's farm, and taking a new cut across the field he soon reached home, where he found his parents greatly troubled over his absence, for the team had just arrived with the empty wagon, causing the gravest apprehension for his safety.

Briefly Tom related the facts regarding his adventure with, and narrow escape from the robber.

"It was a lucky stroke," he concluded, "that I happened to think of pushing him backward out of the wagon, for I would not only have lost the money, but might

have been used very roughly by the robber."

"Do you think he'll follow you here?" asked Mrs. Benton in great alarm.

"It won't be well for him if he does," responded Tom, taking a rifle from the corner of the room. "But I don't think he'll venture near the house."

"I reckon it won't be amiss to be ready fer him if he shows his head about hyar," remarked Mr. Benton, taking a heavy army pistol from its holster on the wall at the head of his bed, and examining its loadings.

Tom now walked to the door, gun in hand, and made a scrutiny of the surroundings, but could see nothing of the stranger. Then, closing the door and bolting it, he seated himself at the table where his supper had been placed to await his coming.

While Beesie was pouring out the steaming coffee he said:

"I have a surprise for you. The mineral brought forty dollars, and I suppose Mr. Quigley will be astonished when he finds we can pay the interest."

"Forty dollars!" cried Mrs. Benton in amazement. "You don't say so! Why that's more'n enough to pay the interest on the mortgage. I don't know what'd become of us if it warn't fer you, Tom," and she laid her hand fondly on her son's shoulder.

"I'm afraid you give me credit for much more than I really deserve, mother," replied the lad with a smile. But I forgot

"That's jist what I couldn't make out," replied Mr. Benton. "I can't imagine who'd be writin' ter me from St. Louis, but it must be some one that knows the place, for he speaks of the old stone fence."

"It beats all," declared Mrs. Benton, a puzzled look coming over her face.

"May be it is from the stranger who was here a few weeks ago," suggested Tom.

"Mebby it is," said Mr. Benton. "He acted kinder strange like."

"He did indeed!" affirmed Mrs. Benton. "Went off without saying a word."

"Somethin' wrong with him somewhar," observed Mr. Benton. "Wouldn't surprise me much if he was crazy as a muskrat fore this."

"I don't think so," replied Tom. "Listen to this," and he read aloud the strange words on the fragment of the letter:

"Place—it is—a treasure—in the red stone fence—it you will find—not fail to.—A friend."

"He's plumb crazy," affirmed Mr. Benton. "But maybe there is a treasure hidden on our place, and he wants to tell us where to find it," said Tom, his heart bounding at the very thought.

Mr. Benton shook his head.

"The letter says, 'in the red stone fence,'" Tom continued, "and I'm going to search through it tomorrow. Who knows but what the stranger might have hidden a lot of money in the old fence, and now wants us to get it? There has been such things—I have read of them—"

log stable where they were soon unbarred and provided with a substantial feed of corn and prairie hay.

It was a long time after Tom went to bed before he closed his eyes in sleep. When at last he did fall into slumber it was only to dream of struggles with unknown robbers, and of the finding of the mysterious treasure in the red stone fence.

CHAPTER IV.

A FRUITLESS SEARCH.

As soon as Tom had finished eating his breakfast on the following morning, he said:

"Father, I suppose I had better go over and pay Mr. Quigley the interest on the mortgage, hadn't I?"

"Yes," responded Mr. Benton. "I told him I'd send ye over this mornin', but I reckon he'll be kinder surprised when he finds ye've brought the money."

"I only wish I had enough to pay off the principal," answered Tom.

"Maybe somethin' 'll turn up to help us out," observed Mrs. Benton, hopefully. "They say its allus the darkest just before day."

While Tom was saddling one of the mules to ride over to the Quigley farm, his thoughts were busy with the events of the past day.

What was the meaning of the mysterious letter? Who had written it? And was there really a treasure hidden in the red stone fence? These and similar thoughts

The robber was taken completely off his guard.

to mention that there is a letter for father," he continued, drawing the missive and roll of bills from his pocket where he had hurriedly thrust them on escaping from the robber.

"Why the letter has been torn in two," he exclaimed in surprise. "I must have done it when I snatched it from the robber's hand. Luckily none of the bills are torn though."

Beesie carried the torn letter to her father, who unfolded it and began to try to decipher it.

"It's torn right through the middle," he said, "an' I can't make heads nor tails out of it unless I had the other half."

"That must be in the possession of the robber," said Tom. "But the letter is from St. Louis. Do you know any one in that place, father?"

"Not that I can think of. I can't make nothin' out of this, see if you can, Tom."

Tom took the fragment of the letter and spread it out upon the table and this is what he saw:

"Why, it says something about a treasure!" exclaimed Tom in an excited voice, as he finished reading the mysterious words. "What can it mean, father?"

"Yes, but they're only in books," remarked Mr. Benton.

"It would be strange if there was somethin' in it after all," observed Mrs. Benton. "If there ain't I can't see what he'd be writin' this letter for. It's the oddest thing I ever heard of. It wouldn't do no harm to search about the stone fence an' see if there's anything there."

"I'm going to do so tomorrow," replied Tom. "Then there's the other part of the letter. It may be that the robber threw it down somewhere when he saw what it was, and I'm going to see if I can find it some time tomorrow."

With this Tom fell to work and dispatched his supper which had been neglected owing to the discussion over the mysterious letter.

When he had finished eating, he went out to take care of the team that still stood hitched to the wagon near the cabin. Fearing that the robber might be lurking about the place, he took the rifle with him. The moon had now risen, rendering every object about the place visible. Glancing cautiously about the premises, and failing to discover any sign of the scoundrel, he unhitched the mules and led them into the

passed rapidly through his mind, throwing him into a state of feverish excitement and eager anticipation.

He was fully resolved to search the stone fence for the treasure as soon as he should return from Quigley's, and whatever might be the result of his labors, he felt that there was something in the stranger's letter that would be of value to them could its meaning be known.

"Better go by an' see the constable, an' tell him of the robber," said Mr. Benton as Tom rode away. "He might be hangin' about the neighborhood, an' it's a good idea ter have people on their guard."

After notifying the officer of the attempted robbery, Tom proceeded directly to the Quigley farm house, where he found Mr. Quigley seated in the back parlor which he had furnished to serve as an office. He was busily engaged in looking over some papers as Tom was ushered into his presence. It was some moments before he deigned to notice the youth; then turning about and facing the visitor he said:

"I suppose you have come to tell me that your father can't pay the interest. It is no more than I expected, but I must tell you that it is impossible for me to be

lenient with all who are in pressed circumstances.

"I have come to pay you the money," replied Tom, briefly, producing a roll of bills and laying them on the desk in front of Mr. Quigley. "Please give me a receipt."

"What! you have got the money then? Your father was not as hard up as he led me to believe. He told me he hadn't a cent."

"This money is some I had out of my own savings," replied Tom, "and father knew nothing about it."

"Oh, you are certainly an exceptional son," observed Quigley with a sneer. "Perhaps you will be able to pay the principal also."

"I hope so," said Tom, quietly. Mr. Quigley then took up the bills and counted them over, eyeing each one critically as he did so.

"You may tell your father that I shall soon call on him for the principal," he remarked, as he placed the money in his pocket book.

"Very well," responded Tom. "I was just thinking," went on Quigley, in a diplomatic tone, "that I couldn't see how your father could possibly meet the payment as soon as I shall expect it, and although the place is a poor one and would be of little use to me, I might be induced to purchase it at a reasonable figure—simply to help a neighbor out of a little financial difficulty."

"I'm quite sure father doesn't want to sell the place," replied Tom. "But he may be compelled to."

"Certainly, but he will not sell it if he can avoid it."

"Of course it is of no interest to me one way or the other. I only mention the matter so that if he should be disappointed in raising the necessary funds to cancel the mortgage, he may know where to find a purchaser—though I should prefer not to invest in any more land at present, unless it was in a case like this."

Tom readily perceived that the man's fair speech was only employed to deceive him, and cover up his evil and mercenary plans with a small show of generosity. But not wishing to give him the slightest cause to believe that his motives were suspected, Tom merely replied that he would speak to his father about the matter, and then took his leave.

"The first thing to do, now," thought the youth, as he rode down the hill from the Quigley farm house, "is to visit the place where I had the tussle with the robber and see if I can find the missing half of the letter."

In spite of the assertions of his father and mother to the contrary, Tom still adhered to the opinion that the strange letter contained information of vital importance, and he was resolved not to rest till he had solved the mystery that surrounded it.

In case he could not find the other part of the letter, it was his intention to return and prosecute a vigorous search for the hidden treasure in the stone fence.

On reaching the spot where the unknown outlaw had made the attempt to rob him, Tom dismounted, and fastening his mule to a tree by the road side, began his search. He soon found the patch of brush into which the rogue had fallen when pushed from the wagon, but no trace of the

missing paper could be discovered. After searching up and down the road and through the neighboring thicket for over an hour he gave it up, and returned to where he had left his mule hitched, and mounting, rode toward home.

"I suppose the robber carried the paper away with him," he mused as he rode along the shady road, "and it is very doubtful if we ever find it."

His reverie was interrupted by the sound of horse's feet behind him, and glancing backward, he beheld Paul Quigley coming down the road, mounted upon his dapple gray pony.

On recognizing Tom, Paul spurred his pony forward into a gallop, and passed without appearing to notice him. When he was a few paces ahead, he drew rein, and allowed his animal to proceed at a walk. Then turning in his saddle he said:

"Hello, there! Where did you get that fine race horse?" and he cast a glance of contempt at the shabby mule Tom was riding.

"That's one I had left me," replied Tom in a careless tone.

On reaching home, Tom found his father sitting by the open door, enjoying the fragrant air that came from across the field.

"I reckon I'll soon be about agin," he said, "but one of my legs is pretty stiff yet. Did ye pay Quigley the money?"

"Yes," answered Tom, "and he seemed greatly surprised. He said to tell you he would soon call on you for the principal and if you couldn't raise the money he might buy the place of you."

"I know'd that was what he was after," declared Mr. Benton. "He thinks he can git the place for a song by pushing us—the mean old miser!"

"It looks as if we might haf ter sell it after all," continued Mr. Benton dejectedly. "I might git the money somewhar if I could git around, but thar ain't many people that's got money ter loan on a second mortgage. I'll try ter git over an' see Kirby in a few days if I can, an' mebbly I'll succeed in borrowin' the money of him er some one in the neighborhood."

"I don't want to sell the place," said Mrs. Benton. "We orter manage it somehow."

"I'll do the best I can," replied Mr. Benton.

"If we could only find the treasure the letter speaks of," ventured Tom, "we would then be independent of Quigley."

"But I'll never be found," remarked his father. "Did you look for the other piece of the letter, Tom?"

"Yes, father, but I couldn't find it. I suppose it was carried away by the robber, though it seems he would have thrown it away as soon as he discovered it was only a piece of worthless paper."

As soon as Tom had put the mule in the stable, he crossed the field to the stone fence, and began a careful hunt for the hidden treasure, but all his labor proved fruitless, and it was almost noon when he relinquished the search.

"If I only had the other part of the letter," he mused as he walked home; "I'm sure I could find the treasure."

But little did he dream that the identical piece of letter for which he had searched, and which was to play such an important part in our story, had been picked up by Paul Quigley early that morning in the road where the robber had dropped it, and was at that very moment in the hands of Zeb Quigley, who was examining it, a look of greedy triumph on his evil countenance.

(To be continued.)

AND THIS IS WHAT HE SAW.

"It's a pity to ride an animal at such a breakneck speed."

"Is it?"

"Yes; you ought to treat him better."

"Is he any relation of yours?"

An angry flush swept over Paul's face.

"What do you mean?"

"You heard what I said."

"You have got to apologize for that insult," cried Paul in rage.

Tom seemed to reflect a moment.

"Perhaps I was too hasty," he said, after a pause.

"You will apologize, then?"

"Yes—to the mule."

Paul grew purple with anger.

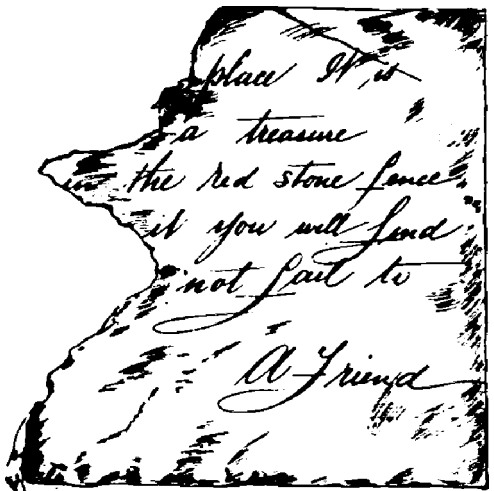

"I have a mind to lay your back open with this whip!" he cried, with a savage gesture.

"You had the same mind yesterday," observed Tom.

"Yes, and I would have given you a sound thrashing if father had not interfered."

Tom smiled.

"It's a pity that he stopped you," he

"You had the same mind yesterday," observed Tom.

"Yes, and I would have given you a sound thrashing if father had not interfered."

Tom smiled.

"It's a pity that he stopped you," he

remarked, with exasperating coolness; "but it's fortunate that he isn't present on this occasion."

"You had better not tempt me to strike you again," cried Paul, with a blustering air. "You will be sorry if you do!"

"It's kind of you to give me advice. You are more generous than I supposed."

Paul bit his lip with anger and chagrin. He saw that he was no match for Tom—either in a war of words or a physical encounter, and the thought nettled him more than he would have cared to own.

"I wouldn't degrade myself by fighting with a beggar!" he cried, seeing no other loophole through which he could escape.

"Nor with anyone else—except with your mouth," responded Tom.

"I'll get even with you for your insolence, see if I don't," exclaimed Paul, and putting his pony into a gallop, he soon disappeared around a turn in the road.

On reaching home, Tom found his father sitting by the open door, enjoying the fragrant air that came from across the field.

"I reckon I'll soon be about agin," he said, "but one of my legs is pretty stiff yet. Did ye pay Quigley the money?"

consonant that has neither hook, circle, nor loop—is halved for either *t* or *d*, the vowels are written and read exactly as though the letter were a full-sized one: thus, *\ ap, \ pat, \ apt;*

\ pet; in other words, there are first, second, and third vowel places in half-length, as well as in full-length consonants.

Where a half-length consonant precedes or follows a full-length consonant, the vowels are reckoned as though both were of full size.

A half-sized letter with an initial hook is vocalized the same as a full-sized letter with an initial hook: as *\ pray, \ praye.*

A half-sized consonant with initial circle *s* or *st* loop is vocalized the same as a corresponding full-sized consonant: thus, *\ pot, \ spot* (read thus: 1, initial circle *s*; 2, consonant *t*; 3, the vowel; and 4, the added *t*).

These regulations apply, of course, equally to halved consonants with final hooks, circles, or loop: thus, *\ pain, \ paine.*

ISAAC PITMAN. (The Inventor of Phonography.)

LESSON VII.—THE HALVING PRINCIPLE—Cont'd.

As a thorough knowledge of the alphabet is essential to the student, the same should be written out from twenty-five to fifty times every day until the student is perfectly familiar with the various signs.

The four heavy letters *sp, sh, lr, rr*, do not admit of being halved for the addition of *t* or *d*, because they would clash respectively with half-sized *m, n, l, r*, as seen in *\ pomade, \ in-*

lend, \ failed.

The rule we have given for the halving of thin consonants to express *t*, and thick ones to express *d*, only applies when the letter is written by itself. When, however, a word consists of more than one syllable, or is only one syllable, but contains a final hook, or circle added to final hook, then either *t* or *d* is expressed by halving it; thus, *\ repeat, \ repeated.*

A full-sized consonant may either precede or follow a half-sized one when it prevents no difficulty in joining: thus,

\ timed, \ wadam; or a halved consonant may occur medially, as *\ military.*

The past tense of a verb ending in *t* or *d* is written thus: *\ part, \ parted.*

The pupil should study attentively the order shown in the "Teacher," page 33, which is to be uniformly observed in the consonantal elements of all words in which the halving principle is applied.

The way to master this arrangement is to go through Exercises 53 and 54 of the "Teacher," and reduce each phonographic sign to its consonantal elements as above shown.

No doubt you will find some difficulty at first in understanding and applying the halving principle and vocalising correctly; but a careful attention to the order of the consonants will guide you as to the vowels. It may, however, be of further assistance to you to consider the following rules:

Where a single consonant—that is, a

Government of cities change on such questions as licenses, popularity of candidates. Should management of great enterprises change with the wind? Millions of money must be invested in developing franchises. But if cost of service to the public is too great regulate it by law. If groceries are too high, must cities go into the grocery business? Enormous debts would be incurred. City ownership would be fraught with great dangers.

REFERENCES.

Read on both sides of the subject, for in so doing you may anticipate the argument of your opponent and be prepared to meet it. It is said that Webster used to prepare the strongest possible argument on the other side before constructing his own argument. Recent magazine articles on city ownership: ARENA, 25:560, 26:99, 27:659, 27:379, 23:432; CHAUT., 23:447; ENGIN., M., 5:725, 9:41; FORUM, 52:219; INDEPENDENT, 52:2065, 2633; NATION, 56:449, 65:26, 75:25; OBITUARY, 59:76, 70:736; WORLD'S WORK, 4:2260.

IS IT NECESSARY TO READ?

Reading is of great importance in securing readiness in debate. One must have a reserve upon which to draw. Moreover, one is unconsciously influenced by the style of the authors read, and he will find he can make a point with greater clearness or force, after reading authors of the best style.

There are between two and three million books in print. But do not be discouraged; it is not desirable to read them all. There is, however, a reason why this department should furnish something about books and reading, and give some lists of books worth reading. Here are a few of the old standbys, which are both interesting and entertaining. Have you read them? THE ARABIAN NIGHTS, ROBINSON CRUSOE, TWO YEARS BEFORE THE MAST, THE LAST OF THE BARONS, A TALE OF TWO CITIES, THE MAN WITHOUT A COUNTRY, WESTWARD HO, THE JUNGLE BOOKS, ROBIN HOOD, IVANHOE, KENILWORTH, KIDNAPPED, TREASURE ISLAND, GULLIVER'S TRAVELS, HENRY ESMOND.

A boy cannot know what book will be most valuable for him to read. He may be sure it will be best to read something. We will try to help him by giving not only references to books upon the subjects for debates, but by talking about the books which a boy ought to read for his own pleasure and profit, books which will keep up the reserve for the emergencies of life. And you can read a great deal if you try. An hour a day, about twenty pages, or twenty five volumes of about three hundred pages each.

SOME QUESTIONS FOR DEBATE.

Resolved, That strikes do more harm than good. That there should be an educational qualification for voting. That United States Senators should be elected by popular vote. That more evil than good results from giving prizes. That athletic training should be compulsory in schools. That it is desirable to have a curfew law. That women should receive the same wages as men for the same work. That capital punishment is justifiable. That a system of compulsory education is advisable. That the national government should own and operate the coal mines. That colored people should not be appointed to office in the South.

THE WRECK OF THE MAINE.

By Robert G. Cousins, member of Congress from Iowa since 1893. Born in Iowa, 1859.

The destruction of the MAINE in the harbor of Havana, Cuba, March 15, 1898, did more than any one thing to precipitate the war with Spain. The following extract is from a speech delivered in the House of Representatives March 21, 1898, upon the bill for the relief of the sufferers by the destruction of the MAINE:

The measure now proposed is most appropriate and just, but hardly is it mentionable in contemplation of the great calamity to which it appertains. It will be merely an incidental, legislative footnote to a page of history that will be open to the eyes of the Republic and of the world for all time to come. No human speech can add anything to the silent gratitude, the speechless reverence already given by a great and grateful nation to its dead defenders and to their living kin. No act of Congress providing for their needs can make a restitution for their sacrifices. Human nature does, in human ways, its best, and still feels deep in debt.

Expressions of condolence have come from every country and from every clime, and every nerve of steel and ocean-cable has carried on electric breath the sweetest, tenderest words of sympathy for that gallant crew who manned the MAINE. But no human recompense can reach them. Humanity and time remain their everlasting debtors.

It was a brave, and strong, and splendid crew. They were a part of the blood, and bone, and sinew of our land. Two were from my native State of Iowa. Some were only recently at the Naval Academy, where they had so often heard the morning and the evening salutation to the flag, that flag which had been interwoven with the dearest memories of their lives and which had colored all their friendships with the lasting blue of true fidelity. But whether they came from naval school or civil life, from one State or from another, they called each other comrade—that gem of human language which sometimes means but little less than love and a little more

than friendship—that gentle salutation of the human heart that speaks in all the languages of man, that winds, and turns, and runs through all the joys and sorrows of the human race—through deed, and thought, and dream, through song, and toil, and battlefield.

No foe had ever challenged them. The world can never know how brave they were. They never knew defeat; they never shall. While at their posts of duty, sleep lured them into the abyss, then death unlocked their slumbering eyes for but an instant, to behold its dreadful carnival. Most of them, just when life was full of hope and all its tides were at their highest, grandest flow—just when the early sunbeams were falling on the steep of fame and flooding all life's landscape, far out into the dreamy, distant horizon—just at that age when all the nymphs were making diadems and garlands, weaving laurel-wreaths before the eyes of young and eager nature—just then, when death seemed most unnatural.

Hovering above the dark waters of that mysterious harbor of Havana the black-winged vulture watches for the belated dead—while over it and over all there is the eagle's piercing eyes, sternly watching for the truth. Whether the appropriation carried by this resolution shall be ultimately charged to fate or to some foe shall soon appear. Meanwhile, a patient and a patriotic people, enlightened by the lessons of our history, remembering the woes of war, both to the vanquished and victorious, are ready for the truth and ready for their duty.

"The tumult and the shouting dies—
The Captains and the Kings depart—
Still stands thine ancient sacrifice,
An humble and a contrite heart
Lord God of Hosts, be with us yet,
Lest we forget—lest we forget."

ASTHMA Taken from the system. Nothing remains which can produce an attack. You can eat, sleep and stand exposure without slightest return of symptoms. Appetite improved; blood enriched; nerves strengthened; whole system built up; life made enjoyable. Book \$0.4 Free, containing reports of many interesting cases. DR. HAYEN, Buffalo, N. Y.

Huffman's Neck Shaving Shield
Shave from lower edge downward. Perfect results. Price 25c., silver or stamped. Price refunded if not entirely satisfactory. AGENTS WANTED.
F. R. HUFFMAN MFG. CO., Penn. Ill.

THE BULL'S EYE EVERY TIME

Every healthy, vigorous Young American wants a gun. It tends to make him independent, courageous and manly. Get him a DAISY or SENTINEL Air Rifle and he can have all the fun without the danger that usually goes with a gun. Simply a choice between the two, as either style represents the best skilled labor and accurate machinery can produce. Our rifles have walnut stocks, handsome nickled steel barrels, improved sights and interchangeable parts. If your dealer will not sell you a DAISY or SENTINEL, send us his name and we will send any style from factory, charges prepaid, upon receipt of price.

No. 1—Daisy Repeater, shoots BB shot 48 times, \$1.25
No. 2—20th Century Daisy, shoots either shot or darts 1.00
No. 4—Sentinel Single Shot, either shot or darts, 1.00
No. 5—Sentinel Repeater; automatic, 303 shot, 1.25
Darts, assorted colors, per dozen, prepaid, 35 cts.

Daisy Rifles and Illustrated Booklet free.
THE DAISY MFG. CO., Plymouth, Mich., U. S. A.

Reliable Watch
GIVEN

Send your name and address for 20 pieces of our Jeweled Novelties to sell for 10c. each. When sold, send us the \$2, and we will send you a fine gold laid, stem wind and set, FULLY GUARANTEED American Watch. We also enable you to make liberal cash profits without expense to you. H. G. F. I. W. JEWELRY CO., Attleboro, Mass.

Mention The American Boy when writing to advertisers.

If the boys interested in this page will write to the editor, giving their wishes, suggestions, questions, he will try to meet their needs as fully as his space and the general plan of the Department will allow.

This department will give, from month to month, outlines of debates, lists of live questions with suggestions for preparing debates, selections from famous orations for prize-speaking contests, notes on boys' books, and such other matter as shall prove most helpful in leading our readers to think and act along the lines which lead to vigorous, aggressive American citizenship.

SUBJECT FOR DEBATE.

Resolved, THAT CITIES SHOULD OWN ALL THEIR PUBLIC FRANCHISES.

Chief among franchises not wholly or even generally under public ownership are those for supplying water, gas, and electric light, and street railroads. In the outlines following, little attention is paid to arrangement. The debaters should divide the points and arrange with some plan of grouping subordinate parts under the main proposition to which they naturally belong, adding others which may be suggested by thinking or by the reading of the articles referred to below. Each point should be developed and illustrated and always the main object to be accomplished should be kept in mind to give unity and value to the argument.

OUTLINES.

AFFIRMATIVE.

It has been successfully tried.
High taxes are reduced.
Good government promoted.
The "danger point" in government is in cities.
"Ring" and "lobby" have to do with franchises in which are vast fortunes.
Millions distributed among the people would increase intelligence, decrease crime.
Cities care successfully for streets, sewerage, bridges, schools, involving vast expenditures, without scandals.
Why give away franchises which would still yield large returns to the people, with less cost for services?
Cost of administration would be less.
No watered stock or expensive salaries.
No "lobby" expenses or loss from strikes.
Illustrate cost of strikes in money and suffering.
Civic patriotism promoted.
Better paid labor, decreased cost for services, wealth accumulates among the people, not in the hands of monopolists.
Surer basis for continued "good times."
The aim of private ownership is profit.
The aim of city ownership is greatest efficiency at smallest cost.
See CENTURY, 31:71, for experience of Birmingham, Eng., in reducing cost of gas.
Wheeling, W. Va., reduced gas from \$2.50 to 75 cents, paid cost of plant from profits, and yields a revenue to the city.
Study Manchester, Glasgow, Belfast.

Electric Lights.	City.	Private.
Essex, Mass.	\$73	\$185
Elgin, Ill.	85	123
Detroit, Mich.	73	132
Bangor, Maine	48	150
Topeka, Kan.	60	...
Fort Wayne, Kan., similar service	...	120
Little Rock, Ark.	51	...
New Bedford, Mass., similar service	...	138

See ARENA, Feb., 1903.

NEGATIVE.

Cities are our "danger points" in government. But franchises are less harmful than contracts and "jobs."
The city "boss" wants city ownership.
Remember "out of the frying pan; into the fire."
Honest officers the best remedy for city evils.
Study of Manchester and Belfast and Glasgow of little value for New York, Boston and Chicago.
The "ring" thrives in our cities.
City ownership would add to power of "ring rule."
Cost of enterprises increased.
For cities do not practice economy.
Business poorly managed.
For change of parties means change of management.
"To the victors belong the spoils."
Private enterprises are managed more successfully.
High salaries are the result of great abilities.
Greater economy in the high salary of the skilled manager than in the smaller salary of the manager with a "pull."
Compulsory arbitration is in the near future.
Cost of service should be regulated by law.
Cities can regulate without ownership.
Control less radical than ownership.
Without prospect of gain there would be no enterprise.
Franchises become valuable only after years of careful management.
Private enterprises succeed through failures.
Cities cannot, for parties change.

The Wanamaker Store

Boys' Spring Clothing at Truly Remarkable Prices

Just three things to say about these offerings of Wanamaker Boys' Clothing—that are worth any amount of hazy generalities:—

All-Wool Materials Silk Sewed Throughout Taped Seams

Add to them the style, cut and general good looks and capacity for wear that distinguish our clothing—then try to match them at these extraordinary low prices:—

Boys' Sailor Suits at \$3.50

Of blue all-wool serge, handsomely trimmed with narrow white, red or black soutache braid; excellently finished. Sizes 3 to 12 years.

Boys' Reefers at \$3.50

Reefers of blue serge—jaunty, well-made overcoats in Spring weights. Sizes 3 to 12 years.

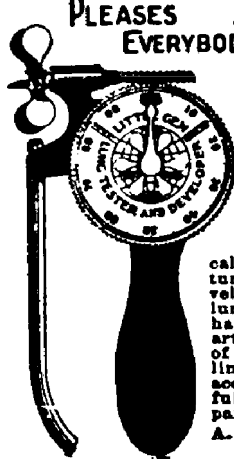

Boys' Double-Breasted Suits at \$3.75

Of plain blue or fancy all-wool chevots, the latter in attractive Spring patterns. Extra trousers. Suits your boys will be proud to wear. Sizes 8 to 16 years.

At the very lowest calculations these suits and overcoats are each worth a dollar more than their present prices.

John Wanamaker, New York.

PLEASES EVERYBODY NO EXCUSE

IF it don't please you, THE LITTLE GEM LUNG TESTER AND DEVELOPER, amusing and beneficial to old and young, induces you to inhale fully and deeply. Its continued use will do more to prevent consumption than tons of medicaments. Has the warmest endorsement of the Medical Fraternity and Health Cultivators. As a means of developing and strengthening the lungs, it has no equal. It is a handsome and well finished article of merit. The amount of fun to be had with it is unlimited. Warranted absolutely accurate. Special price with full directions and chart. Prepaid 20c. Don't Miss This. A. CHAPMAN MFG. CO., Little Falls, N. Y.

EARN 250-SHOT Air Rifle

BOYS we will give you this fine rifle—which shoots 250 times with one loading—absolutely without a cent of cost to you if you will sell 25 packages of Dr. Hall's medicated corn plaster or other novelties at 10 cents a package, outfit free. The rifle is the finest you ever saw and the work the easiest you ever did. Other fine premiums on same plan. Write for free outfit and catalog. **GIRLS TOO** can earn equally fine premiums for similar work. **TWO HOURS' WORK** will get you your premium. Try it! It's easy and costs you nothing. Write at once and we will send free outfit and catalog. WILLIFTON MERCANTILE CO., 240 Fullerton Ave., Chicago, Ill.

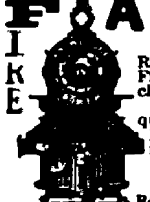

WEST POINT ANnapolis START TO-DAY NOT TOMORROW

Any boy, almost, can go. Every boy between ten and twenty should try. Do you know that Congress is about to double the number of midshipmen at Annapolis? Are you ambitious? Send fifteen cents for our letter about West Point or Annapolis. Twenty-five cents for both letters. Written by one who knows. Money back if you ask it. **THIS IS YOUR CHANCE.** LITTLE LEADERS COMPANY, 140 Nassau Street, N. Y.

ADD'ET THE SELF EDUCATOR.

A new and fascinating mechanical instructor. Five minutes practice each day gives great mental skill in figuring, making one who is slow, quick; and one who is quick, still quicker. Made of celluloid. Pocket size, 25 cts., by mail. Or for a club of six we will present one as a prize. **FRANK W. DAVENPORT,** Manufacturer, Box 455, Dept. K, Providence, R. I.

THE A LOCOMOTIVE

Through Home Instruction. Small Charge—Easy Terms. Railroads need thousands of instructed firemen annually. **GOOD PAY** and chance to become an Engineer. Help to employment on proper qualification. PARTICULARS FREE. **ENROLL NOW** for the great Winter increase of force on all railroads. The Railway Educational Association, Station A L, Brooklyn, N. Y. Reference as to Reliability, Bedford Bank.

ELECTRICAL ENGINEERING TAUGHT BY MAIL

Write for our Free Illustrated Book. "Can I become an Electrical Engineer?" The electrical field offers the greatest opportunities for advancement. We teach Electrical Engineering, Electric Lighting, Electric Railways, Mechanical Engineering, Steam Engineering, Mechanical Drawing, at your home by mail. Institute endorsed by Thos. A. Edison and others. Electrical Engineer Institute, Dept. 24, 222 W. 22d St., New York

TELEGRAPHY

YOUNG MEN wanted to learn Telegraphy and Railway Accounting and prepare themselves for the Railway Telegraph Service. Write for free catalog. The Railway Telegraph Institute, Oshkosh, Wisconsin.

The "Monarch" is the only Automatic

FISHHOOK that cannot be sprung by weeds or in casting. Holds the fish tighter the more he pulls; fish are caught by touching the bait. Small size, 10c; large, 15c. Complete set of 6 hooks, 50c. Agents wanted. A. R. Deering & Co., 177 Starvesant Av., Brooklyn, N. Y.

LEARN PROOFREADING.

If you possess a fair education, why not utilize it as a graceful and unobtrusive profession paying \$15 to \$25 weekly? Situations always obtainable. We are the original instructors by mail. **HOME CORRESPONDENCE SCHOOL, Philadelphia**

BOYS IN THE HOME CHURCH AND SCHOOL

The Ruling Passion.

"Goodness, Henry! How queer baby looks! I think he is going to have a fit." "By George! I believe you are right. Where is my camera?"—Exchange.

What He Would Have Asked For.

A teacher in the juvenile department of a Sunday school in Rockland, Mass., inquired of his class: "What did the lame man ask Peter and John for?" "Alms," promptly answered one of the lads; whereupon another boy thoughtfully followed with: "If I had been in his place, I should have asked for legs."

Another Author.

Teacher—I am sorry to say it, Henry, but your composition is not worthy of you. The rhetoric is faulty, the logic weak, the statements are based upon misinformation, and the style is lamentably crude. Henry—My! won't dad be mad when I tell him that? Teacher—But you can tell him you did your very best. Henry—Did my best—nothing! Dad wrote the whole of it himself.

Shocking.

Fing Ling, one of his brethren visiting the United States, writes home to the Pekin Pelican thus about us: "They live months without eating a mouthful of rice; they eat bullocks and sheep in enormous quantities; they have to bathe frequently; they eat meat with knives and prongs; they never enjoy themselves by sitting quietly on their ancestors' graves, but jump around and kick balls as if paid to do it, and they have no dignity, for they may be found walking with women."

"The American Boy" in the Schools.

A friend of THE AMERICAN BOY in South Tacoma, Wash., tells of a Washington teacher who subscribes for THE AMERICAN BOY in order to use it in her school. She used the front cover picture of the May number for a language lesson in the fourth grade. The picture, you remember, represented a boy sitting on the ground, having fallen from a bicycle. The essays have all been sent to the editor of THE AMERICAN BOY, with the request that he read them and pass upon their merits. The best composition is that of Willie Blackhurst, and the best handwriting that of Linnie Johnston.

"Class Boy" and "Cup Boy."

A boy wants to know what is meant by the terms "Class Boy of Yale, '85," and "Cup Boy of '85, Wolf's Head, Yale," as used in the item regarding Carlton Way on page 66 of our December number. It has been customary for a great many years for the first-born son of any member of a class in Yale University to receive a silver cup from the class at their first triennial gathering. If the boy is born by that time, or at the second triennial, if born between the first and the second. The Wolf's Head is the name of a society of the senior class at Yale. This society also gives a cup to the first boy born to a member of the graduating class each year. This is how Carlton Way is both Class Cup Boy and Wolf's Head Cup Boy of Yale, '85.

"Stick to Your Bush."

One day many years since it was reported among the schoolboys of a certain Massachusetts town that blackberries were ripe and very plentiful on a near-by vacant farm. When Saturday came, therefore, about a dozen of the boys hastened to the berrying ground with large wooden buckets, determined to fill them to the brim. The report proved true—the bushes were indeed loaded, and the delighted boys immediately commenced to gather the luscious fruit. One of them, however, soon conceived the idea of picking only the largest of the berries, thinking that he could thus fill his pail in much less time than it would take the others to fill theirs. Accordingly, he went here and there among the thorny bushes, selecting only the very largest that he could find. The other boys picked their bushes clean as they went, and in less than two hours' time had their pails full. He who had resolved to outstrip his companions had some fine berries, but he had occupied so much time in rummaging about that the fruit was only about two inches deep in the bottom of his pail. When he saw the full pails of the others he became discouraged and commenced eating his berries. The others soon joined in and helped him, and the result was that he went home with an empty pail. The moral of this anecdote is plain: One should "stick to his bush," or in other words, "let well enough alone."—Charles H. Coe.

Appreciated by Denver Boys.

Judge Ben B. Lindsey, of the Juvenile Court of Denver, writes: "THE AMERICAN BOY is given to our boys now every month, and it is appreciated and read by the boys more than any other paper. It has a good effect and is a great help in our work here."

How "Buffalo Bill" Got His Name.

"Buffalo Bill" tells how he got his name. He says that a firm of contractors for the Kansas Pacific Railroad one time paid him five hundred dollars a month to supply the laborers on the railroad with buffalo meat. In order to do so he was obliged to shoot the buffaloes with the rifle, killing nearly 5,000 in eighteen months. It was at that time that the boys began calling him "Buffalo Bill."

Be On Time.

A conductor's watch is behind time, and a frightful railway accident occurs. A leading firm with enormous assets becomes bankrupt because an agent is tardy in transmitting available funds, as ordered. An innocent man is hanged because the messenger bearing a reprieve should have arrived five minutes earlier. A man is stopped five minutes to hear a trivial story and misses a train or steamer by one minute.—Pushing to the Front.

American Boys in Porto Rico Learning to "Shine."

The first American troops that landed on the island of Porto Rico were accompanied by a colored bootblack, a boy about twelve years of age, who drove a thriving business shining the shoes of the officers. In less than two months after his arrival he got some very lively competition from the native youngsters, who, watching his movements, straightway provided themselves with boxes, brushes and blacking and learned the word "shine." Today every city and town of Porto Rico is full of little bootblacks. Thus is "American civilization" spreading.

Starting an Autograph Collection.

Leo Dimond, Pontiac, Ill., asks for information as to how to start an autograph collection. Ask for autographs from persons whose autographs you want, and if the request be courteous and accompanied by a stamped, self-addressed return envelope, you will seldom meet with a refusal. Ask your friends and acquaintances for such autographs as they may have and be willing to give you. When great men and women come to your town interview them and ask for their signatures. Buy a little blank book and have the autographs written therein, or paste therein signatures kept from letters or otherwise obtained.

A Word to Parents.

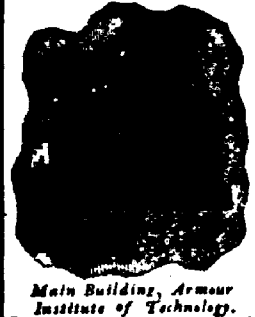

As the boys grow up make companions of them; then they will not seek companionship elsewhere. Allow boys as they grow older to have opinions of their own; make them individuals, not mere echoes. Remember that without physical health mental attainment is well nigh worthless. Let the boys lead free, happy lives, which will strengthen both mind and body. Bear in mind that you are largely responsible for your child's inherited character and have patience with faults and failings. Talk hopefully to your children of life and its possibilities. You have no right to depress them because you have suffered.

Andrew Johnson's Boyhood.

When ten years old, Andrew Johnson, who succeeded Abraham Lincoln as President of the United States, was a ragged street boy in Raleigh, N. C., and had never been to school. Andrew was apprenticed to a tailor and began to learn his trade before he was able to read or write. A benevolent old gentleman in Raleigh used to go about the city reading to the apprentices in the shops, and in the course of time he came upon Andrew. It is supposed that in this way the boy who was to become a president got his first love of reading, for shortly thereafter he began to learn his letters. Ten hours a day he worked at his trade, and the rest of the time, with the exception of a few hours devoted to sleep, he was trying to read. At sixteen he finished his apprenticeship, but he had yet to learn much before he could read well. Then he was fortunate enough to marry a young woman who became his teacher. He opened a tailor shop after he was married and his wife sat with him while he worked and read to him, in the evenings teaching him writing, geography, arithmetic and spelling.

BOYS, BE HONEST.

WHY NOT STUDY ENGINEERING

INSTRUCTION UNDER MEMBERS OF FACULTY OF ARMOUR INSTITUTE OF TECHNOLOGY.

Correspondence Courses in Electrical, Mechanical, Locomotive, Stationary, Marine and Sanitary Engineering, Navigation, Architecture, Mechanical and Perspective Drawing, Sheet Metal Work, Textile Manufacturing. Also 40 Short Special Engineering Courses. In addition to their regular instruction papers, students in full Engineering Courses are furnished a Technical Reference Library (in ten volumes) as a help in their studies. Catalogue upon request. **American School of Correspondence** AT Armour Institute of Technology, CHICAGO, ILLINOIS.

THE DENVER POST NEWSBOYS AT THEIR THANKSGIVING (1902) BANQUET AT THE BROWN PALACE HOTEL.

With the Boys

STUART LAMIE, Newark, N. J., is greatly interested in physical culture and the care of the body in general. He is in the next graduating class in his school and is a strong supporter of THE AMERICAN BOY. He is trying to save up money for an education beyond that given by the common schools.—BYRON GABRIEL, age fourteen, Milford Center, O., has a stamp collection and his brothers have a badge collection. Together they have a collection of relics, and with the last named they have taken first premiums at fairs.—GILES D. RANDALL, Meriden, Conn., age fifteen, is a senior in the Meriden High School and is the youngest boy, with the exception of one, that ever entered a senior class in the High School in Meriden. Last year he took the examination for Yale college and passed with a fine grade.—WILLIAM W. HAVENS, New York city, is a graduate of the largest public grammar school in the world. According to his statement it has 4,000 pupils. On his examination for graduation from the grammar school he took second place, a fraction of a per cent below the first boy. He is now in the first year of the High School, and says that he has never been tardy since he began to go to school.—CURTIS B. KNIGHTEN, Ennis, Tex., secured twenty one subscriptions for THE AMERICAN BOY in one day recently.—ROBERT BROWN, Denniston, New Zealand, via Westport, asks if it would not be possible to open up an exchange column in connection with our stamp page open to subscribers only. Our experience with columns of this character in THE AMERICAN BOY is such that we could not meet the suggestion. It is possible for papers of small circulation to publish exchange columns permitting free interchange of information as to wants, etc.; but with a paper going into 100,000 families and read by upwards of 200,000 boys, we would be deluged with this sort of matter, and the result would be that we would have to disappoint hundreds upon hundreds of our friends by either refusing to print their matter or delaying it so long that the value of the item when printed would be little, if anything. Last year we ran a general exchange column, but we found that we could fill pages every month with such matter and then not keep up with the demand on the part of our correspondents, and rather than disappoint so many hundreds we dropped it.—CLAUDE E. and STANLEY M. CAYOT, Garnet, Kas., have been neither absent nor tardy during the last nine months in school. Claude, when twelve years old, won two county prizes in declamation contests.—STANLEY DUNN, Cowansville, Que., writes of a change of address from Embro, Ont., to Cowansville, Que., and tells of himself and his brother driving the distance from Embro to Cowansville—560 miles—in nine days, with one horse. He says the road was entirely new to them, but they got along fine, the drive being very enjoyable, and very rapid, we should add.—SEYMOUR KRUSE, Marysville, Wash., has had an experience that many boys would like to have. He ran a sawmill engine all summer for his father. Perhaps this wouldn't be particularly enjoyable, but the salmon fishing that Seymour enjoys would not be refused, we imagine, by the average boy. Seymour and his parents removed from Iowa to Washington last spring, and Seymour had a fine ride on the engine over the Rocky Mountains, seeing great sights. One place the train ran over a trestle 225 feet.

The Cincinnati Refuge Home sent us a very daintily gotten up Christmas pro-

gram showing how the boys of that large institution celebrated the great day. The program included music by the Refuge Home band, songs and recitations by the boys, tableaux, and a cantata in which girls took part, as well as Santa Claus himself. The boys of the Home enjoyed a turkey dinner at noon on Christmas day, after the distribution of Christmas presents and goodies by Santa Claus. The entire afternoon was given over to the boys and girls for a family reunion and play.—NEAL HERINGER, age fourteen, Bay City, Mich., is a young orator. He has won three medals in W. C. T. U. oratorical contests—one of silver and two of gold.—WARREN E. DODGE, Hubbard, Ia., wants a complete list of the Henty books. He thinks he has the largest private library for boys in his town. It consists of eighty five books, of which twenty three are by Henty.—LOUIS H. McBAIN, Grand Rapids, Mich., sends us a very pretty piece of burnt work indicating that he has much talent in this direction. On account of ill health Louis has not been attending school regularly for several years past, so he busies himself with doing burnt work and looking after his collection of stamps, which is a large one, and curios, among which are eleven Indian arrowheads and several other Indian relics, a cent run over by the funeral car of President McKinley, dominoes said to have been carved by Napoleon's men while prisoners, a song book of 1792, a sword and knapsack of the Civil War, a bullet from the battle of Santiago, a shoe from China, and corals, shells, etc.—PIERIE DEPEW, Nyack, N. Y., is another boy who owns many Henty books. He has twenty nine. His library contains, in addition, forty other books. He says he can hardly wait for THE AMERICAN BOY to come, and that his father also reads it. Pierie has a fine Sunday record. He has been present in church and Sunday school for two years without missing one Sunday in January, 1902.—CARL BICKEL, Kansas City, Mo., has been studying mineralogy for three years and thinks he has "got it down fine." "I can tell," says he, "any of the common minerals and some of the rare ones." He thinks he has the largest mineral collection ever made by a boy, having 2,000

J. E. POTTER.

specimens, which he keeps in a fine oak drawer cabinet in pasteboard trays.—J. E. POTTER, Conneaut, O., has decided talent in the line of architecture. For a fourteen-year-old boy he is doing splendid work. He has a fine set of tools and spends much of his time at study and drawing. He is taking lessons from an architect, and is at present engaged in remodeling a residence. We are glad to be able to show a specimen

From a design by J. E. Potter.

of his work.—WILLIAM McKINLEY ENSCORE, Menard, Ill., is one of the youngest telegraph operators in the world. He is but ten years old. His father was for many years a telegraph operator at Galatia, Ill., and William and his sister Lena, age eleven, have both learned the business with him. The Southern Illinois Penitentiary is located at Menard, and William visits the prison,

WILLIAM McKINLEY ENSCORE.

of which his father is an officer, almost every week. He says there are more than 950 prisoners there. He tells of the good times the prisoners had on last Thanksgiving day when they were all let out of their cells and for two hours sang and danced together. At dinner they managed to pretty thoroughly clean up 220 turkeys and three barrels of cranberries.—FORD OVERTON, Fullerton, Cal., does splendid work with a pencil. The captain of one of our O. A. B. companies at Fullerton has sent us a specimen of Ford's work and it is easily the best that we have ever seen from the hands of a boy.

The Denver Newsboys' Thanksgiving.

There are about one hundred and eighty newsboys in Denver who will never forget their 1902 Thanksgiving Day, when the Denver Post gave their annual dinner for their newsboys—and a feast, indeed, it was.

For weeks each little urchin who yelled "Denver Post" at the top of his voice had looked forward to this eventful day. At the hour of eleven the boys were to meet at the office of The Post. Of course they were there an hour or more before the time. You can always trust a boy to be on time when he is promised good things to eat.

As the time drew near, the famous Satriano band, stationed in front of the newspaper office, played selections—mostly ragtime music. An elegant Columbia coach, drawn by six beautiful black horses, stood ready to convey the boys to the dinner. About seventy of the little newsboys clambered in, each wearing a flower in his buttonhole, either a huge white or yellow chrysanthemum or a rose. Behind the coach was a large vehicle drawn by four white

horses, and this was instantly filled with more newsboys. Then still a third conveyance was filled with them. The band, attired in red uniforms, completed the procession, which wended its way to the elegant Brown Palace hotel.

Such yelling and cheering! Each boy presented his ticket and was admitted. Then up in the elevator they went to the eighth floor of the palatial hotel. There, what a vision met the sight of those hungry boys! There were three beautifully spread tables which reached the whole length of the long room, with rows of chairs down each side.

What a picture the boys presented as they began to feast on the good things put before them! There were all kinds of boys: Boys of various nationalities; sweet little boys with innocent faces, with a few not so innocent; some dressed for the occasion with white collars and gorgeous neckties, but most of them in sweaters, and a number in ragged clothes; grimy hands and faces and frowny heads were largely in the majority. Notwithstanding all this, all the faces were enwreathed in smiles.

Can you imagine one hundred and eighty boys having all the turkey, cranberries, vegetables, and the et ceteras that they could eat, with coffee and milk to drink?

The band played most of the time and the boys cheered every little while, so that excitement and enthusiasm prevailed all the time. When the waiters appeared with a large piece of mince pie for each one, the boys cried out, "Pie! Pie!" Before the pie had entirely disappeared, the waiters brought in large saucers of delicious ice cream and plates of cake. The boys could not refrain from clapping their hands then. Two boys looked at their saucers of ice cream and passed them to their neighbors. Upon being asked whether they did not like ice cream, each answered sorrowfully, "Yes, but I am too full."

Most of the boys, however, seemed to have unlimited capacities, and they continued to eat nuts, raisins and apples until they were like the two little fellows mentioned—"too full."

Newsboys can stand more than the general run of boys, however, and that same evening they were running hither and thither on the busy streets, shouting, "Post and Times, here, two for a nickel-1-1! Paper, sir?"

Buy a Fence Right!

A fine example of the best fence architecture, intelligent in design, splendidly made, double galvanized steel wire throughout. We build the correct fences for lawns, parks, etc. Our catalog shows a vast variety of the newest, most successful styles at 10 to 50 cents per foot. Write for it. (FREE).

For a Boys' "Circus"

J. C. BEARD

No. 1—THE FUNNY HUMAN ELEPHANT.

Two boys are necessary to make up the elephant. One boy is needed for the hind legs and one boy for the fore legs.

The boy in front manipulates the trunk; the boy in the rear manipulates the tail.

Both boys must bend slightly forward in walking. The boy in the rear rests his one hand which is not engaged in holding the tail, on the shoulder of his companion.

Turn in one corner of an old pillow-case and place it over the head of the first boy. Cut small holes in it so that the boy may see where he is going.

THE ELEPHANT'S ANATOMY.

Paint two large eyes on a sheet of paper. Cut them out and pin them on the pillow-case.

The elephant's trunk is the arm of the first boy covered by a gray stocking. Two pairs of pajamas caught together under the feet and filled out with cotton, excelsior or crumpled paper make the feet and legs. Figure 3 shows this.

The tail, shown in Figure 4, is a short section of a broom handle with the straws from an old broom tied around the end.

The tusks, one of which is shown in Figure 4, are long, narrow cloth bags tightly stuffed with sawdust, excelsior or bits of paper.

Figure 5 shows the elephant's ear. It can be made from either brown or gray cardboard. The ears can be sewed to the head by using a large needle with twine or heavy thread.

Throw a sheet over the two boys to hide them. This will form the body of the beast.

A rug hung over the sheet, especially if it is brightly colored, will give the effect of the tinsel splendor of a circus.

This "fake" elephant does not need months of careful training before he can perform; and he is likely to amuse the spectators better than the real creature.

The table scene, so popular at every

circus, during which the clown decides to treat his pet to a dinner, can be acted to perfection by the human elephant. He can order all the most expensive dishes on the bill, just as the real elephant is always supposed to do, and he can keep constantly ringing a huge dinner bell for the waiter to bring more food.

The human elephant can also introduce a new element into this scene. The boy in the rear can decide that the front boy is getting more than his share and proceed to demand a part of the good things. He can kick the front man; he can reach out his hand instead of the elephant's tail and in a dozen other ways prove to the audience that he is not at all satisfied with the way things are going.

The human elephant, in spite of its simplicity and the ease with which it may be trained, forms one of the most interesting acts which any circus has to offer.

No. 2—THE RUBBER GIANT.

The "Rubber Giant" is so called because he possesses the magic power of growing shorter or longer at will. He is a trump card in the hands of any showman. A group of rubber giants made one of the principal "hits" in the "Black Crook" in which these figures were first introduced.

Fasten a bundle of rags around the end of a stick as shown in Figure 1, and place the mask, shown in Figure 2, on this improvised head.

Drape a piece of cloth around the head in such a manner that the absence of hair will not be noticeable. If a ready-made long, grotesque head can be obtained, it will of course answer better than anything which can be improvised; but the mask and bundle of rags are sufficient to create a great deal of fun.

Fasten two sheets together and gather one end of them around the neck of the rubber giant. When the giant's body is extended at full length, the lower end of the sheets should nearly touch the floor.

Fasten a hoop on the inside of the giant's skirts, as depicted in Figure 3, and attach this hoop to the shoulders of the operator by means of tapes, as illustrated in Figure 4.

This will prevent the giant's skirts from touching the floor when he lowers his head. If the skirts dragged on the floor they would, of course, trip the operator. Two very small holes are made in the skirt just above the hoop so that the operator can see where he is going.

The various attitudes which the giant may assume and odd movements which he may make are very amusing. By lowering the giant's head and crouching down and then gradually resuming an erect position and extending the head to his utmost, the operator may make the figure pass through all the stages of growth from a dwarf to a giant.

By swaying the head from side to side and inclining the body at different angles, the figure may be made to dance. A bow when executed by a rubber giant is almost delightfully ridiculous.

The figure is, of course, an excellent contortionist and can be bent into all sorts of curves. It can bring its head down and stretch it through between its own legs in a most ludicrous fashion.

In all straight or curved positions the operator's body must carry out the lines set by the stick; he must become, as it were, a continuation of the stick to which the giant's head is attached.

Be careful to avoid all abrupt angles. The operator should move in easy curves and with graceful undulations.

A small jacket like that shown in Figure 5 can be fastened around the giant's neck just under the collar, so the collar, Figure 6.

Stuff an old pair of gloves with cotton, as shown in Figure 7, and pin them in the sleeves of the jacket.

The length of the stick which supports the giant's head must, of course, vary with the amount of space which can be allowed for the giant to move around in; but even if there is plenty of room it is not wise to have the stick more than six or seven feet long; because a great part of the fun consists in the apparent animation of the giant, and in his eccentric movements. If the stick is too long it will be heavy and unmanageable and the giant will move in a series of jerks which will spoil the illusion.

It adds to the effect greatly if more than one giant is used. Then the op-

erators can play into each others hands, that is, help to accentuate each other's absurdity.

For instance, one may grow tall while the other is growing short. Or one will watch intently while the other is going through some curious tricks, and when the tricks are completed the one who has been watching will attempt to imitate them.

IN WRITING ADVERTISERS, MENTION THE AMERICAN BOY.

Officer's Badge

THE GREAT AMERICAN

FOR MANLINESS IN MUSCLE

EVERY ENERGETIC AMERICAN BOY SHOULD BE A MEMBER

Company News.

CHIEF GOODTHUNDER COMPANY, No. 4, Redwood Falls, Minn., has resumed its meetings, no meetings having been held during the summer months. The officers are: Captain, Paul M. Hitchcock; Treasurer, Carroll King; Librarian, Henry Morgan. This Company holds its meetings every two weeks in its club room. After the regular business meeting the boys play games, etc. The Company is trying to find a room for a gymnasium, but has not yet succeeded. It would like to exchange a baseball mitt for boxing gloves, or anything for a gymnasium.—**APOLLO COMPANY, No. 31, Yale, Mich.,** has a library of over fifty books.—**ROBERT DALE OWEN COMPANY, No. 4, Stewartsville, Ind.,** is progressing finely. The boys entertained their young lady friends the evening of November 28 at the club room and proved themselves to be royal entertainers.—**WINFIELD SCOTT SCHLEY COMPANY, No. 11, Woodstock, Ill.,** at a recent meeting elected the following officers: Captain, J. G. Richards; Secretary, R. H. Gillmore; Treasurer, Rupert Donovan; Secretary of Athletics, James Northrup. Meetings are held every two weeks, and the membership is limited to twelve, the present number.—**HAYES COMPANY, No. 14, Des Moines, Ia.,** recently organized, has elected the following officers: Arthur Wilkinson, Captain; Howard Osborne, Vice Captain; Marlin Wragg, Secretary; Forest Scott, Treasurer; Ralph Ray, Librarian.—**CAHOKIA COMPANY, No. 23, Edwardsville, Ill.,** holds its meetings every two weeks. The Captain promises us a picture of the Company soon.—**SANTA FE COMPANY, No. 3, Chase, Kas.,** has resumed its regular meetings and expects to enroll several new members in the near future. This Company is going to study shorthand this winter after the lessons given in THE AMERICAN BOY.—**COLFAX COMPANY, No. 8, Indianapolis, Ind.,** holds its meetings every Friday evening at the homes of the various members. Meetings for the winter will be mostly of a social nature. This Company has a basketball team composed of Eugene Dolmetsch, Captain, and Marion Smith, Clare and Harold Sexsmith and Harold Kurtz, with Vance Lawrence as a substitute. It is striving to obtain new members so that next fall it can organize a football team.—**JOHN BROWN COMPANY, No. 6, Paola, Kas.,** was very pleasantly surprised at a recent meeting when Doctor Walthall, father of the Captain, presented the Company with its charter nicely framed. Ex-Captain George E. Quimby writes: "It is a beauty, and we gave him three cheers and tendered him a vote of thanks." Doctor Walthall also donates the Company rooms, and the boys feel very much indebted to him.—**BLACK HAWK COMPANY, No. 9, Sheboygan, Wis.,** is one of the prosperous companies of the Order. This Company expected to have a feast on Thanksgiving evening in its club room. A committee was appointed to decide upon what each boy should bring, and the boys were planning for a good time. We are promised an account of it by one of the members.—**HONEST ABE COMPANY, No. 6, Springfield, Mo.,** is progressing finely. It has a nice set of boxing gloves and a library of about twelve books. This Company has its charter framed and hanging on the wall, with a picture of "Old Abe" hanging underneath it. Meetings are held at the home of Herbert Brubaker, one of the members, Mrs. Brubaker having kindly donated a room for this purpose. This Company expected to have a Halloween party, and a little later to give an entertainment, and we are promised a report of these. One of the local papers of Springfield gave the Company a nice write-up in a recent issue.—**WILLIAM J. SAMFORD COMPANY, No. 3, Opelika, Ala.,** has organized a football team. On November 7 the boys played with a near-by team and defeated them, the score being 35 to 5. After the game three cheers were given for the O. A. B. team. About seventy five people witnessed the game and all joined in the cheering. Frank Driver, a member of the Company, made the best play that was made, having made three touch-downs. The following is the line-up: Tom Dyer, center rush; Frank Driver, quarter-back; Jule Greene, full-back; Moses Blumenfeld, right half-back; Casey Greene, left half-back; Henry Johnson, left tackle; Claude Williamson, right tackle; Simon Blumenfeld, right guard; Kyle Andrews, left guard; Claude Barnes, right end; Lionel

The Order of The American Boy

A NATIONAL NON-SECRET SOCIETY FOR AMERICAN BOYS.
UNDER THE AUSPICES OF "THE AMERICAN BOY."

Object:—The Cultivation of Manliness in Muscle, Mind and Morals.

The object more definitely stated: To promote mutual and helpful friendships among boys; to give wider circulation to high class boy literature; to cultivate in boys physical, mental and moral courage, and develop them along social, intellectual and moral lines; to cultivate purity of language and actions; to discourage idleness, and encourage honest sport and honest work; to cherish and emulate the examples of great and good men; to inculcate lessons of patriotism and love of country; to prepare boys for good citizenship; to cultivate reverence for the founders of our country, and to stimulate boys to all worthy endeavor.

Boys desiring to Organize Companies may obtain a Pamphlet from us containing Directions. It is sent for a 2-cent stamp.

BENGAL TIGER COMPANY NO. 10, DIVISION OF IOWA, LISBON, IA.

Well, left end. This Company has adopted the proposed Constitution and By-Laws. Fines are imposed for various offenses. The boys have had their charter framed and hung upon the wall, and have a fine library which is growing rapidly. The Captain says they are going to do good work this winter.—**STAR OF THE WEST COMPANY, No. 4, Elgin, Ore.,** recently organized, is one of the flourishing companies of the Order. The Captain writes under date of November 28: "We received the charter all right and are very proud of it."—**BLACK HAWK COMPANY, No. 9, Sheboygan, Wis.,** reports its Thanksgiving feast, of which we promised to give an account later, a grand success. All the members excepting one were present, and the meeting was called to order at 8 o'clock p. m., by the Vice Captain. Here is the order of the program: Salute to Flag; Oration, Otis Welsh; Mandolin Solo, Arno Stein; Recitation, Frank Schiffeneder; Essay, "Thanksgiving," Andrew Bielefeld; Speech, Frank Gerhardt; Club Prophecy, Willie Klumb; Salute to Flag. Adjournment. Following the program, the boys played games, and then came the refreshments. The Secretary writes, "There were sixteen boys present and you can imagine how rapidly the food disappeared." After supper more games were played and the boys enjoyed themselves generally until late in the evening, all agreeing that they had a fine time. This Company has organized a football team and on Thanksgiving Day defeated the Freshmen. Following is a copy of the minutes of the meeting held November 11, 1902: Meeting called to order by the Captain; Salute to Flag; Calling of Roll by Secretary; Reports of committees; Secretary's report; Treasurer's report; Proposals for membership; Balloting on candidates. Oscar Schrant and Willie Klumb were appointed a committee to keep the club room in order for the two succeeding weeks. A motion was made and carried that a new window be put in the club room. Motion was made by Otis Welsh, seconded and carried, that if a member did not appear at meetings at least four weeks after he was voted in, his name be stricken from the membership list. It was agreed that, owing to the money in the treasury diminishing so rapidly, refreshments be served only once in two weeks at meetings. Motion was made, seconded and carried, that the Company pay Mr. Slyfield fifty cents, as part of

the money loaned by him for the circulating library. Motion was made that the Captain appoint a committee of three, of which committee the Secretary was to be Chairman, to draft a literary program to be given on Thanksgiving evening. Otis Welsh, Henry Fessler and Arno Stein were appointed as this committee. Motion was made and carried that all those refusing to take the part assigned to them on the program be fined not less than three cents nor more than seven cents, the money collected in this way (if any) to go into the library treasury. A committee was appointed to determine what each member should contribute toward the Thanksgiving spread, with the provision that their report be read at the next meeting for approval of the Company. Fees amounting to seventy five cents were collected at this meeting. Salute to Flag. Adjournment.—**LITTLE GIANT COMPANY, No. 34, Carney, Mich.,** will hold its first meeting for the new year on January 24, at which time it will organize a track team and a baseball team. This Company is very much interested in athletics.—**SHERIDAN COMPANY, No. 21, Chicago, Ill.,** has a fine gymnasium, with punching bag, boxing gloves, Whitely exerciser and a pair of dumb bells. It also has some games and a few books in its library, and expects to have more soon. It has, at this writing, \$2.40 in its treasury.—**GOLDEN STATE COMPANY, No. 12, Fullerton, Cal.,** has had its charter framed in black with a moulding around the edge.—**RIVER VIEW COMPANY, No. 1, Rio Vista, Cal.,** will hold its annual banquet and have a Christmas tree the evening of December 23, at the home of Treasurer Herman Lund. This Company has just added nine new books to its library. The Captain writes, "Our Company is prospering finely and the boys take more interest in it every day."—**JAMES LANE COMPANY, No. 8, Yates Center, Kas.,** is an athletic company. It has a football team, a baseball team, and two basketball teams, and the captain says they have won every game they have played.—**VICTORIA COMPANY, No. 1, Water-vliet, Mich.,** elected the following officers on the evening of December 23: Captain, Arthur Frazee, Vice Captain, Hiram Randall; Secretary and Librarian, Burr Baughman; Treasurer, Sebastian Smith; Sergeant-at-Arms, Sherwood Smith. After the election the boys partook of an oyster supper, which was

given in honor of Lester Sodusky, a former member of the Company, and now a resident of Chicago. After supper a fine program was rendered and the evening altogether was a very enjoyable one.—**U. S. GRANT COMPANY, No. 9, Eureka, Cal.,** has rented a club room, paying for the same one dollar per month. Meetings are held once a week. This Company is chiefly interested in athletics. The boys expect to give an entertainment on the evening of January 15.—**JOSEPH R. HAWLEY COMPANY, No. 2, Norfolk, Conn.,** holds its meetings on Friday evenings at the homes of the members. This company will build an underground club house in the spring, unless suitable quarters are found before that time. It has had its charter framed and has ordered a pennant.—**NORTH STAR COMPANY, No. 35, Detroit, Mich.,** explains the meaning and origin of its name as follows: "Michigan being one of the northern states of the Union, and every state being represented by a star on the flag, we have decided upon the name of 'North Star.'" This company holds its meetings on Monday, Wednesday and Friday evenings of each week at the home of the sergeant-at-arms, Paul Ranspach, where a club room has been fitted up with three trapezes, one pair of rings, one Whitely exerciser, boxing gloves, punching bag, dumb-bells and Indian clubs. It is needless to add that this is an athletic company.—**GEORGE W. STEELE COMPANY, No. 6, Swayzee, Ind.,** has rented a room in a store building which it will fit up as a club room. It already has several books, a drum, two pairs of fencing foils, a baseball mask, a football, one pair of two-pound Indian clubs and one ten-pound club. The secretary promises us a picture of the club room when completed.—**GENERAL LAWTON COMPANY, No. 4, Emporia, Kas.,** at a recent meeting elected the following officers: Captain, Fred Puffer; Vice Captain, Hobart Moses; Secretary, Harry Smith; Treasurer, Warren Morris.—**MAPLEWOODS COMPANY, No. 17, Ida Grove, Ia.,** hope soon to have a new club room. The captain's father is a photographer, and at present meetings are held in his reception room. We are promised a picture of the company soon.—**GENERAL GEORGE A. CUSTER COMPANY, No. 22, Freeport, Ill.,** recently elected the following officers: Captain, Wesley Eiseman; Vice Captain and Secretary, Dea Wheeler; Treasurer, Willie Ickes. This company holds its meetings every two weeks. Dues, five cents, payable at each meeting.—**THE BENGAL TIGER COMPANY, No. 10, Lisbon, Ia.,** on the evening of January 5 elected the following officers: George Wooderson, Captain; Merrill Ringer, Vice Captain; Charles Roach, Secretary; Leonard Furnas, Treasurer. This company has at present \$2.88 in its treasury. The captain has sent us a picture of the company which here appears.—**FORT CONCHO COMPANY, No. 6, San Angelo, Tex.,** is building a gymnasium. This company recently organized a football team and purchased a football. It has ten books in its library at present but intends to invest in a number of new books soon. Company dues are ten cents per month, and a fine of five cents is imposed for disorderly conduct during meetings or for using profane language. The company has at present \$2.30 in its treasury.—**STAR OF THE WEST COMPANY, No. 4, Elgin, Ore.,** sends the following report: Number of resignations, one; number of new members since date of organization, four; total membership, January 1, 1903, nine; amount of money taken in since date of organization, \$2.45. This company expects to celebrate AMERICAN BOY Town Meeting by giving a "pic social," and we are promised an account later.—**HENRY FOUR M COMPANY, No. 24, Henry, Ill.,** takes its name from the words "Manliness in Muscle, Mind and Morals." Its officers are, Geary Stibben, Captain; Cecil Deck, Vice Captain; Joseph Jones, Secretary; Claire Baguley, Treasurer; George Yanochowski, Librarian.—**HONEST ABE COMPANY, No. 26, Merrill, Mich.,** gave a party recently at the home of the vice captain, Thomas Johnson, and reports an enjoyable time. Light refreshments were served and the boys had a good time generally. At a recent meeting the following officers were elected: Captain, Mrs. Horace Johnson; Vice Captain, Thomas Johnson; Treasurer, John Daley; Secretary, James S. Daley.—**GET THERE ELLI COMPANY, No. 2, York, Neb.,** is an athletic company. Last season it organized a baseball team and played twenty games, losing only seven. The team played the South Omaha Stockyards Juniors and was defeated, the score standing 4 to 0. It also played the Seward First team and was defeated by a score of 4 to 5. The captain says these were the two closest games played, though all of them were close. He writes: "We toured the state considerably last season but intend to make a big tour of the state this season and advertise THE AMERICAN BOY." Their uniforms consist of red shirts with the letters "O. A. B." in white on the front, blue pants, white belt, blue cap with white stripes around it and blue (or red) stockings. The captain says the O. A. B. Baseball Club was known all over the state during the season as they had three pitchers in their club who were considered the best in the state for their age. This company also has a football team and a basketball team. The former played one game last season with the Bradshaw H. B. and defeated them 26 to 0. The following are the officers of the company: Captain, Ralph Falkinburg; Vice Captain, Clyde Bailey; Secretary, Willie Mead; Treasurer, Leverage Goble; Librarian, Wray Edwards; Sergeant-at-Arms, Claud Zeigler.—**GRIZZLY COMPANY, No. 11, Berkeley, Cal.,** has a small house, 10x10 feet, which is used as a club room, but expects to build an addition to it soon. The secretary promises us a picture of the company.—**LEWIS AND CLARK COMPANY, No. 5, Baker City, Ore.,** recently organized, is getting

along nicely. This company will make a specialty of curio collecting. The captain writes: "We have received our charter and are very proud of it. We will try to fulfill the meaning of M. M. M. M."—OHIO VALLEY COMPANY, No. 2, Bellaire, O., has a fine club room which has been furnished, free of charge, by Mr. Blum, father of the secretary. It has had its charter framed.—J. C. SPOONER COMPANY, No. 11, Blanchardville, Wis., is an athletic company. It will also have a library.—CUSHMAN K. DAVIS COMPANY, No. 2, Heron Lake, Minn., held its semi-annual election of officers on Friday, January 23, when the following officers were elected: Captain, John C. Benson; First Lieutenant, Hugo Jones; Second Lieutenant, Walter Jones; First Sergeant, Arthur Butler; Second Sergeant, Harvey Prescott; Third Sergeant, Tommy Ross. Meetings are held every Friday and the members are very enthusiastic and are already looking forward to making a fine display in the Fourth of July parade.—GENERAL ROBERT E. LEE COMPANY, No. 3, Bentonville, Ark., holds its meetings twice a week. Dues, five cents per month, with a fine of five cents for using profane language and ten cents for the use of tobacco in any form.—LAFAYETTE COMPANY, No. 9, Carmel, Ind., has about four dollars in its treasury and has a fine gymnasium outfit. The following officers were recently elected. Captain, Clarence E. Lancaster; Vice Captain, Virgil Pond; Secretary, Malcolm C. Randall; Treasurer, Telford B. Myers; Librarian, Cecil Moore.—THE CAVALIER COMPANY, No. 12, Oakfield, Wis., has adopted the proposed Constitution and By-Laws. Weekly dues, five cents, with a fine of three cents for disorderly conduct during meetings and also for using profane language. Meetings are held on Wednesday evenings at the homes of the various members. Company colors, red and blue. This company is chiefly interested in athletics and will soon have a club team.—G. A. HENTY COMPANY, No. 1, Enid, Okla., is a literary company. Its aim will be to get the Henty series of books for its library. (To be Continued.)

American Boy Indian Festival.

Programs and suggestions for THE AMERICAN BOY Indian Festival, which Companies of the Order are invited to hold on March 21st, will be sent Company Captains by mail. The directions are too lengthy to permit of their being printed in these columns.

Reduced Fac Simile of a Company Invitation.

Report of One of "The American Boy" Town Meetings.

The William J. Sanford Company, No. 3, of the Alabama Division of "The Order of the American Boy," is an excellent addition to the club circles of this city. Composed as it is of the splendid little boys, gallant and chivalrous in their noble young manhood, who have

Rank of Individual and Company Members

NOTE:—An INDIVIDUAL MEMBER is one who does not belong to a Company. A COMPANY MEMBER is a member who belongs to a Company. An HONOR MEMBER is a member who has had his name on The Legion of Honor Roll.

Every Member of a Company (excepting an Officer) is a	FIRST DEGREE MEMBER
Every Officer of a Company (Captain, Secretary, etc.) is a	SECOND DEGREE MEMBER
Every Member (Individual or Company Member) who sends us One New Subscription is a	THIRD DEGREE MEMBER
Every Member " " " Two New Subscriptions is a	FOURTH DEGREE MEMBER
Every Member " " " Three New Subscriptions is a	FIFTH DEGREE MEMBER
Every Member " " " Five New Subscriptions is a	SIXTH DEGREE MEMBER
Every Member " " " Ten New Subscriptions is a	SEVENTH DEGREE MEMBER
Every Member " " " Twenty-five New Subscriptions is a	EIGHTH DEGREE MEMBER
Every Member " " " Thirty-five New Subscriptions is a	NINTH DEGREE MEMBER
Every Member " " " Fifty New Subscriptions is a	TENTH DEGREE MEMBER

Members need not send all subscriptions at once. Every time you send sufficient new subscriptions you will receive promotion. We pay CASH commissions on the subscriptions or give PREMIUMS if you prefer, (see our Premium List sent you) and we furnish to you free PRIVATE STAMPS and a BADGE showing your rank. In addition, a Tenth Degree Member receives THE AMERICAN BOY free DURING HIS LIFE; a Ninth Degree Member receives it for TEN YEARS and the Eighth Degree for FIVE YEARS.

CHARLES E. WELLS, Captain Apollo Company, No. 31, Yala, Mich.

for their purpose study, and the special object of the organization is for the "cultivation of manliness in muscle, mind and moral." They have selected a name that allures them on with patriotism, that inspires them with a desire to become statesmen of his noble and exalted type. A noble Christian character worthy for the individual of this company of "The American Boy," that proudly bears his name, to emulate in every walk and sphere of life.

The Wm. J. Sanford company was organized but a few months ago, and their meetings held on Friday afternoon, at the home of Mrs. H. Blumenfeld, have never abated in interest. The program arranged for them in the magazine THE AMERICAN BOY is carried out in detail, and consists of papers written upon various subjects, interspersed with music. The fortunate feature of this company is that they have several musicians in their membership and the program can be varied with music. On Friday afternoon, Mrs. Blumenfeld invited the mothers and a few other lady friends to be present for the meeting of the company, at which time she beautifully entertained in honor of the boys.

When the captain, Mr. Casey Greene, touched his gavel, perfect quiet prevailed and Mr. Paul Shoaff read the well prepared minutes of the last meeting, which told of splendid papers read by members of the company, on Washington, Lee, Jackson and other patriots.

The subject for the evening, "The American Town Meeting," was entertaining, with the following well read and well prepared papers: "A Clean Town," Mr. Henry Johnson; "A Beautiful Town," Mr. George Clower; "An Intellectual Town," Mr. Leonel Well; "A Moral Town," Mr. Simon Blumenfeld.

Music by the orchestra of the company, with Mr. Casey Greene on the piano, and Messrs.

Julie Greene and Simon Blumenfeld on the violin, furnished several sweet musical numbers. Miss Gertrude Shoaff charmed her hearers with a splendid piano solo.

The visitors were delighted to be counted among the friends of the "American Boys," and bade them Godspeed in the noble plans and purposes of their company, one of which is a library, that is now well begun, numbering 21 volumes.

The officers of the Wm. J. Sanford Company are: Captain, Mr. Casey Greene; Vice Captain, Mr. Simon Blumenfeld; Secretary, Mr. Paul Shoaff; Treasurer, Mr. Will Davis; Librarian, Mr. George Clower.—From The Opelika (Ala.) POST of January 30, 1903.

ANOTHER REPORT.

Opelika, Ala., Jan 23, 1903.

Our American Boy Town Meeting was held this afternoon at our club room. It was a great success. The addresses made by the boys were well prepared. Music served to enliven the program. Refreshments were served. About twenty visitors were present. A fine talk was made by each of several visitors, that gave us a lot of encouragement. It was decided that our town was a very clean town, but not so clean as it could be made. In the voting of the second resolution it was decided that our town was not as beautiful as it should be.

In the third resolution it was decided that Opelika is as intellectual as it should be.

In the fourth the decision was that Opelika was not as moral as it should be, but was a great deal more moral than the average town.

CASEY GREENE.

Ten Great Days.

THE ORDER OF THE AMERICAN BOY will celebrate by special program the following ten great days during the remainder of this year:

March 21—AMERICAN BOY INDIAN FESTIVAL; April 25—AMERICAN BOY GRAND RALLY; May 23—AMERICAN BOY TREE PLANTING; June 20—AMERICAN BOY FAIR; July 4—AMERICAN BOY INDEPENDENCE DAY; August 22—AMERICAN BOY CAMP FIRE AND CORN ROAST; September 19—AMERICAN BOY FIELD DAY; October 31—AMERICAN BOY HALLOWEEN; November 28—AMERICAN BOY CONGRESS; December 19—AMERICAN BOY ANNUAL BANQUET. PUBLIC MEETING AND ADDRESS. Every member, whether an individual or Company member, will look forward to these days as red letter days for 1903.

Prize Essays.

In accordance with the terms of the prize essay contest announced on page 89 of the January number of THE AMERICAN BOY, we award the first prize of \$3.00 to Fred B. Snoemaker, age fifteen, Washington, Ia., and the second prize of \$1.00 to Arthur Luthl, age fifteen, Detroit, Mich. Honorable mention is given to Paul A. McCoskey, Chicago, age thirteen; Horace G. Duke, Greeley, Colo., age thirteen, and Edward Stotler, Washington, D. C. There were no contestants under ten years of age.

Thirty Eight New Companies Organized Between Dec. 29 and Feb. 10.

G. A. Henty Company, No. 1, Division of Oklahoma, Enid, Okla.—Cedar River Boys Company No. 15, Division of Iowa, Cedar Falls, Ia.—Chief Wabasis Company, No. 36, Division of Michigan, Rockford, Mich.—Hawkeye Company, No. 18, Division of Iowa, Modale, Ia.—Frances Marion Company, No. 16, Division of Pennsylvania, Harrisville, Pa.—Henry Four-M Company, No. 24, Division of Illinois, Henry, Ill.—Pigeonroose Company, No. 13, Division of Indiana, Scottsburg, Ind.—Albert C. Cummings Company, No. 19, Division of Iowa, Volga, Ia.—Oliver Optic Company, No. 27, Division of Ohio, Pioneer, O.—William Barret Travis Company, No. 12, Division of Texas, Tyler, Tex.—General Ulysses S. Grant Company, No. 14, Division of Indiana, Indianapolis, Ind.—William B. Allison Company, No. 20, Division of Iowa, Webster City, Ia.—Susquehanna Company, No. 17, Division of Pennsylvania, Muncy, Pa.—Ohio Valley Company, No. 28, Division of Ohio, Bellaire, O.—Phineas Taylor Barnum Company, No. 3, Division of Connecticut, Bridgeport, Conn.—J. C. Spooner Company, No. 11, Division of Wisconsin, Blanchardville, Wis.—General Braddock Company, No. 18, Division of Pennsylvania, Braddock, Pa.—Robert E. Lee Company, No. 4, Division of Alabama, Gadsden, Ala.—Will Carleton Company, No. 37, Division of Michigan, Mason, Mich.—Richard P. Bland Company, No. 8, Division of Missouri, Kansas City, Mo.—Now or Never Company, No. 29, Division of Ohio, Greenfield, O.—Port Huron Company, No. 38, Division of Michigan, Port Huron, Mich.—Little Rhody Company, No. 1, Division of Rhode Island, Westerly, R. I.—William C. Sprague Company, No. 30, Division of Ohio, Edgerton, O.—The Cavalier Company, No. 12, Division of Wisconsin, Oakfield, Wis.—General Robert E. Lee Company, No. 3, Division of Arkansas, Bentonville, Ark.—Moses Cleveland Company, No. 31, Division of Ohio, Conneaut, O.—Stonewall Jackson Company, No. 13, Division of Texas, Corsicana, Tex.—Daniel Boone Company, No. 32, Division of Ohio, Martins Ferry, O.—Commodore Perry Company, No. 15, Division of Indiana, Danville, Ind.—Knut Nelson Company, No. 7, Division of Minnesota, Mankato, Minn.—Hamlin Garland Company, No. 21, Division of Iowa, Osage, Ia.—Nemaha Valley Company, No. 11, Division of Nebraska, South Auburn, Neb.—The Pilgrim Company, No. 14, Division of Massachusetts, Duxbury, Mass.—St. Lawrence Valley Company, No. 20, Division of New York, Canton, N. Y.—Thomas Jefferson Company, No. 39, Division of Michigan, Nashville, Mich.—John McLoughlin Company, No. 6, Division of Oregon, Oregon City, Ore.—Jacob Rills Company, No. 40, Division of Michigan, Big Rapids, Mich.—Frederick Post Company, No. 2, Division of Idaho, Post Falls, Ida.—Tulare Company, No. 13, Division of California, Tulare, Cal.

The Wreck of the "Winsome Winny"—J. Olivier Curwood

OURS was a lateen-rigged sail, with an even four hundred feet of canvas. We were both proud of her as she ran her bowsprit out over the ice for the first time. I suppose I took an inglorious pride in the thought that it was I who had given her the name of the "Winsome Winny." We had both planned her, and in her building I had helped as much as any uncle could have expected of a boy who wasn't over fond of saws and hammers. It wasn't our first boat, but it was the only one in which I had ever had the slightest interest, so far as ownership was concerned.

"Looks like an ugly day," remarked Uncle Ben.

We were looking straight out over Lake Erie from a little to the south of where the Detroit river emptied into it. I had never seen the ice so smooth. For three winters the lake had been so rough when the freezing nights came that ice-boating had been confined almost entirely to the rivers and bays on account of the roughness of the "open sea," as we called it. But this year it was different.

Uncle Ben stood with his hands in his pockets, staring across the lake. It seemed only a short distance out that the sombre gray of the sky shut in the ice-field. There was almost no wind, but the pall of gloom grew steadily blacker as we looked. Over the Canadian shore, which shone out in a dim snow-line, the gray had parted and let through a chilly light, which fell on the tumbled masses of ice broken up by the swift current of the river half a mile away. I glanced from these things to Uncle Ben. His face was partly turned, but I could see that it wore a doubtful look.

"I believe that if it wasn't for disappointing the folks over in Sandusky I'd postpone the trip," he said, finally.

"There's a light breaking through, and there's no wind," I argued, knowing as well as he that the light portended more evil things than the purple sky.

Uncle was a man who did not say much. One had to read his face. He made no answer, but gave the "Winsome Winny" a shove that sent her out from the headland, where she caught the breeze in her rigging. "Might as well stand by to hoist the sheet, Harry," he called.

In a trice I had the sheet partly up, and the "Winsome Winny" walked out beautifully with the wind. I was about to loosen the full mains'l—I always abbreviated my "sail" because it sounded more nautical—when Uncle Ben interrupted me, and called me back to the cockpit. There I doubled up my feet and scrutinized the darkening sky and Uncle Ben's face by turns. So far as I could see there was no reason why we shouldn't cut straight across to Sandusky without any loss of time. So long as Uncle Ben was at the tiller I had no fear of getting lost in the worst blizzard that ever blew. But evidently I had more confidence in him than he had in himself. Each minute the sky seemed drawing nearer, like a great curtain, enveloping more and more of the frosted ice-field. From behind, where the steely light broke through, the wind grew fresher. Now and then a sudden puff would set the wire rigging to humming, and each time this happened Uncle Ben would glance back over his shoulder.

"It's six to one and half a dozen to the other, Harry," he said. "If we run back we'll have to leave our boat on shore and hunt up a farmhouse, and if we go on it's likely we'll weather it all right. We'll chance it, anyway. Skip out an' loose the sail."

We had been going dead with the wind, in a sort of uncertain way, but now as the three hundred feet of canvas in the mains'l filled out with the breeze Uncle Ben's cogitations ended, and he brought the "Winsome Winny" about with the wind on our beam in a way that sent her scuttling off like a shot. With "wind abeam" the breeze was striking us at right-angles, from the side instead of the rear, which places an iceboat at her best. This had always puzzled me. I had tried to figure it out again and again. I could see how a boat might go twenty miles an hour before a twenty-mile wind, but how she could make twice that much running almost against the wind had always been a conundrum to me.

"Harry!" My uncle's shout was followed by a quick wave of his arm from the cockpit.

"Hustle up!" When Uncle Ben used that sort of language something was up. Straddling the beam leading out to the runner-plank, I wormed my way toward the cockpit. A fierce gust set the wires humming dismally above my head, and I could feel the jar of the windward skate as it lifted slightly off the ice. The singing of the wires continued. Perhaps Uncle Ben wanted to get me in the cockpit before the blizzard struck us.

"Slips along like a ghost — — —"

"What do you see out there, Harry—your eyes are sharper than mine!" he shouted as he pulled me over among the rugs.

I put my hands telescope-like to my eyes in an effort to pierce the gray gloom on our lee. The sky seemed farther away, but to offset it the air began to fill with a fine, driving snow. For a few moments it seemed as though all was dark, elusive vacancy, then I fancied I caught a glimpse of something that was neither the gray sky nor the ice. I shouted to Uncle Ben, but it had disappeared in an instant.

"Slips along like a ghost—." He said something else, but I couldn't catch it. The fierce gusts of wind had given way to a steadily increasing gale, and with it whistling in our ears and the wires overhead cutting it with shrill wallings a shout was almost unintelligible. Then I caught sight of it again. It was parallel with us, perhaps three-quarters of a mile away.

"It's an iceboat!"

I shouted the fact close up to Uncle Ben's face, and he nudged me, grinning. He replied with something that sounded like "comp'ny," and I suppose he meant we would join the stranger craft, for we changed our course just enough to cross her bow. She loomed up rapidly, for under the edge of the gale the "Winsome Winny" was kicking up her heels, as we called it, at no less than forty miles an hour. I could make her out lateen-rigged, with a bigger sweep of canvas than I had ever before seen on an iceboat. I believe we had crept up to within a quarter of a mile of her before she noticed us. Until then only two figures were visible, one at the rudder and the other sitting amidships, or halfway between the stern and the mast. But immediately on discovering us two others popped up, and disappeared again as suddenly, evidently hugging close to the deck. Hardly an instant elapsed before she heeled over with the wind, and stood out with the gale directly behind her.

"—mighty queer craft!" I caught from Uncle Ben's lips. Above the howling of the wind and the wires I could hear the deep-cut scraping of the rudder skate under the cockpit, and the "Winsome Winny" swung about as gracefully as a bird. A race! I grinned my delight into Uncle Ben's face. He returned it with a stare that seemed unnatural.

The stranger was running splendidly! There was only one figure visible on her now, and that soon began to fade away in the distance. I felt my heart go thump—thump—inside of me as I realized we were being beaten. Uncle Ben seemed to have forgotten I was beside him. He stared straight ahead with a hard, fixed gaze, and more than once during the next five minutes I found myself wondering why a race should affect him so. With the gale straight behind us the wires had stopped singing above, and when Uncle Ben spoke to me it was in his natural voice, though I fancied I caught a peculiar ring in it.

"I'm afraid we're on the wrong tack, Harry. I'm going to put her hard to lee, an' chance cutting 'em off!" By putting her "hard to lee" Uncle Ben meant he was about to fetch the "Winsome Winny" around so that the wind would strike us on the side again.

It was beautiful to see the way we caught the ice! I gave a hurrah as the ringing skates fairly danced across it. It was now blowing a blizzard, and it seemed that half of the time our windward skate was in the air. The big lateen sail ahead began to show up again. Each second added to the whiteness and the bigness of her canvas. Then, like magic, all four figures appeared on her. We could see there was excited talking, and with his free arm the helmsman was gesticulating wildly. The distance be-

tween us was so short that we could see he was talking to a man in the bow, who sat facing us, with his arms up as though he was holding a gun to his shoulder. Then there came a sudden snap, so sharp that we could hear it almost as plainly as though we had been aboard the stranger. The huge lateen sail swept around with a sound like the cracking of a whip.

"She's going over!" shouted Uncle Ben. For a moment it looked that way. I would have staked my life she had capsized. What magnificent control! She was up and off like a bird in an instant! In that hazardous second she had changed her course as completely as though she had taken an hour to do it in. Now she was playing almost dead against the wind, while Uncle Ben, too surprised to act, gave her a handsome start.

"Stand by—duck!" he fairly shrieked. I heard the swish of the "Winsome Winny's" sail as I flattened myself in the cockpit. We were after the stranger again! Once more she was just a mist against the gray sky. The "Winsome Winny" had shown her mettle. I knew it by the grim smile that had settled on Uncle Ben's face.

But why were Uncle Ben and the stranger playing this game of tag all over Lake Erie while every minute a blizzard was coming up blacker and thicker all around us?

There was something mysterious about it all. I began to realize now that it was more than a race. If I had not suspected it before, the next move of the stranger craft would have settled all doubts in my mind. She was hovering in the wind like a great gull an eighth of a mile ahead, almost motionless, for she was taking the fierce blast of the blizzard full on her bow, with her sail swinging out behind like a pennant. Then she suddenly swerved, and as she went off like a shot at right-angles to us I saw something topple off her deck upon the ice.

"Man overboard!" I cried. The grim smile on Uncle Ben's face never changed. With one big swoop to leeward the "Winsome Winny" came about with the wind abeam again, and as we dashed away in pursuit of the stranger we passed within a few feet of the object. It was the carcass of a sheep, freshly cleaned.

"Just as I thought!" shouted Uncle Ben in my ear. His face lit up with an added excitement. I was more mystified than ever, and howled back a lusty inquiry:

"What is it?"

"Mutton—they're smuggling mutton!" he replied.

Smugglers! I felt a cold chill creep up my back that was not exactly caused by the wind. If they were smugglers, why in the world was Uncle Ben chasing them! According to my idea it would have been a much wiser policy to have turned in another direction, and in the next few seconds I made up my mind that if anything did happen it wouldn't be the fault of the smugglers, for Uncle Ben was hounding them like grim death.

The stranger had now tried every trick known to experienced ice-boaters in order to escape the "Winsome Winny." We had beaten her with the wind, we had beaten her against it, we had outpointed her with it abeam, and now as it caught us on the side again we were overtaking her rapidly. Everything seemed plain to me now. I had often read in the papers that sheep could be bought much cheaper on the Canadian side than in the United States, and that there was a big profit in smuggling them. The daring men ahead had taken advantage of the smooth winter on Lake Erie to run them across, and were probably taking them to some point on the shore between the river and Toledo. That they were taking us for revenue men who had got wind of their operations was probable. In no other way could they account for our pursuit. But what in the world did Uncle Ben intend to do? They outnumbered us two to one, and we, at least, were unarmed. I felt that my question would soon be answered, for we were drawing so near that the two men flattened on the deck could be plainly discerned. The figure amidships was facing us again. Suddenly a puff of white smoke clouded it for an instant.

The report of a gun rolled across to us! The lurch that followed sent such a thrill through me as I never hope to feel again! It seemed that I could see death written in Uncle Ben's face as he uttered a sharp cry and lurched against me with a force that drove the breath out of my body.

"Look out!" he shrieked. He doubled me up under him, with my face turned skyward, and in that instant I saw the "Winsome Winny's" big spar toppling down through space, with a loud rending and tearing of canvas. Before I could fairly realize what had happened the "Winsome Winny" seemed standing on end. The fallen

spar crunched into the ice ahead of the forward skates, and as the rear skate swung with the jar the rudder-stick caught Uncle Ben a turn in the side that sent him headlong from the cockpit. One moment more and the "Winsome Winny" was a hopeless wreck. Clinging in a dazed fashion to her sides, I saw the windward skate wrenched off and sent whirling across the ice. From the grinding under me, as we still went on, I knew the rudder-skate was smashed. Then we stopped, a mess of sails, and spars, and snow.

Uncle Ben came limping up across the ice. Without saying a word, he clambered over to the ice-boat's mast, and pulling down one of the ropes he brought it back and shoved it under my eyes, swearing very softly.

"There wasn't one chance in five hundred million that a bullet'd hit that, Harry—'n' yet it did!"

I had read splendid books of the pursuit of richly laden merchantmen by pirate ships, and of their narrow escapes by shooting away the enemy's rigging, but I believe that if any one had told me the "Winsome Winny" could have been put out of business by a single rifle bullet cutting her halyard I would have laughed until I was red in the face.

Now I looked my amazement. "And there's only one thing left for us to do," continued Uncle, after he had investigated the extent of the "Winsome Winny's" injuries. "Every skate on her is ruined. We'd freeze to death if we tried to go back through this blizzard, so we'll have to brave it out on the Middle Sister."

He pointed across the ice, and I could just make out the shore of the island perhaps half a mile ahead.

"You run ahead and build a fire," he said, briskly, "an' I'll go back after the sheep!"

Running half the distance to get a little warmth in my chilled limbs, I soon came up to the rocky shore of the island. It was thickly wooded on our side, down to the very edge of the ice, and picking out a place protected from the wind and snow I scraped together a big pile of dry twigs and broken limbs, and soon had a merry fire going. A few minutes later Uncle Ben came up, carrying the sheep's carcass across his shoulder.

"This won't be a bad place to camp in for a few days, especially after we get our tent up!" he cried, cheerily. "There's enough mutton here to feed us for a week at least. Like mutton, Harry?"

"Love it!" I replied. Things began to look cheery. By the time we got back with the "Winsome Winny's" sail we were as warm as toast, and Uncle began to sing like a boy. I thought he enjoyed our adventure, though I learned afterward that he was more nervous than he acted. After we had built our tent he leaned back and smoked his pipe, while I tended fire and broiled mutton over the coals with sticks.

It was the carcass of a sheep freshly cleaned.

Our first meal was a regular picnic, attended as it was by our ravenous appetites, and for that matter we spent a comfortable night, sleeping but little, and telling stories nearly all the hours through. But when the next day dawned, black, gloomy, and with the blizzard still raging, even I, who thus far had thoroughly enjoyed being "cast away" on an uninhabited island, began to experience an uneasy feeling that was the next thing to fear. As this day lengthened, and we banked up great piles of wood in front of our tent, I could see that Uncle Ben was disguising his real feelings, so I came out bluntly

and asked him to tell me just how we were situated, and to conceal nothing from me, for I had already guessed pretty near the truth.

"I'd rather be wrecked here in the summer," said Uncle Ben, puffing his pipe. "If it was summer we could build big fires on the shore and attract the attention of passing vessels. But now there's nobody near us for miles and miles."

"And we couldn't walk ashore in the summer," I said. "Why can't we noof it over to the mainland? I can make twenty miles in a day easy."

"If we got out into that once, Harry," said Uncle, pointing where the blizzard hung white over the lake. "we couldn't tell which way from which! A few hours' wandering about and we'd freeze to death. All we can do is to stay here, and—I've been hoping!"

What Uncle Ben's hopes were I did not just then inquire. I felt that he would tell me as soon as he had them straightened out in his own mind, and after I had added fresh brushwood to the fire and came back beside him I found that I was right.

"I telegraphed Ed"—Ed was Uncle Ben's brother—"that we were just about to start for his place across the ice, and we were due there last night," explained Uncle. "Seeing that we didn't show up, the folks will telegraph over to Detroit, and between them they will discover that we are somewhere out on the lake, perhaps dead. Of course they'll search—"

Uncle Ben never finished his sentence. With a whoop he tore through our tent door, jumped clean over the fire, and when I had recovered enough from my surprise to follow I found him surrounded by three men dressed in heavy fur coats, all of them shaking his hands by turns with the finest friendship imaginable.

When they had all greeted me, and trooped into our tent, Uncle Ben drew me slightly aside, and putting his mouth close down to my ear whispered:

"Harry, as long as you live, don't you lisp a word about the smugglers! They're gentlemen, every one of them. They no sooner made a safe landing near Toledo than they sent word to an iceboat club there that we were wrecked near the Middle Sister. They saved our lives—mind you—never lisp a word about the smugglers!"

And I have kept it all a secret until now.

THE BOY PHOTOGRAPHER

THE AMERICAN BOY offers twelve prizes of Two Dollars each for the best Amateur Photograph received during the twelve months in the year, one prize for each month, also a second prize each month, of one dollar, for the next best photograph, the competition to be based upon the originality of the subject and the perfection of the photograph. The contest is open to subscribers only. Photographs will be returned if stamps are sent for the purpose. All photographs entered in the contest and not prize winners will be subject to our use unless otherwise directed by the sender, and fifty cents will be paid for each photograph that may be used, the prize photographs in any event to be our own, without further payment than the payment of the prizes. Write on the back of the photograph its title, with a description of the picture, and the full name and address of the contestant, who in every case must be the artist who took the picture.

inch wide and an inch and a half long. If this is not handy, use a piece of paper, only the paper must be twice as wide. Stick this fuse in the powder, letting the end hang out. Then set the can lid on the top of the camera. Now arrange the group, shutting out all artificial light. Open the shutter of the camera, draw the slide and everything is ready. Light the top of the fuse and stand out of the way. The powder will flash up with a dazzling light, after which immediately close the shutter and replace the slide to the plate holder. No shadows will be seen, as they are behind the objects. An ounce of powder will make 20 or 30 of such exposures in a room 15x15.

Fogging Plates.

During the past summer the writer has industriously watched amateur photographers manipulating their cameras, and he noticed one blunder that was made by the majority. After making an exposure they were apt to replace the slide, that covers the plate, corner foremost. The effect of this was to allow a ray of light to enter the plate holder when the corner of the slide lifted the "trapdoor" that protects the plate when the slide is out. This "trapdoor" is called the plate valve, and it should only be disturbed by inserting the plate holder squarely, so as to exclude all light. Another thing: The focusing cloth should be thrown over the camera when withdrawing or inserting the slide. That is the great secret of clear plates.

Prizes.

The prizes for the two best photographs this month are awarded as follows: First prize, Paul Neal, Keota, Ia., picture entitled "The Overflow;" second prize, Lloyd McKinney, 1036 Grove street, Jacksonville, Ill., photograph entitled "Moonlight on Lake Michigan."

Reduction.

Prof. Lainer gives the following formula by which a very slowly proceeding reduction of the negative is obtained without loss of the delicate half-tones: Fixing soda solution 1:4.....100 c.cm. Iodide potassium.....1 g. After about an hour the reduction is perceptible; after eight to ten hours' action, even a dense fog will disappear. The gelatine film is not attacked thereby; on the contrary, it is hardened somewhat.

The Manipulation of Kloro Paper.

The manipulation of kloro paper is simplicity itself. Print a shade deeper than is desired in the finished print; wash in several changes of water until all the free silver is removed, which can be told by the non-milky appearance of the water; take of water 60 ounces, chloride of gold 2 grains, and neutralize with a saturated solution composed of acetate soda and borax, equal parts; prints should tone in five minutes; then place them in a fixing bath composed of 40 ounces of water to 2 ounces of hypo, and they should be thoroughly fixed in twenty minutes; wash in running water half an hour.

Hurrying Negatives to Dry.

A photographer says he has been able to hurry the drying process with negatives by wiping them gently with a Turkish towel. "I grasp the mass of the towel in the hand," he says, "making it into a sort of a pad, and draw it lightly several times across the face of the negative until the superficial moisture has all been removed. This has the effect of removing chance particles of hair, grit, etc., that often adhere to the negative. It insures even drying, while with such treatment it is usually ready for printing in an hour's time." The experimenter is warned to be very careful when trying this way, as some negatives are much softer than others, and will hardly stand what looks to be rather rough treatment, even if it is done with a Turkish towel.

Improving Poor Negatives.

It is not far out of the way to say that most of the negatives at first turned out by amateur photographers are flat or fogged. How they become so is another question, but the probability is that they are under-developed or over-exposed. Yet these very negatives may comprise subjects of both artistic and commercial value. Prof. H. Kessler, who is an authority on photographic matters, advises the following process with such negatives: The dry negative is bleached completely with bichloride of mercury, washed fifteen minutes, and then blackened with a solution of fifty gr. sulphite of soda and five gr. metol in 500 ccm. of water until the blackening has penetrated to the glass side. Then wash again and reduce with a solution of fixing soda and red prussiate of potash until the picture has become clear. Finally wash again. It is not well for beginners to "monkey" with these chemicals, but it will be all right for those who have had some experience in mixing chemicals, and who desire to save fogged plates.

A PROUD READER.

Taking Flashlight Pictures.

Harry C. Hollingsworth sends the following directions for taking a flashlight picture, with the advice that it will be found satisfactory and economical. He says: Get a good powder. Montgomery Ward sells a good magnesium flashlight powder for 35 cents an ounce. Take a section of broom handle, nearly an inch long, and bore in it a half inch hole half an inch deep. Put this in the lid of a baking powder can and fill the hole in the wood with powder. For a fuse, use a strip of celluloid about an eighth of an

PLAYS Best list of New Plays, 25 Nos. Dialogs, Speakers, Hand Books. Catalogue free. T. S. DENISON, Publisher, Dept. 59, Chicago.

MY BROTHER Rodney was sixteen years of age and I was two years younger the first time we ever saw a railroad train. I remember that we and six other boys of about our size walked nine miles to see an engine and a construction train. I recall our delight when the big, good-natured engineer invited all of us to "pile on and take a little ride" when he had to run the engine and two or three flat cars down the track for a mile or two. We "piled on" to the flat car and sat down on its rough floor with bated breath when the train began to move. I remember that we thought that one of the boys, Joe Rees, was fairly risking his life when he had the temerity to stand up at one end of the car after the train was in motion.

The track was new and rough and the train did not move at a very rapid rate of speed, but to our inexperienced minds we were fairly flying through the air, and I remember that little Timmy Davis, the smallest boy in our party, clung to his big brother Ed and began to cry when the train was fairly in motion. "Oh, let me off! let me off!" he wailed. "I'm going to jump off! I'll get killed if I don't!"

"You'll get killed if you do!" exclaimed Ed, as he laid a restraining hand on Timmy. "But what if the cars run off the track?" "No danger of that. Shut up and sit still!" commanded Ed. I think that we were all rather relieved when we again found ourselves on terra firma, but we boasted loudly because of our ride on the cars when we returned to the little town in which we lived, and I rather think that some of us drew largely on our imagination when we told of the length of the ride and of the rate of speed at which we had ridden.

Three months after this epoch in the lives of my brother Rodney and me, a far more momentous event occurred, for we took a journey of more than a hundred miles on the railroad, which had by this time reached the town in which we lived. One morning father said at the breakfast table:

"Boys, do you think that you could go by yourselves from here to your Uncle Lorin's house?"

This was a surprising question, for our Uncle Lorin Dwight lived in the adjoining state of Illinois, a hundred and thirty miles from our home, and we had never been out of the county in which we had been born, but Rodney made eager haste to say:

"Why, of course we could, father. Why do you ask?"

"Because your mother and I have been talking the matter over, and we have been thinking that it would be a pleasant thing for you to make your Uncle Lorin and your cousins a visit now that the railroad runs directly from here to Wablen. You would have nothing to do but to get on the cars here at ten o'clock in the morning, and sit there until you reached Wablen at about four in the afternoon. It is not more than a mile and a half from the station to your Uncle Lorin's farm. The station agent at Wablen could direct you after you had left the train, and it is almost a straight road from the station to your uncle's house. You could hardly miss the way if you tried."

"Oh, we'd find it easy enough," said Rodney confidently. "Do let us go, father!"

"Oh, please do!" I added, although I knew that father and mother had already definitely decided that we were to go or they would not have said anything about the matter. Before we left the table it was settled that we were to start three days later.

"I think that I will not write your uncle that you are coming," said father. "It will be a great surprise to him and to your cousins and to your grandmother when you walk in on them and introduce yourselves."

"I guess you'll have to introduce yourselves," said mother, "for it is ten years since your uncle and cousins visited us,

and you have not seen them since that time, and they would never know you in the world."

The idea of surprising our relatives in Illinois added to the delight of the proposed journey, and we begged father not to announce our coming in advance.

Very few of the boys in the town had yet ridden on the cars, and Rodney and I were objects of envy and interest. All of the boys we knew were at the station to see us off, and most of our numerous relatives, young and old, in the town were also present. We were the recipients of a great deal of advice supposed to be conducive to our safety while en route.

"Now mind what I tell you, and don't you budge from your seats once until you get to Wablen," said our dear old grandmother Morse, who lived at our house.

"And don't you talk to anybody," added our cautious old Aunt Hannah.

"And don't you, on any account, stick your heads out of the car window. If you do, like as not you'll have 'em snapped off by a telegraph pole, or they might strike a gin some building or something," said grandmother, who had never ridden on the cars, and who had declared her intention of never risking her life on "the pesky things."

"You'll see an axe an' a saw in a rack at one end o' the car," said old Tommy Carter out of his large experience of travel, for he had been "clean over to Pettis County an' back," a distance of thirty miles, on the cars.

"That axe an' the saw are there for you to go an' git 'em an' saw an' chop yourselves out in case there is a smash-up," continued the erudite Tommy. "I wouldn't set right behind the engine if I was you, for if it should blow up, pieces o' the boiler might come kersmash right into the car where you are. They say the safest place on a train is the rear car an' the rear seat. An' don't try

ridin' back'ards. I was fool enough to try it just to see how it would go when I went over to Pettis County, an' it riled my stummick up awfully. Every time you hear the whistle toot you'll know it's a horse or a cow on the track, an' you better say your prayers an' keep your eye on that axe an' saw. I tell you I did when I rid clean over to Pettis County!"

With all this well meant advice ringing in our ears we sped away from the little station, our handkerchiefs fluttering from the car windows, but not daring to look out for a farewell glimpse of our

friends on the platform. Billy Todd, a wag of a boy, had handed us a sealed envelope, telling us not to open it until the train was in motion. When we opened it we found it to contain pictures and harrowing accounts of the most shocking railroad accidents, together with a note from Billy in which he wrote:

"Good-bye, Rodney and Lorin. I have a feeling that I will never see you any more. I dreamed that I saw you two boys ground to pulp in a railroad accident last night, and my dreams nearly always come true. There was a big washout about twenty miles down the track yesterday and they say the track is awfully shaky. Then a good many people think that that big bridge over the Three Falls river is terribly unsafe. I saw a picture of a bridge going down with a train on it in my coffee grounds this morning. Good-bye—forever!"

Our ride was really quite uneventful notwithstanding the dismal forebodings and dreams of Billy Todd. We clung to our seats and I am sure our pulses quickened when we rode over the long and high bridge spanning the Three Falls river, but before the day was done we became quite accustomed to riding on the cars. About the pleasantest feature of the trip was the eating of the bountiful and delicious dinner mother had put up for us, and we prolonged this pleasure as long as possible.

The train was a little behind time in reaching Wablen, and it was nearly five o'clock when we reached our destination. We were the only passengers to leave the train, and when the train had gone on its way we went up to the station agent and asked him if he could direct us to the home of Mr. Lorin Dwight.

"Why, yes," he said. "You follow this road right in front of the station until you come to the fourth brick house on the right after you have crossed the bridge over the river. You can't miss the way. The fourth red brick house is Mr. Dwight's place. You can reach it in half an hour."

Thankful that we were so near the end of our journey, and joyfully anticipating the surprise of our relatives when they should see us, we set out in the direction indicated by the agent, leaving our little trunk at the station to be called for.

"What will Uncle Lorin and grandmother and the boys say when they see us?" I said, as we hurried away over the dusty country road.

"I guess it will be about the biggest surprise they have had in one while," replied Rodney.

"We might pretend that we are a couple of tramp boys at first and ask them to keep us over night," I suggested. "Old Tommy Carter says that you are the 'livin' spit' of father, and you do look a lot like him, so they would probably recognize you on that account," said Rodney. "I think it would be more fun to walk right in and say: 'How are you, Uncle Lorin, and all the rest of you?' I should think you might at least have met us at the train."

We agreed that this would be our most amusing method of procedure, and our pulses quickened when we had passed three brick houses to our right and saw a fourth large, square brick house looming up about a quarter of a mile ahead of us.

"That must be the house," I said. "It is the fourth brick house to the right, and you know that father said that Uncle Lorin's house was a large, square brick building."

"That seems to be the favorite style of architecture in this neighborhood," replied Rodney. "All but one or two of the brick houses we have passed on both sides of the road have been of that kind."

Our hearts were in our mouths as we entered the gate and walked toward the front door between two long rows of flower beds full of old-fashioned flowers. Everything about the place indicated thrift and prosperity. There was a beautiful orchard with bushels of peaches and apples in it back of the house, and beyond the orchard was a wide stretch of shining river with high, green bluffs on the farther shore. All of the shades in the front of the house were drawn and Rodney said:

"It doesn't look as if there was any one at home."

"No, it does not," I said a little moodily. We walked up to the front door and pulled the bell knob. We heard the bell ring at the other end of the hall, but no one came to the door. Then we tried the back door, with the same result. All of the outbuildings were closed, and Rodney said:

"There isn't a soul at home. This is a state of affairs, isn't it?"

"I guess it is a state of affairs that won't last very long," I replied. "I suppose that uncle's folks have gone away for the day, and—O, I'll warrant you that they have all gone to Wilmington to that circus! You know, we saw bills on all the barns on the road saying that

there was to be a circus in Wifflington today. You remember that father said that Wifflington was a big town four miles from here, and that's where the folks probably are."

Rodney came to this conclusion, and then he said:

"Let's see if we can't get into the house. I'm hungry as a coyote and we ate every scrap of the lunch mother put up for us. I know that Aunt Mary wouldn't care if we went into the house and got something to eat."

"It is just what she would want us to do," I said.

A little investigation revealed the fact that a window at one end of a long porch in the rear of the house could be raised, and we entered the house through this window."

"I feel like a burglar," I said.

"Pooh! I don't," said Rodney. "I tell you, we are doing just what the folks would want us to do. How spick and span everything is. Mother has often talked about what a nice housekeeper Aunt Mary is. We might as well bring in our satchel. I'm going to have a good clean up first thing. I feel as if I hadn't had a bath for a month."

"You look as you feel," I replied. "The dirt is fairly grimed in on me. I'm rather glad that we can clean and fix ourselves up before we see the folks. And, after all, the surprise will be all the greater when the folks come home and find us quartered here."

We took off our coats, collars, vests and even our shirts and had what Rodney called a "regular clean-up" in the kitchen sink. Then we put on clean collars and combed our hair and felt greatly refreshed. I agreed with Rodney when he said:

"Now something good to eat and a lot of it will put us in shipshape. Let's go on a foraging expedition."

We found the pantry well supplied with eatables, but by this time it had begun to grow dark and we lighted one of the half dozen lamps standing on a shelf in the kitchen. We had set some pie and cookies and bread and butter out on the kitchen table and I was coming from the pantry with a dish of preserves I had found when we were startled by a harsh voice calling out:

"Ye young scoundrels, ye! I've caught ye! Yes, an' I'll have the law on ye! If ye don't sleep in the Wifflington calaboose tonight it'll be because ye are smarter than me an' my boys be, ye young rascalions!"

We could see several faces at a window at one end of the room, and a shrill feminine voice cried out wrathfully.

"Ain't you 'shamed o' yourselves? To think of two mere boys like you turnin' robbers! It's just turrible! If you'd come hungry to the door an' asked for something to eat, I'd of give it to you freely, but now we'll have to search you before you leave this house!"

"Is that you, Aunt Mary?" I asked feebly.

"No, it isn't your 'Aunt Mary,' an' I don't believe you have any 'Aunt Mary.' Don't add to your sins by tellin' no lies."

"No, lyin' won't save ye," called out the man. "You might as well give up peaceable, for we are three to one. Now on to 'em, boys!"

The door by the window suddenly opened and four lusty boys, ranging from thirteen to eighteen years of age, rushed into the room with their father and threw themselves upon us, while the mother seized a broom in a corner of the room and cried out:

"If you go to fightin' or hurtin' my boys, I'll broomstick ye good."

Rodney was very quick-tempered, and when a boy of about his age struck him on the cheek with his open hand Rodney did not "turn unto him the other cheek also," but doubled up his fist and gave the boy a blow that caused him to yell so lustily that his mother made good her threat of using the broomstick, and it came down with unpleasant force on Rodney's head.

Of course we were soon overpowered and when we were each bound with about fifty feet of clothesline and had been cuffed and beaten with the broomstick a good deal more than was necessary for the subjugation of such youthful desperadoes, the man said:

"Now, what ye got to say for yourselves before ye go to jail?"

"We supposed that we were in the house of our uncle, Mr. Lorin Dwight," said Rodney.

"That don't go," said the man, whose name we knew later was Aaron Dean. "We saw all of the Dwights at the circus an' they rode home right behind us. It's likely they have a pair o' nephews here an' never had 'em with 'em at the circus or said a word about 'em. Do you boys remember what happened to Annylias an' Sapphry for fibbin'?"

Rodney then told the whole story of our unexpected arrival and of how the station agent had told us that our uncle lived in the fourth house to the right of the road. Then Aaron Dean said:

"If you are tellin' the truth you must of misunderstood the agent or else he blundered in directing you, for Lorin Dwight lives in the fourth house on the left of the road, about ten minutes' walk from here. I know that your story ain't unreasonable, but there's been a good deal o' housebreakin' around here this fall, an' I don't feel as if I ought

to let you go just on the strength of what you say, although I will say for it that you don't look like hardened toughs."

"Oh, thank you!" said Rodney with sarcasm that was quite lost on Aaron Dean, who added:

"I kin git Lorin Dwight here in less than fifteen minutes, for my team ain't unhitched yet. Here, Fred, you take the team an' go an' fetch Lorin Dwight here right away."

Fred, the oldest Dean boy, had told our story to Uncle Lorin before he reached the house, and the moment he saw us, he said:

"Why, of course these are my brother Henry's boys! This one is Lorin, my namesake, and the very image of his father! Well, well, boys! This is rather a cold welcome, isn't it? I declare if— then, being one of the merriest of men, he burst into shouts of laughter. This speedily changed the attitude of the Deans, who were really very excellent people, and they unbound us with all possible speed and with profuse apologies for their treatment of us."

"I own I acted rather hasty," said Mr. Dean, "but there has been a lot of housebreakin' when folks was away from home around here of late, an' I was dead sure you boys were of that sort when I came home an' saw a light in the house, an' found you here. You'd been welcome as the day to all you wanted to eat if I'd known who you really was."

A warm and joyous welcome awaited us in our uncle's home and we spent four delightful weeks on his farm. During this time the Dean boys became our warmest friends, and many a good swim we had with them and our cousins in the beautiful river. But Rodney and I came to the wise conclusion that when one is about to take a journey it is not best to count too much on "surprising" one's friends, and I am sure that we shall never forget our own surprise when we found that we had invaded the domain of Aaron Dean instead of that of our uncle. Rodney advised that we "keep mum" about it, but I have not done so, as you see.

CORNISH
PIANOS AND ORGANS
FREE IN YOUR HOME FOR A YEAR

Sold From Factory to Home Direct.
SAVING ONE-HALF.

YOUR MUSICAL EDUCATION FREE.

Fine Deeds by Brave Boys—H. Irving King
No. 1—HORATIO NELSON

NO SAILOR, unless it be Farragut, has achieved such undying fame as Horatio Nelson, the British Admiral.

As a little boy Nelson showed those qualities which afterwards made him great. He distinguished himself in the naval service of his country before he was out of his teens.

Weak and sickly as a boy he was filled with indomitable pluck and courage. The free life of a man of war hardened a boy naturally far from strong, and built up a constitution which originally had not been robust.

Horatio was twelve years old when, as a pale, shivering, little atom of humanity, he went on board the man-of-war *Raisonnable*, commanded by his uncle, to take up his duties as a middy in the British navy.

In order that he might get practical experience at sea, his uncle sent Nelson on a trip to the West Indies, from which he returned a good sailor and with his health much improved.

He went to the guardship lying in the Thames and as a reward for the progress he made in the study of navigation, was put in command of one of the small boats attached to the large ship and used to patrol the channels leading up to London. So by the time he was fourteen he was a good navigator, a skillful seaman and a capable pilot.

An expedition was fitting out for Arctic exploration, and as it was to be a work of hardship and danger it was decided that only grown men of good physique should be allowed to go. But Nelson was filled with a desire to see the wonders of the regions of perpetual ice and snow and through the influence of his uncle, Captain Suckling, he was allowed to go with the expedition.

The exploring ships remained in the Arctic seas all summer and met with many adventures, narrowly escaping from being caught in the ice and crushed,

or held prisoners through the long night of the northern winter.

Young as he was, Nelson had command of one of the ships' boats and when the vessels seemed hopelessly hemmed in by the great fields and floating mountains of ice he was sent to find passage to open water.

On one occasion the boy officer was discovered by his captain out on an ice floe at some distance from the ship, engaged in a fight with a big polar bear. He had fired his gun without killing the bear and was now about to attack the enraged animal with his clubbed musket.

The captain fired a gun from the ship which scared off the bear, and probably saved Nelson's life.

When the captain scolded him for his rashness the boy replied, "I wanted to kill the bear in order that I might carry the skin home to my father."

After many adventures and hardships, in all of which young Nelson so conducted himself that he won the admiration of both officers and men, the exploring vessels returned to England,

where Horatio, now just turned fifteen, found himself something of a young hero among his friends and relatives and throughout the navy.

From being a pale, sickly boy, Nelson had become a short, stout youth of florid complexion and athletic appearance. But being ordered on duty in East Indian waters he fell ill and returned home broken down in health and much discouraged.

One day, however, after a long and gloomy reverie he said to himself, "I will be a hero, and confiding in Providence brave every danger."

He has left on record that ever after that hour he did not doubt that he would one day become a great man. His health improved fast and at the age of eighteen he was commissioned a lieutenant and sent on a voyage to the West Indies where he was made commander of one of the small vessels which accompanied the frigate *Lowestoffe*.

The Revolutionary war was on then and Nelson's first exploit on reaching his new command was to board a captured American privateer in a sea so heavy and angry that the other British officers had hesitated to try it.

At twenty Nelson was made captain of the British man-of-war *Badger*. From that time his rise in rank and reputation was rapid until he became the idol of his countrymen and seemed to carry victory with him wherever he went.

While Nelson was a boy he was always studying in spite of his active life as a sailor, and when he was eighteen he passed his examination for the rank of lieutenant with honor, displaying such knowledge of his profession and a fund of general information that surprised the officers who examined him.

It was work and study with him all his life until he fell dead on the deck of his flag ship in the moment of victory in the great naval battle of Trafalgar.

At the Conchos—William Murray Graydon

AM, would you like to accompany Raikes to Parral in the morning? the ride will give you a good idea of the country, and you will see a typical Mexican town."

The speaker was Mr. John Sanderson, manager of the Recolote silver mine in the northern part of Mexico, and the slight, delicate young man was his nephew, Sam Hillard, who had been banished to Mexico by the doctor's advice to recruit from an attack of illness brought on by too severe study at college.

"I should be delighted, uncle," he replied. "No danger of encountering outlaws on the way, I suppose?"

Mr. Sanderson laughed. "No," he said, "we have never had any trouble of that kind. This part of the country is comparatively free from such characters."

Parral lay twenty miles distant from the spot at the Altares mountains where the mine was located; and once a week some one drove over to the bank which several enterprising Americans had started, to draw and bring back the money to pay the men.

This important mission was usually performed by Henry Raikes, a tough, wiry fellow of thirty or less, hailing originally from Vermont, now an overseer at the mine. He was generally accompanied by the assistant manager, but on this occasion Mr. Johnson was ill, and Sam Hillard took his place.

They started from the mine at daybreak in a rude but solidly constructed wagon, drawn by two mules that had been especially trained to the service, and were fleet travelers, with great powers of endurance.

The road down the mountain spur was rugged and winding, but at sunrise they reached the broad plain which stretches clear to Parral, and was covered for the most part with stores and lava, with the exception of the slight "Barranca" or the ravine through which flowed a tributary of the Conchos river.

This lay midway between Parral and the mine, and the road crossed it at a shallow ford.

The town was reached early in the forenoon, and the couple drove directly to the bank, where the money was put up in three canvas bags, containing gold, silver and notes, the whole aggregating nearly three thousand dollars.

"Now, take good care of it, Raikes," said the affable cashier; and Raikes nodded assent, little thinking how soon that promise would be put to the test.

They drove slowly out of Parral, eating the lunch which they had brought with them from the mine.

As the ravine was approached, Raikes whipped up the mules.

"I always feel a little nervous while going down to that ford," he said to his companion, "the brush is pretty thick right there, and it's just the spot that some cowardly Mexican would choose to waylay us."

"But I thought there was no danger," remarked Sam.

"There isn't either," said Raikes; "what I mean is that if there were any bad characters hanging about here, they would be found in just such a place. I'm not afraid," he added, tapping the big revolver at his belt.

Raikes put on the brake as they rode down the sloping side of the ravine, and Sam looked uneasily at the dense timber and shrubbery that skirted both sides of the path.

A sudden exclamation from Raikes drew his attention to the front, and he was startled to see two mounted "Greasers" standing in the center of the road, with revolvers leveled at his own and his companion's head.

They were desperate looking fellows, he saw at a glance, dressed in greasy buckskins, with broad sombreros shading their swarthy faces.

"Throw up your hands," they shouted in Spanish, and Raikes, who understood the words and saw that resistance was useless, elevated both arms instantly, dropping the lines to the ground.

Poor Sam failed to comprehend, of course, and Raikes' whispered injunction to throw up was unheeded. Hardly conscious of what he was doing, he dropped one hand to his side—a fatal move, for the Mexicans, supposing him to be reaching for a weapon, opened fire instantly, and the unfortunate lad tumbled from the seat into the rear of the wagon.

The sharp reports, the flashes, and the curling smoke were too much for the mules, and they plunged forward with a frantic bound, sweeping past the astonished greasers, and turning at a sharp angle down the bed of the river instead of dashing across the ford.

A few yards below the Conchos was swift and deep, and just as the Mexicans wheeled round and opened fire, mules, wagon and all plunged down the steep bank into the water, fortunately without turning the vehicle.

The Mexicans opened a brisk fire on the mules, killing both the animals almost instantly. But this time Raikes was lying flat on the bed of the wagon, squeezing closely against the side. Sam, who was lying motionless under the seat, he believed was dead.

The water was several inches deep in the wagon, and Raikes' revolver was so completely soaked as to be useless.

There was no hope then of defense. The wagon would drift down to the next shallow place, half a

mile distant, and he would probably be shot while the assassins made off with the money.

Venturing to peep over the side, he observed that the strong current had carried them many yards out from shore. A second glance showed him the two Mexicans trying to force their unwilling horses into the water, twenty yards above. He continued to watch their movements, and just what he made up his mind would occur came to pass.

Finding they could not swim down the river after the wagon the Mexicans backed on shore again, and clapping spurs to their horses rode up the bank.

A moment later the brisk clatter of hoofs rang out on the stony plain beyond the edge of the ravine. They were making a short cut to reach the next fording place a half mile below.

A thrill of hope ran through Raikes' mind as he realized the escape that was open to him. He was a good swimmer and it would be an easy matter to reach the opposite bank. He crept forward and bent over his companion. Sam's face was pale, and the front of his jacket was flecked with red.

"Poor fellow," muttered Raikes; "it's all up with him. I'd better pull out while I have a chance and give an alarm. The miscreants may be caught yet."

He threw off his coat and trousers and was about diving from the end of the wagon, when his eyes fell on the canvas bags lying under the seat. Instantly a clever plan flashed into his mind by which the money might be saved from the Mexicans, and what was of more importance, might even be recovered eventually.

But was there time to spare? The wagon, still attached to the dead mules, was drifting rapidly downward in the deep, swift water, and already Raikes could hear the low murmur of the shallows round the bend. In five minutes, at the most, he

Raikes dove from the rear end and coming to the surface twenty feet away, struck out for the shore with all his strength.

The opposite bank of the Conchos was bordered with a heavy growth of weeds. If he could reach these he was probably safe.

But the longed for refuge was still far away, when the cries of the baffled Mexicans came to his hearing.

Taking a long breath he dove far under and swam along the bottom of the river until his brain seemed bursting.

As he shot to the surface two or three bullets whistled by his ears, but the friendly reeds were close at hand and another short dive carried him into thick shelter.

He heard the Mexicans still blazing away at the spot where he had been seen last, but none of the shots struck him and in a moment more he was safe in the timber.

A careful peep through the trees showed him the two angry greasers wading rapidly for his side of the river.

Possibly they believed he had some of the money with him, though revenge for the loss of the plunder was probably their chief motive.

Raikes had no desire to meet them, and as rapidly as possible he darted along the shore toward the upper fording.

Here fortune favored him, for half a dozen sun-burned Mexicans were on the point of wading their horses across, bound to Parral on a holiday trip, and they readily consented to accompany him back.

They arrived too late to capture the miscreants—they must have taken alarm and fled—but the wagon was found stranded on the shallows, and to Raikes' joy and surprise Sam Hillard was sitting up against the seat very weak and dazed.

The strong current had carried them many yards out from shore.

would float into the hands of the expectant Mexicans below.

The struggle was a severe one. It was a question of life or honor with Raikes. He could escape now, if he chose, while a slight delay would probably cost him his life. "I'll do it," he said, resolutely, "no one shall say that Henry Raikes shirked his duty."

He seized the nearest bag of coin, and just as the wagon drifted between two rocks thirty feet apart, he dropped it gently over the side, and down it went with a light splash.

"I'll remember that location," he muttered, "if I live to remember anything."

He lugged the second bag upon his knee and dropped it quickly after the first.

"About ten yards below," he said aloud, measuring the distance with his eyes.

Not daring to look ahead lest his resolution should fail him, he lifted the third and last bag. Directly opposite on the right shore was a huge, dead tree with whitened trunk and limbs.

This was as good a landmark as he could hope to find, and, with nervous haste, he dropped his burden into the water.

The money was secure from the cowardly rascals—that was certain, but how about his own safety?

He turned quickly as the wagon swept round the bend. Barely a dozen yards below him stood the expectant Mexicans waist deep in the riffles.

With one last look at his unfortunate companion,

The Mexicans had not molested him, thinking that he was dead.

An examination showed that one ball had passed through the fleshy part of his shoulder, while the other had glanced harmlessly from one of his ribs.

Raikes made no mention of the money to his new friends, but mounted behind them, he and Sam were taken back to the mine, where they found a search party about starting out to meet them.

Sam speedily recovered from his wounds, and a few days later, under Raikes' directions, the lost money was recovered from a boat by a skilled diver, for the Conchos was not more than ten feet deep at that place.

It was not an easy task, however, for it was necessary to tie a cord to each bag under water in order to draw it to the surface, and the last bag which Raikes had sunk opposite the dead tree was only found after a dozen attempts. The paper money was badly injured, of course, but not beyond redemption.

The two desperadoes were never captured though a hot search was made.

Raikes was properly rewarded for his bravery, but he never afterward passed the fording of the Conchos without a shudder, and as for Sam Hillard he positively refused to make another trip to Parral to bring money back.

"One experience of that sort," he declared, "was quite enough."

The Agassiz Association

THE AMERICAN BOY is the only official organ of the Agassiz Association and should be in the hands of every member. All correspondence for this department should be sent to Mr. Harlan H. Ballard, Pittsfield, Mass. Long articles cannot be used. THE AGASSIZ ASSOCIATION welcomes members of all ages, and any one who is interested in any form of natural science is invited. Established in 1875. Incorporated in 1892. Short notes of personal observations are particularly desired for use in the A. A. department. Send illustrations when convenient. Questions are invited. Address H. H. BALLARD, Pittsfield, Mass.

Chimney Swifts Again.

Nothing yet published in this department of THE AMERICAN BOY has aroused a more widespread interest than the short article on chimney swifts, printed in November. We then printed the following four statements about this bird, offering a handbook and badge of the A. A. for the best letter, either proving or disproving them.

1. The chimney swallow is abroad earlier in the morning, and later in the evening than any other bird.

2. When the country is thinly peopled it seeks a high, hollow tree, usually some lofty elm, which it uses in place of a chimney.

3. The nest is quite small and has no lining.

4. If rain softens the glue which holds the nest to the chimney, and it falls, the young birds creep up the bricks, holding on by their sharp little claws.

The prize has been awarded to Mr. F. Seymour Hersey, of Taunton, Mass., who writes, under date of November 15:

The chimney swift arrives early in May and remains until about the middle of September. My earliest and latest dates are May 3 and September 17. In the spring, during the first week or two after their arrival, they resort to some unused chimney in which to spend the night. I know of such a one—a deserted mill chimney—where I have often seen large flocks of these birds. At the base of this chimney I sometimes find a dead bird. The plumage of these is generally faded and worn, and their bodies so emaciated that I believe them to be, in all probability, old birds which have succumbed to the long journey.

Almost any day in early June one may see the chimney swallow gathering material for its nest. Unlike all other birds with which I am acquainted, this

more than other birds, inasmuch as they are free from the attacks of all the enemies that prey upon terrestrial and slower-flying birds. The young, however, are subject to a peculiar danger. The nest sometimes becomes loosened, by rain or other causes, from its place on the wall of the chimney, and it then drops to the hearth below. If it contains eggs, these are generally broken. On July 15, 1901, a nest containing five young birds fell into the fireplace of my room. My attention was first attracted to them by the sound of their voices. I removed the fireboard and substituted a frame covered with screen cloth. They would climb up this as far as the top, but would go no farther. Their mother seemed unable to find them, and, in spite of all I could do, they died at the end of four days.

They were entirely covered with pinfeathers, but none of these had split the sheath and become perfect feathers. It may be that they would all have opened together, feathering the bird within a few hours, as is the case with the yellow-billed cuckoo.

Honorable mention is awarded to Charles A. Coolidge, Chicago; Willie L. Durant, Bromley, Ala., and Sigel Mullenix, Folsom, O.

Mr. Mullenix tells of a nest, loosened by rain, that fell with young birds. The old birds came down and fed the young at the bottom of the chimney, until they were able to fly. They could not fly up the chimney, however, but crawled up to the top.

Mr. Durant has known these birds to nest in a hollow poplar. He has seen young birds fallen in a chimney, but they did not climb out. Mr. Coolidge has seen swifts abroad at five o'clock, a. m., and at seven p. m. He has found that the young cling so tightly to the side of the chimney that one cannot get them off without hurting them. L. H. Denison, of Harrison, Me., has a nice nest.

Dwars Bemfield, Pleasant Valley, Oregon, writes a good letter, but has evidently mistaken the bird, for he speaks of "nests six inches in diameter, lined with feathers and hair;" and one little friend tries to prove that chimney swallows nest in hollow trees, by saying that it would be "natural" if they could not find a chimney; and he adds: "I never saw a nest fall, but I suppose the young would crawl up if they were able." It is to train our members to "see," and not to suppose, that the A. A. exists.

The prize offered for best photograph of a chimney swift's nest is awarded to Mr. W. M. Robinson, Nunda, N. Y., whose interesting picture was ingeniously secured by gluing the nest carefully to the outside of the chimney in which it was found.

No one has sent a photograph of a hollow elm. We asked for one, because we had been asked whether the elms ever decay so as to become hollow. Has any one seen a hollow elm?

The address of Chapter 34 has been changed. It is now Geo. P. Gifford, Jr., 323 Park street, New Bedford, Mass.

Nature's Funerals.

Which reminds me to ask our readers what becomes of the bodies of dead birds and animals. Every year about as many millions of wild creatures die as are born, yet their bodies are rarely found in field or forest.

We invite letters from our readers on this interesting subject. It's only fair that we should do our part, however, and so we will tell you of one of nature's wise methods of disposing of her dead, particularly as this will answer a question sent by Clyde Stewart, of Augusta, Me. Mr. Stewart writes: "I send you an insect which I have never seen before, resembling both a bumblebee and a beetle. Will you tell me what it is?" The insect is the wonderful "burying beetle," necrophorus; and its work as a sexton is well described by another Agassiz friend, as follows:

"One morning my brother killed a field-mouse in the garden. Soon after I noticed that the mouse was not where we had left it, and looking around I found two burying

Once a day our Government Observers tick the correct time to thousands over the wires.

consists entirely of twigs, which are not gathered from the ground, but are taken from the trees while the birds are in full flight. If you watch one of these birds at this time you will notice that it regularly passes some small tree, one or more branches of which are dead, and that at each passing it barely escapes these dead branches. If you are near enough, you will also notice that after the bird has passed, the twig is left vibrating. The secret of this is as follows. As the bird passes the twig it grasps it firmly in its feet, and the force with which the bird is flying snaps the twig short off. These twigs measure from one to three inches in length. The twigs are then firmly cemented to the inside of the chimney, which has been selected, and when the nest is completed it is little more than a slightly hollowed shelf projecting from the wall of the chimney. An average nest measures about three inches across the top from rim to rim, and is not over three-fourths of an inch deep. It is said that the swift always chooses an unused chimney, but I have known a pair to nest in one in which a fire burned every evening till within a day or two of June 1, and even occasionally after nest building had started. The nest is generally placed at least ten feet from the top. In this are laid four or five white eggs about June 15.

When hatched, the young seem to require a great deal of food, if one can judge of the amount by the number of the parents' visits. These continue long after other birds have retired for the night, and the last robin's voice is stilled. I have often sat after dark and listened to the chatter of the parent birds as they approached the chimney. Then all would be quiet for a second as they hovered over the top, and the next moment I would hear the rushing sound made by the air as they descended, and then the faint peepings of the young. This is often continued as late as ten o'clock, and I have heard the peeping of the young as late as half past eleven. Just before sunrise, when the first birds are beginning their matins, you will again hear the clatter of their voices as they circle about for their breakfast. The adult birds seem to be favored

beetles at work. The male did most of the digging. He kept marching round and round the mouse, throwing up a little earth at each round, till he had a sort of rampart built around the body. He made his first circuit about half an inch from the mouse, and threw the earth outside the ring. He used his head in making this furrow, holding it to one side, sloping something like a ploughshare. He then made a second furrow inside the first, throwing the earth into the first furrow. This plan he followed until he got under the mouse; throwing the earth from each new furrow into the one he had just completed. The weight of the mouse caused it to sink lower and lower as these circuits were made under it, until it was nearly covered, when the loose earth was spread over the surface. The female then deposited her eggs in the carcass; the two gorged themselves, and after that, as they were about to fly away, we captured them. While the male was digging, the female was hiding within the body of the mouse. Once she came out, rested on top of the

*Saurians
and Alligator
TALES*
R. G. ROBINSON

MANY thousands of years ago, in what geologists call Mesozoic time, the earth was inhabited by gigantic reptiles, amongst which great saurians were conspicuous.

Some of these, judging from fossil remains still in existence, must have been forty, possibly fifty, feet long, and most curious and hideous in form, as, for instance, the plesiosaurus, which, if accounts are true, "had the head of a lizard, the teeth of a crocodile, the neck of a serpent, the ribs of a chameleon, the paddles of a whale, the trunk and tail of an ordinary quadruped"—altogether an ugly sort of animal to meet in a lonely wood or puddle of water.

The saurians did not all perish with the Reptilian Age. Many varieties are still in existence, and of these some are terrestrial, some are aquatic, some are at home either in water or on land. Of those in the United States, the largest and the smallest are found in Florida.

One of the least, possessing an inch and a half of body and about as much of slender, quivering tail, is catching flies on my desk as I write. A pair of them has had a home in some nook or corner of the desk for years, and have become very tame and familiar. They are a brownish drab in color, in harmony with the desk, and as fly catchers are more expert than a boy ever becomes in catching ball.

It is interesting to watch one of them stealing and creeping toward a victim. The eyes glitter, the little throat swells and throbs with excitement, the end of the tail switches nervously, and the whole attitude is indicative of the emotions a human hunter feels when his prey is in sight. Every movement of the fly is watched with evident intense anxiety. Now the little fellow creeps forward a step or two; now he crouches as if afraid of startling his game, and for an instant or two, except for his short, quick breathing, he is as motionless as a graven image; then presently—he always knows when the right time comes—with a movement too quick for the eye to follow, he leaps on his prey, and then his tail waves and his lips smack as the fly slips down his throat. He rarely ever misses, though his jump is often twelve to eighteen inches. One of them sometimes makes me jump by leaping to my shoulder after a fly, for though it has happened often it always gives a creepy sensation to feel the sharp little claws scampering around my neck.

The pair come out every morning and hunt for an hour or two, in which time they catch nearly every fly in sight and make a meal hearty enough to last twenty four hours; at least they are not seen again until the following morning. Though called chameleons in Florida, they are quite unlike the animals described by naturalists under that name. The latter are found chiefly in the hottest parts of the tropics and are slow and sluggish in movement, while these little Florida lizards are exceedingly quick and active. Like the chameleons, however, they are saurians, quite as much so as the most terrible of the ancient tribe.

The largest saurian found in Florida is the alligator. The other chief representatives of this particular branch of the family are the gaviol of the Ganges, the crocodile of the Nile, and the cayman of the Amazon. They are all closely related, but while nearly the equal of any of them in size, the alligator is the least ferocious. The others, if reports are true, are very savage and dangerous.

Until recently alligators had a reputation for ferocity which they do not deserve—in Florida at least. They are ugly and repulsive in appearance, look mean enough to be guilty of any atrocity, and when cornered or wounded will fight desperately; but instances in which they have willfully and voluntarily attacked persons are rare, and Floridians do not hesitate to swim or bathe in waters they are known to inhabit; yet unprovoked attacks have occurred, and it is wise not to tempt them too far, for they have capricious and indiscriminate appetites.

The mother alligator lays a nest of thirty or more eggs in the mud a short distance from water and covers it over with weeds and grass, the eggs being hatched by heat from the decaying vegetation. The eggs are perfectly oval in shape, a little longer than goose eggs

but not quite so large around. The young ones are six to eight inches long at first, and at once make for the nearest water. They are amphibious, but never go far from water except when crossing from one stream or lake to another, when sometimes they make long land journeys. On such occasions it is not unusual to meet them in the woods, where, not being at home, they are clumsy and slow of movement with everything except the jaws.

The extreme length attained does not exceed fifteen to sixteen feet, and one more than fourteen feet long is uncommon. They are omnivorous eaters, taking anything their jaws can close on—whether dead or alive, whether fish, flesh or fowl, and when other food is scarce they eat each other, big ones swallowing little ones; and they are very sly and expert in capturing a meal. Their eyes bulge out like a frog's, only more so, and they can float with only the eyes showing above water. When one sees a possible victim he swims toward it and as he comes near goes so slow that the motion is hardly noticeable, his savage little eyes looking like innocent chunks of driftwood floating on the surface. The eyes drift by at a distance of two or three feet, and then, with a sudden flop and bend, the tail slaps the victim into the wide open jaws.

Florida cows are fond of feeding on the aquatic plants and grasses along the shallow margins of streams and lakes, and it is a curious, though by no means unusual thing, to see the heads of a herd of cattle moving about over the surface of water a hundred feet or more from land, while the bodies are wholly submerged and out of sight. In such a position the largest cow is an easy prey to an alligator. Seizing her by the hind leg the beast backs into deep water, turning as it goes, twirling the struggling cow over and over and quickly drowning it; then the carcass is consumed at leisure.

An alligator is only equaled by a bulldog in jaw power and tenacity of hold. When the cruel teeth close on anything there is no letting go, and if its prey cannot be dragged off readily it is accomplished by a few quick turns, revolving the victim also, as illustrated by the following true incident; it has been told before, but will bear repetition.

Two Floridians were dragging a seine in water about three feet deep when a large alligator, irritated by the seine or incited by an empty stomach, seized one of them by the arm and tried to drag him into deeper water. The man, sturdy and strong, with feet firmly planted on the bottom, was a match for the beast in the mere matter of pulling, but it suddenly twirled over sideways, dislocating his arm and turning him upside down. He was then completely at its mercy, or would have been but for his companion, who reached him in time to perform a feat deserving the brightest sort of medal for cool, quick courage and daring. Taking in the situation at a glance, without a moment's hesitation, he leaped astride the beast and thrust his thumbs into its eyes, blinding it completely. Such rough and heroic treatment caused the beast to let go its hold, when its gallant rider slipped off, leaving it to plunge and charge, while he carried his wounded companion ashore.

Another true adventure, which has been told before, was as follows:

A man named Neal lived on the shore of Lake Maggiore, in Florida. From his piazza one afternoon, he saw a large alligator floating along at some distance out in the lake. Getting his rifle he fired at it, and had the satisfaction of seeing it flop and flounder and turn over as if dead. Leaving his gun, he ran down to his boat and paddled out to secure the beast, which he meant to do by tying a line to one of the feet and towing it ashore.

Bringing the boat alongside, he leaned over from his seat in the stern and grasped a paw, but his touch acted on the animal like a galvanic shock. It proved, indeed, a very lively corpse, leaping entirely out of the water it came down full length into the boat, its great jaws almost touching Neal's feet while its tail dangled and flopped over the bow.

Neal, poor fellow, was in a fix. The lake was twenty feet deep and he could not swim a stroke, or he would have

surrendered the boat at once. As it was, he sat gazing at the beast, half dazed by the peril of the situation. His young wife had seen it all from shore, but she was powerless to help; there was no other boat and the nearest neighbor was miles away. At last she called across the water, "Paddle backward, easy, Tom." Roused by her voice, Neal began paddling very softly, fearing each stroke would incite an attack from the beast. After what seemed to him hours he felt his end of the boat grate on the sandy bottom, then rolled out backward, scrambled up the bank and sank down in a fit of nervous exhaustion. His wife, almost as good a shot as he, finished the animal with another rifle ball; but even in its dying struggles, it knocked the boat into kindling wood.

The little Florida chameleons and civilization get along very well together, but with alligators it is different. They do not take kindly to having their teeth made into breastpins or their hides into shoes or pocketbooks, and as civilization advances they are retiring very fast—into articles useful or ornamental. A few years hence, at the present rate of destruction, they will be as scarce in Florida as buffalo are now on the Western plains.

A Young Naturalist

Loveday A. Nelson

Bloomington (Ill.) boasts of a ten-year-old boy, Guy Holloway by name, who is a young naturalist of note. Very early he developed a fondness for books about birds, insects and other animals. At the age of five he was catching butterflies in order to study them and get acquainted with them. He soon learned how to catch and prepare them for mounting. Today he has 125 specimens, all mounted and labeled. He spends much of his time in examining leaves, plant stems and the trunks of trees and finding the hundreds of little living things which escape ordinary eyes. When he finds a tiny egg he watches to see how long it takes to hatch. If he finds any curious formation that looks like eggs on a leaf or branch he takes it home and watches the daily development of the formation. In the same way he studies caterpillars, frogs, toads,

GUY HOLLOWAY.

snails, crawfish and tadpoles. He is also gathering specimens of rocks and shells and is studying about them. Indeed, he seems to be so in love with mother nature that he is constantly with her and can scarcely be lured away from her. When a very young boy he was sickly, but his out-of-door life has brought him health and vigor. He wastes very little time on the street. For weeks and weeks he saved money to buy Holland's Butterfly Book, and at Christmas time he was able, with his money that he had saved and that which his friends gave him, to buy the coveted book. This, with Scudder's Book on Butterflies and other works on science which are usually read by grown-up people only, is the daily food of this boy. How many ten-year-old readers of THE AMERICAN BOY can tell a moth from a butterfly, a frog from a toad, what kind of leaves certain species of caterpillars eat, what becomes of the common green tobacco worms? Guy is fortunate in having a sister younger than himself who is a junior partner with him in his undertakings.

Two Thousand Pigs.

A man who lisped wanted to put two sows and two pigs in his neighbor's pen. The way he asked was this: "I have juth been purthathing thome thwine; two thowth and pigth. I want to put them in your pen till I can fix a pliaith for them." The neighbor remonstrated, explaining that his pen wouldn't hold two thousand pigs. "I didn't say two thousand pigth but thowth and pigth." And thus it went on for some time until the lisper declared that he meant not two thousand pigs but two thowths and two pigth.

Whence Criminals Come.

There are in every great American city thousands of families whose lives are a desperate struggle to secure food, clothing and shelter of the most meager kind. Husband and wife both labor early and late. There are multitudes of cases where women are left destitute with large families of children by the death or desertion of husbands. In both classes of cases the children are left without proper care, their playground is the street, their companions are often those who are older and depraved. They have not clothing suitable, neither have they the books with which to attend school. Ragged, dirty, they soon learn all the accomplishments of the street—to lie, steal, fight, chew and smoke, swear and drink, until in a few years the boy who under proper training and surroundings might have become a useful man is really a rowdy and a tough; he becomes the terror of decent men and a menace to the state. During great strikes that sometimes take place in the cities the soldiers are called out not so much to defend life and property from the strikers themselves as from the lawless element who cannot or will not work. Watch the records of the police courts of any one city and note the large number of cases of boys under twelve years of age who are imprisoned for stealing or other petty crimes. Multiply, then, this number by the number of cities and then think of the great number of boys really guilty of petty crimes who are never apprehended, and you can easily forecast where the criminals of the future are to come from. By birth and environment, the unfortunate children of wrong and neglect are among us; and one great question that faces the American citizen to-day is whether he will take hold of the problem and solve it in a way to protect society or whether he will allow these victims of birth and surroundings to solve it in their own way. This, of course, is the dark side of the picture. The brighter side may be seen if we turn to the records of the societies organized for the purpose of saving boys in almost all of our large cities.

Another Young Barber.

Fred Guerini, attired in knee pants and so young and small that it is necessary for him to stand upon a drygoods box in order to reach his customer's face, has for two years been employed as a professional barber at Ashtabula, O., harbor. Ashtabula harbor has long been known as the greatest iron ore receiving port in the world and, on account of the large number of sailors and transients who are employed in the various lines of traffic connected with the Great Lakes, the few barber shops

FRED GUERINI.

have all they can handle, especially during the busy season. As Fred Guerini is employed in one of the busiest of these shops he has little time for anything except business.

Most people think Fred pretty young to engage so actively in business day in and day out, but he says he enjoys the work and, besides, he is able to save his money, which, if he is wise, as his business career shows him to be, he will later expend in an education. Fred began work in a shop at the age of ten and he has worked steadily for two years. The box on which he stands while using his razor is about ten inches high. Fred shows his business tact and capability also in being able to talk entertainingly to the man in the chair.

Money Makers.

PRESTON HAWTHORNE, Timpson, Tex., age eleven, has been for the year last past head clerk in a grocery store that carries a stock of \$2,000 worth of goods. Often he is left alone for days at a time with the management of the entire business in his hands.—WILLARD C. BODGE, age fourteen, Waltham, Mass., makes \$1.20 a week carrying papers, delivering forty papers a night. He has two shares in the Waltham Co-operative Bank, which represents \$38. Willard is in the Waltham Grammar School.—FRANK D. HUME, St. Thomas, Ont., earned his money for THE AMERICAN BOY working in a clothing store during the Christmas holidays.—STANLEY BRINSON, age thirteen, Portsmouth, Va., works in his father's grocery. He says the clerks say that he's all the time eating. He is sorry for a boy who doesn't work in a grocery. He earns one dollar a week, and all he has to do, he says, is to drive the wagon.—FRED SCHULTZ, Milwaukee, Wis., age thirteen, owns a twenty dollar wheel which he earned by selling coffees, teas and spices on a commission of 25 per cent. Fred is something of an artist, and sends us a sample of his work in colors.—FRED LOGAN, Amesville, O., by saving his pennies, nickels and dimes, has over \$200 in the bank.—HARRY MILLER, Akron, Pa., earned the dollar to pay for his AMERICAN BOY by raising young pigeons and selling them to the poultry dealers.—PERCY ALLEN, Petoskey, Mich., age twelve, for the past three years has bought nearly all his own clothes with money he earned selling flowers to the people who summer at Petoskey. One summer he cleared fifteen dollars. He also gets pay for carrying laundry from the summer cottages. In winter time he buys all his school supplies. He also earns money by selling old rubbers, paper flour sacks, doing errands, peddling bills, etc. He earned all his Christmas money last Christmas.—JAY, H. SUTER, Naugatuck, Conn., earned his subscription money by picking berries.—EARL RHINEHART, Fruita, Colo., earned his subscription money in 1901 raking leaves, and in 1902 by pulling turnips. The boy who earns money with which to buy THE AMERICAN BOY can enjoy it all the more by so doing.—HERBERT C. THOMAS, Terre Haute, Ind., has a paper route and on Saturdays works in a clothing store and makes \$2.50 a week, altogether. He attends high school, and during the vacations he is employed in the clothing store. He has bought nearly all his clothing and has \$100 in bank.—RAY GILLMORE, age eleven, Concord, N. H., earned his subscription money selling homemade candy, recipes for which he found in THE AMERICAN BOY.—THEODORE C. JOHNSTONE, Hawkinsville, Ga., received from his father the use of three-fourths of an acre of land. The boy planted it to cotton and did most of the work. He hired some of the picking doing his old clothes in payment. He cleared \$3.50, one dollar of which he used for THE AMERICAN BOY. The work taught him a great deal about cotton and gave him a useful experience.—TOM BARNETT, Eureka Springs, Ark., age fourteen, worked last summer as a bell-boy in a hotel at twelve dollars a month and earned all the money for his winter clothes.—JACK BARKER, Calais, Me., earned his subscription money by working in a printing office after school. He is a typical American boy and owns a boat, gun, snow shoe, bird dog, printing press, and a good stamp collection.—CLARENCE A. SWOYER, Ashville, O., last year earned over \$200 by working in a canning factory, doing janitor work and other odd jobs. He is in the high school and is studying dynamo with the International Correspondence Schools.—C. W. CAMPBELL, Lehmasters, Pa., age sixteen, has earned money with which to buy his own clothes for the past four years. Until this year he has had the job

BOYS! ARE YOU LOOKING FOR SOMETHING TO DO? IN A DAINTY little booklet, 25 out of some 4000 bright boys tell in their own way just how they have made a success of selling THE SATURDAY EVENING POST Pictures of the boys—letters telling how they built up a paying business outside of school hours. Interesting stories of real business tact. Write for a copy—it is free. THE CURTIS PUBLISHING COMPANY, 415 Arch Street, Phila., Pa.

ATTENTION BOYS!

Would you like to earn, by doing a small amount of pleasant work, a fine, warranted, Gold-Plated Watch, a Watch Chain, an Amateur League Baseball, a Handsome Two-Bladed Pocket Knife, or a good cloth bound volume of one of G. BOYS MONEY EASILY —MADE—distributing samples. Write for information. Israel Sideman Co., New York.

of lighting the street lamps. He sends us a pen and ink sketch of two pugilists, one of which is labeled "The American Boy" and the other "All other boys' papers." It is needless to say THE AMERICAN BOY has got the other down.—WILLIAM WARINER, Topeka, Kas., earned his subscription money selling pictures for a photographer. To the boy who wants to know how to solder granite ware, he says: "Scrape the place to be mended and apply dilute sulphuric acid, followed by a stick of solder with hot iron."—ED. and FRED COX, Woodbine, Ia., are hustlers. They sell the Omaha Daily News, and in addition they sell popcorn and do all kinds of work that comes their way. They buy their own clothes and books and have nearly \$100 in bank. They are trying to accumulate enough to pay their way through college. The boys say THE AMERICAN BOY gives them great encouragement.—HOMER MACNAMARA, Lacota, N. D., has earned money to buy his own clothes for the last two years and is only thirteen. He says he thinks every boy ought to keep an account of the money he handles. His father is a pioneer Methodist preacher in North Dakota.—GEORGE PARKER, Janesville, Wis., learned to feed a printing press and got five cents a thousand for his runs. He earned his money in this way for THE AMERICAN BOY. George belongs to a boys' choir, and captured a five dollar prize for good attendance and good behavior. He has ten dollars in bank and next spring is going to invest it in chickens.—RADCLIFFE WILSON, New York City, in working for THE AMERICAN BOY uses little slips of paper on which is printed "THE AMERICAN BOY is the only best paper for boys." Sprague Publishing Co., Detroit, Mich., \$1.00 a year." These slips he gives to every boy he can find.—ALBERT REHBEIN, Jr., Chicago, Ill., earned his subscription money carrying coal and chopping wood for a neighbor.—DONALD EVERETT, Penza, O., made his subscription money in a novel way—by trapping skunks and selling their hides. He received six dollars for eight hides.—EVERETT B. COPELAND, age twelve, Melrose, Mass., owns a small printing outfit. He earned the money for his subscription to THE AMERICAN BOY by printing cards, little circulars, etc. He has bought a bicycle out of the money thus earned.

He is the happiest man who can carry the golden thread of boyish enjoyment farthest along through the web of life.—Henry Ward Beecher.

\$8 PAID Per 100 PISTOLS Samples of Working Pistols. Send 10c. to sample and receive territory to A. W. SCOTT, COHOES, N. Y.

Boys in Games and Sport

HENRY P. HINSDALE, South Vernon, Vt., age sixteen, has had some fun recently wood-chuck trapping, having caught twenty during the past summer with three spring traps. He sold them at five cents each. One time he caught two in one trap.—JAMES E. TRIPP, Leesville, O., wants to know how to catch coons.—CLAUDE MARTIN, Grayling, Mich., age sixteen, wants to see articles on how to shoot, as he likes to hunt. He has a 16-gauge shotgun and a repeating Winchester.—ELMER T. HESS, Millville, N. J., age fourteen, has a record on a high jump of 43 inches.—LAWRENCE WOODS, of Calais, Me., wants points on how to run. He aspires to be a long distance runner. He and a few other boys organized a track team and are organizing a gymnasium.—HOMER BURT, Santa Paula, Cal., together with a boy friend, set three traps at the foot of the mountain, near which they live. On their first visit to the traps they found they had caught a lynx that weighed ninety pounds and measured three feet from tip to tip. They are much elated over their success and expect to do much trapping from now on.—ROBERT KIENK, Lisbon, Mich., is the best all-around athlete in Lisbon and adjoining towns. He holds three medals won in athletic contests.—L. C. HEISKEIL, Williamport, O., won the half-mile race in the field day exercises of the Central Ohio Interscholastic League, held at Washington, O., H. His time was 2:18. His brother won four gold and three silver medals that day.

Connolly Brothers' Small Yacht.

The Connolly brothers are two boys residing at Beverly Farms, Massachusetts, who take pride in the fact that they own and navigate the smallest sailing boat which has ever carried a passenger. They have always been very fond of the water and are expert swimmers. Sometime ago the idea of constructing a tiny sailboat was broached to their father. Mr. Connolly thought well of the idea and had a "yacht" constructed, which is a model of its kind. The craft is so small that one of the boys can easily carry it down to the water's edge when desired and shove it in. If stood on end it would not be as tall as either of the lads, for it is but four feet in length. When the young captain goes aboard, he is obliged to keep in one position, for it is but two feet six inches in width at the widest part and, as indicated by the photograph, he must cramp himself into a very small space. But the craft safely carries its single captain and crew on cruises a mile or more in length, sailing before the wind and actually beating against the wind so that one can make a trip

mascot. It is the title of one of the characters in Byron's poem, "The Bride of Abydos," and, as will be noted, contains three vowels. Seamen believe that a name containing a large number of vowels is a sign of good luck. Certain it is that the boys thus far have had no serious accident, although several times the Zuleika has capsized in a gale, but she has been righted without difficulty. For this reason the navigator generally puts on a bathing dress before he starts on a voyage, but in an ordinary wind there is no danger of capsizing as the boat is so seaworthy. Occasionally a larger boat will come along and challenge the tiny craft to a race. It is an actual fact that several times the Zuleika has run closer to the wind than her competitors and on this tack has beaten boats which contained three or four people.

PLAN OF THE ZULEIKA.

The Roll.

Figures 1 and 2 illustrate a roll that is easy to learn. Figure 1 is the first position. The under boy bends his knees and brings his feet down onto the floor. The top boy at the same time tips forward, placing his weight on his hands under the boy's ankles and letting himself down easily. He then bends his neck, bringing his face nearly to his chest, and rolls forward, at the same time pulling the under boy up onto his feet as the latter grips the former's ankles. The movement is repeated with the boy first underneath now on top.

Another exercise is described by Figure 2. One boy lies on his back on a mat with his feet raised. The other boy takes the position shown. The under boy rocks backward and the top boy does a mixed handspring and somersault, landing so as to face in the same direction as he faced in the starting position.

Figure 4 shows another exercise. One boy lies on his back on a mat with his feet elevated. Another boy, grasping the first boy's ankles, leans against and balances his body over the feet of the first boy, lightly resting his shoulders on the first boy's hands and then coming to the erect position.—Young Men.

There is an institution in London called the London Schools Swimming Association, organized to teach boys and girls how to swim. It is said that 250,000 boys and girls have learned there how to swim since the association was founded.

"What is an orphan?" asked the teacher of the class in definitions. Nobody seemed to know. "Well, I'm an orphan," said the teacher, seeking an illustration that would not reveal too much. At this a hand popped up and the owner of it exclaimed: "An orphan is a woman that wants to get married and can't."—Harper's Magazine.

Boy Journalists and Printers

Erstwhile Amateurs—Edgar R. Bean.

I HAVE been a subscriber to THE AMERICAN BOY almost since its beginning, and, though carefully reading its amateur journalistic department, I have found nothing relating to those who have been amateurs—men now famous in both Europe and America—and so, if I may take the liberty, I would like to tell of a few for the benefit of others of your readers who, I am sure, would be interested.

Charles Dickens and Nathaniel Hawthorne were both, during their youth, amateurs. Each issued a paper written by hand. Hawthorne's was very neatly done, but we are told that at times Dickens himself could not read his own paper, so poorly written was it.

Richard Watson Gilder, the editor of the Century, issued the St. Thomas Register, which was partly printed. Later, in conjunction with William F. Allen, now editor of the Official Railway Guide, he issued The Leaf.

W. R. Hearst, proprietor of the famous "Hearst papers" (New York Journal, Chicago American and San Francisco Examiner), while attending Harvard was editor of the Lampoon, known to nearly every college student in the United States.

It is well known that Thos. A. Edison printed a small paper in the baggage car of the Baltimore Express, and sold it to the passengers.

J. Pierpont Morgan, the financier, was also an amateur during his younger days. He was so strongly inclined to literature that his relatives and friends regarded him as a future poet.

Alfred and Cornelius Vanderbilt edited and printed a small paper for two or three years in the 80s.

Last, but not least, we come to President Roosevelt, who was an amateur in that, while in college, he edited the Harvard Advocate.

And so volumes could be filled regarding those who have grown from active amateurism to high places in literature, journalism and other professions.

Reviews of Amateur Papers.

GOOD THINGS, published by Charles H. Russell, 1407 West Thompson street, Philadelphia, has added a cover. The cover design is good enough and has the merit of simplicity, but the publication would have a tastier appearance if paper of another color were used and the sheets were bound accurately, and the cover (trimmed to size of reading pages, after the manner of the magazines. Editorially, Good Things is improving, on which we congratulate Mr. Russell, but improvement means constant, strenuous effort; with less effort than this, one's connection with amateur journalism will be of no value either to himself or to the junior world of letters—it will be but little better than a waste of time.—THE PENNANT, published by the Charleston, Ill., High School, is now in its second volume. The editors and the printers seem to be united in the purpose of producing both a handsome-appearing publication and a creditable one from an editorial standpoint. Any high school in the country might be proud of The Pennant. THE AMERICAN BOY takes particular pride in it because it was started as the result of an article in this department advocating the publication of high school papers by the students, which so interested Walter C. Ficklin, who has been the editor-in-chief since The Pennant was started, that he took up the matter with the principal of his school, who indorsed the idea and helped the project along. We wonder, however, why nine of the ten assistant editors are girls. Are not the boys of Charleston as interested in literary and editorial work as the girls? John Grove is one of the athletic editors. Bain E. Winter, business manager, and Rex Woods, assistant business manager, are entitled to a great deal of the credit for the paper's success. We commend The Pennant to every high school in the country as a model that they could well follow, and we also commend to every high school the idea of publishing a paper. The paper will constitute an interesting feature of the school life, and the work of getting it out will be beneficial to the editorial board and to the other students who may contribute to its columns. A sample copy of The Pennant can be obtained for ten cents, and it will be worth the price to any school that is thinking of publishing a paper.—THE EARLY NEWS, published occasionally during the last three years by Norris Pierson, 61 Broad street, Stamford, Conn., is an example of how small a beginning a paper may have. The third issue of the paper consists simply of a piece of paper about the size of a business card, printed on both sides. For a boy of ten, however, which was the editor's age when it appeared, it is not a production to be ashamed of and the editor showed the true American boy spirit when he started with a small paper, when unable to start with a large one.—THE SHORTER BUDGET is published monthly by J. B. Lyon, a boy of fourteen, at Shorter, Alabama. The editor's motto is "always improvement."

THE ZULEIKA.

across the harbor on which the boys live and return without the use of paddle or oar.

The Zuleika, as the boat is named, is built of spruce and divided by bulkheads into water-tight compartments. The framework is bolted and nailed together by galvanized iron fastenings. Upon the planking is stretched a canvas covering which is made water-tight by the liberal use of paint. The little craft is steered by a regular rudder fastened to a tiller on the stern and contains a movable keel which allows it to be sailed to windward or against the wind, as the mariner would say. As indicated the sails include a mainsail, and jib, which are fastened to the spars in the usual manner and raised and lowered by ropes passing through blocks. The sails are also pulled in and let out by "sheets," which pass through pulleys on the stern of the boat where they can be easily handled. The rigging which supports the masts is of galvanized wire, while the spars are made of hard pine and the sails of light cotton. The hull of the boat is painted dark green, while the "upper works" are of yellow, forming a striking contrast.

The boys themselves selected the name for the reason that they believe it is a

Bill's Little Joke—L. R. Gignilliat

THE guide, Hank Kitchens, of Fishtail, looked worried, and with good reason. Fifteen lively youngsters on a horseback trip through Yellowstone Park may furnish much fun for one another, but not for the guide.

"Look here, Dusty," he said (Dusty, by the way, was the cook), "what do you suppose them kids will be doin' next? That young un that rides the pinto, chased a silver tip off the garbage dump at the canyon last night, and him they calls Bill that's got your cayuse 'Nigger' tried to ride him over the 'Devil's Fryin' Pan.' There ain't nothin' that stops 'em, and that Bill especial'. What are we goin' to do with 'em anyway?"

"I dunno," growled Dusty. "They slings more grub than any outfit I ever cooked for; but they ain't a bad lot for kids. What's the name of that knowledge box they come from back east?"

"Culver Military Academy. They belongs to the Black Horse Troop they call it, but these cayuses ain't no black horse troop, and if they don't stop this yere pickin' up the hat and dismounting at the gallop and them other liberties they're takin' they're liable to find the bronchos doin' a few tricks themselves. There is a sight of difference between a horse goin' straightforward and limber and his goin' stiff-legged and straight up."

"Well," said Dusty, "if we get 'em through without any of 'em bein' lost or parboiled in the geysers," and he glanced suggestively at the simmering potatoes, "and without us gettin' in trouble with Uncle Sam 'count of Bill's monkeyin', we'll be lucky!"

"Yes," assented Hank, "I'm kinder glad we get to the lake tomorrow, they're goin' to shake camp and bunk in the hotel. They can't do no devilment there."

At this moment the party under discussion came into view on the crest of a neighboring divide. The little cayuses were trotting tirelessly along. Their riders, in broad-brimmed hats, blue shirts and brown canvas riding breeches, were sitting easily in their big stock saddles. But for their military seats one might well have taken them for an outfit of youthful cow punchers.

Too tired and hungry, perhaps, for their usual banter and chaff, or may be awed into silence by the impressive beauty of the Grand Canyon, passed but the hour before, they were so quiet as to belie somewhat Hap's description of their liveliness.

"We'll camp here tonight, boys," and the pack horses coming up, Hank set busily to work to relieve them of their burden of "grub," tents and bed rolls.

"Say, Hank," said a lithe, bright-eyed youngster who had just dismounted and was untying his kodak from the saddle horn, "the canyon was great. My, the colors were beautiful, old ruined castles, and sunsets and rainbows all mixed up, and a waterfall thrown in." "Yes," said another, "it beats the Golden Gate with its yellow stone, and that black glass cliff, what do you call it? Oh, yes, Obsidian cliff, all hollow." "Well, for my part," said a third, "the thing that beats everything we have seen yet are those geysers! Just think of all that water just steaming and sputtering and boiling winter and summer, and then every so many minutes or hours just shooting hundreds of feet up in the air. Then those pools of colored water on the geyser basins certainly were pretty. Do you remember that blue one and the crimson one side by side and so clear, it seemed like you were looking down into them for about a mile?"

"That Morning Glory Spring was a dandy, too; the name just hits it off about right."

"Wouldn't it be great," suggested a youngster from the Windy City, "if they could have something like that in Jackson Park in Chicago. My, just think of it, a hot sheet of water rippling over a hundred or so feet of salmon and violet lace-work. My father says every American boy that can ought to see Yellowstone Park; he says it's all nonsense sending boys to Europe till they have seen their own country."

"I believe," said an observant member of the party, "that we have seen more foreigners since we have been in the Park than Americans, do you remember those Germans who were so curious to know who we were and couldn't understand that a military school needn't be a government school, I guess they don't have any private military academies in Germany."

"They ain't the only ones that wanted to know who we were; pretty near all the tourists we meet have a question to ask. That old fellow on the geyser basin the other day who dropped that piece of formation so quick when we came up thought we were some of the regular cavalry soldiers, and that we were going to nab him for breaking the Park regulations." "I say," said the boy whom Hank had designated as the one that rode the pinto, "I saw by that paper we got at Yancey's that Teddy Roosevelt,

Jr. was out west somewheres, and that he might come through the park." "Well," said Bill reflectively, "I guess the tourists will gape at him all right. If he is as bashful as Louis over there he'll have a tough time of it." Conversation being thus directed towards Louis, a slender and, in truth, bashful youngster, that youth made a vain attempt to direct the talk from the personal to the general. "Say, but wasn't it chilly coming over Mount Washburn; the snow was up to—" "I say, Louis," relentlessly broke in the rider of the pinto, "Bill says he's going to get even with you for making his horse buck today." "I didn't mean to," protested Louis, "I was stooping down to pick up my hat and my horse ran into Bill's." "Well," grumbled Bill, "that don't take the soreness out of my muscles or make me feel any more comfortable when I'm sitting down," and so saying he seated himself gingerly at some distance from the others and gazed thoughtfully into the fire, motionless in limbs and features except for a smile that now and then hovered on his lips. Hank noticing it eyed him askance. There were signs that Bill and the spirits of mischief were in secret session, and that sooner or later, as the boys have it, there would be "something doing."

"Grub pile!" yelled Dusty. At the welcome sound the hungry travelers moved rapidly towards the cook fire, and "fell to" with a will. Not long afterwards bed rolls had been made down and camp was silent save for the deep breathing of the tired sleepers and the occasional yelp of a dismal coyote.

All was ready for the short ride to the Lake. Hank, with one foot against the ribs of the last pack horse, was giving a mighty yank at some cinch or pack rope before making it fast. The boys were already in their saddles. "Hank," said Bill, as he rode alongside, "I'm going to push ahead a little bit. I want to try to see some elk and antelope at close range; they scare when we are all coming along together," and without waiting for a reply he galloped ahead. The others took up the march at a slower gait, stopping occasionally to enjoy some especially fine view, and when tempted by the trout plainly visible in the clear, cold water of the Yellowstone, and again to inspect that loathsome, rumbling sputterer, the mud volcano.

The time passed quickly, and ere long, rounding a bend of the road, there lay before them the beautiful Lake Yellowstone, a seventeen mile stretch of gleaming water some seven thousand feet above the level

IN THE GEYSER BASIN.

LIBERTY CAP.

IN THE PINES.

BILL AND HIS CAYUSE.

of the sea, a mirror in which the great peaks of the Rockies may look to see that their headgear of snow is not on awry.

A mile or so more and then came in view the for-some-days unaccustomed sight of a structure of man's making, a large and comfortable hotel built and equipped with material that had to be hauled by wagons for many miles across mountainous roads.

"It seems to me," said Hank, "that there's an uncommon number of people agoin' through for this time of year. Look at that crowd," and he pointed to the hotel. And, indeed, it seemed as if a small army had mobilized on the hotel veranda. Curiously enough they seemed as interested in Hank and his party as the latter were in them. In fact, it would almost seem as if they had assembled there for the express purpose of seeing the youthful tourists arrive. As they came more plainly into view, it could be seen that they were gesticulating and pointing excitedly towards the approaching riders.

Nor were they tourists alone; stagecoach drivers, chambermaids, waitresses, dish washers, the clerk from the curio store, the men who rent boats, and even the "sage brush" tourists from down at the camps were all there.

"I wonder who the deuce they think we are," growled Dusty, who was of a retiring disposition, and who began to feel uncomfortable at the attention his outfit was receiving. As the boys approached still nearer the excitement on the veranda increased. "I wonder which one he is," said one. "I'll bet that's

ON THE MARCH.

him over there," said another. "Oh!" said an excited young lady armed with a kodak. "I just must get a picture of him."

At this moment a familiar voice was heard from

the direction of the crowd, and there, surrounded by a gathering of excited tourists, was Bill. "That's him," he was saying, "right there in the middle of the bunch," and Louis, to his unutterable dismay, realized that Bill was pointing at him. Every eye in that excited throng was instantly focused on the one boy in the whole outfit who most hated to be gazed at, who in fact would rather have jumped into a geyser than have faced the ordeal before him. "What on earth are they looking at me for," he wondered, as he looked helplessly around, then suddenly and confusedly he scrambled from his horse and made a wild rush for the hotel entrance. Halfway up the steps he was stopped by an effusive old gentleman, who insisted on shaking him by the hand. "I have never had the privilege," he said, "of shaking hands with your distinguished father, but I wish to do so with—." Louis waited to hear no more, but tore himself desperately away, and this time ran full tilt into Bill. "Hold on, Teddy," said Bill, with a wicked grin, "there are some people here who want to shake hands with you." Teddy? Shake hands? Distinguished father? "Heavens!" It dawned on him like a flash. Bill had passed him off as the son of the president. "We've got the bridal chamber reserved for you," continued Bill, "and—." but Louis had shot through the front door with a velocity that threatened to carry him through the back one as well. What Hank and Dusty said wouldn't do to relate. What the others said, don't matter, suffice it to say that Bill had gotten even.

An Evening of Magic

John Northern Hilliard

Mental magic is an ideal recreation. It does not require any personal dexterity, or power of deception, while it invigorates the mind, strengthens the memory, and inculcates an admiration for otherwise dry mathematics that is altogether wholesome. The experiments that make up this article are not generally known. They require no preparation, but a modicum of effort, and are absolutely undetectable. Performed with neatness and tact, they cannot fail to evoke wonder as well as provide amusement and recreation.

I. TO TELL THE HOUR SECRETLY THOUGHT OF BY ANY ONE.

Borrow a watch, and taking it in one hand and a pencil in the other, tell your audience that you will give them a specimen of your powers at thought reading. Request some one to think of, or to write down, any hour. You then tap with the pencil different hours on the dial of the watch, requesting the person who has thought of the hour to count mentally the taps, beginning from the hour he selected. For example, if the hour thought of were nine, he must count the first tap as ten, the second as eleven, the third as twelve, and so on. When, according to this mode of counting, he has reached the number twenty, he is to say "stop," when the pencil of the performer will rest on the very hour of which he thought. The secret of this splendid little trick is dependent upon a simple arithmetical principle; but it is so neatly disguised that it is rarely discovered. All the performer has to do is to count in his own mind the taps he gives, calling the first "one," the second "two," and so on. The first seven taps may be given upon any part of the dial, but the eighth must fall on the figure twelve, and thenceforward the pencil must travel through the figures in this order: "Eleven," "ten," "nine," "eight," "seven," and so on. It will thus be found that at the tap which, counting from the number the spectator thought of, will make twenty, the pencil will have traveled back to that very number.

An example will make the trick perfectly clear. Suppose the hour thought of was twelve. The spectator will count the first tap of the pencil as "thirteen," the second as "fourteen," and so on. The eighth tap will complete the twenty, and as the performer is in every case to allow the eighth tap to fall on the figure twelve, so when the spectator cries "stop," on reaching twenty, the pencil will be found at the figure "twelve." I will leave the arithmetical reason for this result to the ingenuity of my readers.

II. THE MAGIC CIRCLE.

This simple drawing-room experiment for two persons does not belong, strictly speaking, to the domain of mental magic, but as its effect is that of clairvoyance, and as the manner of working the trick is almost unknown, I take this opportunity to make my readers acquainted with it, as it will occasion no little amusement. I have known it to produce as much bewilderment as many elaborate illusions. One of the performers leaves the room and in his or her absence some object is touched, say one of several coins placed in a circle on the table or floor. On the performer's return, the assistant, who has remained in the room, taking in his hand a walking stick, or even a pencil, points to several of the coins in succession. Not a word is

spoken, but the performer indicates the coin that was touched.

The secret lies in the manner in which the stick or pencil is held. The forefinger at the outset lies flat along it, but when the right coin is reached the finger is slightly lifted. This wholly natural gesture is imperceptible to the onlookers.

III. A TRICK WITH DOMINOES.

There are two or three capital tricks performed with dominoes which will amply repay the trouble of learning them. Place a row of twenty dominoes face downwards on the table, avoiding the appearance of any special arrangement, but nevertheless taking care that the points of the first domino (commencing from the left) shall amount to twelve, the points of the second to eleven, and so on, each decreasing by one point until the thirteenth is reached, which will be the double blank. The seven remaining dominoes may be selected at random. Now inform your audience that you will give them an illustration of clairvoyance, and for the purpose leave the room, first requesting some one in the company to remove during your absence any number of dominoes (not exceeding twelve) from the right to the left hand of the row, retaining their order. On your return you touch one of the dominoes, the number of points on which, on being turned over, is found to correspond to the number of dominoes removed.

This feat is very simple, though the effect on the uninitiated must be observed to be appreciated. All you have to do is to count secretly the row of dominoes as far as the thirteenth from the left hand end, the points of which will correspond to the number of dominoes that were moved.

IV. THE MYSTERIOUS ADDITION.

This is a very effective trick. It requires a confederate, but this is no drawback. If the reader wants to create a genuine sensation among his acquaintances he has only to exhibit this experiment in thought reading, or rather compelling your audience to do certain things predicted by yourself beforehand.

Ask some one, whom, for convenience, we will call A, to write on a paper or slate a row of figures—four or five digits will be all that is needed. Then take the paper and note carefully the number written, and on a piece of paper of your own write the same number, with two subtracted from the "unit's" place and with a two prefixed at the opposite end of the row. Thus, if the number first written were 37184, the number to be written on the performer's paper would be 237182. This sum represents the total of the number first written, plus a like number of nines twice repeated. For example:

37184
99999
99999

Total, 237182

Of course your audience knows nothing of this. I have performed the trick hundreds of times and I have never met any one acute enough to offer a correct solution, though some of the explanations are amusing enough. When you have written the number down on your own paper, fold up the paper, place it in an envelope, seal the envelope and give it to some one in the audience to hold. Then invite a second person, B, to write a second row of figures under the figures put down by A. The slip is then handed to a third person, C, who puts down a third row, then to D, who writes two rows. D is a confederate and in accordance with previous instructions writes under B's and C's figures such a number as when added to it will make nine.

Thus if B's figures were...29465
D's figures would be...70534

Together making...99999
And if C's figures were...18425
D's figures would be...81574

Together making...99999

Which is the same as

37184.....A's figures
29465.....B's figures
18425.....C's figures
70534.....D's figures
81574.....D's figures

Total 237182

The paper is then handed to a sixth person to add, when the total is compared to the figures written by the performer and which were inclosed in a sealed envelope at the beginning of the experiment.

V. THE GREAT DICTIONARY TRICK.

This is a new method of performing this well known trick, which has made the fame of more than one conjurer. In this improvement any dictionary may be used, whereas formerly the trick depended upon a dictionary of one page repeated throughout. The effect of the trick is as follows: The performer hands a spectator a sealed envelope, requesting him not to break the seal until given permission. A dictionary is then handed around for examination, after which some one inserts in it, at any page, a playing card. A counter bearing a number, say 27, is taken from a bag containing fifty, all numbered differently; the dictionary is opened at the page containing the card, and due note is taken of the twenty-seventh word, as indicated by the counter, and which is, we will suppose, "magic." The person who holds the envelope is requested to open it, and on doing so finds to his astonishment that it contains a card on which is written "magic," i. e. sorcery, enchantment," in exact accordance with the word chosen, apparently by chance, from the dictionary.

This seeming mystery is easily explained. All you need is a new pocket dictionary, and, having opened it somewhere about the middle, bend the covers back until they touch each other. Any new book used thus will ever afterwards open at the same page. The performer secretly introduces a playing card—at this page. While holding the book, he gives a similar card to some person, with a request that he or she will insert it between the leaves in any position and push it right into the book. In this condition the dictionary is laid on the table. A small silk bag is now introduced, from which the performer takes a handful of cardboard counters numbered from 1 to 50 and gives them for examination, after which they are returned to the bag. Any person is now allowed to place his hand in the bag and remove one counter, but it is needless to say, however, that as careful as he may be, the number chosen will be 27, which is accounted for by the fact that the bag is provided with a division through its entire length, forming two pockets, one of which contains the counters numbered 1 to 50, and the other fifty counters all bearing the same number, i. e. 27. The dictionary is now opened by the performer at his own page, which every one will take to be the chosen one, and some one is asked to note the twenty seventh word on that page, as indicated by the counter, and the trick is brought to a conclusion, as already described. You can always ensure the left hand page of the opening being read, by holding the book, with the card, in such a position that the twenty-seventh word on the right hand page cannot be seen. Care must be taken not to expose the duplicate cards.

Peptic Malt

A Sleepless Night Can be Prevented

Substantially all the cases of insomnia are caused by the inability of a stomach weak in digestive power to furnish the brain with the necessary amount of pure rich blood.

The brain through the nerves keeps telegraphing the stomach for a further supply. If the stomach cannot respond, wakefulness ensues.

A tablespoonful of our Peptic Malt taken before retiring will enable the stomach to fully supply the brain, and a restful night's sleep will follow. It is not a medicine, but a highly concentrated form of nutriment.

A delicate, nervous lady wrote us: "I have not enjoyed such sleep in 20 years."

We will mail you a sample pound package for 40 cents in stamps.

We also manufacture Peptic Graham (a cooked food), Wheat-Oats (our breakfast food), Graham Flour, Gluten Flour, Buckwheat Flour, Boston Brown Bread Mixture and Corn Meal.

Active agents make money without risk, selling our superior products to their friends and neighbors.

They are staple goods, that are used for breakfast, dinner and supper.

They may cost a little more than some others, but the value is there. The public have been educated in trash, and now demand the best.

Inclose 2c stamp for terms to agents.

HALL CEREAL CO., DANVILLE, N. Y.

Lots of Fun

THE INDESTRUCTIBLE

WHISTLING TOP

Any BOY or GIRL that can pull a string can spin it. FAMILIAR TO ALL. Young and old will try who can spin it the longest, and cause it to whistle the loudest. Toy Store, 18 cents. By Mail, 15 cents.

KINSEY-BURT COMPANY,

(Patented) 188 Liberty Street, NEW YORK. Correspondence with Dealers Solicited.

U R Name,

In above (or script) type, 10c, postpaid. Funny Pig's Head or Initial, 10c. Name or Basis your mail. Family Printing Outfit, containing 24 font of type, pad, indelible ink, holder and trowers 85c, other up-to-date designs shown in our big catalogue, 4 cents. We make all kinds of Rubber Stamps.

HAMMOND MFG. CO., Dept. A. H., Aurora, Ill.

Our Big Round World

HIGHEST GUN IN THE WORLD.

On January 17, at Sandy Hook, near New York City, Uncle Sam fired off the biggest gun in the world, a 16-incher. The shots were fired to test the gun and the test was a complete success, hurling a 2,400-pound projectile three miles out into the sea. The gun was loaded with 640 pounds of powder. The velocity of the projectile at the muzzle was 2,306 feet a second. If the shot had ever struck a first-class battleship it would have been the end of her.

THE SIBERIAN RAILROAD.

Nobody a generation ago would have believed that before the Twentieth Century was two years old three fast trains a week would be running between St. Petersburg and far-off Irkutsk, and not merely ordinary trains but elegant ones, with dining cars, baths, barber shop and library. The first-class fare from Irkutsk to St. Petersburg is \$62.57. Sleeper, \$11.63. By traveling second-class one can make the trip, sleeper included, for \$34.18. The railroad company notifies travelers that they must furnish their own soap, blankets and pillows.

THE HOTEL WALDORF-ASTORIA.

Perhaps few boys have had the opportunity to visit the Waldorf-Astoria hotel in New York City, probably the greatest

exceeding \$40,000,000, all the rights and property of the new Panama Canal Company of France, including all the capital stock of the Panama Railroad Company. The President is to acquire from the Republic of Colombia exclusive and perpetual control of a strip of land not less than six miles wide, from the Caribbean Sea to the Pacific Ocean, with right to build and maintain the canal and protect it. In the event of the President being unable to buy a satisfactory title from the new Panama Canal Company he is to have authority to build a canal over the Nicaragua route on the same general conditions. An appropriation of \$10,000,000 is made to begin the process, and all further appropriations are not to exceed the additional sum of \$135,000,000 if the Panama route be adopted, or \$180,000,000 if the Nicaragua one be adopted. An Isthmian Canal Commission of seven members is created to be nominated by the President and confirmed by the Senate. They are to have charge of the construction of the canal.

ALASKA.

From The Popular Science Monthly we obtain a map showing the size of Alaska as compared with the United States. The map shows that it has one-fifth the area of the whole United States, or three and one-quarter times the area of California, or ten times that of Iowa, or one hun-

CHILE A GROWING POWER.

European newspapers seem to fear that the United States wants to gobble up South America under the Monroe Doctrine. South American countries, however, dread Chile far more than they dread the United States. Our illustration shows how Chile has grown since 1810.

A CURIOUS POSTOFFICE.

The postoffice in Beebe Plain, a town half in Vermont and half in the Province of Quebec, Canada, serves, in the postal service, two nations. The postoffice is run by parent and child, the father being postmaster for the Canadian Government and the daughter postmistress for Uncle Sam. Standing in front of this strange postoffice is a large post which marks the boundary line. The building was put up over seventy five years ago, and originally was a general store.

WHAT BECOMES OF THE PENNIES!

There have been 10,600,000,000 pennies coined in this country. Where do they go? During the last year the Government put into circulation 700,000,500 of them. The mint in Philadelphia is the only mint where they are coined, and it is working all the time trying to meet the demand. One press can strike off a hundred a minute. No doubt many millions of them are in boys' and girls' savings banks. Railroad companies and other big corporations that receive pennies in large quantities turn them back into the treasury in bags to be redeemed in currency. Still the question remains, what becomes of the pennies?

THE "CELTIC."

Boys who have been reading this paper for several years have read something of the "Oceanic," of the White Star Line. Here are a few interesting items regarding the "Celtic," of the same line. She was built at Queen's Island, Belfast, and is an exceedingly graceful craft. Her weight at launching was 14,257 tons, and her gross tonnage 20,904—nearly 3,500 more than the "Oceanic." She is 700 feet long, with a beam of 75 feet and a depth of 49 feet. She has no less than nine decks, and accommodation for nearly 3,000 passengers besides quarters for the crew of about 350. The height of the funnels is 131 feet above the top of the keel. She is indeed a great floating hotel.

A PART OF SANTA CLAUS' MAIL.

The White Star liner "Cymric" that reached New York the Saturday night before Christmas brought to our shores 2601 sacks of mail—the largest load of mail that any steamship ever brought to the port of New York. This was but the forerunner of other large mails from other countries that came to America

THE SIZE OF ALASKA.

hotel in America, if not in the world. Some facts regarding it will interest our readers: The average number of persons sleeping in the hotel during a year is 370,000; greatest number entertained at any one time, 1,444; largest bill ever paid at the hotel by one individual, \$20,000. The amount of business transacted each year figures many millions of dollars. The number of employes per day averages about 1,500; number of sleeping rooms, 1,386; baths, 800; electric lights, 30,000. The quantity of water pumped daily exceeds the entire water supply of Trenton, N. J. Daily ice supply, 150 tons; coal burned per day, 100 tons; meat bill, \$300,000 a year; flour bill, \$35,000 a year. A ball of 4,000 persons can be given in the hotel and ordinary guests will not know that anything of the kind is going on. The head of the Waldorf-Astoria is Mr. George C. Boldt. This boniface has received many magnificent presents from guests. His Excellency, Yang Yu, a great Chinaman, gave Mr. Boldt a magnificent blue plaque and a pair of magnificent old cloisonne vases. Marshal Yamagata, a Japanese, gave him a cloisonne plaque from the royal collection in Japan. A distinguished foreigner gave him a jewelled caterpillar about four inches long, which crawls along the table exactly as if it were a living creature, showing at every movement a wonderful display of brilliant colors.

THE PANAMA CANAL.

It is settled that the canal across the Isthmus that joins North and South America, which has been so long a matter merely of talk, is really to be built, and that it is to take the short Panama route. Its length will be forty nine miles, and its depth thirty five feet. The President is to buy for the United States, at a cost not

dred and twenty seven and one-half times that of Connecticut.

VENEZUELA.

Venezuela, a country now figuring pretty largely on the stage of international affairs, was discovered by Columbus in 1498. It was a part of Spain's dominions until about 1821, when it became a member of the Columbian federation. The Republic of Venezuela was proclaimed in 1830. It is governed by a president chosen every two years and a congress of two houses. It has a standing army of 3,600 men. It covers 593,943 square miles divided into nineteen states, settlements and territories. The population is about two and one-half million. The largest city is the capital, Caracas, with about 75,000 population.

AUSTRALIA.

The commonwealth of Australia has nearly 4,000,000 people. It is made up of six states, whose combined debt is \$1,180,000,000. In area Australia is larger than the continent of Europe, including the British Isles.

APPLES.

New York State leads the Union in the quantity of apples grown. It takes Missouri, Kansas, Illinois and Arkansas to grow as many apples as New York, which raised a crop of over 52,000,000 bushels during the year just passed, and yet Missouri has over 20,000,000 trees to New York's 15,000,000.

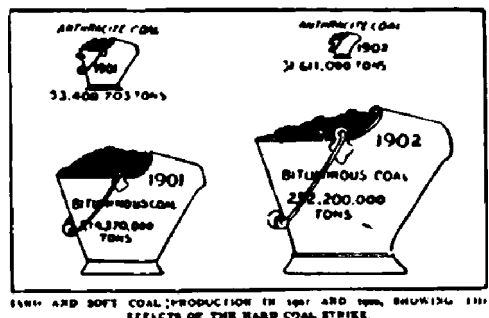

THE "CELTIC" IN DRY DOCK.

THE IMMENSITY OF SIBERIA.

Siberia possesses one-ninth of all the land surface of the globe. The United States and all Europe, excepting Russia, could be put into Siberia, with land enough left over to make thirty five states like Connecticut. It has 9,000,000 people. It is not all a cold, barren country such as we are accustomed to think of it. In great parts of it wheat, rye, vegetables, strawberries, raspberries and currants grow, and sheep and horses graze unsheltered the year round.

before Christmas, for the steamship "Etruria" followed with 1,805 sacks, the "Kaiser Wilhelm Der Grosse" with 660 sacks, and the "St. Louis" with 350 sacks. Fourteen hundred and twelve sacks of the "Cymric's" mail were for New York City alone, requiring fourteen large mail vans to carry them to the postoffice. Three hundred and sixty six sacks of New York's share of the mail were from London, 252 from Liverpool, 122 from France, 275 from Germany, seventy three from Spain, sixty-two from Austria, while other countries furnished the remainder. Of the whole number of sacks carried by the "Cymric," 1,538 contained letters and 1,063 merchandise and papers. The letters for New York City alone were over 800,000 in number, with half a million individual pieces of merchandise and papers. It required 400 men in the New York City office to sort the New York mail, in addition to 150 in the registry division, these working from seven o'clock in the evening until three the next morning and then being relieved by another equally large corps of employes, who worked until noon of the following day, for as soon as this tremendous mail was out of the way that from other steamships arriving later had to be handled.

NEW AND SOFT COAL PRODUCTION IN 1901 AND 1902, SHOWING THE EFFECTS OF THE HARD COAL STRIKE. - The New York Herald

Address all communications for this department, Uncle Tangler, care American Boy, Detroit, Mich.

Rules to be observed: Write in ink and on but one side of the paper. Sign your name to every page. Write your address in full on one page. Send answers with all new puzzles to be printed. Send original puzzles only. We cannot reply personally to letters.

T. R. Beyer, 118 Maplewood avenue, Germantown, Pa., wins the prize for best list of answers to January Tangles.

Honorable mention is accorded the lists of Louis A. Steinitz, Lawrence E. Stevens, John H. Seamans, J. Eustace Guest and Burton F. Jennings.

Sherman Spurrier, Readstown, Vernon County, Wis., wins the prize for best lot of original puzzles. Splendid new contributions were also received from Howard L. Seaford, Frank C. McMillan, Charles C. Curtis and Joseph M. Heinen.

The following also sent in answers or new puzzles or both: Neal R. Clark, Frank Miller, Lowdermilk brothers, J. Terrell Hoyt, Edwin Henry Corbin, F. L. Hall, Vernon Lovett, George Kump, Raymond F. Hill, Walter Perry Allen, Benjamin Lazarus, Frank Holloway, O. C. Camp, Jr., Meredith Knappenberger, T. S. Englar, Sarah Gilles, Roman E. Hammes, Ross Richtmyer, Ralph Clark, Noel Negley, George H. Stanbery, Fred Schultz, Ernest Albert, Albert Donorc, Harold R. Norris, Mary B. Owen, Harry Pfaff, Lillian Muncaster, W. B. Morton,

Jr., Alex Hug, Robert E. Platt, Clyde Nickum, J. Klenzie, Howard S. Currier, Fred Bortow, Wyman brothers, Chester H. Pierce, Nels W. Kindgren, Rudy Snyder, Harold V. Beach, Harold H. Vannatta, Addison G. Kerr, Charles Krauss and William Pygh (without answers to his puzzles).

Population Puzzle No. 10 was the sure-enough tangle of the month. The answer, published in February, will show you, who worked so hard and faithfully over it, where the trouble lay. The population of Lisbon used was that of 1890, and should have been so stated. Quincy, and not Springfield, is the "third city in the third state," the latter being third only when Chicago is left out of consideration, which was not the intention. The author of the puzzle was right with Battle Creek and Muscatine as the ninth and tenth cities respectively in the ninth and tenth states, and not those who insisted on Lansing and Keokuk. In making the prize award due allowance was made for your method in reaching the correct answer.

We prefer not to print puzzles having THE AMERICAN BOY or Uncle Tangler for answer. A good many such are received, some of them very good otherwise, but we are modest, and advise you to choose other subjects if you desire your contributions to appear in this department.

A prize of two dollars will be given for the best original geographical puzzle of any kind received by March 20.

An interesting book will be given for the best list of answers to this month's Tangles received by March 20.

Preliminary Announcement: The May issue will contain a Grand Prize Offer of a Stevens' Favorite Rifle to be given for the best original Fourth of July puzzle of any kind (illustrated puzzle preferred) received by May 20, to be published in the July number. This is fair warning to get on your thinking caps. Do not send in contributions for this contest until after you receive the May AMERICAN BOY.

Answers to February Tangles.

11. Actor, Artist, Author, Baker, Banker, Brewer, Broker, Butcher, Editor, Grocer, Hatter, Hunter, Lawyer, Mason, Merchant, Miller, Milliner, Miner, Nurse, Plumber, Porter, Potter, Preacher, Printer, Soldier, Stationer, Surgeon, Teacher, Walter.

12. (1) VACATE (5, A, 100, eight), (2) MOLTEN (1000, O, 50, ten), (3) CROSS-EXAMINED (cross, x, A, 1001, NE, 500), (4) VACCINATE (5, A, 201, N, eight), (5) EXCULPATED (E, 90, U, 50, P, eight, E, 500), (6) VICE-ADMIRAL (6, 100, E, A, 500, 1001, RA, 50), (7) FIGURATIVE-LY (figure 3, 4, 50, Y), (8) MIMIC (1001, 1001, 100), (9), VIVIFICATIVE (6, 6, F, 99, eight, 4).

13. (1) Oliver Optic, (2) Horatio Alger, (3) Edward S. Ellis, (4) Tudor Jenks, (5) James Otis, (6) Frank H. Converse, (7) A. A. Henty, (8) Harry Castlemon, (9) William P. Chipman, (10) Harry Prentice, (11) Capt. Mayne Reid.

14. CLASP, ANILE, TRACE, ETHEL, BOLOS

(Read vertically as well as horizontally.) Primals, cates; finals, peels.

15. My son, if sinners entice thee, consent thou not. (Mice on IFS) (inn) (nurse) (cent) (ice) (T he) (100=C on cent) (THOU) (knot.)

(1) Catnip, (2) Cattle, (3) Catafalque, (4) Catacomb, (5) Catabaptist, (6) Catastrophe, (7) Catechu, (8) Cataalpa, (9) Caterer, (10) Catarrh, (11) Catapult, (12) Catechism, catechist, (13) Category, (14) Catalogue, (15) Catabolism, (16) Catskills, (17) Catamaran, (18) Catenate or Catenated, (19) Caterpillar, (20) Catiline, (21) Catalepsy, (22) Catnap.

17. 1 S p b A, 2 A h a B, 3 I z a R, 4 N e v A, 5 T o a H, 6 V e r A, 7 A d a M, 8 L o l I, 9 E a l I, 10 N a i N, 11 T a l C, 12 I d d O, 13 N o e L, 14 E n o N

Saint Valentine—Abraham Lincoln. 18. (1) Hag—hog, (2) Moose—mouse, (3) Pansy—Patsy, (4) Nut—net, (5) Petal—pedal, (6) Leech—leach, (7) House—horse, (8) Map—mop, (9) Tramp—trump, (10) Trice—truce.

19. Era, general, rally, ally, generally. 20. Th, e, C, r, i, s, i, s, "The Crisis."

21. REVOLUTIONIST, UNIPERSONAL, PREMATURE, PRONOUN, ONSET, ICE, ONE, RUDDY, BEREAVE, RECONCILE, PREDECESSOR, REVERBERATION, Perpendicular centrals, Transcendence.

NEW TANGLES.

22. BIBLE PEOPLE. Here are the names of nine well-known people mentioned in scripture.

Grid puzzle with numbers and letters. Includes clues like '+ a 1000' and '1440 MINUTES 6500'.

—Sherman Spurrier.

23. TWENTY ONE CENTS. Example: A gorgeous cent. Ans.: Magnificent.

1. A taciturn cent. 2. A cent not guilty. 3. A kind cent. 4. A passively assenting cent. 5. A foaming cent. 6. A recovering cent. 7. A satisfied cent. 8. A neighboring cent. 9. A bright-hued cent. 10. A new cent. 11. A proper cent. 12. A rising cent. 13. A cent growing to manhood. 14. A vanishing cent. 15. A cent that calls to mind. 16. A silent cent. 17. A rotting cent. 18. A cent like a tree. 19. A cent going out of use. 20. A cent turning to stone. 21. A cent that lies under. —Nels Kindgren and Frank C. McMillan.

24. HIDDEN WORD SQUARES. Sixteen words, forming four word squares, are concealed in the following, the words being hidden without regard to the order in which they are used in the squares. "It was eminently a difficult task, I tell you," said Will Santos, sadly, "As we were almost afraid to stir on the roof; and by some ill luck I lost my balance, venturing to advance to mend some places on Lynn's side, and fell off near the biggest Jumbo skunk nitroglycerine ever blew up." —Howard L. Seaford.

25. MARCH ACROSTIC. Each word contains the same number of letters. The initials spell the Irishman's holiday. 1. A county in Wyoming, named after a famous Irishman. 2. The seat of a famous negro college. 3. A Virginia county named after an Indian. 4. A county in a corner of Missouri. 5. A county in Nebraska named for a former U. S. Senator. 6. A corner county of North Dakota. 7. An Illinois county named after an Indian tribe. 8. A county of Iowa named after an Indian tribe. 9. The river up which Colonel Benedict Arnold led his troops in his march on Quebec, in 1775. 10. A New Hampshire county with an Irish name. 11. The county in which is the capital

Becomes a Draftsman in Six Months Through the I. C. S.

When I enrolled as a student in the Architectural Drawing Course, I was working on a fruit farm with my father, in the village of Queenstown. After six months' study, though only about half way through my Course, I decided to try for a position as architectural draftsman. The first architect to whom I applied gave me employment. I cannot recommend your methods of correspondence instruction too highly to any one who wishes to improve his situation in an easy and quick manner.

NORMAN A. ARMSTRONG, 223 Church St., Toronto, Ont., Can.

of Tennessee. 12. The county, named after an Indian tribe, in which Denver is located. 13. A county at one end of Nova Scotia.

—Ragnar Lunell.

26. DROPPED CONSONANTS.

Complete the four words with the same four consonants used in the same order:

— E — — E —
— A — — E —
— I — — E —
— U — — E —

—Kenneth Trainer.

27. SHOPPING TOUR ANAGRAMS.

I went along the business streets intent upon the errands for my mother. The first place I came to bore the sign, "ROMEO LAMPS," and I hurried by in disgust. Next to it stood the "GORED RUST," which some say is at times almost as bad. Two places I was to stop at were the "DOGS DORY" and the "RIMLY LINE" shops. I next lay in a supply of "RICE GORES," and paid the "FRONT ICE CONE" a visit. I had no need to stop at the "RIALTO," nor, happily, the "COTROD" or the "STINTED." I stopped at the "CRUBETH," but skipped the "HOT RAG HOPPER," the "GREAT HELP" office, the "ONE HALF RIAS" dressmaker's shop and the "SLY WARE" office, ending my tour at the "COFFIEPOTS," where I found THE AMERICAN BOY awaiting me.

—The Gopher.

28. LETTER REBUS.

EEEEEEEEEE
E E E
E t h e e E d a e r I a w
E E E
EEEEEEEEEE

—Frank C. McMillan.

29. PHONETIC CHARADES.

Example: A consonant and a head-land form to flee from danger. Ans.: S—cape, escape. 1. A consonant and an organ of a fish form pertaining to elves. 2. A vowel and tardy form to raise the spirits. 3. A consonant and a funeral pile form imperial power. 4. A vowel and a Turkish governor form to yield submission. 5. A consonant and confidence form to commit to the care of. 6. A vowel and profit form once more. 7. A consonant and shyform to ensnare. 8. A vowel and yeast form a number found in the multiplication table. The phonetic letters taken separately in order spell a drink that is good for American boys. —Queen Zero.

Gold Stocks Free

Do You Want Them? One of the old publishing houses of Denver has hit upon a plan to build up a national circulation for its big illustrated weekly which is taking like wild fire.

Here It Is: To each person sending us \$1 for a weekly family and mining paper (founded 1868) we will send a block of five shares in a very promising "Ridge Creek" gold mining company, incorporated, full paid and non-assessable. Clubs of 3 or more \$50 each including 5 shares each. Stamps taken, or remit by express, P. O. order or registered letter.

CRIPPLE CREEK is the most wonderful gold camp in the world. It is now producing \$20,000,000 yearly. The mining company above described owns good property at Cripple Creek and may strike it rich any day. Our paper will keep you fully posted. This generous offer is limited—send your subscription at once. Shares together with prospectus telling all about the company will be sent by return mail. Refer to the editor of this paper. Enclose dollar bill in your letter. Mention THE AMERICAN BOY. Address: GLOBE PUBLISHING COMPANY, DENVER, COL.

SCROLL SAWYER. On receipt of 15 cents I will send, postpaid, a free pattern of this free-wheeling scroll saw. Also is a 21 over 500 beautiful designs for scroll sawing, and my ILLUSTRATED CATALOGUE of Scroll Saws, Lathes, Fancy Woods, Small Locks, Fancy Hinges, Catches, Clock Movements, etc., or send 50 cts. for Catalogue and Miniature Designs. Any live boy can make this bracket. A. H. POMEROY, Juvenile Dept., 29 Aylam St., HARTFORD, CONN.

Earn A Watch. Every boy or girl should have a watch. Here is the opportunity to get a handsome stem wind and stem set watch, timed, tested and guaranteed for one year, without costing you one cent, by selling only 20 packages of our famous Glendale Sheet Bluing at 10 cents a package and sending us the \$2.00 collected, when sold. This bluing is a fast seller and you will be surprised how quick you can earn trust you with the goods and send the 20 packages at once immediately upon hearing from you. We also have OTHER REMEDIES. Write to-day, Glendale Mfg. Co., Dept. v, Winchester, N. H. HIGH SCHOOL. Is a High School Paper for high school students. The only one of its kind in the country. Send 10c. and mention this magazine and we will put you on our mailing list for one year. Address Manager, H. S. L., 614 Steinyway Hall, Chicago. Do you want to try our MAGAZINE for ADVERTISING purposes? Send for sample.

THE AMERICAN BOY

THE LEADING BOYS' PAPER OF AMERICA

Entered at the Detroit, Mich., Postoffice as second-class matter.

The American Boy is an illustrated monthly paper of 32 pages. Its subscription price is \$1.00 a year, payable in advance. Foreign subscriptions, \$1.50.

New Subscriptions can commence at any time during the year.

Payment for The American Boy when sent by mail, should be made in a Postoffice Money-Order, Bank Check, or Draft, Express Money-Order, or Registered Letter.

Silver sent through the mail is at sender's risk. Expiration. The date opposite your name on your paper shows to what time your subscription is paid.

Discontinuances. Remember that the publishers must be notified by letter when a subscriber wishes his paper stopped. All arrearages must be paid.

Returning your paper will not enable us to discontinue it, as we cannot find your name on our books unless your Postoffice address is given. Always give the name of the Postoffice to which your paper is sent. Your name cannot be found on our books unless this is done.

Letters should be addressed and drafts made payable to The Sprague Publishing Co., Majestic Building, Detroit, Mich.

LITTLE INDIAN CAMERA

And Complete Outfit \$1.00.

Amateur photography is growing. To take pictures of your friends and places you may visit is the most popular amusement for both young and old. Until we placed our LITTLE INDIAN CAMERA on the market, a really good camera could not be had for less than \$5.00. This little camera takes pictures 2 1/4 x 2 1/4 inches, and does as perfect work as the most expensive camera. We will send it to any address, express prepaid, for \$1.00, and will send with it 1 pkg. plates, 1 pkg. Hypo, 1 pkg. developer, 1 pkg. card mounts, 1 pkg. sensitized paper, 1 sheet ruby paper, 1 developing tray, 1 printing block, 1 book of instructions, all for only \$1.00, and further, we will guarantee it as represented or will cheerfully refund the money. We use only the finest materials in making this camera and careful inspection is made of every lens. We will send you a photo made by one of these cameras for 2c. stamp. Address THE AMERICAN CO., 173 Greenwich, New York.

On the Field of Honor

By ANNAH ROBINSON WATSON, of Memphis, Tenn.

The Second of The Sprague Publishing Co.'s Books for Boys.

Illustrated. Beautifully Bound.

"On the Field of Honor" is the happy title of a happily conceived collection of stories of young American heroes, charmingly written by Mrs. Annah Robinson Watson, well known as the author of "Some Notable Families of America," to one of which she belongs; "A Royal Lineage," and a volume of poems entitled "Passion Flowers." These delightful stories of some six and twenty young heroes of the Civil War are all founded on fact, and are a common heritage of a reunited country, for Mrs. Watson has written of Northern and Southern gallantry with perfect impartiality. No better book of Civil War stories, of courage and patriotism displayed by boys, has appeared than "On the Field of Honor."

(GENERAL) JAS. GRANT WILSON.

The Syndicated Foot—Joseph Blethen

PUGET SOUND in summer is a campers' paradise. Broad expanses of salt water, thousands of bays and inlets, islands that are bits of dense wilderness, beaches that are peopled with shellfish, and small ranches where wonderfully fruitful orchards grow; all these make a land which once visited is always to be loved.

The "Johnnies" had been camping at Pole's Pass for two summers and their plans for the next outing contemplated the purchase of a sailboat in which they should make a cruise completely around Orcas Island, with a two or three days' stop at the Pass. Dr. Runner had offered the "Johnnies" his sailboat for two hundred dollars and the "Johnnies" had accepted. They intended to save twenty five dollars each that winter, and the resulting three hundred dollars would have been enough to purchase boat and supplies.

Now, a sailboat big enough to take twelve boys cruising must be quite roomy, even though a journey around Orcas Island in July, when undertaken by boys of nineteen years of age, makes but little baggage necessary. A tent, blankets, a Klondike stove, tin dishes, canned goods and potatoes are enough. The ranches, the Sound and the beaches will supply the remainder abundantly. But to obtain such a boat for two hundred dollars, even though it be at second-hand, was a rare opportunity and the "Johnnies" talked of little else that fall. Indeed, their plans became a subject of general comment in the little town, which held but twenty five hundred people, and before Christmas Dr. Runner's boat, as she lay moored behind Commercial Dock, came to be called "the Johnnies' boat."

There were three sets of boys in the town that winter; the Chappies, the Johnnies and the Brownies. The Chappies were the unmarried men of local society and were so called because the still younger sets thought them effeminate, and chaps who wouldn't go camping unless the young ladies accompanied them. The Johnnies got their name from the fact that seven out of the twelve boys in that set were named John. And the Brownies were so dubbed because they were little.

A little town of twenty five hundred residents is, the world over, a small democracy for its boys; in the new West it is also a fair field for the elders. A man is judged by his efforts. There is an indifference to family position, and society is formulative. And so the Johnnies were well to do or poor with utter indifference, the former going to school, the latter earning their living in various unskilled callings.

More than one attraction at the theatre that winter was passed by, that the Johnnies' fund might increase. Various parties were given for them at the homes of their girl friends, and the Johnnies piled all their obligations in a heap and to meet them gave a big Valentine party in the town hall. The winter before they had given four parties in that hall; but during that time, said the forgiving girls, they were not planning to buy a big sailboat. And the Johnnies promised to take them all sailing many, many times when they should own the boat.

April first came, finding the fund with an average of fifteen dollars credited to each of the twelve. But

on that same day John Hemmingway, one of the Johnnies, who worked in the big sawmill, played an All Fools' Day joke on a big Swede, who flew angry and pursued his tormentor. John sprang over a bench, slipped and fell, and a whizzing trimming saw cut off his right foot. And that night eleven Johnnies sat on the hospital steps and waited, while the twelfth lay inside under the sympathetic hands of Dr. Runner.

For the first time in their boyish years they felt an irresistible blow; the kind with which Fate makes men out of Johnnies. Their first feeling was of disappointment in disarranged plans. But as the days went by they began to imagine how John Hemmingway would look on crutches, and then they planned a cot for the sailboat on which he could lie during the cruise. But when John could sit up and they were allowed to visit him, they received another blow.

"I can't go camping," said the crippled John, sadly. "I'll be deep in debt when I get over this. And I've no trade. I must study bookkeeping or shorthand while I'm getting well."
"Debts! Obliga-

ridicule his comrades, his true colors were never doubted. Looking back over those happy months they saw John Hemmingway always in the midst of the fun, and never shirking the responsibilities. Moreover, he had earned his own way ever since coming to that new town on Puget Sound, for he had no kin west of the Mississippi.

And so, talking it over, one said that if Johnny couldn't go cruising, he shouldn't go. Another said that, if Johnny needed money, they ought to help him. Then, without knowing just how it started, they found themselves planning John Hemmingway's future. The first definite step was taken when they sent a committee to ask Dr. Runner to free them from their promise to buy his boat.

Dr. Runner received them in his office, which he maintained in a vine-covered addition to his house.

"H'm," said the doctor, smiling at their announcement, when they had expected a frown, "going to buy John a foot?"

The Johnnies had not thought of a foot. They had pictured their comrade as of necessity on crutches.

"Do you mean a wooden foot?" asked one of the committee, rather in doubt.

"Not necessarily so," replied the doctor. "They make artificial limbs very light nowadays. When John is thoroughly well he can wear a foot in a way that will puzzle you to tell which is his own and which the bogus member."

"Well, it's this way with us. Johnny is alone in the world. He says he must learn bookkeeping or shorthand, or some such indoor trade, and he wants to begin studying as soon as he can. We thought we might help him instead of buying your boat. We hadn't thought of a foot. But if he needs a foot, why, we might buy that."

"What will a good foot cost?" asked another member of the committee.

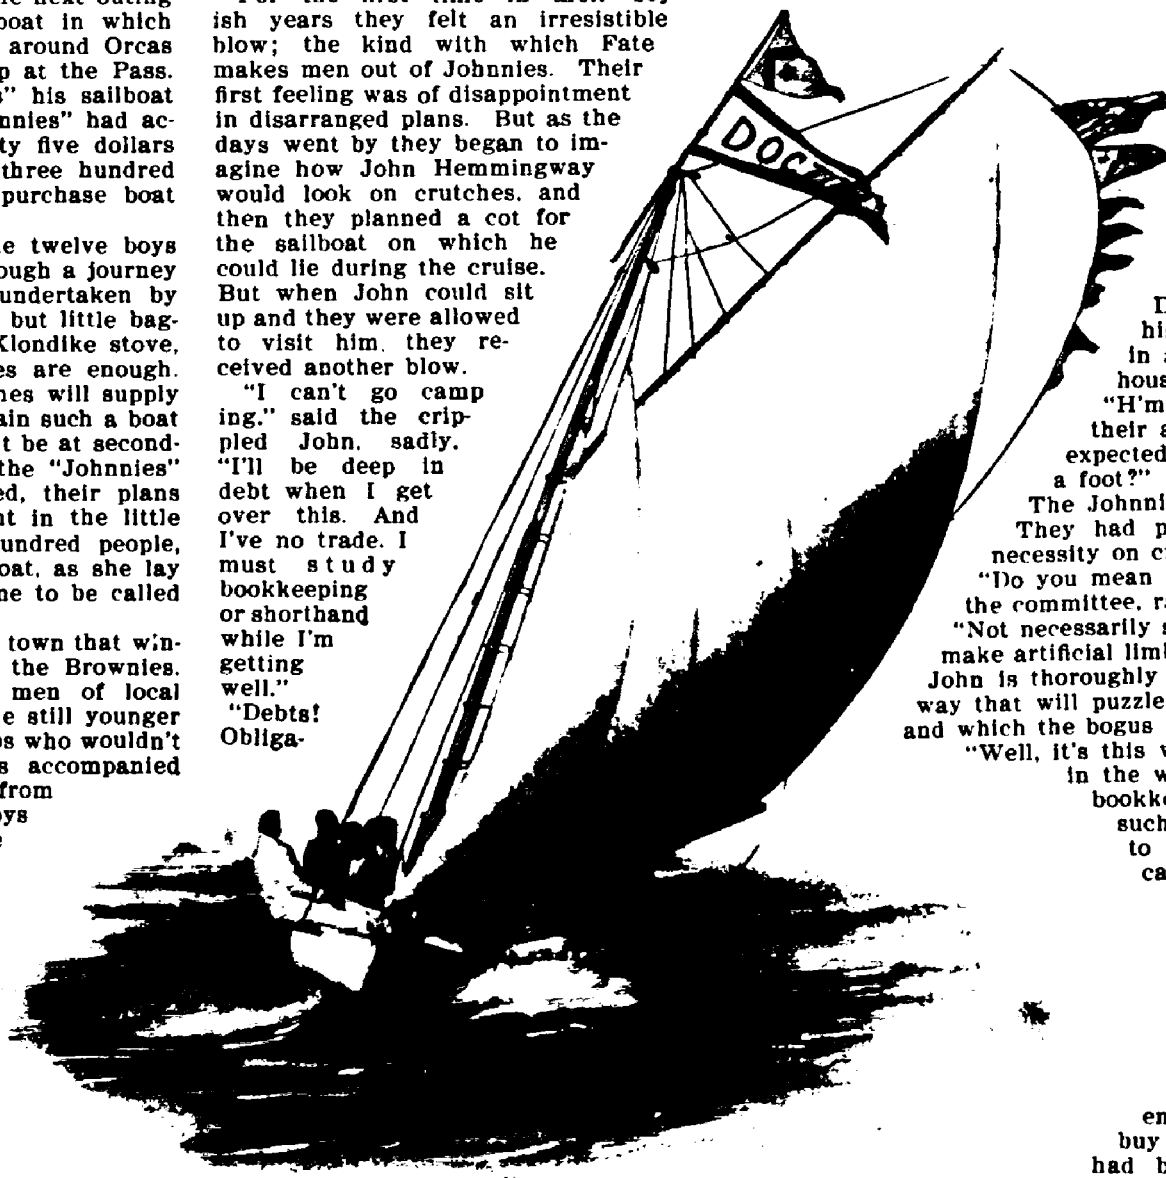

The doctor knew the plans entertained by the Johnnies to buy his boat; he knew what hopes had been built upon those plans.

He appreciated, even as those frank-hearted boys did not, what a praiseworthy sacrifice their action would mean. He was himself that manner of physician who values tact as one of his greatest aids. He saw in the present suggestion more than did the Johnnies, and he proceeded to act upon it.

"If you boys," said the doctor, "will allow your three hundred dollars to go to pay John's hospital expenses and get him a foot, I'll throw in my bill. More than that, I will take him into my home, where he can stump around and grow strong, during the time he is studying his shorthand. Now, call your crowd together and let me know your decision."

The delighted committee tore around the town hunting out their comrades, and, when the eleven

(Continued on Page 187.)

From photo by Walter P. Miller, Seattle.

tions! Plans for the future! These were new troubles to the Johnnies. They went away thinking, and the sailboat rocked at her buoy unvisited for a week.

In that week the Johnnies discovered many things about their friend which appealed strongly to them. They had always been a lively crowd, with plenty of fun on hand, rainy season or summer. They never hesitated to wear each other's coats or ties, or to get between a fellow-Johnny and his best girl. But their love of mischief was no stronger than their sense of loyalty, and while each was ready to

Napoleon

A History Written for

CHAPTER XIV.

CONQUEST OF SPAIN AND PORTUGAL—WAR WITH AUSTRIA.

THE Treaty of Tilsit was ratified July 7, 1807. With this treaty the sun of Napoleon reached its meridian splendor; from that time on its glory waned till its final setting forever in Waterloo. Up to this time the sympathies of every unbiased student of history must go to the man and the people who among the nations of Europe alone sought to maintain the equality of all men before the law, to abolish caste and special privilege, and to promote popular liberty and equal justice as between man and man. From now on the friend and admirer of Napoleon must excuse and palliate and defend, and oftentimes must hide his head in confusion. Eaten up by an ambition born of success unprecedented in the history of the world, Napoleon forgot France, forgot liberty, forgot all but himself, until going from blunder to blunder he fell—never to rise again.

For a few brief months after Napoleon's return to Paris tranquility reigned throughout Europe, but the fires of hatred were smoldering and required but a little breeze to fan them into flame. Nominally, at least, the continent was now united with Napoleon against England, and the Decrees of Berlin promulgated by him by which English goods were to be kept out of France, were made operative throughout the continent, excepting Spain and Portugal. England retorted with a declaration that she would search all merchant vessels, and that neutrals should not be allowed to trade unless they had touched at a British port and paid duties there. Napoleon then declared that any ship submitting to England's demands should be treated as an English ship.

England could not be expected to remain quiet under such provocation. About the middle of August an English fleet, with a force under Sir Arthur Wellesley, appeared before Copenhagen, the capital of Denmark, bombarded the city for three days and three nights, destroying public buildings, churches, libraries, and eight hundred of the homes of the citizens as well as hundreds of men, women and children, and received its surrender with that of the Danish fleet. Napoleon was enraged. Alexander of Russia dismissed the British Ambassador from St. Petersburg, and Russia, Austria, Prussia and Denmark declared war on the commerce of England. This would have been greatly to the advantage of Napoleon had he not thrown away the good fortune, thus fallen in his lap, by a blunder almost unexplainable.

English goods were finding their way into Europe by way of Portugal. By a series of intrigues it was agreed between Napoleon and the imbecile King Charles IV. of Spain, in the Treaty of Fontainebleau, that Spain was to furnish 27,000 troops and France 28,000 for the invasion of Portugal, while France was to assemble 40,000 troops as a reserve at Bayonne ready to take the field if England interfered. In November, 1807, the allied armies under Junot poured into Portugal; it surrendered almost without the shedding of a drop of blood, the Prince-Regent fleeing in an English ship to the Brazils. Napoleon's eye was now, if not from the very first, on Spain itself, where a weak king, a profligate queen and her paramour (Godoy), and Prince Ferdinand, the heir-apparent, were intriguing against one another, each at the head of a party of corrupt nobles. Napoleon thought the fruit ripe for the plucking and marched his army of reserves, under Murat, into Spain, and another army of 12,000 through the eastern Pyrenees, and gained by treachery or in the guise of friendship one after another of the Spanish strongholds in the north of Spain.

Each of the Spanish parties supplicated aid from Napoleon in his quarrel against the others. Charles IV. asked protection against his son, and Ferdinand asked the hand in marriage of a Bonaparte princess. Napoleon listened and put off answering, meanwhile pushing his armies slowly but surely into the heart of the country. At last a panic seized the Spanish capital, Charles IV. abdicated the throne, and Ferdinand was proclaimed king. Murat, now in command of the French armies in Spain, surrounded the Spanish capital with 30,000 troops, and on March 23, 1808, with 10,000 men entered Madrid. Charles IV. and Ferdinand now each appealed to Napoleon for recognition. Each was led to believe that something might be had by appearing before Napoleon in person; so in April at about the same time each appeared at Bayonne and had audience with the Emperor. The result was that Charles IV. resigned his crown for himself and his heirs, accepting in return a pension, as did also Ferdinand. Godoy was exiled to Italy and pensioned. Thus Spain and Portugal were added as gems to the crown of the victor, but by means which though comparatively bloodless will not bear

THE EMPEROR NAPOLEON I. IN HIS CORONATION ROBES.

the light of enquiry. But, after all, he was but following the precedent of his times as set by Russia, England and Prussia, whose empires were built after the same method. Napoleon himself seems to have apprehended the danger of the step he was taking in usurping the throne of an old and proud people, for in cautioning Murat against going too fast he says, "Remember, if war breaks out, all is lost."

Soon all Spain was in insurrection. Messages were flying to England invoking aid she was eager to lend, and in every court of Europe there was ill-concealed satisfaction over the fatal step that had thus been taken by the hitherto shrewd conqueror.

With 80,000 troops in Spain Napoleon soon re-established tranquillity in Madrid and summoning the Council of Castile commanded them to elect a new sovereign, which they did by naming Napoleon's brother, Joseph Bonaparte, then King of Naples. Joseph, protected by Napoleon's army, reached Madrid in safety and was crowned King July 24, 1808. Murat, who it is said was disappointed in not being selected by Napoleon, was made King of Naples.

Portugal burst into insurrection and allying herself with the loyal part of Spain concluded a treaty of offense and defense with England. The forces now opposed were gigantic. Napoleon could summon one half a million men commanded by the best generals of Europe, accustomed only to victory. The name of Napoleon was worth an army in itself. Great Britain had a standing army of 200,000, and the largest and best fighting navy in the world. France, with 80,000 troops, held one-half of the fortresses of Spain. The credit of each nation was unlimited and each believed in the justice of its cause.

The first great battle between the French and Spaniards was at Riosseco, July 14, 1808, where 20,000 Spaniards fell. Elsewhere the Spaniards were more successful; in a series of combats divisions of the French army were repulsed or driven back by loyal Spaniards—men and women, who fought together in the ranks headed often by their priests. At Baylen, 20,000 French troops surrendered after a long and desperate battle. Within a few days Joseph Bonaparte fled from Madrid to Vittoria. Then occurred

Bonaparte

Boys by the Editor

the famous siege of Saragossa by the French, in which the Spaniards displayed wonderful bravery and almost unparalleled heroism, resulting in the retreat of the French after a vain effort to overcome the town continuing through two months.

On August 8, 1808, Sir Arthur Wellesley landed in Portugal with 10,000 English troops and immediately set out for Lisbon. Junot, commander of the French army in Portugal, had 24,000 troops. On August 21, the two armies met, and the result was a defeat for the French with a loss of thirteen cannon and 2,000 men. In a few days the French withdrew from Portugal under the terms of an armistice by which they surrendered their magazines, stores and armed vessels, on condition that the French soldiers be carried to a French port and be permitted to take with them their private property.

Napoleon now saw that he himself was needed in the field to retrieve the losses of his generals, and determined to cross the Pyrenees with an army that would carry everything before it. There were at this time 60,000 French troops in Spain, opposed by three independent Spanish armies of a total strength of about 125,000. Napoleon, with 200,000 fresh troops, marched through France to the Pyrenees. "Comrades," he said, "let us bear our triumphant eagles to the Pillars of Hercules! * * * What you have done, and what you are about to do, for the happiness of the French people and for my glory, shall be eternal in my heart!"

Leaving his army for the moment, Napoleon met Alexander of Russia in a conference at Erfurt, where the two sent a message to the King of England proposing peace. His reply was in the negative. Then giving orders to strengthen his armies in Germany and Italy for fear of Austria, Napoleon hastened to Paris, then to Bayonne, and then to Vittoria, where in an inn he called for a map and in two hours had planned his campaign and put the forces in motion. In an incredibly short time he opened the way to Madrid. On November 30, 1808, Napoleon with his guards reached the defile of the Sommosierra, ten miles from Madrid, and found 12,000 men defending the pass. Sixteen pieces of artillery completely swept the road. Napoleon rode to the mouth of the pass, and surveying the scene, ordered his Polish lancers to charge up the road in face of the battery. The brave fellows, led by General Krazinski, fearlessly obeyed, with the result that the Spaniards fled, leaving their cannon and their dead on the field. Napoleon now encamped about Madrid, which was in a terrible state of confusion, bells ringing, ferocious bands parading the streets, and scenes of violence occurring everywhere. On December 4 the city surrendered and the French army marched in.

After issuing edicts abolishing the Inquisition and feudal rights, and proclaiming an almost general amnesty, Napoleon set out for Portugal, where there existed a feeble Spanish army in scattering detachments and an English army of 33,000 men under Sir John Moore which was advancing into Spain. Napoleon put himself at the head of 50,000 men and started for Lisbon. The English heard of it and at once turned about and began a disastrous retreat, reaching the seacoast at Corunna just in time to embark and set sail—but without their commander, who fell gallantly fighting.

Napoleon did not return to Madrid, as would seem natural, there to complete the work of conquest, but to Paris, where there was urgent need of his presence. For Austria had again declared war. Riding on post-horses, a part of the time as fast as thirteen miles an hour, he reached Paris January 22, 1809. Francis of Austria had never recognized Joseph as King of Spain, and had never forgotten his losses through the battle of Austerlitz. A bribe of \$20,000,000 paid him by England helped him to forget his treaties with Napoleon. Napoleon's keen eye had noted before he left for Spain the warlike preparations of his old enemy and was not unprepared when on April 6, Austria declared war.

A half million men were now under the banners of Francis of Austria, commanded by the Archduke Charles, of whom we have before heard. In a few days the Archduke Charles crossed the Inn with

300,000 men, the Archduke John with two divisions started for Italy, and the Archduke Ferdinand stationed himself with a division where he could repel Russia in case Alexander took up the French cause. Napoleon, accompanied by Josephine, at once went to Strasburg, where on April 13 he formed his plan of campaign. He ordered the two widely separated wings of his army, under Massena and Davoust, to march forward and converge to a centre; he himself advanced between them; in doing so the French met in two divisions of the Austrians, which on the 21st surrendered 9,000 men, thirty cannons, and all their stores. By splendid generalship Napoleon now by different routes led the divisions of his army to a point where at the same moment they converged on the divisions of Archduke Charles and after a hard battle (at Eckmuhl) the Austrians left in Napoleon's hands 20,000 prisoners, fifteen colors, and nearly all their artillery. The Archduke made another stand at Ratisbon, but was again routed and fled into Bohemia, leaving Vienna at Napoleon's mercy. On May 10th the conqueror, after a short bombardment of the city, received its surrender and again took up his residence in the palace of Francis.

The Archduke Charles, having recruited his army in Bohemia, posted himself strongly on the left bank of the Danube. Napoleon, coming up on the right bank, found the river swollen and well-nigh impassable. On May 20th, however, by means of a bridge of boats, he succeeded in crossing at Ebersdorff. On the 21st the two armies met, the Austrians being splendidly posted on rising ground and protected by 200 pieces of artillery. The first day's fighting brought partial success to the Austrian arms after terrible carnage. The following morning victory for the French seemed secure, when it was found that fire ships had been sent down the river and that a part of the bridge between the island of Lobau and the right bank was destroyed and Napoleon's army was cut off from the reserve which still remained across the river. Napoleon at once retreated across that part of the bridge that remained on to Lobau and adjacent islands. Here he was cooped up, separated by a raging flood from his reserves, until, on July 4, 1809, he established communications with the right bank and arranged for crossing to the left bank again at a point where the enemy did not expect him. When the Austrians perceived this move they took up their position with the town of Wagram as their center. Here on July 6, a great battle took place. Napoleon poured the whole strength of his army upon the Austrian center, which had been weakened by being extended too far, and after a sanguinary contest Napoleon took 20,000 prisoners, and all the enemy's baggage and artillery. At this battle fell Lannes, a general of magnificent courage, both of his

JOACHIM MURAT,
NAPOLEON'S FAMOUS CAVALRY COMMANDER.

Joachim Murat was born in France March 25, 1771. He was the son of an innkeeper and entered the army as a volunteer, serving in Napoleon's campaign in Italy in 1796-7, and in his campaign in Egypt in 1798-9. He married Caroline, sister of Napoleon, January 20, 1800. In 1804 he was made Governor of Paris and a marshal, and in 1805, prince and high admiral. He commanded the cavalry at Marengo in 1800, at Austerlitz in 1805, at Jena in 1806, and at Eylau and Friedland in 1807. He commanded in Spain in 1808, and became King of Naples as Joachim I. in 1808. He commanded the French cavalry in 1812, and was defeated by the Austrians at Tolentino in May, 1815. He was captured by the Austrians in October, 1815, which was followed by his execution on the thirteenth of that month at Pizzo, Italy.

legs shot away by a cannon ball. Napoleon knelt by his side, his clothing stained by the blood of the hero, and cried, "You will live, my friend, you will live";

but it was not to be so. Thus ended the war with Austria.

To return for a moment to Spain: Saragossa, again besieged, had surrendered to the French. The French under Soult had been defeated by Sir Arthur Wellesley at Oporto, as had been Marshal Victor by this same able English general at Talavera. Elsewhere in Spain battles had raged with varied results. Portugal was again in the hands of the English under command of Wellesley (after the battle of Talavera created Lord Wellington).

Napoleon remained in the palace at Schoenbrunn, near Vienna, till October of this year, 1809. Here an assassin attempted to take his life, but was caught just as his dagger was about to enter the Emperor's body. Napoleon asked of the assassin, "What injury have I done you?"

"To me, personally, none," he answered, "but you are the oppressor of my country, the tyrant of the world, and to have put you to death would have been the highest glory of a man of honor."

That Napoleon should quarrel with the Pope of Rome seemed inevitable, seeing that in Spain the Catholic clergy were leading in the insurrections and the Pope had refused to join with him in his war with England. The quarrel culminated in a decree by Napoleon stripping his Holiness of nearly all of his Italian territory and annexing it to the kingdom of Naples. In February, 1809, a French division of the army took possession of Rome itself; the Pope, however, was permitted to remain in the Vatican, attended by his guards. On May 17th the Emperor issued a decree that the temporal sovereignty of the Pope was wholly at an end, incorporating Rome with the French empire, settling a pension on the Pope, and appointing a committee for the civil government of Rome. The Pope thereupon excommunicated Napoleon. Then, under pretext that the Pope's life was in danger, the French general in command in Rome arrested the Pope and for over three years he remained a prisoner at Fontainebleau, though treated with great courtesy.

The treaty of peace with Austria brought many changes, chief of which was the giving up by Austria of territory to the amount of 45,000 square miles and a population of nearly four million people, the losing of every one of her seaports, and the payment of \$20,000,000. Napoleon's demands are generally conceded to have been moderate, and a reason for his moderation may be found in the following chapter.

Napoleon left Vienna October 16th, and on the 14th of the following month the public bodies of Paris addressed him as "the greatest of heroes, who never achieved victories but for the happiness of the world."

(To be continued.)

From Street to Store—E. E. Youmans

"Shine, sir?"

The gentleman looked around and beheld a bright-looking boy standing a little behind him.

"Shine, sir," he repeated, and began adjusting his box with such a business-like manner that the merchant became interested. He consented to have his boots repaired upon, and the young bootblack was soon down upon his knees, working with such energy that the gentleman smiled and asked:

"Why do you work so fast?"

"Because this is my busiest time, and I want to get through with you so I can get more shines."

"Well, don't hurry on this occasion. I wish to talk to you, and you'll get through before I can tell you what I want to say."

By this time one boot was polished so bright that you could see your face in it, and as the man placed his other foot upon the box the youth said:

"It won't pay me, sir, to talk now. If I lose so much time I won't get so many shines, and every shine I miss is five cents gone."

"I will pay you for all the time you lose," said the gentleman; "and perhaps you will not care to black boots when I tell you what I have to say."

He paused a moment, then continued: "I am looking for a smart boy in my store to take charge of the blank book counter. If you care to take the place, I think it will pay you better than blacking boots."

"I don't know about that, sir. I make a good deal some days."

"What is your name?"

"Ned Harris, but the boys all call me 'Lightning' because they say I'm so fast."

"Well, Ned, how would you like to come to my store to work?"

"What would I have to do?"

"You could learn to be a salesman, and I think you would make a good one. At any rate if you should persevere in it with as much energy as you display in blacking that boot, your chances would be very good."

"What pay would I get?"

Mr. Carter smiled at this question, and asked:

"How much do you make on an average at boot blacking?"

"From five to six dollars a week."

"What do you do with so much money?"

asked the merchant in surprise. "It doesn't cost that to keep you?"

"Oh, no, sir. I support my mother and little sister with it. My father is dead."

"Ah, is that so? Well, I think all the more of you for that. Where do you live?"

"In Broome street."

By this time Ned had polished the other boot, and as he rose to his feet Mr. Carter said:

"I have taken quite an interest in you, and if you want to come into my store and learn the business I will give you six dollars a week to start with, and advance you as fast as you learn."

This offer at once aroused Ned's ambition. He had always had a desire for a mercantile life, and here was a chance for him to get it, and his eyes beamed with pleasure as he said:

"I accept, sir, gladly; when shall I come?"

"You can call and see me at three o'clock this afternoon. Here's my card, and here's twenty five cents for your labor; and now, good morning."

Mr. Carter walked briskly away, and after looking at the card Ned placed it and the quarter in his pocket, then turned his attention to getting more shines.

Promptly at three o'clock he presented himself at the merchant's store. As he entered he was accosted by one of the clerks, who said:

"Well, Bub, what can I do for you?"

"You can tell Mr. Carter that Ned Harris is here."

"He's engaged now, and can't see you, so you may as well leave," was the rough reply.

The clerk turned away, but he had hardly done so when Mr. Carter appeared from his private office near by, and said severely:

"The young man is my friend, Ford, and you'll do well to treat him with respect." The merchant then ushered Ned into the office, and they remained there for some time much to the surprise of the clerk outside.

The next day Ned went to work in the store. He resolved to do all in his power to gain the confidence of his employer, and to make himself reliable and useful.

He was quick to learn, and soon discovered that two important qualities were essential to his new business—patience and politeness. He therefore took as much

pains to display goods to customers whom he thought would only buy a little as he did to those who would give a larger order.

One day a plain but neatly dressed woman entered the store, and going up to Ford's counter asked to be shown some books. Ford got out a few, and then leaned back against the shelves. He concluded that she would not buy many, and took no further interest in her. His manner, was so offensive that she looked at him in wonder.

She turned away, and Ford began putting up the books with the remark that "some people don't know what they want, nor care how much trouble they give one."

The woman walked on toward the door with the intention of going to some other store, but in passing Ned's counter her attention was attracted by certain books, and she paused, saying:

"Will it be too much trouble to show me those books?"

"Certainly not," said the youth, and in a moment he had the counter littered with books.

Ford watched him intently, concluding that he was a fool to take so much trouble; but Ned continued to show one kind of books after another with untiring patience.

The woman proved to be from a nearby country village, where she kept a store, and she was so well pleased with the attention Ned gave her that before she left he had the satisfaction of selling her a bill of goods to the amount of fifty dollars.

It so happened that Mr. Carter was in his office at the time and had seen the whole proceeding, and while he was disgusted and angry at Ford's behavior, he was more than ever pleased with his new clerk.

"I don't think I made a mistake," he said to himself.

Ned continued to devote himself to business. He was accommodating to all, and soon became known to the customers, many of whom bought of him whenever they came to the store.

This aroused a jealous feeling in the other clerks toward him, but he knew he was right, and decided to pay no attention to it.

Ford, however, determined to do all he could to annoy him, and he took a very mean way of doing it. He contrived to

reach the store ahead of Ned in the morning, and at once littered up the boy's counter with books and papers. To put them back in their proper places gave Ned a good deal of extra work, but he bore it patiently for some time, hoping it would soon cease. In this he was disappointed, however, and he was finally forced to refer the matter to Mr. Carter. He did so, and the merchant was very angry. Calling the clerks together he said:

"I find that you are trying to annoy Harris all you can. I want this stopped at once. If I hear anything more of it I will discharge you. Return to your work now, and let Harris alone in the future."

This had the desired effect. At the same time the feelings of the other clerks toward Ned were anything but friendly, and Ford did all he could to prejudice them against him.

But Ned worked on and improved so rapidly that Mr. Carter decided to advance him at the first opportunity. The promotion came in a few days, and in a way that surprised Ned and the other clerks considerably.

Of late the merchant had noticed that Ford's face was unduly flushed every morning when he came to the store, giving evidence of dissipation. He became more negligent each day, and finally Mr. Carter concluded to speak to him about it.

He called Ford into his office one morning and told him what he had to say. A lively discussion followed, in which Ford became very angry, and the interview ended in his being paid his salary and discharged on the spot.

After some deliberation the merchant decided to put Ned in Ford's place, so he summoned him into the office and informed him of his intentions.

"Keep right on in the way you are going, my lad," he said, "and you will yet reach the top."

And Ned kept on. When he took Ford's place the jealous feeling toward him increased for a time, but he treated his fellow clerks as friendly as he could, was polite and accommodating to all, and after a while they became ashamed of their behavior and began to be more civil, and finally became his best friends.

Thus by his own energy Ned Harris worked his way up, as every boy who tries can do, from a lowly position to one of confidence and trust.

Nita—A Tomboy Soldier

—THE LAST STORY WRITTEN BY THE LATE G. A. HENTY—

Sole American Rights Purchased

By THE AMERICAN BOY

Synopsis of Chapters I. and II.: Fort Darlinger, on the northwest frontier of India is occupied by three companies of a Punjaubi regiment under command of Major Ackworth. To punish some of the marauding tribes which had recently made an incursion upon the natives under British rule, the major sets out from the fort with two companies, leaving his daughter Nita, and the remaining company under the command of Lieutenant Carter. Nita has been brought up in the army and her education consists mostly in being a first-class shot and a good boxer and fencer, while the usual accomplishments of a young lady have been, in her case, wholly neglected. To remedy her deficiencies her father announces that on his return she is to go to England to attend school. The actions of the natives make Nita uneasy regarding the safety of the fort, and on telling her fears to Lieutenant Carter he agrees that matters look suspicious and proceeds to make everything as secure as possible, including the planting of two barrels of gunpowder underneath a mosque situated near the gateway of the fort. During the night a strong force of natives make an attack upon the fort but are bravely repulsed by the little band of defenders. Nita takes her place in the hospital and attends the wounded. At daylight the natives give up their attack and Carter and Nita discuss the situation, which they agree is a very grave one.

CHAPTER III.

TOWARDS daylight next morning a tremendous fire opened suddenly, and Nita dressed hastily and ran out. Running up to the walls, she saw that a large number of men were approaching the gate, covered by a rain of bullets from the mosque and village, and that, as it seemed to her, an equally strong attack was being made from the other side. The Punjaubis were hard at work, and from the number of dead that covered the ground behind them, she felt how accurate their fire had been. This time the Afridis seemed to have worked themselves up to a pitch of fanatical bravery. Two or three times they halted for a minute, but their leaders came to the front, and, waving their flag, led them forward again. At last, in spite of the fire of the twenty-five men on that side, they reached the gate, at which they began to hack with their heavy knives.

Half a dozen men now ran down from the wall, and, climbing up the barricade, opened fire through the loopholes on the mass below, causing terrible destruction among them. The men who could not get at the gate opened fire at these loopholes, and it was not long before two of the defenders fell, shot through the head. Nita at once went up and took the place of one of them. The two men who had been killed were lying together. Taking careful aim from one loophole she fired—a man dropped; then she shifted her place to the next vacant loophole, and fired from that. Sometimes she lay still for two or three minutes, and then fired several shots in rapid succession from the loopholes; sometimes using one and sometimes the other, and thus avoiding the storm of bullets that followed each shot. She had no sense of fear now. She was proud of doing her share of the work. That she was doing a share she knew, for scarcely one of her shots missed its mark.

Presently the men before the gate began to sneak off, and in five minutes all was over, the Afridis suffering heavily as they retreated across the open. Then Nita went down into the courtyard. As she did so, she saw Carter run across the court to the other side, where the combat was still raging. She mounted the wall a short distance away from it. The enemy had each brought a great faggot, and throwing these down against the foot of the wall, gave a slope almost to the top. On this they had again and again rushed, only to be beaten back each time by the Punjaubis. Fortunately the faggots were insufficient to reach quite to the top of the wall, and the Afridis had to help their comrades up the eight feet between the crest and the top of the parapet, only to fall back shot or bayoneted. The arrival of ten men from the gate turned the tables. With thirty rifles playing upon them the Afridis felt that no more could be done, and retired sullenly, taking advantage of every bit of rising ground or bush to lie down and fire.

"Well, Miss Ackworth, that affair is over. I saw you standing at a distance and was thankful that you did not come up to join us."

"I did my fighting on the other side," she said, with a smile, "you know you said that I might."

"You did," he said angrily. "I shall have to put you under arrest, Miss Ackworth, for disobeying orders."

"Thank you," she said, "but it happens that I did not disobey orders. You particularly said that I might fire through the loopholes of the gate when it was seriously attacked, and I took advantage of the permission to get possession of two holes where the defenders had been killed, and I flatter myself I did some good. I fired thirty shots and know enough of my shooting to be sure that there were not many of them thrown away. The circumstances were exactly what you pointed out. The gate was very seriously attacked, and it was therefore open to me to do a little shooting on my own account."

"It was really wrong of you, Miss Ackworth. The attack was serious, but I never thought for a moment that they would take the gate, and it certainly never entered my mind that you would expose yourself to being killed in this way."

"I took every precaution," she said, "and fired sometimes from one loophole and sometimes from another, and as I must have accounted for twenty-five men at least, I honestly believe that I did as much as any of your soldiers, and probably a good deal more."

"That is all very well," he said; "I don't say that you did not do good service, and I admit that my orders did give you some sort of license; however, this must not occur again, or I shall consider it my duty to order you to keep your place in the hospital and put a sentry at the door to prevent you from coming out under any pretense while fighting is going on. You must remember that I shall have to account for your safety to the major when he returns, and that were anything to happen to you the blame would fall upon my shoulders and would not be put down to your wilfulness. However, should the time ever come when we are driven to our last corner, I shall then authorize you to use your pistol."

Glad to have got off so easily, Nita went down to the hospital. There were but few wounded, and these, as before, had been hit principally on the head and shoulder. Lieutenant Carter came in shortly afterwards. "Let me have a look at your patients, Miss Ackworth; I have gone through the St. John Ambulance course and am pretty good at bandaging. I see that you have taken great pains with the men, but I think that I can possibly make a little improvement here and there. Besides, in some cases, I may be able to get the balls out. It will be more than a week before the surgeon is back with your father, and getting a ball out might make all the difference between life and death. I have brought in a case of instruments the doctor left behind him. Do you think that you could help me?"

"Certainly I could," she said; "I think my first attack of weakness will be my last."

"Well, then, let us set to work."

In two or three of the cases the ball had penetrated the brain, but in the cases where the men had been shot in the neck or arm, Carter managed to find the position with a probe, and in four cases he succeeded in getting the ball out. In each case the patients behaved with heroic fortitude, and although the operation was necessarily painful, bore it without a murmur. When the work was done and the wounds bandaged again, he said: "Now, Nita, a little fresh air would do you good; come with me up to the ramparts. I am going to try the effects of an explosion. It is certain that the enemy are all gathered now in the mosque and village, and possibly after their defeat of this morning a blow will disconcert them altogether, and send them to the right-about."

"I should think it would," Nita agreed. "What loss did they suffer this morning, do you think?"

"I should say at least a hundred and fifty of their bravest men."

They went together to the spot where the train ended. "You go on to the walls," he said, "and watch. I will run up as soon as I have lit the fuse. We calculated that it would last five minutes to the spot where we laid the train of gunpowder."

Nita ran up to the wall and a minute later was joined by the officer. He took out his watch and counted the minutes as they went past. "Now, Miss Ackworth," he said, putting his watch into his pocket again, "the fuse ought to be up in forty seconds, but we must allow a minute or two for miscalculation in the length of the fuse."

Two minutes passed, then there was a deep roar; the mosque came down like a house of cards, and many of the houses collapsed from the shock of the explosion. Timbers and stones flew high into the air.

There was a moment's pause, and then an outburst of wild yells, and screams. "I think that ought to frighten them a bit," the Lieutenant said; "unless their leader has great power among them, and is a man of iron nerves, they would be off. The worst of it is they won't like to return home after the disasters that they have suffered to face their women. The men scarcely know what nerves mean, and they may very well make up their minds to make one last attempt. You may be sure it will be a formidable one, if they do, and they will probably adopt some entirely new scheme. We shall have to be doubly cautious for the next two nights."

Although a sharp lookout was kept, there were no signs of the enemy retreating. At night a scattered fire was opened from the village against the gate, but otherwise the night passed quietly.

"I don't like it," Carter said, the next morning; "the enemy have not gone yet and they have not renewed the attack. I have no doubt that the beggars are up to something. I wish I knew what it was. It worries me."

"It does seem strange," Nita said, "but perhaps they have been burying their dead, which would keep them pretty well occupied all day. However, as we have beaten them off twice with the loss to ourselves of only six killed and eight wounded, I suppose that we shall be able to resist them again."

"I am sure we shall if they attack us openly. It is only the unknown that I am afraid of. I was on the wall the whole night, but except for a continued random fire from the village they were quiet. I wish we had a moon. In that case we could make them out comfortably at a hundred yards, whereas on these dark nights one can't see twenty."

The officer's provision of danger told upon Nita, and when she reached the bungalow that night she dressed herself in Carter's uniform, cut her hair right close to her head, and lay down in readiness to leap up at the first alarm.

Had anyone been keeping special watch in the

They were met with a stream of musketry.

courtyard they would have seen a number of dark figures clustering between the wall and the hospital. During that and the preceding night eighty Afridis had gathered at the foot of the wall, crawling forward, one by one, on their stomachs. They were armed only with spear and knife, and with these had attacked the wall noiselessly, working the stones out one by one, unobserved and undreamt of by the watch on the wall above. The first night they had almost completed their work, and by three in the morning of the second had made an opening through which two men could pass abreast; then one had gone back to the village, and presently a stream of men were passing into the wall.

When all was ready they burst out with triumphant yells. They were, however, ignorant of the position of the various buildings and scattered in different directions. A moment later the bugle sounded, and twenty men in reserve at once made a rush to the mess house. The defenders of the wall came running down the various steps leading from the battlements. Many of these were cut down on the way, but twelve of them managed to join their comrades at the mess house.

Nita had just sprung up when the first yell broke out, seized her revolver and a box of cartridges, and had reached the mess house just as the party in the yard came in. The door was kept open until the last fugitive entered, desperately wounded and followed by a mob of the exulting Afridis.

Each man had been instructed as to the place he should take up in case they were driven from the wall, and the pioneers took their places in stern silence.

"Where is Lieutenant Carter?" Nita asked, "has anyone seen him?"

"I am here, Miss Ackworth, and, thank God, you are, too. I was one of the last to come in, for I hung round your bungalow to be sure that you got in."

Someone struck a light; candles and lanterns had been placed on the table, and Nita took a match-box from her pocket and lit several of them.

"Hullo, Miss Ackworth, is that really you?" said the astonished lieutenant as soon as a light was struck.

"Really and truly," she said; "you rather scared me yesterday by your talk, so I made myself up in your uniform before I lay down."

"You did very well," he said, "and I should certainly take you for a lad who had just joined the regiment. Well, I must not stay here. The first thing is to go round and rearrange the posts, for we have little more than half our original number here. I shall only leave three or four men on this floor at present, and shall at once open fire from the upper window. I shall be much obliged if you will stay down here."

"Certainly I will do so. I will place myself near the main door and let you know when there is any attack upon it."

"You are a brave girl," he said, "and I wish I had two or three dozen like you."

The Afridis soon pulled down the barricade from the front gate, and the tribesmen swarmed in. Very soon, however, they were obliged to take shelter in the various buildings, for the galling fire from the windows of the mess house rendered it impossible for them to stay in the open.

At daylight firing ceased altogether and refreshments were served out to the troops, and the officer and Nita sat down to breakfast in the mess room.

"There is no disguising it," he said, "that our position is a very critical one. In the first place, have you any idea how these rascals got into the fort?"

"I have no certain idea at all, Charlie," she said, "but I think that in the dark they must have cut out some part of the wall and bored a way in with their knives."

"I should think that it was something of that sort; they certainly did not get over the walls, they could not have done so without being seen by the sentry. That they should have got in has certainly changed our position greatly for the worse. They have shown themselves amazingly determined and enterprising. I have no doubt they will fill every house whose windows bear on ours, and keep up such a fire that we shall not be able to show ourselves. Under cover of that fire they will attack us. We may kill a great many of them, but I fear that in the long run it will come to the same thing. Our only hope, I think, lies in the chance that the major has received news of the attack upon us, and has abandoned the purpose of the expedition and is hurrying back to our relief. God grant that he may arrive to-day, or at latest, to-morrow. It is no use our shutting our eyes to the fact that our position is a very grave one."

Nita herself had already seen this, and yet she turned a little pale at her companion's words. "Well," she said, "I am glad indeed that I put on your uniform. One can but be killed once, and if they fail to kill me I shall do it myself. The only thing that troubles me is the thought of father coming and finding that I had been killed," and her eyes filled with tears.

"It is awful; I can say nothing to comfort you," he said, sadly, "but we must keep up each other's courage to the last. There will be no great occasion to keep up yours, though, for you are the pluckiest

girl that I ever saw. As for my own, I am in command here, and must keep up a brave face no matter what I may think."

"I am afraid that I am not so brave as I seem to be. It is as much as I can do really to keep myself from breaking down and crying."

"That is only natural," he said, "and if you would like to have a good cry I will leave you to yourself for half an hour."

"Oh, no," she said, "I don't mean that I am going to, for if I began to cry I don't know when I should stop; and," she added, with an attempt at a smile, "that would shake my hand and I shall want it to be as steady as possible. I think that I can promise that every shot shall tell this time. I dare say it seems horrid to you that I should be so bloodthirsty, but I hate them so for coming in and attacking us like this that I would kill them all with one blow if I could."

"I wish you could, very heartily," he said with a smile. "You have been a great friend to me," he went on, taking her hand; "your high spirits have kept me up and I don't know what I should have done without you. It was your idea of getting up the explosion, which I should say must have accounted for a great number of them, not counting those you brought down with your pistol. You have forgiven my speaking sharply to you, I hope?"

"I have never thought of it since," she said simply. "You were quite right to blow me up, and I felt that at the time. Yes, we have been great friends, and I have told myself scores and scores of times what a little fool I was to have thought that you were rather stupid because you talked so little and didn't seem to care much for entering into the amusements of others."

"No I know that I was not what you call a good comrade, but I could not help it. I fancy I was shy and I did not care much for any of their sports; besides, I knew that they regarded me rather as a killjoy, and that kept me from mixing with them much."

"Well, you have had your turn now, Charlie, and no one could have come out of it more splendidly. You will be a great soldier some day, if——" and she stopped.

"If I live, yes. I hoped some day to have got a chance of distinguishing myself, and the chance has come, but, as you say, it is unlikely that it will ever come again. But, as you also said, one can but die once, and at least I hope that I shall die with credit, and a soldier can wish no more. I would, however, give all the few hours that I might have left to me to have known that you had got out."

"That is all nonsense," she said; "I am only a girl, and a girl's life is not worth anything. If it wasn't for my father I should be fairly content."

"Well," he said, "it is no use talking. We shall have to do as best we can till the time comes. I must go round and see after the men."

CHAPTER IV.

There was but a short cessation of hostilities, and then from every building round a blaze of musketry burst out. The men were at once called down from the upper rooms, where there were no shutters, and planted at the loopholes of those on the ground floor. "Don't throw away a shot," was the order given to them: "keep well out of the line of the shutters, and when you do fire take care that you bring down your man."

So the fight went on all day. The losses of the enemy were far greater than those of the garrison, but the men lost to the latter could be ill spared.

"It is awful to think of the fate of those in the hospital," Nita said, when she took a hasty meal in the middle of the day with Lieutenant Carter. "Four or five of them managed to get in here alive; the rest must have been massacred in cold blood."

"Do not fret over that, Nita; it may be the fate of all of us in a few hours. We shall sell our lives dearly, but I cannot shut my eyes to the fact that the enemy are not far off. A big rush, then the doors will give way, for we have no means of strengthening them; and as there are but two headpieces at the back as well as in front, nothing but the return of the major can save us. There is no doubt that in spite of their losses the enemy are determined to capture the place. We have now only eighteen men left capable of firing a rifle, and they are fifty to one against us. It is of no use disguising it from ourselves. Tonight will see the end of the fight."

"If it must be so, it must," Nita said, quietly. "You don't think that any one is likely to see that I am a girl?"

"Certainly not; your disguise in that way is complete. There is more chance for you and me than for the men, for it is just possible that they may take us and carry us off, as hostages. That means that they will keep us as slaves till they are attacked in such force that they may think it prudent to make terms. The chances are against it, but there is a possibility that that is the course they will take."

"I would rather die than that," Nita said. "I might keep up my disguise for a time, but they would be sure to detect it sooner or later. I dare not think of it."

"I don't think that you would be detected, Nita. I should not detect your disguise myself, and if I who know you could not do so you may well pass with these ruffians. You have plenty of spirit and may very well sustain your character."

"I shall take my own life before I am captured," she said, passionately; "I have quite made up my mind to that."

"That must be your own choice," he said, gravely. "While there is life there is hope, and sooner or later you may be restored to your friends. Sooner than later, I should guess, for you may be sure that when the news of this massacre reaches the authorities they will lose no time in getting together a strong punitive expedition against the tribes, and as soon as they find that resistance is hopeless they will try to make terms on the strength of any hostages that they may have in their hands."

Nita shook her head. "It is all very well for you to give me hope, Charlie, but you know as well as I do that the chances are tremendously against us."

At night, as soon as it became dark, there was a tremendous rush against all three doors. "It is of no use, men," Carter said, in firm tones which rose above the din, "the doors will not hold out five minutes. We will assemble here and fight till the last. We have done all that men can do, and I thank you for the way that you have stood by me, but the odds are too great for us and we have nothing to do now except die like men. They will find that, handful as we are, we can account for a good many of them yet."

The men gathered in a ring with Carter and Nita in the centre. Three minutes later two crashes were heard and the natives burst in. They paused a moment on seeing the compact little body waiting their attack, then with yells of triumph rushed at them. They were met with a stream of musketry, every shot of which took effect, and the crack of the revolvers of Carter and Nita added to the din. In vain the natives endeavored to get possession. Then they betook themselves to the muskets. The ground was speedily piled with dead, but numbers gradually prevailed. The little ring of defenders grew less and less, and at last, when but six men were standing, they burst into them. There was wild fighting for a minute; the men with bayonets did their work, but gradually the din ceased.

Carter was one of the last to fall. Nita had one shot left in her revolver and directed this to her forehead. But at the moment when she was about to draw the trigger she was felled to the ground by a blow from the butt of a musket. Then the Afridis, seeing that all was over, scattered for plunder, leaving the bodies of the slain where they lay. Daybreak had dawned when Nita opened her eyes. She saw that Carter, herself and two others had been removed from a heap of slain and placed by themselves. She closed her eyes again with a shudder and yet with a feeling of relief. The removal of the three men as well as herself must have been the result of an examination of the slain, and like herself the other three must have been found breathing. Her head ached as if it would split and she lay for a long time without moving. Then two men who were evidently chiefs came up and examined them.

There was some discussion between them and then Carter and another were carried out, and she and the remaining man, who was one of the native officers, were also carried out. The wounds of the four were all roughly bandaged and then Carter and his companion were lifted up by four natives and carried off. Nita remained for another hour. By this time the court had been completely ransacked. Then she and her companion were also placed on stretchers and carried out of the fort, which was at once set on fire in a dozen places. Some water was given them and the tribe then started off. Nita lay with her eyes closed all day, scarcely able even to think, for her head throbbed as if it would burst. They traveled fast and did not halt till nightfall. Then she was given a piece of dry bread and a little water. She made an effort to eat, but it was useless; she drank most of the water, however, and soaked her handkerchief in the rest, and placed it up to her head, and managed at last to doze off to sleep. In the morning she felt better. The chief then came up to her and spoke. She shook her head and he went away and presently returned with one of the tribesmen who had served in a Punjauhi regiment.

"Who are you?" he asked, and in that language which Nita could speak fairly well.

"I am an officer in the regiment," she said, "and am a relation of the major." The man translated it to his leader; he looked pleased.

"Tell him that he will be my servant," he said, "and will be well treated if he gives no trouble, but if he attempts to escape he will be shot at once."

This was translated to Nita. Then he went on: "You are very young to be an officer; you are no more than a boy."

"I am young," Nita replied, "but when one has a major for a relation one can get a commission at a much younger age than he otherwise would."

(To be continued.)

A Boy's Garden in the North

Dr. Hugo Erichsen

LUTHER BURBANK.

Creator of New Flowers, Vegetables and Fruits.

IN NORTHERN latitudes, where the gardening season is short, boys will derive much more satisfaction, as a rule, from hardy plants than from annuals. The former increase in size and beauty from year to year, and many of them multiply so rapidly that a whole garden may be stocked with the prolific varieties in a comparatively short time, at an insignificant outlay of money. Take Rudbeckia Golden Glow, for instance. Less than three years ago I procured two small specimens of this plant at an expenditure of twenty cents. It spread so rapidly, in my backyard garden, that I was compelled to take up most of it, subdivide it and give it away in order to keep it in check. In this way I must have distributed at least one hundred plants of this perennial, which, in turn, as time goes by, will become the parents of hundreds of others and stimulate the generosity of their owners, until whole sections of my native town are radiant with golden bloom. Left to itself, the rudbeckia grows like a weed and soon takes possession of a garden.

One great advantage of hardy plants is that, when once established, they practically take care of themselves and require very little attention, outside of sprinkling and pruning. It is safe enough to lop off dead branches, wherever and whenever found, but otherwise the pruning knife should be used sparingly, unless directed by intelligence. A book on pruning may be found in almost every public library and from it directions may be readily gleaned to trim the limited number of shrubs that adorn the average home grounds. In the absence of these directions, it would be preferable not to interfere with the shrubs at all and to let nature take her course. Unintelligent pruning will only result in the mutilation of a specimen, instead of stimulating its growth by confining the nourishing processes to healthy parts.

Some plants, like some persons, are peculiar. It will not do to prune the lilac in the fall or early spring, for instance, as it carries its buds for the coming season throughout the winter. People who do not know this sometimes commit the mistake of trimming their lilacs in autumn, and then wonder why they fail to bloom. You might as well cut a dog's head off and then expect him to bark. Knowing the peculiarities of the plant, it is plain that the proper time to trim it is shortly after it is through blooming, that is to say, before the new buds are formed.

The modern garden might be termed an index of civilization. Every part of the world has been laid under tribute to supply it with new forms of plant-life. The aster was derived from China, the rose and azalea from India, and the lilac from Persia. But no country has done as much in this respect as Japan. The Yankees of the East are great plant lovers. They fairly worship the cherry trees, when in bloom. By careful selection they have evolved some types of flowers that can scarcely be improved upon, which is particularly true of some of their chrysanthemums.

In the person of Luther Burbank, of Santa Rosa, Cal., America possesses a wizard of the first order in the floricultural and horticultural world. He has created many new flowers, vegetables and fruits, by what is called cross-breeding, and will always be regarded as one of the great benefactors of his race. Among the new fruits that he originated is a prune that bears neither seed nor stone and is propagated by grafting. In grafting the budding shoot of one plant is inserted into the stem or branch of another. Curiously enough, the characteristics of one plant are transmitted to another in this manner. Burbank has also produced a cross between an apricot and a Japanese plum, under the name of "Plumcot." This combination is as distinctly a new fruit, as though it had been handed down from another planet and possesses the desirable qualities of both of its parents. His new rose "Coquito" is a continual bloomer, but not hardy much further north than Philadelphia. Burbank's latest floral wonder is the "Shasta Daisy." It is hardy, in his

own words, "wherever it is not cold enough to kill oak trees." Being a perennial, it blooms better and more abundantly each season and multiplies rapidly. The flowers are extremely large and graceful, averaging about a foot in circumference, with three or more rows of petals of the purest glistening whiteness, on single, strong, stiff, wiry stems, nearly two feet in length. Shasta daisies were originated by combining the weedy, but free flowering, American species with the rather large, but coarse, European species and the Japanese species, after which rigid selection through a series of years produced the present wonderfully useful and beautiful strain. Many new and graceful forms have lately appeared among the Shasta daisies and well-marked colors are now appearing in a flower which was never before seen except in white.

Mr. Burbank's portrait is reproduced from a photograph he recently had the kindness of sending me. It well shows the studious nature of the man, which contributed so greatly to his success.

The list of hardy shrubs and plants is so very extensive that I must refer my boy friends to the catalogues of reliable nurserymen for a comprehensive consideration of them. I will only mention a few that have proved particularly useful in my own garden. Among the shrubs I would especially commend the "Bridal Wreath" and "Van Houtte's" spires, the pink and white flowering almonds, the common snowball, the mock orange, Thunberg's Berberis, Deutzia Gracilis, the Japanese rose (Rosa Rugosa), weigelas, the hardy hydrangea, the Japanese quince, the snow-berry, the golden-leaved elder, and the High Bush Cranberry.

As regards hardy plants, I will also have to confine myself to a few, with which I am personally familiar. Peonies are always of great decorative value, particularly the white and pink varieties. Nor should columbines, larkspurs and foxgloves be omitted from any enumeration of our most useful perennials. And who, once having cultivated them, would

SUGGESTION FOR GARDEN IN THE NORTH

care to miss the modest buttercup and showy bleeding heart from his garden? Lilies-of-the-valley spread rapidly when given partial shade. The day-lily, hardy Phlox, Iceland poppy, and lobelia, are also noteworthy in this respect. But for cut flowers, that is to say, flowers to make a bouquet with, nothing surpasses the galliardia, coreopsis, helianthus multiflorus (a variety of sunflower) and the giant daisy.

Of course, every boy will want to have roses in his garden. But if he does not want to court disappointment, he had better avoid all but the most common varieties, such as Gen. Jacqueminot, Harrison's Yellow, Clotilde Soupert, etc., and prepare the spot in which the queen of flowers is to be located by thoroughly enriching and mellowing the soil.

It is quite possible that, somewhere in this great country of ours, among the hundred thousand readers of THE AMERICAN BOY, one or two poor lads may peruse this article with a heavy heart, under the impression that they are debarred from the pleasures of gardening, on the score of expense. But for them nature has provided a great storehouse of floral treasures in the woods and fields. Most farmers will readily give them permission to help themselves to any useful plants they may discover, and the search for new acquisitions will in itself afford pleasure and provide an incentive for frequent open air excursions. Gradually the boys will acquire a knowledge of the habits of wild flowers that will enable them to transplant the trillium safely from the woods, take the flowering dogwood from the swamp, cull the wild lilies from the roadside, and select the most perfect daisies

and goldenrods from the fields. All of these flowers, and many more from the same source, thrive under cultivation.

The seeds of annuals may also be procured quite cheaply and offer an almost unlimited variety of floral splendor. What a multitude of shades, for instance, may be found among the sweet peas. And then there is the aster, in its variety of form and color, both dwarf and tall.

How many of my boy friends, I wonder, are familiar with the snowdrop that heralds the coming of spring. Sometimes this beautiful white flower puts in an appearance before the snow is quite gone, while Jack Frost still hovers about ready to punish any plant that dares to defy his authority. It is quickly followed by the many-hued crocuses that have been planted on the grass plot the preceding fall and now look like blossoms plucked by some wilful child and scattered at random over the lawn. Before the grass is long enough for mowing this pretty flower is out of bloom. Curiously enough crocuses are not injured in the least by successive croppings with the lawn mower, but come up season after season, as though nothing had happened.

In my garden the spring bulbs and forsythias bloom at about the same time—in April. The forsythia is also known as the golden bell and possesses the peculiarity of blooming before its foliage appears. As the bare branches are studded, however, with dense masses of small yellow flowers, these shrubs produce a very pretty effect. In most gardens Fortune's forsythia will give better satisfaction than the variety known as the Viridissima. The Dutch bulbs, that is to say tulips, hyacinths and narcissi, should be planted in October for spring blooming, preferably in beds, as isolated specimens do not attract much attention. Color effects of perfect harmony may be secured by proper arrangement.

Among the bulbs that bloom in the summer and early fall gladioli, tuberoses and dahlias are most noteworthy. For cultural directions of the plants mentioned in this article my boy friends are kindly referred to the catalogues of florists and nurserymen. Moreover they will find that every package of seeds bears directions and that no class of men is as eager to impart information as the propagators of flowers, fruits and vegetables.

During the early months of the year much may be done in hastening the maturity of vegetable plants by sowing the seeds in shallow boxes in the house. When the second leaf appears the little plants are shifted to small flowerpots and ultimately transferred to the garden. But in large cities it hardly pays to do this, as plants of tomatoes, cabbages, etc., may be purchased at a very low price. Grown by professionals, who have made a study of the business, these are generally more satisfactory than the seedlings of the amateur gardener.

I shall take it for granted that that part of the lot selected for a kitchen garden has been thoroughly dug over and fertilized. If well-rotted cow manure is not obtainable for this purpose, artificial fertilizers will answer.

At the close of April, garden work begins in earnest. Cabbage, cauliflower, radish and lettuce seeds may now be sown in the open ground. Parsley may also be sown out of doors, as soon as the ground can be worked. Time may be gained with peas by sprouting them indoors, before planting them in the open air. The same method applied to potatoes yields early tubers. Spinach should be sown early and every two weeks after the first sowing, if a succession is desired.

In the early part of May, it is well to start Lima beans in pots, as they require a long time to mature. During this month bush beans, started in the house, may also be planted in the open ground as soon as the weather becomes settled, and beets sown for succession. At the end of May cucumbers may be sown out of doors. I find it a good plan to put half a dozen cucumber seeds in a wooden berry box (the kind strawberries are marketed in), about the middle of April. In transplanting these seedlings to the open ground, it is only necessary to prepare a small hill, with a plentiful supply of well-rotted manure in it (about two shovelfuls to the hill will be enough), break up the box and insert the plants. If they are thoroughly watered before this is done, they can easily be transferred in this manner, with the earth intact. When the plants have become fully established, better results are ensured by removing all but three. Care should be taken, however, not to set out the plants until no danger from frost need be apprehended, as the cucumber is very tender.

It has been found that lettuce seed does not germinate well in warm weather. For this reason it should be sown in a shady spot, after the beginning of June. As fast as the bush beans are removed, their place may be taken by sweet corn, cabbages and cauliflower, for a late crop, may still be planted during the month of roses, but as they are comparatively cheap and take up a great deal of space, it is questionable whether it would not be better to exclude them. Wax beans and radishes may still be sown in June and July for succession.

With me, the vegetable gardening season closes with the harvesting of Brussels Sprouts. In the past year I removed the last crop of this delicious vegetable from my garden in the middle of November. The edible part of the plant consists of sprouts that grow in the leaf-axils.

A KNOWLEDGE OF DRAWING

Opens many opportunities to Boys. We offer three courses:

ARCHITECTURAL, MECHANICAL, PERSPECTIVE.

MACHINERY HALL, ARMOUR INSTITUTE

Instruction under supervision of Members of the Faculty of ARMOUR INSTITUTE OF TECHNOLOGY.

ALSO COURSES IN

Electrical, Mechanical, Civil, Locomotive, Stationary, Marine and Sanitary Engineering; Navigation, Refrigeration, Architecture, Sheet Metal Work, Telegraphy, Telephony, Textile Manufacturing; also 40 Short Engineering Courses.

In addition to their regular instruction papers, students in full Engineering courses are furnished a technical Reference Library (in ten volumes) as a help in their studies.

American School of Correspondence,

Armour Institute of Technology.
CHICAGO, ILL.

Make Your Own Jewelry

and sell it at a big profit. Any bright boy can make gold wire jewelry at home as well as the men who make big money at it. Easy to learn—easy to make—easy to sell. At a cost of a few cents, stick pins, rings, watch chains, fobs, etc., can be made in a few hours that will sell for dollars. Complete outfit and instructions with tools and material sufficient to make

\$10.00 worth of jewelry, sent express paid for \$2.25. Catalogue containing illustrated instructions and a full line of tools, material and jewelry sent

FREE

ROGERS, THURMAN & CO.,
158 Wabash Ave., Chicago, Ill.

The Rienco Electric Motor.

The RIENCO motor is of an entirely new design. It will run at high speed with one cell of almost any kind of battery. It is one of our "HALF-DOLLAR" specialties and lowest priced motor on the market. Full instructions with each motor. Price 50c. Postage and packing 15c.

Ithaca Electric Novelty Co.

ITHACA, NEW YORK.

MIRROR IN HAT

WITH YOUR NAME ON. Something entirely new; an elegant mirror and hat mark combined will stick in any hat. This is the latest novelty and thousands are being sold daily. Agents make \$10 daily. Sample 10c, postpaid and our mammoth catalogue free. Address Ample Supply Co., Dept. B, 371 Broadway, N. Y.

Ferry's

Seeds

are planted by farmer and gardener who has stopped experimenting. It pays to pay a little more for Ferry's and reap a great deal more at the harvest. All dealers. 1903 Seed Annual postpaid free to all applicants. D. M. FERRY & CO., Detroit, Mich.

PALMS FROM SEED The choicest Tropical Palms can now be as readily grown from seed as the most common vegetable. Large Packet only 10 cents contain- ing several varieties. Catalogue free. LAKE VIEW SEED GARDENS, BROCKPORT, NEW YORK.

Joe Jolly Boy

I was born in the land of Siam, in the southern portion, which is French possession. My father was a French soldier and my mother a native woman, and I was the second child born to them. The first was also a boy, and being three years older than I he had the care of me to a great extent.

My name may strike you as queer, and I will explain how I got it. Our family name is Bart, and my given name is Paul, but I was so full of mirth, even as an infant, that I made everybody smile with me. As a youngster I was laughing from morning till night, and nothing ever put me out of temper. One day, when I was about ten years old, father brought a comrade home with him, and when this man heard me singing and laughing he said to my parents:

"Your boy is so jolly that you ought to change his name. If I were you I'd call him Joe Jolly Boy."

My parents smiled at the idea, but in a little time they began to call me Joe and Joe Jolly Boy, and by the time I was ten years old everybody used the name in speaking to me. The same soldier who gave me the name also put queer ideas into my head. When he came a second time he sat down with me on a bench at the door and said:

"Joe—Jolly Boy, when you get to be a young man you should pay a visit to the island of Jolly Land. It is situated half way across the China Sea in the direction of Borneo, and a soldier who was there once has told me some rare tales about the people. It is Jolly Land, indeed, as everybody laughs from dawn till dark."

My comrade was there for four weeks, and he did not see any one weep or even put on a serious face. The people are not like us in color or build, and there are very strange animals on the island. What is right-side up to us is upside-down to them. They live in strange houses, eat strange food, and are altogether unlike any people you ever heard of before. Hasten to grow up, and some day you may pay a visit to the people who can laugh as loud and long as you can."

The soldier talked simply to be friendly with me, and I don't think he believed half he said, but my interest was at once aroused. I wanted to set out and find that island and see what was to be seen. Indeed, I was on my way down to the sea shore to find a boat and put to sea when my brother Anak met me and took me back home. I told him what the soldier had said, and he replied:

"Brother, it is all nonsense. I never heard of such an island, and I'm sure father and mother never did. Even if there was, how are you to get to it? It is hundreds of miles away over the water, and if you put to sea in a boat you would perish miserably within four days. Do not think of such a thing."

But I did think of it. It was in my mind day and night, and though I was as jolly as ever I was planning to do a very foolish thing. A week after the soldier had told his story I had determined to set out on a voyage. Had my brother suspected what I was planning he would have told my father, and then I should have been severely talked to and perhaps whipped, but I was very careful in my movements.

Down on the shore beyond our house all the fishing boats were always drawn up at night. I had been out in boats many times, and young as I was I knew something about sailing them. I also realized that I must have food and water in plenty if I was to go to sea.

The soldier had said the island was far away, and I might be two weeks reaching it. The water I could get by filling one of the boat kegs at the spring, but most of the food I must get at home. It took me a week to secrete the quantity I wanted, and then I gathered bananas, oranges, lemons and other fruit to add to it, and one night I crept out of bed, made up a bundle and slipped out of the house without any one being the wiser.

There were no fishermen on the beach, and having filled my keg and stowed away my food I shoved the boat into the water and set out on the strangest voyage a boy ever undertook.

I was going to brave perils and dangers I did not dream of, and to have adventures that might bring fear to the heart of a strong man. I did not realize this, however, and had anyone been about when I sailed out upon the dark waters he would have heard Joe Jolly Boy laughing as he set out for the unknown Jolly Land.

As the wind was off shore and I had selected a fast sailing boat I was soon at sea, and had I been missed and pursuit made, the darkness was too great for any one to have espied me. I was not at all afraid, for I was used to the sea, and not at all lonesome, because I was setting out on a wonderful voyage.

I truly and honestly believed every word the soldier had said about Jolly Land and its queer people, and of course I expected to meet with many adventures and have things to tell upon my return. If any one had been with me that night he would have heard me laugh more than once as I thought of the island where everything was upside-down.

I did not sleep at all during the night, as I wanted to give the boat all my care and be as far away as I could when morning came. Daylight came before I expected it, and as I stood up and looked around I could not see a sail except at

FOOLED THE HOSPITAL

Was Pronounced Incurable But Got Well on Pure Food.

Sometimes in a case of disease resulting from the use of improper food the symptoms are so complex that medical science cannot find the seat of trouble, and even the most careful hospital treatment fails to benefit. A gentleman of Lee, Mass., says: "On April 1, 1900, I was sent home by one of our Massachusetts hospitals, saying nothing more could be done for me. I have been a great sufferer from nervous diseases and rheumatism and nervous prostration and had previously been treated at Sharon Springs and by a number of doctors without getting much assistance."

"One day I was feeling worse than usual when I read an article about your Grape-Nuts that impressed me so that I went out for a package. I commenced using it at breakfast the next day."

"For fifteen months I never missed one day. If you ever saw anyone grow strong and improve it was I. I gained from 125 pounds to my old weight 165. I will always be a cripple from rheumatism but otherwise I am so much improved that I now feel as well as any man in this country." Name furnished by Postum Co., Battle Creek, Mich.

There is a recipe book in each package of Grape-Nuts that will interest the housekeeper.

Wonderful Boys.

Mozart was a composer at five. Gassendi was a preacher at five.

Lalande composed dramas and novels at ten.

Kotzebue wrote his first composition at three.

John Stuart Mill was a profound thinker at twelve.

Darwin had made a study of plants and animals before he was eight.

Galileo at eighteen invented an instrument that would measure the pulse.

Thomas Young could read at the age of two. At five he had learned a large number of English and Latin poems.

A wonderful twelve year old boy violinist has been discovered in Brooklyn, N. Y. He bears the name of Herman Brede. Professor Hahn, of Columbia College, has recently undertaken the instruction of the boy. The little fellow is quite methodical. He has posted in his room a code of rules which he follows with the utmost care. At 6:30 he rises, has breakfast, practices one hour, studies one hour, and at 9 o'clock is in school. At 12 he has dinner and returns to school and is home again at 3. He plays for half an hour, practices for two hours, then has supper, after which he gives himself a half hour's recreation, practices an hour more, studies for an hour, and at 9 o'clock is in bed. He is a vivacious, buoyant and happy-spirited boy.

POWELL

IF YOU ARE EARNING LESS THAN \$25 Per Week

I can double your salary or income by teaching you how to write catchy, intelligent advertising.

My System of Instruction by Mail is the only one in existence that has the hearty indorsement of the great experts and publishers, and I am anxious to send my prospectus with proof if you are interested. I will show you how to earn from \$25 to \$100 per week. Address, GEORGE H. POWELL, 120 Temple Court, New York.

ADVERTISING INSTRUCTION

a great distance. This was well for me, for had any ship come close to me the captain would have insisted on my coming aboard.

I ate my breakfast and whistled and sang and laughed, and the boat sailed on at a good pace for four or five hours. Then the wind died away and I was left becalmed.

Thinking I might catch a nap before the breeze came again I lay down in the bottom of the boat and closed my eyes. I did sleep for a couple of hours, and my awakening was anything but pleasant. The first thing I knew the boat was being lifted out of the water and jostled about in the strangest manner, and when I leaped to my feet it was to find that a whale had come under my craft and bounced her about until it was almost a miracle she was not upset.

The boat and the whale rested on the water side by side, and although I had had a narrow escape from being thrown into the sea and drowned, and was still in peril, I had to indulge in a hearty laugh.

By and by the whale began lashing the water with his tail, and the waves he kicked up were likely to swamp my boat, but I could do nothing but hang on and hope for the best. When I was about ready to give up in despair the monster suddenly sank out of sight, and in a little time the sea grew quiet again. I was very thankful, as you must understand, and had some of you been in my place I think you would have turned back and made the best of your way home.

The calm continued, and when the sun went down he was like a great ball of gold. I had finished my supper, and was softly singing to myself as darkness came down, when all of a sudden another voice reached my ears. It was that of a woman, and she seemed to be humming a tune. There was no ship in sight, and the shore was at least fifty miles away, and I was both puzzled and alarmed. I had been looking about me for fully five minutes when I made out the head and shoulders of a woman who was climbing to the stern of my boat. She had a fair face, long hair and a string of pearls around her neck, and I took notice how white her teeth were.

I was a bit afraid for a moment, but then I remembered hearing the fishermen talk of mermaids, and I felt sure that this must be one. I beckoned to her and called her my dear and said that I was lonesome for company, but she shook her head and smiled. Then I began softly creeping aft, thinking to make a sudden grab and capture her, but she suspected my intentions and swam away from the boat and hummed a merry air and smiled archly.

"I have heard of mermaids," I said to her. "You live in a coral cave at the bottom of the sea, and must meet with many wonderful sights. Won't you come and talk with me? Do not fear that I will hurt you. When I go home I should like to tell the fishermen and others that I have not only seen, but talked with a real mermaid."

It was no use, however. Boy that I was, she was afraid of me, and while I was speaking to her she suddenly sank away into the sea and I did not get another sight of her, although it was a long two hours more before the wind came and I resumed my voyage. This mermaid lived so far from the shore that probably she had never seen a human being before, and she was therefore afraid of me.

These were two pretty fair adventures for one day, but I was to have a still more stirring one on the morrow, and if you read the next chapter I think you will be interested in what came to me and how I got out of it.

(To be Continued.)

A Big Telephone Exchange.

Only the girls in the telephone exchange in New York City and the officials of the telephone company, know what a vast amount of business is transacted in the American metropolis by telephone. In New York and its suburbs, about 120,000 telephones are in use, more than in all France. These 120,000 telephones are used in ringing up the central stations about 426,000 times a day.

The Young Man's Administration—Waldon Fawcett

NEVER before in the history of the United States government have so many young men held high positions in Uncle Sam's service as at present. President Roosevelt is the youngest man who has ever held the highest office in the gift of the nation, and it is manifestly his policy to surround himself with keen energetic young men. Inspiration for American boys may be found in the fact that practically every one of the young men who have lately been elevated to high places have risen from humble beginnings solely by their own efforts. Indeed many of them have come up "from the ranks" in the very branches of the government service in which they now hold positions of responsibility and trust.

Perhaps, most prominent among these notable young men is Hon. George B. Cortelyou, who has been made Secretary of the Department of Commerce and Labor, a new branch of the government which has just come into existence. Mr. Cortelyou is the third youngest man who ever held a position in a President's Cabinet. Mr. Cortelyou was born in New York and although he prepared to go to Harvard College circumstances prevented and he contented himself with a common school education. For a time he taught school in New York and then did newspaper work, but his real career began when after studying stenography he secured a position where rapid shorthand work was required.

In 1891 Mr. Cortelyou removed to Washington and secured a position as private secretary to one of the officials in the Post Office Department. When President Cleveland needed another assistant he heard of the bright young man and had him transferred to the White House. There he has been ever since acting as private secretary to three different Presidents—Cleveland, McKinley and Roosevelt—and earning a salary of \$5,000 a year, which in his new position is increased to \$8,000 a year. One of the secrets of Mr. Cortelyou's great success is found in the fact that he is not afraid of hard work, toiling at his desk until after midnight almost every day. Another manner in which he made himself invaluable was by his carefulness never to make mention to any person of matters which came to his knowledge in the course of his work and which his employers might not wish to have known. Mr. Cortelyou is a musician and gains as much enjoyment from his music as many men do from hunting or fishing or yachting.

The second most important position in the new Department of Commerce and Labor, a post to which is attached a salary of \$100 a week, has been given to another young man—James R. Garfield, son of the late President Garfield, who was assassinated in Washington after serving as Chief Executive for only a few months. Mr. Garfield was born in Ohio and received his education in the schools of his native state and at Williams College, which his father had attended before him. Later he studied law and formed a partnership with his older brother. Mr. Garfield is a firm believer in young men going into politics. He has been in politics—at first in a very small way,—ever since he was old enough to vote and although he has sometimes been defeated he has kept right ahead fighting for cleanliness and honesty in public affairs. It was only a few months ago that the President asked Mr. Garfield to come to Washington to take the place on the Civil Service Commission which Mr. Roosevelt once held himself, and in a short time the young man from Ohio had made so favorable an impression on the President that the latter asked him to take the highly important position of Commissioner of Corporations.

William Loeb, Jr., who succeeds Mr. Cortelyou as Secretary to the President, has gained his present position solely as a result of his own exertions. He is a native of Albany, New York, and he left high school when he had only half completed the course in order that he might strike out for himself. Like Secretary Cortelyou he chose shorthand reporting as a profession and steadily advanced, until he was elected official stenographer of the New York state legislature. When Mr. Roosevelt became governor of New York in 1899 Mr. Loeb was appointed one of the four executive stenographers and his ability soon attracted the notice of Governor Roosevelt who made him his private and confidential secretary. When the Governor was nominated for the Vice Presidency and made his memorable tour of the country Mr. Loeb accompanied him, and when Mr. Roosevelt was elected Vice President the young man was made his secretary. When later Mr. Roosevelt became President he kept his "right hand man" with him as Assistant Secretary, and when Mr. Cortelyou left the White House to assume the direction of the new Department of Commerce Mr. Loeb was promoted to his present position.

Mr. B. F. Barnes, who has just been advanced to the position of First Assistant Secretary to the President and who preferred this position rather than a post as Assistant Secretary of the Department of Commerce, although the latter would have paid a much higher salary, is another one of the administration's "strong young men." A few years ago he was merely a government clerk

A Page of Fun and Brain Gymnastics

Red and Gray Make White.

Red and gray make white. If you don't believe it, pour a weak solution of caustic soda, colored red with cochineal, into a gray solution of sulphuric acid. The result is a pure white liquid.

To Tell Age.

Tell the person whose age you are endeavoring to learn to put down on a piece of paper (and he does not show you the figures) the day of the month of his birth. Ask him to double it, add seven, multiply by fifty, add his age, subtract 365, multiply by 100, add the number of the month of his birth, and then add 1,500, and give you the resulting figures. You will find in their order the day of birth, the age, and the number of the month of birth. For instance, if one is born on the 25th day of February, and is forty two years of age, the resulting figures would be 254,202. If he is thirty eight years old on the 5th day of September, the resulting number would be 53,809.

To Make an Aeolian Harp.

This instrument can be made by almost any ingenious boy. It consists of a long, narrow box of very thin deal, about five or six inches deep, with a circle in the middle of the upper side an inch and a half in diameter. In which are to be drilled small holes. In this side, seven, ten or more strings, of very fine gut, are stretched over bridges at each end, like the bridges of a fiddle, and screwed up or relaxed with screw pins.

The strings should all be tuned to the same note, and the instrument be placed in some current of air, where the wind can pass over its strings with freedom. A window, the width of which is equal to the length of the harp, with the sash just raised to give the air admission, is a proper situation. When the air blows upon the strings of the harp, with different degrees of force, it will excite different degrees of sound; sometimes the blast brings out all the tones in full concert, and sometimes it sinks to the softest murmurs.—New York American

A Mathematical Rhyme—G. M. L. Brown.

In the following verses you must supply numbers where the dashes occur. In one case, you will find, a Roman numeral is needed. Be sure not to place a figure that will injure either the rhyme or the meter. When you have finished add your numbers; they should amount to 156. This includes the numbers twelve and fifty.

When Jimmie —d was twelve years old
He showed no —dency — work;
His father, kind, —bore — scold,
Till Jim, he saw, would be a shirk.

"See here, my boy," said he — day,
As Jim a hearty breakfast —,
I —der who the bills would pay,
If no — worked from morn till I —."

Your —tune will not come unless
You strive, and I — told you once,
I've told you fifty times, success
Will ne'er at —d the lazy dunce."

"So quicken up your g—, my lad;
He — they pass you in the race;
—hibit character; be glad
It's not — I — take your place."

FAT BABIES

Are Famous Sleepers

The saying: "Sleepy as a fat baby," expresses a good deal, for fat babies are famous little fellows to sleep. What a contrast is their refreshing rest to the pitching and tossing of a sleepless coffee drinker. A good elder of Springfield, Ill., found a way to bring refreshing sleep in place of insomnia. "Until three years ago," he says, "for 15 years I was troubled with a throbbing in my stomach, was very nervous, kidneys out of order, troubled with severe headaches and dreadful insomnia.

"After trying all sorts of remedies I came to the conclusion that my troubles were the result of drinking coffee, and seeing an article in the paper about Postum I determined to try it. So I quit coffee and took on Postum. It agreed with me from the first cup. At first I drank it diluted, then pure. I relaxed it, too, and to my great joy I was soon free from stomach trouble, nervousness all gone and head clear, and instead of being wakeful for half the night I sleep like a fat baby and get up in the morning refreshed. This I owe to having quit coffee and taken to drinking Postum." Name furnished by Postum Co., Battle Creek, Mich.

Nothing marvelous about it, but there is a reason. If healthy sound sleep is worth anything to you, drop coffee and give Postum a short trial—say ten days. That will tell the tale.

The Mysterious Tumbler.

Here is a little experiment that is mysterious enough to those that witness it to seem like magic, and yet it simply is an illustration of a well-known principle of natural philosophy. All you need to make the experiment is a marble-top table, such as may be found in any parlor or sitting room, a glass tumbler, and a piece of candle.

You first put under the two legs at one end of the table thin wedges of wood or paper, to give the table a very slight incline in the direction of the other end. If you wish to make the feat all the more mysterious, you should put the wedges under the legs when the company is not looking.

Now take a plain glass tumbler and moisten the rim carefully, so that the water will stick to it, or at least enough

of it to make a thin coating of moisture. Place the tumbler, rim down, on the end of the table where the wedges are, and it will not move, for the incline, if you have not made the wedges too thick, will not be great enough to make the tumbler move by gravity.

But you are going to make the tumbler move of itself, so that it will seem to do so by some magical power. To do this light the piece of candle and hold it near the tumbler for a few moments. The heat from the candle will cause the air in the tumbler to expand, and this expansion will have the effect of raising the tumbler just a little from the smooth marble. The air cannot escape, however, because the water around the rim of the tumbler keeps it in.

Then the tumbler will begin to move slowly along the marble top, for the slight elevation that the expanded air has given it makes it now rest on a thin layer of moisture, and it glides down the incline by the force of gravity.

How to Draw an Oval.

Of course, you all know how to make a circle. That's easy, and there are numberless ways of doing it—with a pair of compasses, or a string, or a piece of paper with two holes punched in at the requisite distance apart, or in any other way that fancy may suggest.

But how many of you know how to draw a perfect oval? That's a very different matter. It does not require any elaborate instruments to do it, however, and if you will follow the directions given below, you will find yourself able to do it without any difficulty.

Take two stout pins and stick them firmly into the table, through the sheet of paper on which you wish to draw the oval, about two inches apart. Then tie together the ends of a bit of string, about eight inches long, so as to form a loop, leaving two loose ends, each about an inch long. When you have done this, tie the loose ends into a smaller loop, which need not be larger than sufficient to admit the point of a pencil.

Now, place the larger loop over the two pins and, putting the point of your pencil through the smaller loop, stretch the string as far as it will go and circle all around the pins. You will find that in moving from one pin to the other the string forms an ever varying triangle, and that the figure described in passing all around the pins is as perfect an oval as the most delicate instrument can produce.—New York American.

The Game of Contrary.

Two players hold out a light walking stick or umbrella between them. A third player traces mystic circles in the air with his forefinger, saying solemnly, "Here we go round by the rule of contrary. When I say 'hold fast,' let go; when I say 'let go,' hold fast." He then suddenly and sharply cries out, "let go." In nine cases out of ten the players will drop the stick instead of holding fast. They will be anxious for another trial, but the chances are they will be caught napping the second time as easily as they were the first.

"To Err is Human"— Not to Err—Elgin.

The man who is always
right on time is the man
who carries the

The Boys' Brain "Gym."

Walton Griffiths, Chicago, Ill., sends the following brain puzzlers:

U 0 a 0 but I 0 U,
O 0 no 0 but O 0 me;
O let not my 0 a 0 go;
But give 0 0 I 0 U so!

The answer is:
You sigh for a cipher, but I sigh for you;
Oh sigh for no cipher, but Oh, sigh for me;
Oh let not my sigh for a cipher go;
But give sigh for sigh for I sigh for you so!
(2) What sea would make the best bedroom? Ans.—Adriatic.—(A dry attic.)
(3) What goes all the way to New York without stopping? Ans.—The railroad.
(4) What could you fill a barrel full of to make it weigh less? Ans.—Holes.
(5) What is the heaviest horse on the road? Ans.—A led (lead) horse.
(6) What relation is the doormat to the scraper? Ans.—A step farther (father.)
(7) What word in the English language is longer when it is shorter and longest when it is shortest? Ans.—Short.

Charles C. Curtis, Amesville, O., sends the following:

What ship has two mates but no captain?
Answer: Courtship.
Why is a jeweler like a jailer?
Answer: One sells watches and the other watches cells.
The first boy mentioned in the Bible is Chap. 1.
When does a dog become larger and when does it become smaller?
Answer: When it is let out at night and when it is taken in in the morning.
Why is the letter O like the equator?
Answer: Because it is a circle dividing the globe into two parts.
Do you know who were the first three persons to come out of the ark? The Bible says Noah came forth.

A Handkerchief Trick.

To fold a handkerchief lengthwise, and taking hold of both ends to make a knot in the handkerchief without letting go the ends, is an easy trick to perform, though it looks difficult. Place the handkerchief before you, fold your arms, letting the right hand rest on the left arm and the left hand rest under the right arm. Take hold of the right end of the handkerchief with the left hand, and the left end of the handkerchief with the right hand. By unfolding the arms you make a knot in the handkerchief.

Curious Mathematics.

Take the number of your living brothers.

Double that number.
Add to it three.
Multiply the result by five.
Add to it the number of living sisters.
Multiply the result by ten.
Add number of deaths of brothers and sisters.

Subtract 150 from the result.
The right hand figure will be the number of deaths, middle figure will be the number of living sisters, and the left figures will show the number of living brothers.

Frank Fluck, Springfield, Mass., shows us how he multiplies. As an example, multiply 6,598,702 by 9. The ordinary way is to multiply 2 by 9 and put down the 8 and carry the 1; multiply 0 by 9 and add 1, and so on. He suggests that we multiply 6 by 9, then the 5 by 9, then 9 by 9, and so on, beginning at the other end. Then add the resultant figures, as:

9 multiplied by 6 equals 54
9 multiplied by 5 equals 45
9 multiplied by 9 equals 81
9 multiplied by 8 equals 72
9 multiplied by 7 equals 63
9 multiplied by 0 equals 0
9 multiplied by 2 equals 18

Then place the figures as follows:

54
45
81
72
63
0
18
59,388,318

We make Pants to Order, and PANTS ONLY

Pants to your measure in the latest fashions, and guaranteed as to quality and workmanship, or money refunded. Our prices are

\$3.00, \$3.50, \$4.50, \$5.00 & \$6.00.

We buy our cloth in large quantities direct from the mills, and can make pants to order cheaper than you have been buying ready made. Send postal stating what price pants you desire and we will send you samples and a self-measurement blank, that is so simple a child can understand it. An Agent wanted for each town.

VERNON PANTS CO., Dept. A,
57 S. Fourth Avenue, Mt. Vernon, N. Y.

Why pay \$50.00 for a talking machine when you can get this Columbia Graphophone, with fine effect. We give it complete with 5 records for selling only \$25.00 of our new Jewelry Novelties. Goods that sell—having genuine value and real merit. Send name and address, we send you with 25 pieces FREE, postpaid, and TRUST YOU will order of art jewelry. Sell at 10 cts. each. When sold, send us the \$2.50 and we send the Columbia Graphophone or give your own choice of 50 other reliable premiums. Each and every one as good or, if possible, better than this. There is no trick about this. We will refund \$1.00 to anyone who reads \$2.50 and can prove we do not send the Graphophone at once. Send us your order today. ROSE MFG. CO., Dept. 646, CHICAGO, ILL.

EARN PRINTING PRESS

BOYS here's a chance for you to make money by printing cards, envelopes, etc., for other people. We will give you this press with outfit of type, ink, cards, etc., absolutely without a cent of cost to you! You will sell 30 packages of "FRESH" White envelopes at 1/10c each. JUST TWO HOURS' WORK is all it will take you to earn a few more. We will send you free with press full directions for printing type-setting, etc. Write us once for outfit and circular telling you "how to make money". They're FREE. CHAPTER V.

MR. QUIGLEY MAKES AN OFFER.

It was with a feeling of disappointment that Tom Benton returned home and reported the result of his search for the treasure.

"It is just as I expected," declared Mr. Benton, and with this the subject was dismissed.

As soon as Tom had finished his dinner, he started for the field to finish cutting a strip of late corn that was intended for fodder. He was just crossing the yard when hearing a voice calling him, he looked up and saw Minnie Jones, one of the neighbor's little girls coming up the path.

"What is it, Minnie?" Tom asked, as she approached.

"Pap's wuss agin, an' sent me to ask you to go to Joplin for the doctor," she answered, almost out of breath.

"Yes, I'll go as soon as I can get ready," Tom replied. "Won't you come to the house and rest?"

"Noop—they said I must hurry," and turning around, the little girl walked rapidly away.

Tom went back to the house, and after acquainting his parents with his intended errand, he repaired to the stable where he hastily saddled and bridled one of the mules. A few moments later, he was riding down the Joplin road at a brisk trot.

The Joneses were a poor family, living a half mile north of the Benton place, on a flint ridge farm, and for over two weeks the head of the family had been confined to his bed by an attack of malarial fever, and once before Tom had gone to Joplin for a doctor for him.

"Mr. Jones is havin' a hard time of it," said Mrs. Benton. "Reckon I'll run over and see how he's gettin' on. I'll be back as soon as I can."

Sitting in his "splint" rocker by the open door, Mr. Benton soon fell into a dreamless sleep. It was late in the afternoon when he awoke. The sound of horses' feet and the roll of wheels came from without, and the next moment a buggy, containing no less a personage than Zeb Quigley, stopped before the door.

"Howdy, Mr. Quigley, won't ye git out?" greeted Mr. Benton.

"I haven't the time to stay but a few minutes," answered the visitor in a careless tone; "thought I'd just drop in and see how you were feeling."

"Some better, thank ye," replied Mr. Benton.

In spite of his hurry, Quigley dismounted from the buggy, and hitching the horse to an oak tree near the door, he entered the house.

"Jist take a chair thar—bring the other rocker hyar, Bessie," said Mr. Benton.

Bessie obeyed, and Mr. Quigley seated himself in the rocker, and for some moments sat silently gazing out across the field.

"Your crop of corn seems to have been almost a failure this year," he remarked, after a long pause.

"Jist about," replied Mr. Benton.

"I presume you will have some difficulty in raising the money due me?"

"It looks that way at present," replied Mr. Benton. "I had jist been thinkin' that I might git the money on the place by placin' another mortgage on it, but I don't know who ter go to fer it."

"I fancy you would have some difficulty in procuring a loan during the present financial depression," observed Mr. Quigley, carefully studying the weight of his words with his auditor; "and I am only too sorry that circumstances render it impossible for me to grant you the necessary extension of time."

"I hain't been expectin' much of ye," responded Mr. Benton, speaking in a rather impatient tone.

"That is where you do me a great injustice," observed Quigley in an oily tone. "No one is more ready and willing to do a neighbor a favor than I; but there are circumstances which sometimes preclude our adhering to the generous and philanthropic principles of our nature, and it is such circumstances that frequently subject you to uncharitable criticism."

"I reckon yo mean by all that talk that ye're goin' ter demand immediate payment of the three hundred dollars I owe ye?" said Mr. Benton.

"It is not my wish to do so, and I had hoped to be able to extend the time indefinitely, but having met with some disappointment in another business matter, I am forced—and very unwillingly on my part—to ask for an early settlement."

"That's what I lowed; but I can't see jist yit whar I'm goin' ter git the money, unless I could git a loan on the place—"

"There is a serious difficulty," spoke up Quigley; "your place is a poor one—to say the least, and owing to the great stress in money matters all over the country, it would be next to impossible to negotiate a loan on any terms with such indifferent security at your command."

"Then I suppose ye'll foreclose the mortgage," responded Mr. Benton, "seem' as I won't be able ter git the money?"

"There is where you misjudge me again," answered Quigley. "It is not my purpose

to foreclose the mortgage, but to offer you a way out of the difficulty."

"Then ye're goin' ter extend the time?" "No; for I hardly think that would be of much advantage to you. It would only succeed in putting off the evil day which must come sooner or later. What I have in mind is better still than that, and would free you at once from all obligations and worry in the matter. I have just thought that it would be the best to buy the place outright. That, it seems to me, is the only solution of the difficulty. Of course, I couldn't afford to give much, but I'm willing to do the best I can by you, being that you are a neighbor."

Mr. Benton shook his head. "I don't want ter sell out if I can help it," he said; "I have calculated to rent my house hyar, an' sellin' out an' movin' round never pays, an' is about the same as bein' broke up at onced."

"Certainly; you are right in a certain sense, but how are you to manage it, taking it for granted that you will not be able to procure the money?"

"I can't tell yit; but how are you ter buy the place if you air pressed so fer money?"

"Ahem! well, the fact is—the money I thought of using in this case could hardly be called my own. It is a fund I have laid by for my son Paul and I thought it might be a safe plan to invest it for him in real estate."

"Of course I'll sell the place if I haf ter—I reckon thar ain't no other way out, but

Quigley returned the greeting, and after making a few common place remarks about the weather, said:

"I have just been speaking to Mr. Benton about purchasing the farm, but we couldn't come to any agreement until he had consulted with you—which is perfectly right and proper—but now that you are here, I dare say we will soon come to an understanding."

"I ain't for sellin' the place at all," answered Mrs. Benton; "I reckon we can get the money to pay off the mortgage some how."

"We have just been discussing that part of the subject," remarked Quigley, "and I feel safe in saying—as I said to Mr. Benton—that you will find it almost impossible to get money under any conditions at present. I have offered nine hundred for the place—six hundred clear of the mortgage—but if you are not disposed to sell—of course it is not my place to urge the matter."

With this he rose from his chair and walked into the yard, where he stood drawing on his kid gloves as if preparing to leave.

Mr. and Mrs. Benton conversed with each other in low tones for a few moments, and then the latter said:

"We can't take less than a thousand—its cheap enough at that."

"Very well," said Quigley; "I will take it at that, and if you have no objection we'll have the deed made out at once."

"Say nine hundred, and call the matter settled," said Quigley.

I've made some improvements an' orter have more an' I gave fer it."

"That's reasonable; I expect you to have a fair price for your improvements, but the value of the land itself has not increased, as you must know."

"It may be as ye say—I hain't bought no land lately," replied Mr. Benton.

"What then, would you consider a fair price?" queried Quigley.

"The place cost me seven hundred dollars includin' the mortgage—an' I war thinkin' I orter have one thousand."

"Say nine hundred, and call the matter settled," said Quigley. "That will be allowing you a fair profit on your improvements."

Mr. Benton shook his head.

"Tain't enough," he said slowly; "an' I'd haf ter see the ole woman before makin' any contract. She ain't in fer sellin' the place, and I reckon she's about right."

"Isn't Mrs. Benton at home?" asked Quigley, glancing about the room.

"No; she's gone over to Jones's—though she orter come back any minute."

"I should like to settle the matter at once," said the other, moving uneasily in his chair. "The fact is I'm expecting to go away to-morrow and may be absent for a month."

At that moment Mrs. Benton entered the doorway, having just returned from her visit to Jones's cabin.

"Good evenin' Mr. Quigley," she said, bowing to the visitor.

CHAPTER VI.

WHERE THE REAL TREASURE WAS.

It was near the middle of the afternoon when Tom Benton arrived in Joplin. Hitching his animal to a convenient rack he repaired at once to the doctor's office.

He found no one there but the office boy.

"Where is the doctor?" Tom asked.

"Gone down into the Kansas City bottoms to see a patient," replied the boy.

"Will he be back soon?"

"I can't tell. He may and he may not."

"How long has he been gone?"

"Only a few minutes."

"Perhaps I can find him; can you give me directions for reaching the place?"

"Yes, sir; ask for the Taylor residence just on the hill beyond the bottom. You will either find him there or on the road somewhere."

"Thank you," said Tom and withdrew from the office.

Mounting his mule, he rode northward through Main street and descended the hill into the bottoms where hundreds of men were busily at work in the scores of mines that were scattered over the valley.

He saw a buggy hitched in front of a large white house on the side of the hill, and recognized it as belonging to the doctor.

"I will wait here till he comes out," thought Tom, drawing rein near a mining shaft, where several men were at work.

"Want something?" asked one of the miners, glancing at the youth.

"No, sir," was the reply. "I'm only waiting for the doctor," and he pointed to the buggy hitched in front of the house.

"Thought mebbe you was one uv them new silicate buyers," explained the miner with a grin. "They're thicker 'an rabbits about the mines since the new zinc works started up at Weir City."

"What's silicate?" asked Tom.

"It's a kind uv zinc ore—looks just like rocks; thar's some uv it," and the man pointed to where a pile of what appeared to be reddish looking stones were being loaded into a wagon.

"How much is it worth?" asked Tom.

"Well, that depends on the quality," answered the miner, "but about twelve dollars a ton is the usual price. The fact uv the matter is, though, it hain't been worth anything till lately."

"How is that?"

"Thar warn't any one buyin' it, and fer about three years after these mines were discovered nobody thought of savin' the black Jack an' silicate, an' it war jist throwed in the waste dumps. A good many miners didn't even know that them rusty lookin' rocks was ore at all; but now thar's some new zinc works started up out in Kansas, about twenty five miles from hyar, an' the company's buyin' all the zinc ores it can git. More 'an that, thar's been some speculators' agents all over the country lookin' fer mineral land, an' they are buyin' up a good many no 'count farms among the flint hills, an' some uv 'em I hear has got good zinc mines on 'em."

As the miner was speaking strange thoughts were passing through Tom's mind, and he could hardly control the excited feeling that these thoughts occasioned. Hastily dismounting, he began to examine the pile of silicate at the dump. It only required a moment to convince him that the pieces of rusty looking ore were of the same material that composed the red stone fence on his father's farm. This discovery was indeed a most important one, and Tom realized at once that the poor ridge farm of his father's was worth a small fortune. And there was the fence built of pure silicate—he made a rapid calculation—it must be worth \$2,000 at least!

He could hardly wait to reach home to tell the good news to his parents. So excited had he grown over the discovery that for a moment he almost forgot the errand on which he had come, but just as he mounted into the saddle, the doctor for whom he had been waiting, came driving down the hill in his buggy.

"If you please," said Tom, approaching the doctor, "Mr. Jones would like to have you come out to see him again—right away if possible."

"Is he feeling worse again?"

"Yes, sir."

"I will start immediately," responded the doctor, and giving his spirited horse a cut with the whip, he sped down the road at a rapid pace.

Turning and thanking the miner for his information, Tom urged his mule into a fast canter toward home. He continued his course through the town without stopping, only too anxious now to acquaint his parents with the great discovery he had made.

As he left the town behind, his thoughts ran rapidly over the events of the past few days, and as he did so, his mind reverted to the mysterious letter that had been sent to his father. Then it came to him like a revelation—it was about the existence of mineral on the place that the letter had been written, and the reference to the red stone fence was fully explained. Link by link the chain of strange circumstances was put together till Tom had solved to his own satisfaction the whole mystery that surrounded the matter.

He also recalled the words of the miner in regard to speculators having sent agents through the country to buy up all the mineral land through that section. This, then would explain the visit of the stranger to his father's place some weeks before, Tom reasoned, and he was satisfied that it was the stranger who had written the letter to his father. He had doubtless discovered the mineral on the farm and the fence made of silicate, and for some reason had written to his father divulging the secret.

Instead of there being a treasure hidden in the stone fence as Tom had been led to suppose, it was now evident that the fence itself was the treasure referred to. Tom felt satisfied that could he have found the other part of the torn letter the whole matter would have been explained.

For the benefit of those of my readers who are not familiar with the different kind of zinc ores, I will give a brief explanation. The zinc bearing ores of the mining region referred to in this story are of three varieties, black Jack, Iron Jack and silicate. The first named yields about fifty percent of pure zinc, and in appearance resembles a piece of common rosin. The Iron Jack takes its name from its strong resemblance to iron ore, and its yield of zinc is smaller by some three or four per cent than that of black Jack. Silicate, sometimes erroneously called "dry bone," has the appearance of rusty red stone, and might readily be taken for such. When broken a brown rust is found to per-

meate the whole mass. The percentage of zinc yield from this substance is quite large, though not so large as from black Jack.

I might add that the writer spent eight years in the Joplin lead and zinc mining district, and the events related in this story are taken from actual occurrences.

Tom had not proceeded more than three miles, when he overtook Nathan Kirby, who was also returning from town. He was mounted on a shabby gray pony which seemed perfectly satisfied to move at a small trot, without ever aspiring to the dignity of a gallop.

"How'dy, Tom," greeted Kirby as our hero came up. "Bin over ter the city I reckon?"

"Yes, sir," responded Tom, returning the greeting. "I've been for the doctor for Mr. Jones, again."

"Seems ter be havin' a hard spell."

"Yes, indeed."

"I must go over an' see him ter night," answered Mr. Kirby. "But what was that about a robber attacking ye? Did ye find out who it was?"

"No, sir—not yet," replied Tom, "but I reported the matter to the constable, and hope he'll get track of him."

"Did he get any money from ye?"

"No, though he came very near getting away with all I had, but the only damage he did was to tear a letter in two which I was bringing to father—a very important letter, too, and I have not been able to find the half that remained in the robber's hands," and Tom gave a brief account of his adventure with the scamp.

"That was last night, was it?"

"Yes, sir—as I was coming from Joplin."

"Was it in the road just whar it runs through the deep ravine that the robber tackled ye?" asked Kirby.

"Yes, sir."

"Did ye search for the piece of the torn letter this mornin'?"

"Yes, sir."

"Early?"

"About nine o'clock."

"Not before that?"

"No, sir."

"Then it's no wonder ye didn't find it."

"What! did ye find it?" asked Tom.

"No; but Paul Quigley did, or I'm mistaken."

"Did you see him find it?" asked Tom, a troubled look crossing his face.

"I think I did. Ye see I started fer town early this mornin', an' as I was comin' along the road about whar ye had the fracas with the robber, I suddenly discovered Paul Quigley ridin' jist ahead of me. Perty soon he stopped and got off his hoss. I saw him pick up a piece of paper by the side of the road, an' then as I came up, I could see that it was part of a letter. As soon as he see'd me he slips it in his pocket all quick enough, an' gits on his pony, and gits without sayin' a word. When I seed the constable in town this evenin' he was tellin' me about yer havin' the bout with the robber, an' I war wonderin' if ye hadn't dropped somethin' thar an' that young scapegrace had found it."

"You are right," Tom replied, "he must have found it, and if he did, there is no telling what use he may put it to." Briefly then he related to Mr. Kirby the important discovery he had made while talking to the miner—of the presence of zinc ore on his father's farm—the fence composed of sillicate and the mysterious letter and its reference to the matter.

When he had finished, Kirby gave vent to his surprise by a prolonged whistle.

"It sounds jist like a story in a book," he declared; "but don't lose a minute in gettin' home, my boy. You can't tell what that Quigley 'll be up to if he gets a scent of the matter. He would stoop to any intrigue ter beat ye out of the place if he finds out its value."

"That's what I'm afraid of," replied Tom with a troubled countenance. "He's been trying to buy the place of father for some time, and I half suspect that he had some idea of its value."

"Tain't more an' likely. If I war you I'd ride on as fast as possible, fer he's a sly ole coon an' will head ye off if he can. Go on an' don't wait for me."

Tom now realized the necessity of reaching home as soon as possible, and applying the switch to the lazy mule, he galloped away, soon leaving Kirby far behind.

He had fully five miles to travel yet, and the sun was already low in the horizon.

He knew that if the piece of the letter should reveal the secret of the mineral upon his father's farm that Quigley would take advantage of it at once, and that the torn letter was now in Quigley's possession, Tom was fully convinced.

"I ought to reach home soon," he mused as he urged his refractory animal forward at a lumbering gallop. "Every moment may be of the greatest value just now."

But could he have looked into his home at that moment, he would have seen the crafty Quigley draw forth a roll of bills from his pocket with the words: "I'll just pay you the money now, and here is the deed—already drawn up—sign it and the matter will be settled."

CHAPTER VII.

ALL OF THE LETTER.

"Mr. Benton, you and Mrs. Benton will please sign this," repeated Quigley, as he drew the deed from his pocket and placed it upon the table. "I had the deed drawn up and everything arranged so as to give you as little trouble as possible in case we made a bargain. I have the money here, and am ready to pay you in full as soon as your signatures are placed on the deed."

But in taking the deed from his pocket, another piece of paper fell to the floor. Mr. Benton stooped and picked it up, and as he did so he saw his own name written thereon. In an instant, the truth flashed

upon him—it was the missing half of the mysterious letter which the robber had torn from Tom's hand.

Taking the other piece from his pocket he compared the two and found that they fitted together perfectly.

An exclamation of surprise escaped Mr. Benton's lips as he read the strange message. It only required a moment's reflection to convince him that the statements made in the letter were the truth. This, then, would account for Quigley's great haste to gain possession of the farm, since there was enough in the piece of letter which he had lost to give him a clue to its value as mineral land.

Quigley was not aware of having dropped the important letter, and now turned to

reading the strange words written thereon she exclaimed:

"It jist beats all—jist like a story in the books. Do you reckon it's the truth, and that there are zinc mines on the place?"

"Thar ain't no doubts in my mind about it. If thar had been, ole Quigley, tryin' to git the farm would have removed it."

"So he had found the paper an' read it an' come here to buy the place fore we learned its value," exclaimed Mrs. Benton.

"That's it exactly. It's lucky though that he dropped it from his pocket, er he might 'a' beat us after all."

"So he might; he's a sly 'un an' would take all the advantage he could."

A few minutes later Tom arrived from town and entered the cabin in a hurried and excited manner.

"You haven't sold the place, have you?" he asked in an agitated voice. "I saw Quigley coming from this way and I feared—"

"No—we hain't sold it—though the ole fox tried ter git it in every way he could," answered Mr. Benton.

"Hurrah!" cried Tom joyfully. "We have got a fortune! I just found it out while I was in Joplin," and hurriedly he told of the important discovery he made while talking to the miners. "But how did Quigley find out about the mines?" he continued. "Did he really get hold of the paper as I feared he had?"

"Yes; but as luck would have it he dropped it on the floor hyar, an' I got hold of it before we signed the deed," answered Mr. Benton.

"Good!—good! it served him right. Mr. Kirby told me he saw Paul pick up the letter in the road early this morning, and I feared they'd find out the secret and try to buy the place before I could get back to tell the good news; but he failed, thank goodness."

"It is the hand of Providence," said Mrs. Benton reverently.

CHAPTER VIII.

CONCLUSION.

Early on the following morning Tom Benton repaired to the stone fence at the back of the field, where he compared the sample of sillicate brought from Joplin with the material in the fence. To his satisfaction the two were found to be identically the same.

"That fence isn't worth less than two thousand dollars," he mused, as he walked towards home. "I guess we'll be able to pay off the mortgage now, and Paul Quigley won't get the place after all."

A little farther on he met Paul Quigley in the road, but that youth dropped his head and rode by without once glancing at Tom. It was evident that he knew the turn affairs had taken, and did not feel proud of the part he had taken in the little plot to get possession of the Benton farm.

"All things come out right in the end," Tom reflected; "and it's always best to be on the right side, whatever happens."

On reaching home he said: "Father, I have just been thinking of taking a sample load of the sillicate to Joplin today. By so doing I can find out from the different sillicate buyers there just what they will

"I reckon not."

"I might be induced to offer more—rather than spoil a trade," ventured Quigley.

"Taint no use. The farm ain't fer sale jist now. I'm goin' ter wait till I investigate the matter spoken of in this letter."

"I'll give you fifteen hundred!" said Quigley, growing desperate.

"I can't take it."

"Then it is no use for me to make you an offer."

"No."

"You may regret your decision."

"I'll take the risk."

"May I ask what ye wor doin' with this letter of mine?"

"Very well."

Picking up the deed from the table Quigley walked from the room. But he paused just outside the door and said:

"If I should offer you two thousand dollars—"

"I wouldn't take it," replied Mr. Benton firmly.

"Then you may keep it," replied Quigley, and turning around he entered his buggy and drove away.

"Why, what's all this about, Abe?" asked Mrs. Benton in astonishment. "Why didn't you take his offer—it's more 'an we'll ever get."

"Read this letter," answered Mr. Benton. "That'll tell ye the secret."

She took the scraps of paper, and after

Butcher's Boston Polish
Is the BEST Finish Made for FLOORS, Interior Wood-work and FURNITURE.
Not brittle; will neither scratch nor deface like shellac or varnish; is not soft and sticky like beeswax. Perfectly transparent, preserving the natural color and beauty of the wood. Without doubt the most economical and satisfactory POLISH known for HARD-WOOD FLOORS.

ENERGETIC, INTELLIGENT BOYS

needed in every city, town, and village to sell the Busy People's Weekly News-Magazine

THE GREAT ROUND WORLD

which is everywhere recognized as a high class publication.

Many boys now make **SUBSTANTIAL WEEKLY INCOMES** after school hours and on holidays by selling **THE GREAT ROUND WORLD**.

A FREE START IN BUSINESS

WE WILL START YOU IN BUSINESS BY SENDING THE FIRST WEEK'S SUPPLY ENTIRELY FREE AND AFTER THAT ALLOWING LIBERAL COMMISSION.

Write us and we will tell you how to go ahead and will give you the details of the

One Hundred Dollars in Cash Prizes

to be divided in June among the boys who sell **THE GREAT ROUND WORLD**.

SALES DEPARTMENT B, THE GREAT ROUND WORLD, 150 Fifth Avenue, New York.

BOYS!!! DROP A LINE

to us on a postal and we will tell you how you can catch more than if you spent the same time fishing.

Boys You Can Sell Sinkerene,

which will prevent the sink from stopping up. Because there is nothing like it on the market; it sells for 10 cents and fills a long-felt want. One boy sold 50 in about 5 hours. Write us at once, giving us the names of 2 of the best grocers in your town, and we will send you sample and circulars, with list of premiums and cash offers.

Sinkerene 10 Cents

SAVES PLUMBERS' BILLS. Write at once, as the first ones out on a new article like this will get the best results.

NO MONEY REQUIRED. SINKERENE M'FG CO., 268 Am. Tract Building, New York.

A Fine Scotch Collie Puppy Free

To the Boy or Girl Selling the Most Seeds for us.

This is given in addition to large cash commissions we pay. **Hundreds of Boys** are making **lots of money** by our "Plan." We want good honest hustling boys and girls only. It costs nothing for your outfit. Write at once for particulars and agency of your town.

Holmes Seed Co., Harrisburg, Pa.

A GOOD AGENT WANTED

to sell high class mining stocks. Highest commission paid. Some of our agents make \$2,000 a month. Write with reference. **MINING INVESTMENT & BROKERAGE COMPANY, J. M. GRAYBILL, V. P., 382-3-4 WILCOX ANNEX, LOS ANGELES, CAL.**

HOW TO MAKE MONEY Invest 1 cent by writing us a postal card and we will put you in a position to earn \$1,000 a year. This is no fraud. Many now in our employ will vouch for the truth of this statement. We are willing to guarantee any honest, energetic person, without previous experience, from **\$700 to \$1,000** a year sure money. Write to-day **J. L. NICHOLS & CO., Naperville, Ills.**

POCKET MONEY Got all You Want? on every dozen **DAINTY DESSERTS** you sell at 10 cents each. Sample and particulars 10 cents. **THE DE VERE COMPANY, 130 Noble Street, BROOKLYN, New York.**

Make Mirrors and make \$25 a week! We send the complete Columbia Method for \$1. Plenty work replacing old mirrors everywhere. Particulars free. **Columbia Mirror Co., Dept 4 Columbus Grove, O**

We Pay Cash For NEWSPAPER CLIPPINGS, NAMES and ADDRESSES. Write, enclosing stamp, for particulars. **THE E. M. SMITH CO., 114 E. 23rd St., New York.**

Boys as Money Makers

Technical Education the Best Asset—George Ethelbert Walsh.

The greater part of the world's work today is performed by men who have not received a college education; but the directors and captains of industries are those who have either received a good education in some institution or acquired it outside in odd moments. But the education which the world demands today more than anything else is a technical, or at least a practical, education, which enables the student to master the problems of engineering, manufacturing, invention, transportation and general industrial achievement. The opportunities for securing a technical education are today far superior to anything ever offered in the past. The ambitious youth, if he cannot afford to attend a technical college, has placed within his means the chances of learning all that is taught at any institution. The correspondence schools, of which there are many, issue written instruction papers, with text books and diagrams, which any ordinarily bright youth can master at night time after his day's work is finished. There are published technical books which are also graded to meet the requirements of any student. These books make home study far more pleasant and satisfactory than any which the famous men of the past depended upon.

The great industrial world is calling for trained men more emphatically every year, and the requirements to meet the demands are naturally becoming more comprehensive. Quite lately several of the large railroads intimated that in certain of their departments preference in advancement would be given to those employees who had a technical training. It was intimated further that this rule would in time apply to all departments, excepting those where the work was merely clerical, and even here a knowledge of technical terms and meanings would prove of great advantage. The reason for this new rule, which will eventually be adopted by all the railroads, is that men with a good technical training have less to be taught from one position to another. It has become almost an accepted maxim today that a railroad president should be perfectly familiar with all the technical details of engineering and railroading; indeed, most of our famous railroad presidents are men of this stamp. Every part of an engine is well known to them, and they are such practical engineers that they could lay out a road and superintend its construction from beginning to end.

But it is not only in railroading that technical education is demanded. Every manufacturing concern is in search of young men who have been trained for practical work so that with ambition and push they can become valuable members of the company's staff. From their employes frequently come the greatest inventions of the day. Many industrial concerns encourage invention by offering prizes for any labor-saving device invented by an employe, and giving the promise to patent it and pay royalties as well. The technical worker thus feels that a reward is held out to him, and he bends all his energies toward making a reputation for his concern. The steel and iron manufacturing industry's history is full of examples of young mechanics forging wealth and fame by means of their steady application to technical studies and experiments.

The youth of today need to understand the great fundamental principles of mechanics and engineering, and when they select their avocation they can specialize any particular branch. Considered from the purely money-making point of view, the technical education is far more valuable than the professional or classical. The professional life has been crowded many years with incompetents, and every year thousands of new students are turned out to make poor doctors, lawyers and ministers, who might have made excellent mechanics and engineers. The professional life appears to offer to most of us an easier and more self-respecting vocation, but it hardly pays unless we are cut out by nature to fit it. Some are gifted by nature with abilities which make them eminently adapted to success in this direction, but one should be pretty certain of the gift before choosing one of the professions in preference to an industrial life on the higher plane of modern achievement.

The clerk who aspires to office work as a life business, or as the shortest way to enter the firm, is more frequently disappointed in his ambition than the modest student of technical science who equips his mind with all that will make him valuable to his employers, and then steadily follows out his chosen pursuit. Experience shows that office clerks generally remain the same all their life, and they acquire a pretty poor idea of the actual workings of the business of which they are a part. Unless they have a special pull they have only one chance in a thousand of rising much above the average.

While the supply of office clerks is abundant, and far greater than the demand, the technical workers of a high order are scarce and difficult to secure.

BOYS WANTED!

Any Boy who is willing to work a few hours after school on Fridays and on Saturdays can earn many dollars by selling

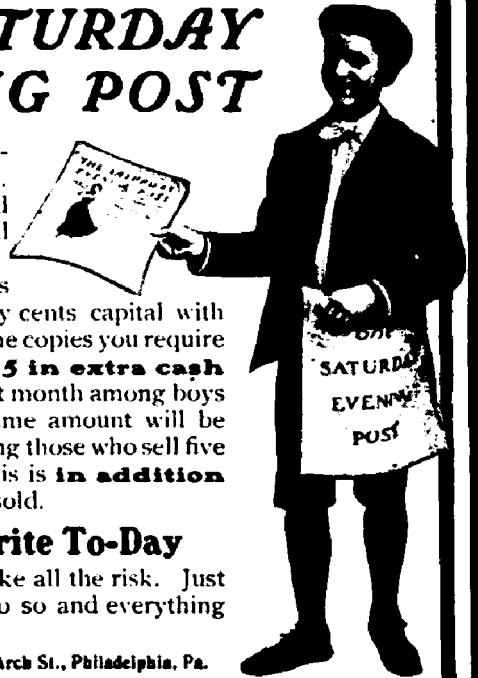

THE SATURDAY EVENING POST

among his neighbors and relatives. You can begin at once. Absolutely no money needed to start. Write us to-day and we will send you the first week's supply of ten copies free. This will provide fifty cents capital with which to start; after that all the copies you require at the wholesale price. **\$225 in extra cash prizes** were distributed last month among boys who did good work; the same amount will be distributed next month among those who sell five or more copies a week. This is in addition to the profit on every copy sold.

Don't Delay—Write To-Day

If you will try it we will take all the risk. Just write saying that you will do so and everything necessary will be sent.

The Curtis Publishing Company, 415 Arch St., Philadelphia, Pa.

Improved machinery is constantly revolutionizing industrial conditions, and to keep pace with the changes manufacturers require trained men to help them to grasp the new situations. More and more are the technical students becoming the right-hand men of the captains and leaders of industry. There are few needed to reorganize companies, and to form trusts and combinations of labor, but many are demanded to bring the industry up to the highest point of efficiency. These men must come from the technical schools, or from that large class of home students who are bending all their energies to the acquirement of a technical education. In the near future the successes which the world will hear about will be largely from this increasing class of young men who have selected their life work because of love for it, and not from any false notions of what others may think of their profession. All work is honest, and technical labor in the world's great laboratory is about the noblest of all.

Boys, Be Honest.

A Millionaire's Advice.

The following was printed on one thousand rulers and given away to school children in Central New York recently, the advice being that of George W. Perkins, a millionaire. The words come with force from one who began life in a humble position—that of an office boy in a New York office: "Too many young men in this country don't want to work hard. They prefer to take things easy, stay up late at night and lie abed too long in the morning. They never can get ahead that way. Time and conditions may change, but the old rule remains the same, that there is no success without keeping everlastingly at it."

When you are in the right, stick to it. Don't be afraid of your employer. Don't do anything wrong, even if he asks you to do so. He will respect you all the more if you stick to the right, and when you get a chance to beat your employer in a discussion upon any matter of policy, fight it out with him. He won't say anything to you at the time, but he will remember you for it. Make yourself indispensable, and your employer will keep on thinking about you until he raises your salary, and thus your advancement will come.—Andrew Carnegie.

It Pays To Do Right.

WE TRUST YOU

BOYS, GIRLS, LADIES EARN One of the premiums illustrated below or your choice of 50 premiums absolutely free for a few hours work. We send 20 packages Alpine Perfume to sell at 10c each. When sold send money, premiums will be sent instantly. Premium list and instructions with goods. No money required. We trust you. Write at once to

A Young Mineralogist.

Karl M. S. Bickel, a boy mineralogist of Kansas City, Mo., was born in Omaha, Neb., October 22, 1888. He removed to Kansas City, Mo., in 1898, and in the same year entered a ward school. Some three years ago he became interested in mineralogy and geology, especially the former. Since then he has been an in-

KARL BICKEL.

dustrious and enthusiastic collector of specimens and data pertaining to these subjects, having about 1,500 specimens, many of which are rare. He has a small laboratory in which he spends much of his time. His friends expect him to become an able scientist, as so far his work has been highly creditable.

One day little Elmer's mamma caught him in the pantry helping himself to some cake and jam. "Why, Elmer," she exclaimed, "don't you know it is wrong to take things without asking for them?" "It isn't wrong, mamma," replied Elmer. "Our Sunday school teacher says the Lord helps those who help themselves."

"Oh, mamma!" exclaimed little Fred as he caught sight of a zebra at a menagerie. "Come here quick and see the poor little convict pony!"

BOYS DO YOU WANT TO BE A CAPTAIN?

We are adding to the pleasure of BOYS by starting RIFLE CLUBS all over the country by GIVING AWAY WITHOUT MONEY Uniforms, Rifles and Rules for Drill so that every little village may have a boys' militia of its own to take part in all its celebrations, adding pleasure or dignity to Memorial Day, 4th of July, Washington, Lincoln, Garfield and McKinley birthdays, and all public ceremonies, besides having a rousing good time among themselves.

Our Free Offer is not confined to any location, but is open to ALL BOYS, giving each community an opportunity to SUPPORT and develop patriotism and respect for our flag. Write to-day for RULES OF DRILL. SEND FREE the same day your letter is received. We also tell you how easily and quickly you can get WITHOUT MONEY, a complete uniform including rifle, cap, belt, and reserve red stockings. HOME MAGAZINE CO., Dept. 306, Washington, D. C.

ELECTRICITY IN ONE YEAR The Home Electrical School is the oldest and best school in the world teaching electricity exclusively. Practical and theoretical course complete in one year. Actual construction of electrical instruments, dynamos, motors, etc., taught. Graduates hold good positions throughout the world. Opens September 2. Catalogue on request to W. N. TELEGRAPHY Thoroughly and quickly taught. Tuition \$40. Positions secured. Catalogue Free. RYAN'S SCHOOL OF TELEGRAPHY, P. O. Box 176, Huntington, Ind.

Boys in the Home, Church and School

Young Inventors.

John Ericsson, who built the "Monitor" and the great iron bridge at Sunderland, England, at the age of twelve invented a new kind of sawmill. The saw blade he made of an old watch spring moved by a crank constructed of a broken teaspoon, and his only tools were a knife, a file, and a gimlet.

C. F. Brush, who was the inventor of the Brush electric light, before he was fourteen constructed a new form of electric motor and invented an electric apparatus for turning on the gas in street lamps, lighting it, and turning it off again. The next year he made a microscope, grinding the lens himself.

Thomas A. Edison was at fourteen a night telegraph clerk. Every half hour he had to report to the head office by telegraphing the word "six." This was to prove that he was not asleep. To save the necessity of doing this monotonous work, he cut notches on a wheel and attached this to the works of a cheap clock. This apparatus transmitted the signal automatically every half hour.

It was a boy by the name of Argand who invented the lamp chimney.

A boy invented cast iron cement.

Young Men to the Front.

The chief examiner of the Civil Service Commission of the United States says the rapidity with which gray-haired men are turning over the reins of government to the youngsters is amazing. We have now the youngest of our Presidents in the White House, some minor boys in Congress, unbearded youths in the service in Cuba, Porto Rico and the Philippines. It is so in nearly every department of the Government. The boys destined to become public men are those who are educating themselves. Such boys have four chances out of every five. Secretaryships are the best apprenticeships for those ambitious to become public men. Boys ambitious in this direction should cultivate diplomatic and courteous ways, and equip themselves in law as well as stenography. Literary ability is becoming day by day more essential to the public man, so there are splendid chances for young Journalists. Representative Feeley, who goes to Congress from Chicago, was barely twenty five when elected. Frank A. Vanderlip was but thirty two when made Assistant Secretary of the Treasury, having been before that private secretary to Secretary Gage. He began on a farm, worked in a machine shop, studied in the universities, and became a reporter and financial editor. John E. Wilkie, chief of the Secret Service, was in his thirties when he was appointed. He began newspaper work when he was seventeen. O. P. Austin, chief of the Bureau of Statistics, is another young man in the service who came up from the ranks of a reporter. James H. Eckels was appointed Comptroller of the Currency when but thirty five. Charles G. Dawes was appointed to the same position at the age of thirty two. Both Eckels and Dawes were law school graduates. Mr. Ridgeley, the present Comptroller, is also a young man. James A. Wetmore, chief of the Law and Record Division of the Treasury, is still in his thirties. Commissioner of Navigation Chamberlain was but thirty seven when appointed. Dean C. Worcester was but thirty two when he became one of the Philippine commissioners. The new Secretary of State for the Philippines, Arthur W. Ferguson, cannot be much older. W. F. Willoughby, who was recently made treasurer of Porto Rico, is but thirty five. Felix Brangan, treasurer of the Philippines, and W. Martin Schuster, collector of customs for the islands, are both young men.

The Boyhood of John D. Rockefeller.

The Rockefeller family in 1838 lived on a small farm near Richford, N. Y., and was poor. The cottage in which the family lived was dilapidated. The roof was full of holes, so that when the richest man in the United States, and perhaps in the world, was a baby lying in his trundle-bed, he could look up through the roof at the stars and the moon. John D. Rockefeller, when very young, learned to take care of himself. He was not thought to be very bright, and certainly no one anticipated any great career for him. He early had to do the chores about the place, and when old enough was sent to the district school, several miles away from home. In the summer time he was sent out to work on a near-by farm, for the father was able to attend to the Rockefeller place alone. Later on the family moved to Cleveland, and in that city the boy grew to manhood. A reporter, who recently visited Mr. Rockefeller in his New York home, says:

Mr. Rockefeller seems to have a most vivid recollection of his boyhood days. He remembers many incidents, not particularly striking, which would have been forgotten by most men; but to Mr. Rockefeller, they are dear remembrances of days gone by, and he cherishes them with care. "They are priceless possessions," he said to me, "and I would take nothing as a purchase price for them. It is these which have made me what I am. My boyhood days were training days."

"It is true, then, that you worked upon a farm?" I asked.

"Yes, it is true," was the reply. "I worked for many months as a farmer's lad, and the work was good for me. I would have continued working at it had I not removed to Cleveland."

He worked usually, as he informed me, for 25 cents a day, from 5 or 4:30 in the morning until darkness fell in the evening. He was grumbled at by the farmers because he worked slowly. It was his custom to spend some time in laying out a piece of work before beginning it. "In this way," he said, "I was always able to do it in the very best way." The farmers, however, did not appreciate this forethought, and Johnnie Rockefeller was considered "a leetle lazy." They did not consider that while other boys worked faster, they did not work as well. The boy was not fond of the work, but the man of today considers that it was a splendid training for him. "It taught me patience," he says.

In winter the child attended a district school, which is yet standing near Owego, N. Y., and which has been made famous by the story of the millionaire's youthful determination, and the way in which it was exhibited at school. The children always gathered at noon-time and at recess to play games, and in deciding what the game should be Johnnie Rockefeller had usually a strong voice. If the others would not agree to play his game, he would not play at all, but stood by and watched the others with an air of offended dignity. This story is typical, in a way, of Mr. Rockefeller's after life. Those who have been associated with him in business know that he is accustomed to being the head, and that unless he leads in any matter he declines to take any part whatever. Thus is the boy father to the man.

At school Mr. Rockefeller is said to have been known to his chums as "Rocky," and when I questioned him on the subject he admitted that he rather enjoyed the nickname. "It made me feel like one of them," he said, "and even now when I hear it, I feel like a boy at school once more."

Boyhood of a Great Showman.

Every boy has heard of James A. Bailey, the great circus man. Perhaps no showman is better known by name to American boys than Mr. Bailey, leaving out of account P. T. Barnum. We are sure that boys would like to know something about Mr. Bailey's boyhood.

Mr. Bailey was born in Detroit, Mich.,

JAMES A. BAILEY.

fifty three years ago. At the age of nine he was left an orphan, and from that time on, for several years was taken care of by a brother-in-law, who was not the very best kind of a guardian. The boy, therefore, did what is usually a very foolish thing for a boy to do—ran away from home. He did not go to sea, however, as so many boys do, but started out along a country road with twenty five cents and a knife in his pocket, and a single idea in his head—to get away from home. When he became weary and footsore he sought the house of a prosperous farmer, and as it was harvest time the farmer engaged him for three dollars a month, with board. For two years he continued to work on the farm, then set out again to seek his fortune. After walking half a day he reached Pontiac, Mich., went straight to a hotel and asked the landlord for employment. The landlord recognized the pluck in the little fellow and immediately engaged him as a bell-boy. He made many friends, among them being Fred Bailey, general agent of the Robinson & Lake Circus. This friend induced him to leave his position and accept one with the show. This was on the 17th of June, 1850. The circus that he joined was a small tent show, but was then one of the most important in the country. From that time on, Mr. Bailey rose in the ranks of showmen, until he became one of the greatest the world has produced.

PEN MIGHTIER THAN SWORD. If you have any literary taste, cultivate it, make it pay. Bean Editor, Critic, Reporter, Author. Write what you think, feel and see—turn it into money. We teach Journalism At Home. Not newspaper work only; we give general instruction in literary composition—word study, reviewing, reporting, space writing, story writing, proof reading, etc. We give individual instruction. Write for catalog. Sprague Correspondence School of Journalism, 108 Majestic Building, Detroit, Michigan.

LEARN BOOK-KEEPING and TELEGRAPHY BY MAIL—AT YOUR OWN HOME. This is the chance of a lifetime for young men and women and you should not miss it. Up-to-date method, you can learn it within 6 to 8 weeks and place you in position to earn good salary at once. Thoroughly practical and remarkably inexpensive; our graduates secure good positions. Write today for full particulars. Mich. Business Instit., 196 Instit Bldg, Kalamazoo, Mich.

A LOCOMOTIVE Through Home Instruction. Small Charge—Easy Terms. Railroads need thousands of instructed Firemen annually. GOOD PAY and chance to become an Engineer. Help to employment on proper qualification. FARMICULARS FREE. Our Instruction and Recommendation are Recognized by Master Mechanics. The Railway Educational Association Station B, BROOKLYN, N. Y.

STORY-WRITING and JOURNALISM taught by mail. MSB. criticized, edited, sold on commission. Send for free booklet. "Writing for Profit" tells how to succeed as a writer. Proofreading is refined, private and educative work. Women receive same salaries as men, \$15 to \$35 a week. Proofreaders always in demand. If interested, send for free booklet. "Practical Proofreading" tells how. National Press Association, 44 The Baldwin, Indianapolis, Ind.

ELECTRICAL ENGINEERING TAUGHT BY MAIL. Write for our Free Illustrated Book. "Can I Become an Electrical Engineer?" The electrical field offers the greatest opportunities for advancement. We teach Electrical Engineering, Electric Lighting, Electric Railways, Mechanical Engineering, Steam Engineering, Mechanical Drawing, at your home, by mail. Institute endorsed by Thos. A. Edison and others. Electrical Engineer Institute, Dept. 56, 242 W. 234 St., New York.

TELEGRAPHY YOUNG MEN wanted to learn Telegraphy and Railway Accounting and prepare themselves for the Railway Telegraph Service. Write for free catalog. The Railway Telegraph Institute, Oshkosh, Wisconsin.

NELSON and Farragut are the two most celebrated sailors the world has ever seen. Both became naval officers when they were little boys and distinguished themselves while yet in their teens.

David Glasgow Farragut was appointed a midshipman in the United States Navy when he was nine years old. He entered on active service as officer of the frigate Essex when he was ten.

The Essex was lying in the harbor of Norfolk, Va., when David joined her, and he did not have to wait long for an adventure. He was sent ashore in charge of one of the ship's boats to bring off some officers who were to visit the frigate. The little fellow wore his cocked hat, his brand new uniform resplendent with brass buttons, and had his little sword by his side.

As he was waiting in his boat off the end of the pier for the expected officers, a crowd of rowdies gathered on the dock and began to make fun of the "baby officer," as they called him. David said never a word in reply, but finally one of the gang got a watering pot and, leaning over, began to sprinkle the young middy "to see if it would make him grow," he said.

This was too much and David and his men springing ashore went at the rowdies "hammer and tongs," putting them to flight and chasing them up the street until the police interfered.

Young Farragut weighed only seventy-three pounds at that time and Captain Porter, of the Essex, remarked, when he heard the story, that "Young Farragut is three pounds of uniform and seventy pounds of fight."

Upon the outbreak of the second war with England, known as the War of 1812, the Essex was sent on a cruise off the coast and Farragut, now a seasoned sailor of eleven, went out as one of her officers.

While on this cruise he saved the ship from capture. The Essex had taken several British ships and the prisoners on board outnumbered her crew. One night, as he lay in his hammock, David was awakened by a feeling that some one was standing near him. Peeping out under his eyelids he saw one of the British prisoners bending over him with a pistol in his hand.

He realized that the prisoners had obtained possession of the weapons and were about to rise and take the ship while most of the crew were asleep. He lay perfectly still until the man, after looking closely at him and concluding that he was still asleep, had passed on.

Then he sprang from his hammock and rushed into Captain Porter's cabin where he told his story. The Captain told David to sound the fire-alarm, and he himself rushed to the quarter deck and shouted "Fire!"

This brought the crew on deck at once and confused the prisoners, who were

just starting for the deck to begin their work. The crew drove the Britishers below where they were disarmed and secured.

Captain Porter publicly thanked David for the promptness and intelligence with which he had acted.

The Essex then went on a cruise to the coast of Brazil and from there around Cape Horn into the Pacific where she took many prizes.

Of one of these prizes, the ship Barclay, David was made prize-officer—that is, he was sent on board of her to take command. With a few men from the Essex David went aboard the Barclay and thus found himself a commanding officer at the age of twelve. He is probably the only boy of that age who ever was placed in full command of a big ship.

Captain Randall, who had commanded the ship before she had been captured, and who had been left on board, was a cross old fellow and he made up his mind he would take no orders from a little boy in uniform.

But David had orders from Captain Porter to command the ship and he determined to do it. The Essex and her prizes were at anchor off the coast of Chile when David took charge of the Barclay and soon after he went on board a sailor came into the cabin and told him that the other vessels were in motion and that the Essex was flying a signal for the Barclay to get under way and follow the fleet.

Going on deck, David said to Captain Randall, who was supposed to do duty as sailing master, "Order all sail to be made and follow the fleet."

"Listen to the little monkey," sneered Randall, who was more than six feet tall, looking down on the little officer. "Listen to the little monkey!"

"My orders are from Captain Porter," replied David. "We must set sail and follow the fleet to Valparaiso."

"To New Zealand more likely," answered Randall. "This is my vessel and she goes where I say."

"I order you to make sail on this vessel!" shouted David, his voice rising into a shrill treble in his excitement.

The men had begun to come aft and were listening to this strange conversation between the giant and the midget. Turning to the men, David cried out, "Get up the anchor and be lively!"

There was a moment's hesitation on the part of some of the sailors, but the men whom David had brought with him from the Essex sprang to the capstan and the others followed.

"I won't be bossed around by a baby who ought to be in long clothes," cried Randall. "I'll shoot the first man who touches a rope. I'll get my pistols and we'll see who commands this vessel!"—and he rushed into the cabin.

Calling to a quartermaster whom he knew he could trust, a big fellow, David said, "If that man comes on deck, I order you to throw him overboard."

Then calling down to Randall he said, "You are under arrest. If you come on deck you do so at your peril."

He kept Randall a prisoner until he came up with the fleet when, it falling quite calm, he took him on board the Essex and reported him.

Randall declared to the officer who heard the report that he had only tried to frighten the boy.

"And you saw how well you succeeded," replied David.

While the Essex was lying in the neutral port of Valparaiso she was attacked and destroyed by two British vessels. Each one of them alone was far more powerful than the American ship, and, therefore, against both of them the Essex had no chance.

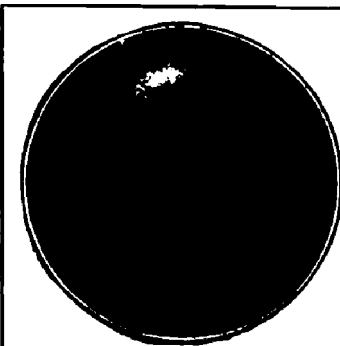

This attack was against all the laws of war, for vessels are not supposed to fight in the waters of a neutral nation. The Essex made a good fight of it before she surrendered and David as aid to Captain Porter, was in the thick of it and distinguished himself so greatly as to win the admiration of the British.

The British captain, in order to show his appreciation of the young hero's bravery, invited him to breakfast the next morning in his cabin.

David was then thirteen years old. The war was over before he got a chance at another battle; but it was reserved for him to grow up to be a great admiral and in another war to make his name immortal in after years.

Shorthand in Ten Easy Lessons

ISAAC PITMAN'S SYSTEM

TWENTIETH CENTURY REVISION

By special arrangement with Isaac Pitman & Sons, 31 Union Square, N. Y.

LESSON VIII.—W and Y Series of Diphthongs.

Though the principle that we have to treat of in this lesson does not admit of such extended application as that principle which formed the chief subject of our last study, it is yet of such importance as to call for your earnest and undivided attention. Before discussing the W and Y series at length, it may be necessary to offer a few remarks on the course which you should pursue with regard to the principles of abbreviation set forth in the last lesson and in the present one. It is almost impossible for the novice to adopt and apply, in the course of one lesson, more than two or three of the more important principles of the art, notwithstanding the numerous examples that are interspersed in the text (for we hold with Dr. Johnson that "an art is best taught by examples").

We advise you therefore to confine your practice in Phonography—apart, of course, from a set study therein—in the first instance, to the simpler principles of the art, and to cultivate at the outset what may be termed a long or full style of Phonography, rather than a highly abbreviated one. Let the principles have time to settle in your mind and mature.

You must expect at first to find your progress so slow as to seem merely creeping. That progress, however, is real.

These remarks obviously are not intended to check you in your study of the art, which should be persisted in without any shirking. Keep up your enthusiasm: The reward is worth the labor; for it means a cultivated intellect and a refined mind. We have known many whose experience tallies on this point. Your interest is little likely to flag, or your mind to weary, so long as you keep up the practice of reading printed shorthand works, in which a constant succession of forms new and strange leads to the pleasant expedient of making experiments in outlines, and keeps the mind in a state of perpetual activity and expectation. No matter how inelegant or inaccurate what you produce may be; elegance and accuracy, being the natural outgrowth of experience, can come but by degrees. Of one thing you may be certain; that the more time you devote to Phonography, the shorter will be your period of probation, and the speedier your success. The two

things that you have to bear in mind are: (1) that you read as much as you write; and (2) that while your practice should be limited to first principles, you should, nevertheless, work hard at each untried application of any given rule, in order that your knowledge of it may be perfected.

A series of diphthongs whose first element is *i* or *y* may be heard in the words *India*, *alien*, *idiot*, *folio*, *value*. Another series is formed with *oo* or *w*. Systematic signs for these diphthongs are shown on page 35 of the "Teacher."

These signs, like those for simple vowels, are written heavy for long vowels and light for short ones. Self-taught students of Phonography usually find much difficulty in clearly understanding and accurately employing this series of diphthongs. The part they play in the representation of words is by no means unimportant, as will be seen upon examination of the illustrative words given. A thorough mastery of the principle is indispensable to success.

Read page 35 of the "Teacher," and you will see that the second of the two *w* signs (*o*) may be employed before *k*, *g*, *w*, instead of the full alphabetical sign *w*: thus, *w* *week*. Compare *w* *awake*, with *w* *wake*. The long and short *waw* and *wo* may be joined to *k*, *g*, *w*, upward *r*, and a few other letters when the joining is convenient, to represent *w* and the vowel in connection with it: thus, *w* *Walker*, *w* *war*, *w* *water*. A slightly varied form of *o* added to *w* makes the double consonant *w*.

It should be remembered that the shorthand signs for the double letters of the *w* and *y* series are always written in the same direction; that is, they do not accommodate themselves to the consonant to which they may be written, as do the signs for the simple vowels *aw*, *oh*, *oo*.

Work for this month to end of Exercise 60.

Those of our readers who are desirous of taking up this valuable course of shorthand lessons can do so by purchasing the "Phonographic Teacher," "Key to Phonographic Teacher," and six "Phonographic Exercise Books." These works will be sent postpaid by Isaac Pitman & Sons, 31 Union Square, New York, to any address on receipt of one dollar.

WITH THE BOYS

ALBERT BIERFREUND, Camden, N. J., sends a pencil sketch that is interesting. If nothing else, a boy sits with his feet on the mantel-piece intently reading THE AMERICAN BOY. A parrot perched on his toes is calling "Wake up." His mother behind him is calling, "Come here this minute, Will Jones." Another copy of THE AMERICAN BOY is spread out on the floor and the cat is intently reading it.—WILLIE POLK, Indianapolis, Ind., belongs to the Baptist Boys' Brigade and is first sergeant. The brigade consists of twenty boys. They are about to have uniforms.—AMELE KING, Moncton, N. B., writes a long letter telling what he and his boy friends do, which shows that boys in New Brunswick are not without their pleasures. Among their games are football, boxing, punching bag, hunting, skating, printing, baseball and hockey.—L. WALKER LAYNE, Ventura, Cal., pictures with his pencil an American boy sitting on a soap box reading the great boys' paper. Behind him his father, who is a farmer but not a "way back," is saying, "Jack, that's the best boys' paper ever manufactured."—HARRY Y. ISZARD, Germantown, Pa., has 150 books in his library, of which he has read about one half. Edward Stratemeyer is his favorite writer, with Horatio Alger next.—HOWARD RITTER, Kendallville, Ind., sends a description of some tricks, but as we have all the "trick" matter that we can find space for we are unable to use it. Howard wants us to write him a personal letter. Many such

man who has used tobacco all his life and quit the habit through the influence of the article, "Top or Bottom—Which?" that has been running in THE AMERICAN BOY.—D. C. MARTIN, Santa Cruz, Cal., age ten, sends us a piece of sea moss. It is very beautiful, indeed, being as fine as the finest lace. We wish every boy could see it. He says it never snows in Santa Cruz. The only snow he has seen is that on the mountains eight miles away.—HAROLD B. PRATT, Brooklyn, N. Y., age eighteen, writes a long letter about his Sunday school, which he seems to enjoy very much. He says he knows no boy ever got any harm from Sunday schools and many have got good from it. He thinks we ought to dwell on the advantage of the Sunday School more than we do. Harold attends the Church of the Good Shepherd, the rector of which is Rev. Robert Rodgers, who he says is a friend of every boy in his school and whose good advice and good stories every Sunday after the lesson do a great deal of good.—SAMUEL COLE, Lebanon, Ind., describes to us his collection of curios, of which he is very proud.—RAYMOND A. ALLEN, Monticello, Utah, age eleven, lives one hundred miles from a railroad. Mountain lions are found in his vicinity, and on January 17 he shot a coyote. He has a Marlin 22 repeater. There are many Indians near his home—Navajo and Utes. As soon as school is out he is going with his father into the mountains to prospect for gold.—ST. JOHN MCCARTHY, Brasher Falls, N. Y., has an old cannon ball found on the battlefield of Fort Ticonderoga; also sea shells from the Bermudas.—EDWARD WILLIAMS, age seventeen, Bonville, Ark., cannot say enough for THE AMERICAN BOY. He lives in the country. He says: "I have red hair and freckled face, a large appetite, and weigh about 135."—FRED M. BEATY, New Castle, Pa., is president of the literary society of his school. He is saving money with which to go to the St. Louis Exposition. He says THE AMERICAN BOY keeps him off the street.—CHARLES A. COOLIDGE, West Pullman, Ill., writes a very interesting letter, telling about his brother, who is only twelve years old but a great musician. On the fourth of January Charley found a red-cockaded woodpecker. He wants to know if it isn't unusual to find a bird in this latitude at this time of the year. He has taken an interest in our little Ducca (Inua) boy and has written him a long letter. At the "auditorium" a few days ago he met four American Boy subscribers and became friends with them right away through talking over its many interesting features.—RAYMOND W. PARRAMORE, Somerville, N. J., thinks we ought to have a page of jokes and riddles. He sends one for a starter. Here it is: "An old Irish lady gave her husband some of those natural wool underclothes for Christmas and they tickled him to death." Raymond must be something of a joker, for in enumerating the animals that he has he puts down four dozen cats.—ALEXANDER MARTIN, 3rd., Klamath Falls, Ore., is secretary of his Sunday school though only ten years old.—WASCE YEAGER, Wichita Falls, Tex., took the highest grade in his school for the month ending December 5, 1902. This does not entitle him to THE AMERICAN BOY Legion of Honor ribbon, as the work done must be in the year 1903.—HARRY T. BLANCHARD, Ticonderoga, N. Y., wants to hear from Canadian boys.—DENTON BURDICK, Sault Ste. Marie, Mich., says THE AMERICAN BOY has helped him and that he is now trying to do better in school. Harry Castleman is his favorite author.—ORLAND W. JOHNSON, Richland, Tex., age sixteen, is studying journalism under The Sprague Correspondence School of Journalism, Detroit, Mich., having earned the money to pay for the first term by hoeing corn in the spring of 1902. He has written several stories which have been published.—CHARLES E. WELLS, Yale, Mich., is writing a history of his town, obtaining information from the old pioneers and from old papers. The settlement of Yale dates from July 4, 1851. The town has now a population of 1,300.—ROBERT N. GIBSON, Clintonville, Wis., sends a joke: First boy: "I have nothing but praise for THE AMERICAN BOY." Second boy: "I have more than that; I have a dollar."—JOHN HOLMES, a Great Falls (Mont.) boy, has his little joke, too. He says: "I take THE AMERICAN BOY, and THE AMERICAN BOY takes the cake." John is fourteen years old and sends some pen and ink drawings.

A Boy to Be Proud Of.

Gurnee Millard, the eleven-year-old son of Frank Millard, Corunna, Mich., deserves to go on our AMERICAN BOY Legion of Honor Roll. Gurnee has attended school for nearly six years and during that time has not been absent or

GURNEE MILLARD.

tardy. He has sacrificed a good many days when he might have had a good time out of school. His parents have let him make his own choice and he has always chosen to go to school. He, of course, stands well in his studies.

requests come from boys, and it is hard to refuse them; but when the fact is considered that the editor is receiving thousands of letters from boys, the impossibility of his attempting to answer, except in a general way through the columns of THE AMERICAN BOY, should be understood.—HUMPHREY SMITH, Princeton, N. J., has received a subscription to THE AMERICAN BOY from an officer in his Sunday school for good behavior.—HAROLD C. LESLIE, Yarmouthville, Me., has books by Henty and by Munroe, and is very fond of them. He is no doubt looking forward with great interest to our Henty and Munroe stories.—PAUL BURROUGHS, Towanda, Pa., sends some scissors clippings of figures of animals made by a little girl and thinks they beat those by Elmer Ewing Stokes, a sample of whose work was shown on page 89 of our January number. Those by the little girl are very good, but the work of young Stokes, many samples of which were before us, was really more remarkable.—RAY SCOTT, Dutton, Mich., is handy with a pencil and sends us pencil sketches of Napoleon, Washington and others, copied from pictures in THE AMERICAN BOY. Ray aspires to be an artist and have a studio of his own.—ADELBERT CAMPBELL, Lebanon, N. H., sends a funny picture of his own making in pen and ink, showing what Willie does when THE AMERICAN BOY comes. Willie is intently reading THE AMERICAN BOY. His gun, bicycle, baseball bat, etc., lie scattered about him unused. His sister is saying, "Willie won't play with me now." There are birds and squirrels in a tree near by, all of whom are talking. One says, "Willie ain't got his gun." Another asks, "Where's Willie?" Then another, "What's the matter with Willie?"—F. P. WOODS, Calais, Me., is a member of a literary club that meets every Friday night. Its name is secret. Each member has something to look up and tell about for each meeting, and once a month the club issues a paper.—ROBERT KILPATRICK, Memphis, Tenn., is endeavoring to earn money to go to the St. Louis Exposition and wants to know if the editor will be there, and when, as he wants to meet him. The editor will certainly be at the Exposition. Just when he does not know. He is endeavoring to plan a way by which he can meet a large number of the readers of THE AMERICAN BOY.—CHESTER H. COOK, Rockville, Mo., is one of three boys in his neighborhood who are enthusiastic over THE AMERICAN BOY and are endeavoring to interest enough boys to form a company of the O. A. B.—GLENN DARGWELL, Jackson, Mich., wants to tell the boys that under a little clump of old oaks near the West Union High School of Jackson, Mich., was where the Republican party was organized.—VAN SHERMAN, Chillicothe, Mo., wants to tell the boys that THE AMERICAN BOY inspires him to better living. He was what was known as a "rounder," being thrown into all kinds of bad company. Now he is going to school, and he says "THE AMERICAN BOY caused it."—ROY T. RISLEY, Mount Carmel, Ill., says he knows a

A Young Violinist.

Charles Hayes, of Vienna, So. Dak., is a young violinist of some local fame. His love for the violin began at a very early age, when his sole possession in that line consisted of a shingle, with sounding-board, and threads for strings. He obtained his first violin when he was ten years old, and from that time on has made rapid progress. His services as a musician are in much demand in his home town.

CHARLES HAYES.

What the I. C. S. Does for Schoolboys.

When I enrolled in the Mechanical Drawing Course of the I. C. S., Feb. 26, 1901, I was a student of the High School, at Hop Bottom, Pa., and had no previous training in drafting. Through the efforts of the Students' Aid Department, I secured a position as mechanical draftsman with the Diamond Drill and Machine Co., at Birdsboro. There are in the employ of this company, three other draftsmen and four stenographers, who are students of the I. C. S. I believe that an education gained through the I. C. S. is as efficient and thorough as can be obtained.

—LYMAN W. KELLUM,
Birdsboro, Pa.

The Rudder Publishing Company

According to our artist a unique football match took place recently in the North. The Sportville Club issued a challenge to a neighboring township to play a match on the Sportville frozen lake, the conditions being that each side numbered fifteen and all players were to wear blunt wooden skates. The game was very fast and furious, ending in favor of Sportville by 31 goals to 7. The visitors unfortunately ran out of goalkeepers, chiefly due to the presence of an uninviting hole two yards from the goal posts, through which several disappeared at exciting moments. At close of play the casualties included five cases of concussion of the brain, two broken arms, four knee caps put out, eleven sprained and ricked backs, five bad cases of semi-drowning, and all the combatants had contusions and fractures more or less severe. The local doctor has since been enabled to purchase a very nice pony and is busy promoting a similar match while the ice lasts. A committee of the spectators are prepared to offer 5s. each as gate money to view another such game, but the performance is not likely to be repeated.—From "Chums," London, England.

Eskimos Have Good Games

H. IRVING KING

The Eskimos who live away up in Northern Alaska, on the shores of Behring Sea and the Arctic Ocean, where the nights and days are six months long and snow and ice abound, are extremely fond of games.

The little Eskimo boys have toy-hunting outfits with models of sleds and canoes, or kalaks, as they are called, and the girls play with dolls of ivory made from the tusks of the walrus. They have little toy dishes and other household utensils made of baked clay, with which they play at housekeeping, just the same as civilized children do.

There is one game of which the children are particularly fond, and which is also enjoyed by their fathers and mothers.

A round block of wood about six inches long is whittled into the shape of a spool, excepting that one end, instead of flaring out, is sharply pointed so that it can be stuck in the ground which forms the floor of the native hut.

A hole is drilled through the block the same as through a spool and the contrivance is stuck in the center of the floor, with the flaring end uppermost.

Then the family and their friends, children and old people together, seat themselves cross-legged in a circle and try to throw small darts so that they shall go into the hole in the center of the spool-like block.

Each player has beside him a little pile of sticks with which to keep count and when he succeeds in sending the dart into the hole he takes one of these sticks and lays it to one side.

Each player has the same number of these counting-sticks. When a player misses sending the dart into the hole he passes it to the next player, and so it goes around the circle until one player has made as many successful throws of the dart as he has counting sticks, when he drops out and the others continue until all the sticks have been used up, the last player out losing the game.

They also play "cat's-cradle" with a cord made of the sinew of some animal, and are so expert that, besides making the ordinary combinations such as are made among civilized children, they will form the outlines of birds and various northern animals with the string.

Another game consists in placing on the back of the right hand a number of small wooden sticks, like jackstraws. The player withdraws his hand swiftly and tries to catch the falling sticks between his thumb and forefinger, still keeping the palm of the hand downward. If one of the sticks falls to the ground it is a miss and the next player tries.

When a player succeeds in catching all the sticks he takes one from the number and lays it aside. This is continued until all the sticks are used up, when the one having the largest number is declared the winner.

The Eskimo children are great top spinners. A boy sets his top spinning on

the earth floor of the hut which serves him for a home, and then, dashing out of the door, tries to run around the building and get back inside before the top stops going. If he does so he scores one, and the boy who can do this the greatest number of times consecutively wins.

Another game they play is this. A stick is driven into the center of the floor and the players gather around in a circle about four yards away from it. Then one of the players places an article of some kind in the center of the circle and the others take turns in trying to throw a ring of twisted grass so that it will fall over the stake.

If a player succeeds he takes the prize as his own and replaces it by another article of like value, but of a different kind.

As each player puts up something of which he has a surplus, the game amounts to a sort of trading of articles, and, though it is very much like "playing for keeps," the poor Eskimos of the frozen shores see no harm in it.

There are a number of games, the success in which depends upon skill in throwing darts and in which the children become expert.

Football is played among the Eskimos by both men and boys. They play it in two different ways. In one the ball is thrown into the center of the field and the two sides make a rush for it and try to drive it to the goal of the other side. The goals are marks made in the snow.

This game is much like the football played among civilized boys, only that it has no set of rules to govern it. Anything, apparently, is fair which will bring success.

In the other game the players stand in two long rows close together, the ball is rolled between the lines and the players try to kick it through the line of the opposing team. As soon as this is accomplished there is a rush to drive it to one or the other of the goals.

They use a leather ball about six inches in diameter, stuffed with moss or deer

hair. This game is played on the hard, frozen snow in the spring when the long night of the winter is beginning to give place to the long day of the summer.

In a game of handball which they play the boys are on one side and the girls on the other. The ball is a rectangular leather bag filled with sand or earth, and the boys throw it from one to the other, while the girls seek to catch it and keep it going on their side.

When one of the boys has not had the ball in his hands for a long time his companions call out to him that he is "hungry," and try to throw the ball to him. The girls try to prevent the "hungry" one from getting it, and if they succeed, they chase him and rub his head with the ball, saying "we will oil your head so that you will not starve," while the rest of the players look on and laugh uproariously.

Two Savage Looking Trophies.

The American Museum of Natural History in New York has the famous scalp-lock shirt owned and worn in battle by "War Eagle," the fierce old Sioux warrior. Nearly four hundred human locks of hair dangle from it, all from the heads of victims. One bright lock has been identified as that of the gallant Custer, cut from his head on the field of battle by "Rain in the Face," after his memorable fight of the Big Horn. This shirt was worn by "War Eagle" when he lost his life in one of the last uprisings of the Sioux tribe, and came into possession of "Rain in the Face" and of "Sitting Bull."

One of the dueling pistols belonging to John Rowan is now in possession of his granddaughter, Miss Julia Rowan, of Bardstown, Ky. It measures sixteen inches in length and weighs about two pounds. This pistol figured in two notable duels, the first between Judge Rowan and Dr. Chambers, in which Chambers was killed. The next was between John Rowan, Jr., the son of Judge Rowan, and the renowned Kentucky statesman, Tom Marshall. In this duel Marshall was crippled for life.

The elder Rowan was a United States Senator at the time of his duel and the younger a Minister to Italy. In his will the elder Rowan disposed of this weapon and another similar to it as follows: "My dueling pistols I bequeath to my son John, and at his death to his eldest son. They are never to be used by either, but when their honor imperatively demands it, and in that case I know they will be held steadily."

The Rowan homestead is also famous as the birthplace of the celebrated song, "My Old Kentucky Home."

Curious Bridges.

China has a stone bridge six miles long made up of 330 arches each seventy feet high. There is an iron bridge in Scotland 18,612 feet long. There is a wooden bridge composed of trestlework in New Orleans twenty one miles long. The wood used is cypress, and the piles have been saturated with creosote oil in order to preserve them. Bradford, Pa., probably has the highest bridge in the world—301 feet above the bed of Kinzina Creek.

\$3.00 SET OF TABLE TENNIS \$1.00

Buy Direct from the Manufacturer. Table Tennis is the most fascinating of games placed on the market in recent years, and is all the rage in London, Paris and New York. For a limited time we are making a special offer of No. G. set containing two basswood rackets, nickel plated posts, 4 ft. green net, "Halax" (English) balls, with rules in good box, sent express prepaid to any address in the U.S. upon receipt of Money Order for \$1.00.

A Land Outrigger Sail Craft—How to Make It

J. C. BEARD

There can be as much difference in land boats as there is in water boats. There may be land sloops and schooners and square rigs; wide hulls and narrow hulls; some shaped like a rectangle, some like a diamond, some like a square; some are bungling and slow; some are clean cut and swift as a greyhound.

Progress in this branch of sport has, in fact, been very rapid, and boys are no longer satisfied with an ordinary wagon to which a sail has been attached. The "hand-gear," a sort of old-fashioned velocipede arrangement made to eke out the power of the sail, has been entirely abandoned, and racing land boats, like racing water boats, now depend on wind and sail alone. As upsets seldom occur,

The ship under way

and are not at all serious when they do, the boys crowd on a prodigious amount of sail and make very creditable time. A good land boat will go very much faster than any boy can run.

The outrigger, described in this article, although one of the fastest designs yet built, is a very simple affair to construct. Figure 1 shows the wagon bed. It is made of two pieces of board, one five or six feet long, and about six inches wide, the other perhaps two feet long and eight inches wide. The boards should be at least one inch thick, but not more than one and one-half inches thick. If the available boards are thin, use two boards, one on top of the other. The shorter of the two boards is fastened at right angles across the other, as indicated in the diagram. Figure 2 shows the forward truck of the outrigger. The two front wheels are fitted on the truck at A and B. The bolt shown at the top of Figure 2 is passed through the hole shown in the end of Figure 1. The upper part of the truck should be a little wider than half the diameter of one of the wheels. This is to allow the wheels to swing under the bed of the wagon when the truck is turned. The outrigger may be swung to either side of the wagon as desired. The object of the outrigger is, of course, to allow the wagon to carry an immense sail without tipping over. As the wind changes or the direction of the wagon changes, of course the direction in which the wagon tends to tip changes. The outrigger must always be kept to windward, or toward the wind. Figure 3 shows the arrangement by means of which the outrigger is adjusted. The piece C is the end of the outrigger. It is bolted loosely to the wagon bed so that it can swing from side to side. D (Figure 3) is a sort of pocket into which C fits when it is to the right. Figure 4 shows a side view of D (Figure 3). When C has been slipped into the pocket, a bolt is pushed through the hole indicated in the end of D. This will hold C in place. The piece to which C, D and the pocket at the left similar to D, are attached, is the cross-piece shown in Figure 1. Figure 4 shows the method of attaching the wheel to the rear of the wagon bed. Two straight pieces of board, a little longer than half the diameter of the wheels, are fastened to the wagon bed by means of braces. A bolt is run between these two pieces. The wheel at the end of the outrigger is fastened on in the same manner. The bolt serves as an axle for the wheel. It

Parts of the land craft.

may be well here to say a word about the wheels themselves. Four wheels are needed. Two on the front truck, one at the rear of the wagon bed and one at the end of the outrigger. The wheels are best if they are all of the same size, although it is only essential that the two wheels on the forward truck be of the same size. It will do no harm if the other two are a different size, because

CANFIELD EVERY BRAKE FULLY GUARANTEED
COASTER BRAKE

the length of the two vertical pieces, shown in Figure 4, can be arranged so that the wagon bed will be level. Bicycle wheels are the best sort to use, but any kind of light, strong wheels do very well. Figure 5 shows the step for the mast. This must be fastened to the wagon bed near the forward end. A small square block is screwed down first and then a sort of bridge is built over it, as shown. Make the step very strong, for the strain on the mast will be severe. Any sort of strong cloth will answer for the sail. Do not be afraid to make it large.

If this design is carefully carried out, the maker will possess a flyer that, on a smooth road in a high wind, will leave everything, save an automobile, far in the rear.

Something About Rowing.

We will suppose that there are enough of you to constitute the crew of a row-boat—a captain, a coxswain and several oarsmen. The coxswain sits in the stern of the boat and steers. He ought to be the lightest boy in the crew. The captain sits in the bow. The oarsmen will, of course, face the coxswain and have their backs to the captain. The stroke oarsman is an important individual. He sits in the stern of the boat facing the coxswain. He sets the pace. The other boys must all row just as he rows, fast or slow. The heaviest boys should sit in the middle of the boat. The captain directs the coxswain, who, in turn, directs the crew. When ready to start, the captain says to the coxswain, "Go ahead." The coxswain calls out "Ready, all," on which the crew places their oars in the water ready to begin a stroke. Then the coxswain calls "Row," and the stroke is begun. When the captain wants the boys to stop rowing he gives directions to the coxswain, who calls out, "Way, all." When he wants the boat stopped he orders "Hold, all," on which the crew put their oars deep into the water and hold them in that position. If he wishes to turn to port he orders "Port, hold; starboard, pull." When he wants the boat to go backward the order is "Stern, all," and the crew backwater with their oars.

There are a good many kinds of strokes. A common stroke is this: Hold your oars with a good breadth between your hands. Reach forward toward the stern of the boat with both the body and the arms, swinging forward from the hips without bending the middle of the back. Drop the oars into the water, the lower part of the blade turned slightly toward the bow of the boat—not straight up and down. Drop the blades when you are at "full reach," that is, when your arms are extended and your body bent forward. Don't let the blade dip deep. Now swing back just a little past the perpendicular, bringing in the hands until they just touch the body, keeping the body erect. Pull firmly and strongly and don't jerk. When the hands are close to the body, drop them to raise the blade from the water, and do not turn your hands to feather the oar until they are dropped. Start your hands and your body together as you swing toward the stern of the boat, but shoot your hands away from your body very quickly until your arms are straight. Let the blade clear the water by three or four inches and at a uniform distance from it, and not in a circular movement. To feather the oar (that is, to turn it when it leaves the water so that the blade will be horizontal and offer the least resistance to air when reaching for another stroke), use the hand nearest the rowlock, allowing the oar to turn loosely in your other hand. Sit in the middle of the seat and do not lean to the right or left. Practice first on stationary seats and then on sliding seats. Do not start your slides toward the bow of the boat until you begin to pull on your oars. Do not push your stretcher before your oar is under water and you are pulling on it.

Recently Lord Curzon, in speaking of the young people of India, declared that to be without education in the twentieth century would be as if a knight of the feudal ages had been stripped of helmet, spear and coat of mail.

Every boy should have a copy of... **"BOXING"**

Spalding's Athletic Library, No. 162.

Illustrations, showing how each blow is made, how to attack and defend yourself, how the hands must be held and the positions to take, with descriptions that are so accurate that any boy can, with a young friend be, come proficient.

A Noble Rescue

William Murray Graydon

ANG! A loud report echoed across the Juniata, and as the white wreaths of smoke curled up from the hickory trees on the bank, a duck skimming swiftly toward the farther shore dropped limp and lifeless into the water.

Two boys intently fishing from an old boat that lay half on the pebbles, half in the water, jumped to their feet in surprise.

"It's a duck, Tom," cried Jim Hackett, "Look, there he goes floatin' down toward the falls. I wonder who fired?"

"It was that sportin' feller from the city," replied Tom Carrol, "here he comes now. He must have been up there in the bushes," and Tom nodded his head toward a young man in velveteens and shooting-cap, who was hurriedly making his way through the reeds and long grass.

"My boys," he began, as soon as he reached hailing distance, "you have a boat here; get that duck for me, will you, before it goes down the falls."

Jim shook his head. "It's too late, mister; by the time a feller'd get the duck he'd be over the falls."

"Nonsense!" said the man. "If you are smart you have plenty of time. Quick, what do you say? Will this tempt you?" and he held out a bright quarter of a dollar.

"You're a fool," whispered Tom angrily; "you can do it easy, Jim; I'll go with you."

Jim looked once at the floating duck, now perilously close to the falls, and then replied decidedly: "No, it's too risky. I won't do it."

"Here, give me your old boat, Jim, and I'll get it quick enough," cried Tom suddenly, and shoving the boat into the current he snatched the oars and was pulling away from shore before Jim had a chance to say a word. Forty yards below, the river waded and foamed over a jagged line of rocks, and straight toward the worst spot in the falls the duck was drifting.

Tom pulled hard and fast, every movement eagerly watched by Jim and the stranger.

He was close onto the perilous line of foam now, and the duck was still a yard distant. One more fierce pull and then reaching out quickly Tom victoriously jerked the duck into the boat, and bending with all his might to the oars, hauled the boat's head up the stream.

It was a fearful tug, for he was fairly caught in the furious current, and the rapids were hissing and roaring just below him. For a moment he seemed to be stationary, then inch by inch, the boat moved up stream, and at last Tom ventured to head for shore. "You're a brave lad," cried the man, as Tom handed him the duck; "here, take this, you have fairly earned it," and he pressed a half-dollar into Tom's perspiring hand.

"I say, Jim, what was wrong with you today?" said Tom a minute later, when the man had gone off with his duck. "I never knew you were a coward before." Jim clinched his hand and his face flushed.

"Don't you call me a coward, Tom Carrol," he cried angrily. "I wasn't afraid to go out there. It wasn't for that reason. It was—"

"What was it then?" demanded Tom rudely. "You weren't afraid? Oh no, not at all."

"No, I wasn't afraid, and you know it," said Jim. "I don't believe it's right for a fellow to risk his life for nothing at all."

Tom laughed derisively, and holding up the silver coin so Jim could see it he ran off up the bank.

When Jim went through the village half an hour later, the city sportsman was sitting on the tavern porch relating some amusing story to an audience composed of Abram Heck, the tavern keeper; Jefferson Jones, the postmaster; the old German shoemaker from over the way, and half a dozen barefooted boys. They laughed loudly as Jim went by, and presently some one called after him "coward." Jim thought he recognized Tom Carrol's voice, and was half tempted to turn back, but he thought better of it and continued on home.

His heart was bursting with indignation. It was the first time he had ever been called a coward, and boy-like he was terribly distressed about it. Yet he knew that he had done right, and this made it seem all the more severe.

For several days following his companions treated him with evident coolness. Old Hans Diedrich, the cobbler, alone pitied him. He called Jim into his shop and said: "Nefer mind, my boy, pay no attention to dose pad boys. Some day you vill show dem who bees de coward, ain't dot so?"

Jim found but cold comfort in this well-meant consolation. He went off to the river and stayed there by himself until evening. That night it stormed and the rain poured down fiercely and steadily.

In the morning it was still raining, and pulling on an old gum blanket, Jim started for the river to see that his boat was out of harm's way.

Down the gloomy straggling street he saw a man running swiftly, and as he drew near the tavern, out came half a dozen more and dashed off down the street at the top of their speed, utterly regardless

of the pouring rain. Women rushed to their doors and small boys shouted wildly. Jim began to run, too, and presently caught up with the postmaster, who was hobbling along with the aid of a cane.

"What's the matter, Mr. Jones?" he cried breathlessly.

"Why, it's that city feller, Luke Walton, an' young Carrol, they do say that they air drowned in the falls," groaned the postmaster, "ef this rheumatism wasn't so bad, I'd soon—" but Jim was already twenty yards away and going at a rate of speed that caused Mr. Jones to groan with envy.

He swept through the rain-soaked bushes, and plunged down the grassy slope in three jumps.

Half the population of the village were running up and down the pebbly beach, crying and shouting, and pointing with trembling hands out toward the falls.

The Juniata, swollen to madness by the heavy rains, was rushing past turbid and yellow with mud, and the falls were roaring in sullen rage, and tossing up great spiral columns of tawny foam and spray as the heavy waves thundered against the half-submerged rocks.

With a sickening heart Jim saw a dark object tossing up and down in the troubled waters just below the falls, and

hind him, and then he looked at his boat which lay untouched upon the shore. Suddenly a woman broke from the crowd and, wringing her hands in agony, ran weeping along the sand.

It was Tom Carrol's mother, and this sad sight steeled Jim's heart to a sudden and desperate resolve.

Before the eyes of the amazed people he pushed the boat into the river, grasped the oars and pulled firmly up stream at an angle.

"Come back, Jim, come back. You're crazy, lad, you'll be drowned," the people shouted at him, but paying no heed whatever, the youth pulled into the center of the river. He stood up once and with a critical eye measured his distance. Then sitting calmly down he let the boat sweep at will straight toward the angry falls.

He was directly above the upturned craft, and just below him between two jagged rocks a great wave shot madly into the air. If his boat could shoot that wave, and if he could jerk it to one side far enough to pierce the eddy where the hapless victims were tossing up and down, he might get them into the boat, and it was barely possible that the passage of the rapids below might be made in safety. The lives of all three hung by

a slender thread indeed. On shore the people, stupefied into silence, watched in breathless suspense this daring exploit.

The boat, caught in the swirl, shot madly forward, heading straight for the great hissing wave. Two inches to either side and the pointed rocks would shatter it to fragments.

Jim's face was white as a sheet, but he remained calmly seated, clutching the oars with a firm grasp. Ten

seconds more and straight out on the crest of the wave rode the frail craft. Then the foam and spray shot up in columns around it, and a low murmur burst from the people on the shore, which turned to a shout of triumph as the boat appeared a moment later battling fiercely with the turbulent waters. The struggle was desperate, but brief. With a mighty effort Jim cut through the edge of the current and the craft rode into the tossing eddy. He waited a moment to ball out some of the water with a wooden scoop, and then with two or three strokes reached the upturned craft. Leaning over the edge he held out his hands to Walton and with a brief struggle dragged him into the boat. A moment later and Tom Carrol was seen to crawl over the side; and as the rescuing boat with its three occupants darted out into the swirling waters again a mighty cheer rose from the spectators that was heard even above the furious roar of the falls. The whole village was on the spot now, and as the boat began its perilous journey down the rapids the crowd followed in wild excitement along the shore. Twice the craft struck hidden rocks and bounded into the air, twice the dashing

instantly he realized what had happened. Walton and Tom Carrol had been carried over the falls. They retained their hold of the capized boat and drifted into a little eddy.

"Is no one trying to help them?" he cried.

"It's no use," groaned the tavern keeper, wringing his hands, "no boat can get near them from above nor below; they're doomed men;" dropping his voice to a whisper, he added, "It's a pity,—a terrible pity, and that man Walton owes me for two months' board; it's terrible, terrible."

Jim ran down to the very edge of the water, where he could see everything plainly. The upturned boat was bobbing up and down among the waves, and Walton and Tom, who were clinging feebly to the sides, were almost hidden at times by the splashing foam.

They appeared to be shouting, but all sound was smothered by the angry roar of the rapids. In a moment or two, at the latest, they would be carried into the current again, and in that mad half-mile stretch of rapids below they would be swallowed up forever.

Jim looked wistfully at the village peeping out from the green foliage be-

(Continued on Page 189.)

THE SYNDICATED FOOT

(Continued from front page.)

had been thus hastily gathered, laid the doctor's proposition before the meeting. It sent their spirits skyward, and, putting their planned cruise firmly out of their minds, they declared that every Johnny was entitled to two feet, and that John Hemmingway should have the same number as the others.

As soon as Dr. Runner could trust the crippled Johnny to hear so much good news, he allowed the whole eleven to call upon their comrade in the hospital and themselves tell him their plans. The Johnny who was selected to make the announcement got only a little way in his speech and broke down.

"Johnny," said he to the cripple, "we—the fellows—are mighty sorry you lost your foot. We know it's going to be hard to walk on crutches—and so—we—"

"We're going to buy you a new one," nervously said another.

"And not go cruising," said a third.

"And Doc Runner is going to take you home while you learn a trade," said another.

Then they all smiled bashfully and said:

"Yes! That's right, Johnny."

But the poor, worn, nervous boy on the bed looked from face to face in speechless surprise, finally resting his eyes on the doctor.

"You must get well fast, my boy," said he. "You see what good friends are waiting to help you on your feet. Yes, I said feet!"

There was a nervous laugh in which even the boy on the bed joined. But in the awkward silence which followed he drew the sheet over his face and his pain-racked form shook with sobs. Then, holding the sheet to his eyes, with his left hand, he extended his right into the air and touched the nearest Johnny. One by one they filed by and shook that thin, white hand, and then filed out of the room, silently, humbly; touched to the very core of their manly hearts.

The doctor made a good bargain for them, and on the night when the new foot arrived at his office he had them in to see the package opened. Gradually the wound healed, and one day the lame boy limped down from the hospital to the room which had been prepared for him in the doctor's house. Then came the days when the new foot was tried on, with no one present but the doctor and the patient, and later the first limping steps were taken. Finally, when he could walk quite firmly with the aid of a cane, the doctor called in the Johnnies.

"Go hire the hall for next Wednesday night," said he. "Tell your friends that they may sit in the galleries for twenty five cents a seat. Tell the band that they are to play, and tell the hotelkeeper to spread a supper for fourteen. Tell them we will divide the receipts into three parts—one-third each for the band, the hall and the supper. If you go at it right they will accept those terms. One thing more. You will want a name for the event. Have tickets printed like this," and the doctor held up a sample, which read:

THE SYNDICATED FOOT

Town Hall—Wednesday Night—Next.

Under the Auspices of the Johnnies.

The Johnnies did not wait to hear the doctor's promise that John Hemmingway should walk into the hall on his own feet; they promptly upset his office in their efforts to apportion the necessary preparations among themselves.

The town took to the suggestion splendidly. There was to be a Johnny banquet and a dance afterward, said the girls in the Chapple set, and, of course, every Chapple forthwith bought tickets. There was to be a Johnny minstrel show, or something or other, said the Brownies, and forthwith several family purses were raided for the necessary "two bits." The girls in the Johnny set volunteered to the doctor as table waitresses, and the doctor at once arranged the matter with the hotelkeeper. And then the business men said to their wives, in the easy rhetoric of the West: "What kind of a game is Doc Runner and those Johnnies up to?" with the result that they, also, bought tickets.

People came early that night because they were curious; and several of the Johnny girls were found on duty, some as door tenders and ticket takers, and some as ushers. The band occupied the stage, and in the center of the hall was the banquet table spread for fourteen, around which hovered other Johnny girls, daintily dressed, with tiny lace aprons and caps, adding the delicate finishing touches. The people kept coming

till the balconies were packed, and a row of chairs was placed around the walls on the floor of the hall. Then the doorkeepers closed the entrances, the ushers scurried down to the floor and with the waitresses retired from the hall.

The people glowed and tingled in that moment of excitement, and when the band broke out strongly with the opening notes of "Whistling Rufus," they applauded nervously from the fullness of their hearts.

Out of the anteroom came the procession. First the girl ushers, two abreast; behind them the waitresses single file; and then Dr. Runner, with a Johnny on either side of him. Then there was a slight break in the order, but only for a moment, for there came the crippled Johnny walking without crutches and with two feet! How the guests in the gallery and on the floor did cheer the smiling boy!

Behind him came the remaining Johnnies, the hospital doctor in the last file.

They went around the tables twice, Dr. Runner showing his confidence in the new foot by not once looking back at the boy. Then they drew back the chair at the end of the table for the guest of honor, Dr. Runner taking the opposite end, with six on each side of the table.

J. L. HARBOUR.

Lecturer and well-known writer for boys whose stories are appearing in THE AMERICAN BOY.

Knowing the temper of the townspeople, Dr. Runner had cautioned the boniface not to make the dinner too long. In keeping with these directions the affair moved quickly, the onlookers finding ample amusement in the band, the animated scene on the floor, in the menu cards, a quantity of which had been printed for distribution among them. Besides, there was to be dancing later.

These cards breathed the spirit of the occasion. A line across the top declared:

The habit of walking on two feet is expensive, but all of ours are paid for.

The menu cards read as follows:

- Olympia Oysters on One Foot
- Little Toe Pickles
- Olives from the Foothills
- Soup on Crutches
- (Very weak)
- Water Cress, Ankle Deep
- Fried Sole, Shoepeg Sauce
- ROAST TURKEY WITH DETACHABLE LIMBS
- Cranberries from Lame Cow Marsh
- Ladies' Slippers Stuffed with Onions
- Hobnail Punch
- (With a Kick in It)
- Cork Leg Salad
- Cutlet of Knotholes
- Rubber Boot Pudding
- (Neat's Foot Oil Sauce)

- Cold Foot Ice Cream
- Moccasin Cake
- Strong Coffee
- (Patent Leather Top)
- Copper Toed Nuts
- Full Dress Raisins
- Fruit
- (Of Experience)

When the last course had been served the waitresses dropped back from the table, for it was known that Dr. Runner was to formally invite the ticketholders to remain and dance. The doctor waited until the last cracking of nuts had died away and the faces about the table bore expressions of utter contentment. Then he rose in his place and rapped for order.

"It is my pleasure," said he, "to invite all within this hall to remain until this table is removed, and join the Johnnies in their dancing. Of all the parties given by this set, this occasion is in some respects the most unique. It is typical only of the West; but it is generous in its inception and generous in its results. I admire the spirit which animated these boys when they voluntarily gave up their cherished plans and turned their syndicated funds to the aid of this unfortunate member of their councils. I have been happy to become a co-worker in their deed; and I thank you for them for so generously responding with your presence tonight at this Johnny reception."

The doctor paused and as this sounded like the end of a speech, everybody applauded. But he again rapped for order. "One thing more before we break up," continued Dr. Runner. "I hold in my hand a deed of gift of my sailboat, 'Doctor.' It is my purpose to give it to a young man who deserves a little financial aid just now. If the good people of this town will remember him and employ his boat when they arrange for sailing parties this summer, he ought to earn enough therefrom to pay his way through a commercial college next winter. I have the pleasure of presenting this bit of paper with my best wishes to Mr. John Hemmingway, the most deserving Johnny who wears two feet."

Eleven Johnnies and the hospital doctor rose to their feet to cheer, for the doctor's gift was a genuine surprise. The pale boy at the end of the table reached down and grasping his knees, held on tight, tight! It seemed to him that the world was tipping over and that he must slip off into space.

When quiet was restored, there was a general directing of attention toward the recipient of the gift, as though expecting him to acknowledge it. But a shuffling of feet, and murmuring of voices on the stage drew many eyes to the band to see heads nodding and hands waving over some point of discussion. Then the leader arose and, very red and smiling in the face, motioned Dr. Runner to approach. The crowd in the hall saw the band leader whisper something to him, which evidently pleased him, for he reached up and shook hands with the leader and waved his hand in a salute to the band.

Turning to the hall, Dr. Runner said, with a decided note of happy surprise in his voice:

"The band authorize me to say that they desire their one-third of tonight's receipts to be applied to that course in the commercial college."

The Johnnies fairly danced about in glee, but were silenced by a man who rose from his seat and waved for silence. He was the owner of the hall.

"Doc, you can put mine in, too," said he. There was the next thing to pandemonium for a minute, which ended in a great shriek of delight as the crowd recognized the fat hotelkeeper waddling out on the floor. As soon as he could be heard he waved his hand grandiloquently at the table and said:

"Boys, I'm a sport. Make it three straight."

The citizens of that town have seen it grow till now there are ten times twenty five hundred people, and four times that number there. But they will never forget one night when they were younger, and that was the night when the Johnnies, headed by the band and followed by half the population, marched out of the hall, down the main street, out on the long dock, carrying a boy with an artificial limb on their shoulders, and after seating him in the stern of a sailboat, christened him:

"Captain Johnny of the good ship 'Doctor.'"

ELECTRICAL UNITS FOR BOYS.

Is written so simply that every boy can understand something about Electricity. It answers such questions as: what is a volt; an ampere; an ohm; a watt? It tells how to find the amount of wire, number of batteries, etc. required for any power. It explains magnetism, the dynamo and the motor. Boys, if you want to know something about electricity and the secrets for this valuable book, Catalog of Boys' Electric Novelties for sale. Address, H. W. HARDESTY & CO., 1129 A Central Ave., Newport, Ky.

A Famous Pony and a Famous Ride

General Charles

King, U. S. V.

P TO the year 1898 the American soldier had fought no battle save on North American soil. Within two years thereafter American soldiers had followed their flag through brake, swamp and jungle in four different lands—Cuba, Porto Rico, the Philippines and China. It fell to the lot of one American officer, and only one that I know of, to fight in all four, to be most highly commended by his commanding general in all four, to be recommended for brevets or other recognition, and to achieve a most unique distinction. When the fighting was all over, the recommendations of the generals at the front were overhauled by a board of officers at the rear. To many a good soldier who had served in, possibly, only one land, they awarded the Medal of Honor or a brevet. To the one man who had fought in all four they awarded—nothing.

There was something so odd about it that other officers took to comparing notes and writing letters. The soldier in question had been wounded at San Juan Hill, his horse falling, pierced by three bullets. He had won the official praise of Generals Young and Wood before his transfer to Porto Rico, where Generals Garretson and Guy Henry added their praise for his courage at Yanco, and his conduct of an expedition to capture Spanish arms. He was promoted lieutenant colonel and sent to Manila; spent six weeks in a smallpox camp at Angel Island and six more on a tub of a transport that nearly swamped with all hands. He rendered brilliant service in Luzon and Mindanao and later in China, but the thing of all others that set "soldiers, sailors and marines" to talking about him was the affair of Vigan.

Officially, we might never have heard of it but for the navy. This was odd, too, for the officer in question was Lieutenant Colonel Webb C. Hayes, son of a gallant soldier of the great Civil War, better known as Rutherford B. Hayes, President of the United States.

A little force of our Thirty-third Infantry Volunteers, early in December, 1899, was occupying the town of Vigan, Luzon, near the northwest coast of Luzon, Province of Ilocos Sur. It had a fine cathedral, "city hall," bishop's palace and other public buildings and a native population of nineteen thousand. Parker had perhaps one hundred men fit for duty and as many more sick and wounded sent in from the field columns scouring the mountains after Aguinaldo. All on a sudden he found himself surrounded by an overwhelming number of insurgents, with Mauser and Remington rifles, but fortunately without artillery. He was cut off completely from the outside world, for the Tagalogs seized all boats on the Abra estuary, and held even the water roadways to the open sea, three miles away.

What the insurgents wanted most was the great store of rations and ammunition under Parker's charge. The capture or destruction of the little garrison, and probably a wholesale massacre of the sick and wounded would, however, have been an incident. Parker was sheer grit. He stationed his men in the stone buildings on the plaza. He armed such of the sick as could stand, and when, urged on by their officers, the Tagals charged, they were met by a hot and furious fire that drove them back dismayed. Then they crawled into the surrounding "shacks" of stone or bamboo and began a siege, with the chances ten to one in their favor unless Parker could get help from outside.

And this was the condition of things when, on the afternoon of December 4th the United States warship Vicksburg, Captain Harry Knox commanding, steamed into Vigan roads, off the mouth of the Abra, dropped anchor and sent a little boat ashore containing a solitary soldier, with his field kit and a chest of medicines for Parker's sick and wounded. The solitary soldier was Lieutenant Colonel Hayes, who had come up from Manila, a passenger, under orders to report to General Young, commanding in the field somewhere north or east of Vigan. That was all they could tell him at Manila; but, like Rowan and his "message to Garcia," it was all Webb needed to be told. The ship's pilot came ashore with him to interpret in case they met anybody; but, barring a few silent and suspicious native fishermen, they found at first only one man, the Spanish agent of the tobacco company, who threw up his hands in dismay at sight of the colonel and begged him at once to go back to the ship. "Porque?" said the pilot. "Because," said the Spaniard, "the Tagalogs by thousands have surrounded Vigan and massacred the Americans to a man." But

any price. Hayes calmly grabbed the reins, straddled the pony, bade the owner come on and claim pay and property in Vigan. The truth was Hayes needed both mount and guide, and saw no other way of getting them. The native borrowed another pony and came ahead. A mile from the beach they reached the wicker bridge over the Abra and here they came in sight of the swarming insurgents, and here the native balked. Livid with fear, he protested he dare go no farther, until he felt the muzzle of Hayes's revolver at his cheek. It was then dusk. Hayes was in loose khaki, the native in flapping, dirty white "ropas." Both were bestriding native ponies. The insurgents were doing their best to finish the "Yankoes" within the town and hadn't brains enough to watch for any without. Once more, at sight of a big party of armed Tagalogs by the roadside, the guide bolted, but Hayes was too quick for him, and, nabbing his rein, whirled the pony about, then set his pistol between the shrinking shoulder-blades and savagely bade him go on. Marvellous as it may seem, they went that mile of dusky road past dozens of Aguinaldo's soldiery, past dead and wounded as they neared the suburb, then through shadowy, deserted streets straight to the plaza and the dark, frowning walls of the cathedral and city hall, looking every instant for shot or challenge and hearing not a sound until, almost at the iron gateway of the Casa Real, came the lusty hall of "Halt! Who is there?" And up went the answering shout, "Americans! Friends!"

Two minutes more and the lieutenant colonel of the Thirty-first stood in the presence of the lieutenant colonel commanding the little garrison, Parker, with his few officers, to answer their wondering questions and to hear them, with one voice, say, "Impossible!" when told he had come through from the shore. It was what the Vicksburg's captain called "the coolest and nerviest bit of work" he knew of, "hazardous, but not foolhardy," and something he would allow no one under his control to attempt, yet declared it admirably carried out. But that wasn't all.

That night the insurgents pitched in with all their might. Perhaps they knew that help was coming by sea and General Young by land, but the besieged did not know it. Twice Colonel Hayes strove to signal from the cathedral tower to the ship, but the sight of the lantern brought a storm of buzzing bullets from the surrounding foe. All night they kept up the attack, but Hayes had managed to bribe a Spaniard to push through with a note to the Vicksburg, and, though captured and maltreated by the Tagalogs, the messenger did his work and morning brought relief. The Newark and Wheeling joined the Vicksburg, and Captain Bowman McCalla landed his sailors and marines and pushed in from the sea-side, meeting Hayes and a small detachment near the bridge, while General Young, with three troops of cavalry, trotted in from the mountains, raising the siege after Parker had lost eight killed and several wounded.

To him, the brave young commander, was awarded the Medal of Honor for "most distinguished gallantry in the defense of Vigan, where, with small numbers, he repulsed a savage night attack by overwhelming numbers of the enemy, fighting at close quarters in the dark for several hours." To Hayes, for his daring and devotion, was given, for a whole year at least, not so much as a word. Just how it happened that no mention was made of it in the official reports is one of those strange things time alone can explain. Hayes joined the staff of General Young and served him so well that the general wrote of him enthusiastically. But Hayes, while praising Parker's pluck, of course, said nothing of his own. A long year after, through a letter from Captain Harry Knox, of the Vicksburg, the matter was brought to General Young; then, at once, the latter wrote the War Department, calling attention to "The chivalrous and daring action of Colonel Webb Hayes," but Young was then only a brigadier, and the report, perhaps, was "blanketed" somewhere. Now as senior major general of the line the gallant veteran has the ear of the President, and the Medal of Honor, so long withheld, hangs where it should on the breast of Colonel Hayes.

A year later there came to Ohio, after having borne his tall rider through the severe campaign in northern Luzon, a mite of a Filipino pony, sent by Col. Hayes, to be the wonderment of many a Buckeye boy, and, for long months, the joy of one, his proud owner, the colonel's nephew and namesake. The asperities of the American climate proved fatal to little "Piddig" (for the pony brought

Hayes said, "Listen!" and listen they did, and through the soft, summerlike air came the smothered sound of crackle and sputter. "Burning bamboo," said the pilot. "Musketry," said Hayes, who had heard it before. "Take the medicine back to the ship and tell the captain the news, and I'll wait here."

Away went the boat, and the farther it went the closer came a swarm of curious fisher folk, increasing in numbers with every minute, jabbering excitedly and pointing to the lone American's fine field glass and revolver. Presently he, too, was surrounded and saw that it was time to break through, so break he did, shouldering a path through the crowd until he got to the surf line, then faced about, with his hand at the pistol butt. They couldn't speak American, but they could understand. Every few minutes the louder sound of distant firing would set them to still more excited jabber and gesticulation, and their eyes on Hayes were very greedy. But the sight of the snowy hand at the revolver and of the Vicksburg, now steaming closer to shore, was too much for their nerve. Presently another small boat shoved off and an ensign came ashore, with armed Jackies to protect him. "The captain thinks you'd better return to the ship, sir," said he. "My orders are to go to Vigan," said Hayes, "and—I'm going." Natives opposed and Navy expostulated, but it was

with him his Tagalog name), and in the fall of 1901 he died and was buried under a boulder monument at Fremont, Ohio, side by side with "Old Whitey," the big charger ridden by General Rutherford B. Hayes through the later battles of the great Civil War.

PIDDIG IN PEACE.

On his back are mounted five grandsons of President Hayes. Photo taken at the Hayes farm in Ohio.

The Youngest Member of the Pennsylvania Assembly.

Representative Andrew Anderson Thompson, of Uniontown, has the distinction of being the youngest member of the Pennsylvania assembly. He celebrated his twenty second birthday on February 13, while seated in the speaker's chair. Speaker Walton invited him to take the chair immediately after the house was called to order, a compliment never before extended a "baby" member, as young members of that austere body are styled. He won the admiration of all the members present and after the house had adjourned, his name was agitated as a prospective candidate for the position, as the term of office of the present incumbent, Representative Walton, expires soon.

Representative Thompson is a member of a rich and powerful family, his father, Hon. J. V. Thompson, and his father before him, being president of the First National Bank of Uniontown, which is rated as sixth in the Union in ratio of surplus and individual profits to the capital stock. His father is the wealthiest man in southwestern Pennsylvania. By working in his father's bank during

ANDREW A. THOMPSON.

vacations, young Thompson paid his way through Washington and Jefferson college, graduating at the head of the class of '02.

Last fall his name was casually mentioned as a candidate for member of the assembly with those of a number of other prominent men. Contrary to all expectations and the wishes of the "machine," he won the nomination and was later elected by a majority of over 4,000 having polled the largest vote of any candidate on his, the Republican, ticket.

Before leaving his native town for the capital at Harrisburg, he announced his intention of abandoning the banking business and taking up politics as a profession.

In the few months that he has been in the assembly, he has demonstrated his legislative ability to a marked degree. In the past history of that body, it has been customary for "baby" assemblymen to make themselves more ornamental than useful, but he upset all the time-worn traditions by taking an active interest in every measure that came up. He has won quite a reputation as a speaker and a debater.

He has secured the passage of a bill calling for an additional appropriation of \$30,000 for the maintenance of the Uniontown State Hospital, while twenty nine other bills asking appropriations for similar institutions have been laid on the table. He has also been largely responsible for the repeal of Sunday laws that have been in force in Pennsylvania since colonial days, and known as "blue laws," now contrary to the spirit of our institutions.

Boys Books Reviewed

HIS MOTHER'S LETTER or The Boy Wolf's Search by J. M. Merrill. After reading this book we have to find fault with the title. "His Mother's Letter" is too tame to convey any idea of the many exciting adventures and hairbreadth escap's which Fred Burton experienced in his search for his unknown father away up in the lumber regions of Northern Michigan. The story is pleasingly told, and there are sufficient "thrills" to satisfy the reader. 300 pages, nicely illustrated by W. H. Fry. Ornamental cloth cover. Price, \$1.00. The Saalfeld Publishing Co., publishers.

PITMAN'S SHORTHAND DICTIONARY—Twentieth Century Edition. The first edition of Isaac Pitman's dictionary, printed in 1846, contained the shorthand outlines of 12,000 words. The edition before us—the eighth—contains the Shorthand Reporting Outlines of 65,000 words, proper names, grammalogues and contracted words with key in ordinary type. The busy, up-to-date writers of Pitman's system of shorthand will find this book of vast assistance in their work. As a reference work for teachers, students and writers it stands unrivaled. 320 pages. Half leather binding, \$1.50 postpaid, or Library Edition, Full roan, \$1.75. Isaac Pitman & Sons, publishers.

CRUISING ON THE ST. LAWRENCE, by Everett T. Tomlinson. This is the third volume of the St. Lawrence Series, by Dr. Tomlinson, and there is no sign of any diminution in those exciting and pleasurable incidents and adventures so beloved of healthy boyhood. To those who have not read Dr. Tomlinson's previous books in this series, "Camping on the St. Lawrence," and "The House-boat on the St. Lawrence," we will say that the present volume tells of a summer vacation spent by four college students cruising in their sleep yacht, the Truant, on the famous, historical St. Lawrence. Combined with the delights of sailing, shooting, fishing and other sports, the story gives plenty of useful information as to the historical places along the river as well as the history of the Indians and their manners and customs. The book is interesting and entertaining from cover to cover. Illustrations by A. E. Shute. 442 pps. Handsome cover. Price, \$1.20 net. Lee & Shepard, publishers.

PETERKIN, by Mrs. Moleworth. The name of Mrs. Moleworth is so well known as a writer of stories for young people that anything from her pen is sure to be delightful reading and no one will be disappointed in this story. Peterkin was, indeed, a queer child, full of strange fancies regarding fairies and witches and their doings, and sometimes he was considered a bit of a nuisance by his elder brothers and sisters. He fancied that people could be changed into animals and birds and that all good people became fairies. There are many amusing things told in the book and also a few that are pathetic. The young readers are sure to be interested in the parrot, in little Margaret who was called Princess by Peterkin, and in the journey Peterkin and his brother Giles (who is supposed to write the story) took with her to escape from the witch as they called good old Miss Bogie, who looked after Margaret. The story is a pretty one and will be greatly enjoyed. Illustrations by H. B. Millar. 200 pps. of large, clear type, ornamental cover. Price, \$1.25. The Macmillan Co., publishers.

THE NEW PUPIL, a school story by Raymond Jacobus. The boy who thinks that because this is a story about girls it is not worth reading, will be very much mistaken, and we are sure that the boy's sister will say so with considerable emphasis. Pollie Quebec, a little, motherless girl, has been living with her father and two young brothers in sunny Italy. The father has been so absorbed in the great Italian dictionary that he is writing that his children's education and upbringing are neglected. His attention is called to his shortcomings and he resolves to send Pollie to a school in England. Her undisciplined nature, her boyish actions and the green parrot, Jacko, are rather a trial to Fraulein Friederichs, the kind hearted, motherly principal of the school, but her patience and kindness are finally rewarded. It gives a good picture of school life with its friendships and its enmities. The character of Pollie, troublesome because of her thoughtless pranks and follies, yet honest and truthful, preferring silence rather than expose her school fellows' wrongdoing, and the others girls and teachers are all finely portrayed. Altogether it is a thoroughly good, wholesome book. Illustrations by Gertrude Demain Hammond. 260 pps. good paper, large type. Cloth. Price, \$1.50. The Macmillan Co., publishers.

THE YOUNG VOLCANO EXPLORERS or American Boys in the West Indies (Pan-American Series), by Edward Stratemeyer. In conveying sound information and instruction in an interesting and pleasing form Mr. Stratemeyer is a past-master. His former works for boys have placed him high in their regard. The location of the story before us is in the West Indies. Sailing from Venezuela, upon which the eyes of all European nations are fixed at present, Professor Strong and his boys arrive at Jamaica; from thence to Cuba, landing at Havana and visiting different places made memorable by the Spanish-American war. They then visit Porto Rico and travel across the island. Afterward they sail for Martinique and arrive at St. Pierre just in time to view the Mont Pelee eruption with all its attendant disaster and loss of life. Mr. Stratemeyer has spared no pains in ensuring accuracy, having not only consulted the best Spanish and American authorities, but read the reports of eye-witnesses and those who suffered and escaped from the conflagration. Every boy who wishes to learn something of the Americas outside of the United States should get this book. 332 pps. Nicely bound in ornamental cover. Illustrations by A. E. Shute. Price \$1.00 net. Lee & Shepard, publishers.

BOYS EARN MONEY. From \$1 to \$50 per Month is Being Earned by Boys and Girls Without Interfering with School, by a Few Hours Work each Saturday. B) 245 Lawrence St., Cincinnati, O.

\$10.00 for Boys. THE AMERICAN BOY wants to find out the original ways which boys have found of making money without leaving their homes, so it offers the following prizes: \$5.00 for the best description of the best idea; \$3.00 for the best description of the NEXT BEST idea; \$2.00 for the best description of the NEXT BEST idea. No more than 300 words should be used; fewer if possible. Write only on one side of the paper. What you must tell is: The idea by which you made money; how you did it, and the amount of money it netted you. It must be an idea that can be put into practice in the summer time, and it must be a personal experience; something tried, and the exact methods plainly told, and money results must be given. Send as many different experiences as you like, but no single one should exceed 300 words. Send before May 1, to the editor of THE AMERICAN BOY. MEMBER 0025 WORLD'S FAIR POSTER CLUB. JOIN THE WORLD'S FAIR POSTER CLUB and keep in touch with the greatest Exposition ever held. Send 25 cents in coin for membership in the World's Fair Poster Club and 10 beautiful World's Fair Posters, posed from life by Jas. J. Hannerty, an official World's Fair idea man. Pictures are 7 1/2 x 9 1/2 and equal to finished photographs. With each set of pictures we send you a richly colored emblem badge and a membership button bearing the official World's Fair colors and your membership number. Preserve your membership button, as some of the numbers will become valuable in the near future. WORLD'S FAIR POSTER CLUB Century Building, St. Louis.

Captain Nolan's Boy

JULIA K. HILDRETH

JUSTIN CRAIN lay on the grimy deck of the small steam-tug, Lucy M., his face turned toward the sky, across which heavy white clouds were sailing. There was no sound to be heard but the lapping of water against the timbers of the wharf and the creaking and straining of the hawser, as the boat rocked backward and forward on the heaving water.

On the left of the little tug lay a large working schooner, its dingy sails flapping idly to and fro and its deck piled high with dark-colored barrels and boxes. Between the schooner and the tug, looking almost like a toy by contrast, danced a tiny yacht, its snowy sail and brightly painted hull gleaming like a jewel against the dusky background of the large vessel.

A strong puff of wind, blowing across his face, caused Justin to glance toward the schooner. "I wonder if she will want us today," thought he, half aloud, "we are going to have a squall before long and Mr. Nolan said she would not start in a storm."

Mr. Nolan was the owner of the tug and Justin was his boy. A year ago Justin's father died suddenly and as his mother was left with three children to provide for, Justin, being the oldest, determined to support himself. Mr. Nolan kindly overlooked his want of experience and offered to teach him to manage the Lucy M., if, in the meanwhile, he would do what he could to assist him. Justin, being intelligent and studious, learned all Mr. Nolan could teach in a very short time, and now the management of the engine was left almost entirely to him. And it sometimes seemed to the boy as though this black, unsightly engine was one of the dragons of which he had read in his childhood, it required so much feeding, coaxing and watching to keep it good natured—and that he was its slave. At any time, night or day, Justin must be ready to start up and set to work.

Backward and forward steamed the strong ugly, little craft, tugging by its side the stately sailing vessels, like a small black gnome who had captured a delicate water fairy and was leading her away to his cave.

This morning Justin was very weary, for he had been at work since daybreak, and now, as he lay thinking of his mother and home, his eyes closed and he fell into a light doze. Presently, however, before his doze had time to change into a sound sleep, he was aroused by the noise of pattering feet on the boards of the wharf and a childish voice close to him said: "Have you seen Tom?"

Justin opened his eyes and saw, peeping down on him, a pretty little girl in a very seaman-like costume. A blue worsted cap was placed jauntily on her thick yellow curls, and large blue anchors were embroidered on the deep collar of her loose white blouse.

"Who's Tom?" asked Justin, springing to his feet.

"Tom is the sailor who always goes with us," replied the little girl. "Frank told me to run down and see if he was in the yacht. But he is not there and I thought perhaps you might know where he is."

"Has he a large red beard and a very dark skin?" enquired Justin.

"Oh, yes," replied the little girl eagerly, "where is he?"

"About an hour ago, Mr. Nolan went off with a man whom he called Tom, and I heard him say something about breakfast," said Justin.

"Then I suppose he will be back soon," replied the little girl, as she seated herself upon a small box on the wharf and began to examine the Lucy M. with great interest. Presently she glanced at the sky and said earnestly:

"Do you think it is going to rain?"

"Yes," replied Justin, smiling. "I am quite sure we are going to have a storm of some kind."

"There, that's just what I said!" cried the little girl, nodding her head wisely. "But they all laughed at me. Now I don't want to go out sailing if it rains and blows, because the boat tips up so and frightens me dreadfully. I would not be afraid in your boat," continued the little girl, with a look of admiration at the ugly Lucy M. "She never tips, and she must be very strong too, because I have seen her pull big ships along with her as easy as anything."

"Yes," replied Justin, gravely, "she is very strong for her size."

"Frank named his boat, Hattie, after me," said the little girl. Pointing to the letters on the tug: "Is that your sister's name?"

Before Justin could answer, a boy's voice cried impatiently. "Hattie, Hattie! Come here this minute."

"Good-bye, and thank you very much for telling me about Tom," said Hattie, rising and turning leisurely toward a party of young people who had just appeared at the other end of the wharf.

As Justin watched them approach, he was startled to hear the largest boy say in a tone quite loud enough to reach him:

"Don't you know any better than to stop and talk to such a ragged, dirty fellow as that? Why he is only Mr. Nolan's boy."

"Old clothes don't make people bad," cried Hattie indignantly. "He was very polite and spoke as nicely as you do. He said it was going to storm. So I think we had better give up our sail."

"Do you suppose a common, ignorant fellow knows more about the weather than I do?" said her brother sharply.

Justin waited to hear no more. For one moment he had clenched his fist angrily, the next, however, he bit his lip and turned away, while a choking feeling arose in his throat.

"After all he is right," he muttered. "I am only Mr. Nolan's boy. And I am dirty and ragged too, and what is more" he added sorrowfully, "I don't believe I shall be anything better all my life."

Presently he heard the children enter the yacht, then he heard Hattie's brother exclaim rather boastfully, "Of course I know how to manage her, and I am not going to wait any longer. Come, Hattie."

Justin looked toward the little vessel and saw that there were three boys and one girl already seated, but that Hattie still lingered on the shore.

"Please don't go, Frank," cried the little girl earnestly. "You know we ought to wait for Tom. I am sure it is going to storm; and besides I don't believe you know enough to keep her from turning over."

"I tell you what I think," replied Frank, crossly, as he began to haul up the sail. "You are a little coward."

"Come, Hattie," said the little girl in the yacht. "Don't let any one call you a coward. I do so want a sail and you know I won't go without you."

"And besides Frank only means to go out a little way," said one of the boys reassuringly.

After glancing up at the sky and then back over the wharf as if in hopes of seeing Tom, Hattie stepped slowly and reluctantly into the frail vessel.

Justin watched the pleasure party rather enviously as the yacht slowly moved from the shore. A sharp, sudden gust of wind tossed a quantity of gravel from the wharf into Justin's eyes and made the sail of the small vessel quiver.

"Why," thought Justin, as he watched Frank's movements, "I don't believe he knows how to manage her at all. If there is a storm she will surely capsize." He was looking into the dainty little boat as she passed close to him and Hattie, catching sight of his face, smiled and nodded. This determined Justin. "I suppose if I speak that boy will say something hateful, or else take no notice," thought he, uneasily, "but still it is only right to warn him."

Going to the side of the tug, Justin called out:

"You had better take a reef in your sail, there's a storm coming."

Frank turned toward him with a glance of anger and impatience as he replied:

"When we want your advice we will ask for it."

"Oh, Frank!" remonstrated his sister "how can you be so cross? And I really think you ought to take in the sail!"

"Oh! oh! oh!" screamed the two girls, in concert, for at that moment the yacht bent so far over that the water sprinkled their pretty dresses.

The boys laughed and all sprang nimbly to the other side, while the vessel flew swiftly and lightly before the rapidly increasing wind.

Justin, with a bitter, resentful feeling in his heart, turned his back upon the water and after throwing a little coal upon the fire under the boiler, once more resumed his place upon the deck of the Lucy M. his face somewhat blacker than before.

"Serves him right if she does go over," muttered Justin, as he watched the clouds roll by. Presently two great tears crept

from his eyes and made deep channels through the coal dust on his cheeks before they splashed upon the deck.

"What a baby I am!" he muttered impatiently. "Why should I mind what a mean fellow like that says? He must be mean or he never would have spoken so, only because I am poor. I won't think any more about it," he added resolutely, and taking a small book from his breast, he fixed his eyes upon the pages and tried to read.

But the boy was really very tired, and presently the little volume slipped from his grasp and his eyes closed. Justin had forgotten his troubles in sleep.

Meanwhile the clouds grew thicker and blacker and covered the heavens with a somber gray mantle. Then a murmuring sound arose among the distant trees and the little tug, Lucy M. struggled and pulled at the cable which held her to the dock. At last, with a wild shriek, the wind struck the water, lashing it into great waves. One of these, larger than the rest, carried the tug so high upon it that the hawser slipped from its place and she began to float away toward the sea. Justin was wide-awake and on his feet in an instant. He sprang to the engine and started it, then running to the helm he did his best to keep her from being crushed, between the various objects that lay in her path. He heard, with a feeling of relief, the regular throb of the screw, as the stanch little boat cut bravely through the stormy water.

"I think I can manage her," said Justin, as he glanced anxiously toward the shore, in hopes of seeing Captain Nolan, or one of the two men who composed the crew of the Lucy M. No one was in sight and the boat moved quickly from the land. Suddenly Justin remembered the little yacht and the merry party aboard her.

"I wonder what has become of her," thought he, as he looked before him. Some distance out in the bay, a small white sail was flitting like a wind-tossed butterfly. She was bending so far over that Justin thought the boat would capsize at once. But the next moment it was upright again; a quiver passed through it as the boat appeared to stand still. Then over she went again.

"Let your sail fly," shouted Justin, but the storm drowned his voice and the only answer was a scream in a girl's voice which came faintly to his ear. "There! he's done it!" cried the boy excitedly. He looked about him a moment hesitatingly, then he directed the course of the tug toward the scene of disaster.

"I suppose they won't object to being pulled out of the water by any one, even Captain Nolan's boy," thought Justin, as he rapidly approached the yacht. Soon he was so near that he could discern dark forms clinging desperately to the side and hear the boys calling, "Help! help!"

"I'll be there in a moment," shouted Justin encouragingly, as the Lucy M. steamed swiftly over the water. He stopped the engine and the tug sailed slowly up and lay heaving, close to the overturned boat.

It was the work of a short time to help the terrified children into the Lucy M. As the last shivering form scrambled upon the narrow deck, Justin cried hastily:

"Where's the other?"

"Hattie!" cried Frank, in a tone of horror, as he sprang to the side of the tug.

"Hattie, little Hattie!" shrieked the girl wringing her hands, "where are you? She was close by me when your boat came up," she said, turning to Justin. "Oh! where is she?"

"There she is," shouted Frank, wildly pointing to a small white face that suddenly appeared upon the surface.

"Are you a good swimmer?" asked Justin, catching Frank by the arm as he rushed to the side of the tug.

"No," replied Frank, trying to free himself, "but let me go."

Justin thrust him on one side, then without a pause plunged into the bay. With a few strong, swift strokes he reached the spot where Hattie's face had last been seen. Only a few ripples marked the place. With a beating heart Justin dove beneath the black water. Something solid brushed against him. He snatched at it eagerly—it was the motionless form of the little girl. Then rising to the surface, he shouted to the horror-stricken children watching him:

"Throw me a line, quick. I've got her."

Before he could be obeyed and while he was endeavoring to keep little Hattie's face above the water, Justin heard the sound of oars. Looking up he saw a large rowboat, pulled by Captain Nolan and his two men. As it appeared and disappeared, with the rise and fall of the water, Justin perceived that they were accompanied by a stranger who pointed excitedly toward him. This stranger bent forward as the boat reached Justin and cried in a trembling voice:

"My little Hattie! Is she injured? Give her to me."

In another moment Captain Nolan pulled Justin into the boat and Hattie was in her father's arms. Then, before Justin could speak, they were all on board the Lucy M.

When little Hattie recovered, which she did in a very short time, Captain Nolan and his crew having righted the overturned yacht and secured it to the tug, turned their course back to land. The storm had blown itself out and glimpses of blue sky could now be seen between the clouds.

Justin had rubbed his face dry and stood steaming and shivering close to the engine, when the little party of children whom he had rescued came toward him.

"Here he is!" cried Hattie, who was wrapped in her father's coat, out of which her little round face peeped comically. "Here is the nice, big boy who saved us all! Thank him, papa, do thank him."

"Indeed, I will," replied her father, heartily. Justin would much rather have been spared this ordeal, but he saw no way of avoiding it.

"My boy," said Hattie's father, in a low voice as he placed his hand on Justin's shoulder, "you have this day rendered me a service for which I shall consider myself in your debt the remainder of my life. Now tell me, is there not something for which you have been wishing? I never knew a boy who had not some pet want. Don't be afraid to name it. I am rich; but without my children my wealth would have been valueless."

"Thank you," replied Justin, flushing and turning away. "I was not thinking of being repaid when I picked up your children. I would have done the same for any one."

"I know that," replied Hattie's father, "but now I want you to think less of yourself and more of me—"

Justin looked up in surprise.

"If you owed a boy some money," continued the gentleman gravely, "would you not wish to return it as soon as possible?"

"Of course," replied Justin quickly. "Well, then, how do you suppose I feel?" said Hattie's father; "I owe you much more than money could buy."

Justin was silent; presently he said, "I thank you very much, but there is only one thing that would be of any real use to me, and I don't think you could give me that."

"Well?" demanded Hattie's father as Justin paused.

"An education," replied Justin smiling.

"Nothing easier," replied Hattie's father coolly. "I am glad to hear you express such a sensible wish. It shows you are a boy worth helping. You shall go to college and take up any branch of study you desire."

Justin was so astonished that he could not speak, and besides, Frank and the other two boys pressed up to him in their turn.

Frank extended his hand timidly, as he said: "Will you forgive me for being such a cad as to speak as I did?"

Justin had forgiven him long before, so he grasped Frank's hand readily.

Justin in due time entered college and is now studying hard to become a civil engineer. He never forgets in vacation to pay a short visit to Captain Nolan and Lucy M.

The Captain each time he sees Justin declares that the tug has never been the same since he left her, and that no one will be able to manage her as he did.

As for little Hattie, she still regards Justin as a hero. And she has often been heard to say that he is the bravest, best and strongest boy in the world, and now that his face and clothes are clean, he is also the handsomest.

For a Boys' "Circus"

J. C. BEARD

BEGUN LAST MONTH—MORE TRICKS NEXT MONTH

TRICK DOGS.

When, either for the sake of amusement or profit, one undertakes to teach an animal tricks, dogs are by far the most satisfactory pets with which to work.

They are more easily taught than any other kind of animal, and they can learn more complicated and difficult feats.

Another item in the dog's favor is that, when he is properly handled he will enjoy both his lessons and his performances and he will make it evident that he enjoys them. Any sort of dog can be taught tricks and not infrequently some yellow, short-haired plebeian from the street has more capacity for tricks than a blue blooded poodle.

dom do any good. If the pupil is in momentary expectation of being struck he gives but a small part of his attention to the lesson, and he falls into a cringing, sneaking carriage which spoils even the best of tricks.

The trick of firing a pistol is very popular with both boys and older people, and it is a very easy feat to teach a dog.

Rig up a stand such as that shown in Figure 1, and tie a small cap pistol to the upright bar. Cock the pistol but do not cap it. Tie a string to the trigger of the pistol, as shown in the diagram. Fasten a bit of food to the string and let your dog have the tid-bit.

When he pulls away the food, he will, of course, pull the string and so let down the hammer of the pistol.

After this has been done several times, tie a rag instead of food to the string and reward the dog from your hand every time you induce him to pull at the rag.

After the dog thoroughly understands what is wanted of him a cap may be placed on the pistol.

A dog may be taught to ring a dinner bell (see Figure 2) by exactly the same process.

Climbing a ladder (see Figure 3) is more difficult to teach than pulling on a string. Yet many pet dogs learn to climb ladders without any training.

Hold a piece of meat just out of the dog's reach and encourage him to reach it by climbing. Reward him at short intervals even if his attempts are far from successful. It will only be a matter of a few days before the dog will climb to the top of any ladder.

The dog that can walk along a row of bottles is fit to perform in public. Fasten the bottles to a plank, as shown in Figure 4. Ordinary fish glue will attach them securely.

Preparations for learned dogs.

The young trainer must not fall into the mistaken notion that the ability to learn a trick quickly is the most desirable quality in an animal. Some pupils learn their lesson far too rapidly and forget them within the next half hour.

Do not expect too much from one pet. Public exhibitors are able to show a large number of tricks because they have so many animals to call on.

Each pupil, as a rule, knows only a few of these tricks. A dog ought, however, with a proper amount of training, to learn enough tricks to satisfy a reasonable trainer.

Good management by a trainer can often make one good trick appear to be several tricks by working some slight variations.

It is surprising that so few pets—dogs, cats, white rats, parrots, etc.—are able to perform, for it is really not at all difficult to teach these animals. Often only one or two lessons are needed to teach a dog some amusing feat.

When a master, after constant trials, fails to teach his pet the trick he desires, it is almost always the fault of the master. Either he has lost his temper too frequently and frightened the animal, or

Graduates in the profession.

he has not held to one system of teaching and, as a consequence, he has confused his pupil.

It is impossible to explain to an animal what is desired of him. The animal can only learn to associate certain signs or words with some action, and he learns this only by constant repetition.

If the words or signs which are meant to direct an animal are constantly changed the pet will never be able to understand what is wanted of him.

Whippings confuse animals and sel-

Circus wrestling position.

Pick your dog up and place each of his four feet upon one of the bottles. Help him to balance himself while in this position. After this has been repeated a number of times the dog will be able to stand alone.

Then induce him to lift one of his feet. Tapping it lightly with a lead pencil will usually achieve this result.

When the dog wishes to replace his foot, guide it to the bottle just ahead.

In this way the animal will soon learn that a tap on the foot means to walk ahead.

It is great fun to train a dog and the ability to perform a few tricks multiplies his value twenty times over.

CLOWN WRESTLING.

In the illustration the reader will see that two clowns are lying on their backs. Their left legs are raised and locked together. The object of each clown is to make his adversary raise his right leg from the ground without raising his own right leg.

The diagram shows two heavy black lines crossing each other. The shorter of these is known as the scratch and the longer of the lines is known as the belt line.

The four black circles in the diagram, two of which are marked "right" and two of which are marked "left," are intended to indicate the position which the shoulders of the wrestlers should occupy relative to the belt line and the scratch.

When the shoulders of a wrestler are in one of the circles marked "left" he will raise his left leg. When the

shoulders of a wrestler are in one of the circles marked "right" he will raise his right leg.

A match consists of six bouts, three in "right," three in "left." The wrestler obtaining the greatest number of "falls" will, of course, win the match.

It is agreed sometimes that a "fall" shall not be counted until both legs of one or the other of the combatants are thrown across the belt line. In other words, until one of the men is made to turn the beginning of a back somersault.

(Diagram)

If the reader will experiment a little with some companions he will soon learn what is meant by the beginning of a back somersault, particularly if he appears to yield somewhat and then pushes down with his engaged leg.

The hands of the wrestler must be kept on the floor and cannot be used in any way.

"Buffalo Bill" Gives Good Advice.

In a recent interview "Buffalo Bill" (Col. William F. Cody) gives advice to boys. He advises them to learn all they can about the great country in the central west. He wants them to become first of all good Americans, and in order that they may do so they must learn all about their own country and fill themselves with pride for it, and grow up to do their duty as citizens of it. Speaking of the opportunities for young men, he says: "It is easier now for boys to get an education than formerly. The country's needs in every field of usefulness were never greater than they are today. The country is larger; the population is greater; people have more wants; and if the boy is of the right sort of stuff, he has the chance to fill them. Too many boys in the east are educated in the belief that there is no wealth or industry west of Wall street. The great center of our wealth, political influence in national life, is moving west. Already our brightest business men and our best statesmen come from there. The average educated Englishman knows more about the resources of the central west than the average educated American. Some of our eastern men are more insulated than the Englishmen."

An Honest Trade Well Mastered.

There is an unfortunate tendency among young men to absolutely disregard places of employment where shirt cuffs and pressed trousers would be out of place, yet many brilliant successes and large fortunes have been founded on an honest trade, well mastered. During the course of a strike in Philadelphia recently it came out that many of the skilled workmen earned as much as \$1.08 an hour, and could earn as much as fifty dollars a week without over-exerting themselves. A young man who has a trade at his fingers' end may feel secure. His trade is always a valuable asset. Such a man will not lose his position for a trifle, or through the whim of an employer, nor does he have to enter into competition with all the riffraff of the labor market.

Where Gold Is Thick

The gold is so thick on a Jas. Boss Stiffened Gold Watch Case that it takes the same depth of engraving as a solid gold case, without impairing its wearing quality. A Boss Case never wears thin.

JAS. BOSS

Stiffened GOLD Watch Cases

Are guaranteed for 25 years. For 50 years they have been recognized as the most serviceable of all cases. Don't accept any case said to be "just as good" as the Boss. Ask your jeweler. Write us for booklet.

By This Mark You Know Them.

THE KEYSTONE WATCH CASE COMPANY, Philadelphia.

KLIP-KLIP

THE POCKET MANICURE

TRIMS, files, shapes, and cleans, and keeps the nails in perfect condition. A complete manicure for man, woman or child.

Silver steel, nickel plated. Sent postpaid on receipt of price if your dealer hasn't it. **25c**

The Boy Photographer

A Royal Photographer.

Amateur photographers are in good company, anyway. Not long ago, when the Shah of Persia was in England, he posed before one of the royal princesses for his picture, which turned out quite a success. The Shah himself is an adept in the use of the camera, and possesses one of the most expensive of instruments. It is magnificently inlaid with gold and silver, and of course the lenses are of the very best. The Shah likes to take his own picture, which can be easily done by sitting before the camera and with a string manipulating the shutter.

A Great Chance for Amateurs.

The great wave of "animal books" which is sweeping over the country is a famous chance for the amateur photographer. There is no magazine of any prominence that will not take and pay well for photographs of wild animals. The text accompanying them may be very meager, if only the pictures are clear enough for reproduction. So the coming season let all amateurs resolve to wander afield and patiently watch the actions of wild animals, become acquainted with their habits, and make snaps in which there is both money and glory.

"WE'VE DE TERRIBLE TIGERS."

Liquid Lenses.

THE AMERICAN BOY has made mention of the fact that a famous rapid lens has been invented by an Englishman. This lens has now been patented in both the United States and Europe, and it is probable that it will be upon the market the coming season. While it is not quite such a wonderful affair as was first heralded, it is of a sufficiently advanced nature to make its possession desirable—providing the price does not soar so high as to be within the reach of only the rich.

The lens is composed of thin pieces of glass between which is a liquid of practically no dispersive power, but as temperature has much to do with its availability, it must be kept at a temperature of between 46 and 72 degrees F. Dr. von Hoegh, of the firm of Goerz, says that a change of temperature of only two degrees will cause a decided change in the optical constants, but this extreme sensitiveness to heat and cold is denied by the makers. It covers a field of about 60 degrees, and Dr. Grun, the inventor, says that he can sit in the stalls of a theater and take perfect pictures of the performance with an exposure of a hundredth of a second.

Thus far the largest size of instruments made for sale just nicely covers a 4x5-inch plate—the size commonly used by amateurs. With such a lens it will be possible to get bright views of conventions in session; of noted men making evening speeches, where the illumination is only the ordinary gas or electric light; and of those social occasions which now can only be preserved photographically by the use of flashlight powder, with its objectionable smoke and dust.

Copying Portraits.

In copying portraits with regular folding hand camera I have constructed a board the width of my camera and about three feet long, having at one end a short piece of board nailed upright about the height of my camera. This I use to tack the pictures to be copied upon. I then rack my camera out to the hundred-foot mark and open the shutter and slide the camera backward and forward until the focus is reached for the size of the picture desired. I mark the board at the end of the camera for the size of the picture I am making, and then I don't have to bother focusing at night, but simply clamp down my camera on the board at the mark desired. One needs but simply to change the pictures and make as many exposures as desired, never paying any attention to the focus, as when a copying board is used, with the camera clamped thereon.—Camera and Dark Room.

Pyro Stain.

Yellow fog appears frequently if pyro-gallic acid is used as a developer; particularly with under-exposed, or forced development. To avoid the same, says the Professional Pointer, put the negative, after development, but before fixing, in a bath consisting of six grams citric acid, twelve grams chrome alum to one liter of water; wash well, and fix as usual. If the yellow fog is not observed until after fixing, wet the negative, and pour some sulpho-hydrate of ammonium over it, until the yellow fog has disappeared. The only disagreeable part of the latter manipulation is the bad odor of the liquid.

A Simple Plate Lifter.

Some people's skins are very tender, and the developer makes the hands sore. In such cases it is wisdom to keep the hands out of the developer as much as possible. A bit of string in the tray before the negative is placed in the developer will enable the amateur to lift the plate if a few inches of the string is left sticking over the sides. The string can even be used to rock the plate.

An Acid Clearing Bath.

A correspondent asks for a formula for a "good" acid clearing bath. During the winter months acid clearing baths are not at all necessary, but in the summer it is an advantage to be able to place a negative in a solution that will harden the film previous to the necessary washing to eliminate the hypo of the fixing bath. Here is a good formula, but it must be kept in mind that acid fixing baths work slower than the plain bath composed of 16 ounces of hypo to 32 ounces of water.

Hypo 16 ounces
Sulphite of soda 2 ounces
Sulphuric acid 1 dram
Chrome alum ½ ounce
Warm water 64 ounces

Dissolve the sulphite in eight ounces of the water; then mix the sulphuric acid with two ounces of the water, and slowly add the sulphite solution. Dissolve the chrome alum in eight ounces of the water, and the hypo in the balance. Then add the sulphite solution, and finally the chrome alum.

A Good Varnish.

The so-called water-varnish, which in collodion times was used a great deal, is also very useful for dry plates, as it prevents the formation of silver spots in the negative during printing. It is also very suitable for retouching purposes. It is applied to the plate after washing, and before it has become thoroughly dry. The varnish is prepared as follows: 100 g. shellac, in thin flakes, is added to 500 c.c.m. of water, and the mixture is heated to a boiling point. To this hot liquid a saturated borax solution (1 part borax to 12 parts of water) is added by drops under constant stirring, until the shellac has dissolved. Any excess of borax must be avoided. After cooling and filtering, the varnish is ready for use. Bleached shellac is preferred for the above purpose.—The Professional Pointer.

A SQUAD FROM THE BOYS' BRIGADE
Of the First Presbyterian Church, McKeesport, Pa.

An Aid in Mounting Prints.

The proper time to mount prints is immediately after they have been toned and washed. Do the trimming before the toning, keeping the fingers off the face of the prints. After the paste has been applied to the back of the print, lay it carefully and straight on the mount; then place over it a piece of wet cotton cloth, well wrung out. Then when the squeegee is run over the cloth, in which there should be no wrinkles, the cloth will take up any excess of paste that may squeeze out from the edges. A writer in a photographic magazine says that when mounting bromide prints he first gives them an alum bath for five minutes, washes them for four or five minutes, and then, in mounting, places over them his wet handkerchief. The amateur will have little success and less satisfaction in trying to mount prints dry. The one exception is platinum prints, which are only stuck to the mount by the two upper corners.

Drunken Buildings.

Perhaps the one defect which is most common in the early work of beginners is that of representing such staid buildings as churches and venerable cathedrals in a state of intoxication. When the blushing amateur shows the productions in which that type of flaw is manifest, he explains that it is owing to his not having been able to get far enough back from the building. In a sense, that is true, but what he needs to learn is, that a camera without a rising front and a swing-back can never be relied upon to depict buildings in a sober manner. If a camera of the rigid type has to be used in photographing buildings, then the amateur must remember to hold his instrument perfectly level, and be guided by the image as it is seen in the viewfinder. In taking buildings at close quarters, a great improvement in the picture will result if the exposure can be made from the first or second floor of another building opposite.—The Traveller.

"Beat 'em all"
"King" and "Prince" Air Rifles
A choice of names—no difference in merit.

Made in the factory where the first Air-Gun was born. The perfected achievement of the inventor of the air rifle. The handiest, the handiest, the strongest, the most accurate shooting air rifles in the world. Gun like guns which never disappoint. Genuine steel barrel; guard; handomely nickel and polished, all parts interchangeable; shoots B. B. drop shot or darts. Both single shot and repeaters. Just what the boys and girls require. Full of fun without danger.

The "King" or "Prince" Single Shot Air Rifle \$1.00
The "King" or "Prince" Repeating Air Rifle \$1.25
The "Queen" Take Down Single Shot Air Rifle \$2.00
This is the finest Air Rifle made. Comes packed in fancy boxes, 4 inches wide, 24 inches long.

The "Chicago" Single Shot Air Rifle \$1.00
The first and only breech loading Air Rifle made in the world.

The American Boy Lyceum

qualities which make for good citizenship.—courtesy, courage, fairness, self-control.

The subjects given above are from one section of the country, but all sections and all ages are represented in this movement. We wish especially to hear from the ORDER OF THE AMERICAN BOY, scattered over the whole land, that we may report what they are doing in this line of work. We hope in this way to gather into this department material that will be of great value to all members.

PRIZE SPEAKING CONTESTS.

These contests rival debates in interest and value in many schools and clubs. They may well go side by side. To thoroughly learn and to recite in an effective manner, a selection from a virile oration is the best kind of preparation for the work of debating. But there is a value in the work for its own sake. With the stimulus of the contest before him and a selection appealing to his imagination and sympathy, the boy will lose himself in his earnestness, and will develop in voice, bearing, action, poise, power. If thoroughly trained upon one good selection he will never afterward speak in a perfunctory manner.

Propose such a contest in your school or lyceum, train thoroughly upon live, valuable selections, get up a good musical feature for the meeting, and see if you do not have the best and most profitable entertainment of the season. After a time there will be traditions in the school or the club, of the excellent work of the past, and there will be standards to be maintained. You will breathe it in the air and all the future boys of the community will do better, because it will be a part of their life. John Fiske calls attention to this spontaneous quality of action in life by referring to the record "that in the year 1619 a house of burgesses broke out in Virginia, as if it had been the mumps, or original sin, or any of those things that people cannot help having." In the same way success or a certain standard of excellence is contagious.

There will appear on this page of THE AMERICAN BOY each month a selection suitable for such a contest as I have proposed. If you want further help or suggestions, write to the editor of this department, care of THE AMERICAN BOY, Detroit, Michigan, and be sure to report your contests after they occur, giving program, winners, and other features of interest.

Too much attention cannot be given to the outline of the debate, to arranging a plan so as to give the greatest effect to the argument as a whole. A general wins a battle not because he has more men or better men; it is a question of arrangement, of bringing up the reserves at the right time. Below I give an outline from a Modern Rhetoric, on the affirmative of one of the questions suggested for debate in the March number of THE AMERICAN BOY. It will illustrate what I mean by the value of arrangement.

OUTLINE OF AN ARGUMENT.

Resolved, That a system of compulsory education is advisable.

INTRODUCTION.

1. The meaning of compulsory education.
2. What can be said in favor of education in general can be said in favor of compulsory education.
3. It advances the standard of intelligence (a) among the people as a whole, but (b) especially among the humbler classes.
4. If we can prove that it (a) lessens crime, (b) promotes individual and national prosperity, and conduces to human happiness, we shall prove our proposition.

PROOF.

- A system of compulsory education is advisable; for
- A It lessens crime, since 1. It raises the standard of intelligence, and crime is less prevalent among the intelligent. 2. An intelligent people are a law abiding people.
 - B It promotes individual and national prosperity; for 1. It increases the productivity of labor; 2. It lessens political corruption, since educated men are less likely to be dominated by bosses; 3. It conduces to peace. "Education is the cheap defense of nations."
 - C Nations and states with a system of compulsory education are more prosperous than those that do not have such a system.
- C It conduces to human happiness; for 1. It promotes morality; 2. It affords intellectual pleasures; 3. It teaches men to respect the rights of others; 4. It promotes the sanitary condition of a people; 5. It takes children from sweat shops and places them in the more wholesome atmosphere of the modern schoolroom.

CONCLUSION.

If a system of compulsory education lessens vice, promotes individual and national prosperity, and conduces to human happiness, it must be desirable. It may be well to note at this point that after the structure is completed it must have suitable flesh and clothing to cover the skeleton. The greater the clearness of the image in the mind of the speaker and the less it is revealed by any "firstly" or "fifthly," the more favorable will be the impression of those who listen.

VARIOUS DEBATES.

In all parts of the country, there is a great deal of interest in debating in schools, colleges, and clubs of various kinds. The Dartmouth-Brown debate in February was on the subject, "That trade unions ought to incorporate." The Bowdoin-Amherst debate in March was on the resolution, "That it is for the public interest that employers recognize trade unions in the arrangement of wage schedules." This month Bates and Boston University have their annual debate on the subject, "That trusts are likely to promote the welfare of society." In May the question for the Dartmouth-Williams contest is that of "admitting free of duty, raw materials, and rough products of iron and steel."

The Progressive Debating Club of the Bangor, Maine, Y. M. C. A. has recently had for discussion the question of "government ownership of the coal mines," of "gifts to schools and colleges by men who have obtained their money by questionable practices," and "that the standards of true womanhood are lowered by women entering the business world."

It will thus be seen that the questions of most importance are those which concern the vital thought of the year in which we live. It is a good sign to have so many young men studying such questions. There are doubtless boys who are beginning their career with trembling this very month, in High School class debate or Lyceum Club, who will in the years to come take their places in the highest "Lyceum" in the land, the Congress at Washington.

Every boy ought to belong to some Club, to obey its rules, to work for its success; for it will develop the very

Aaron of that Great Deliverance, were both at Lexington; they also had "obstructed an officer" with brave words. British soldiers, a thousand strong, came to seize them and carry them over sea for trial, and so nip the bud of Freedom auspiciously opening in that early spring. The town militia came together before daylight, "for training." A great, tall man, with a large head and a high, wide brow, their captain,—one who had "seen service,"—marshaled them into line, numbering but seventy, and bade "every man load his piece with powder and ball. I will order the first man shot that runs away," said he, when some faltered. "Don't fire unless fired upon, but if they want to have a war, let it begin here."

Gentlemen, you know what followed; those farmers and mechanics "fired the shot heard round the world." A little monument covers the bones of such as before had pledged their fortune and their sacred honor to the Freedom of America, and that day gave it also their lives. I was born in that little town, and bred up amid the memories of that day. When a boy, my mother lifted me up, one Sunday, in her religious, patriotic arms, and held me while I read the first monumental line I ever saw—"Sacred to Liberty and the Rights of Mankind."

Since then I have studied the memorial marbles of Greece and Rome, in many an ancient town; nay, on Egyptian obelisks, have read what was written before the Eternal roused up Moses to lead Israel out of Egypt; but no chiseled stone has ever stirred me to such emotions as those rustic names of men who fell "in the Sacred Cause of God and their Country."

Gentlemen, the spirit of Liberty, the love of Justice, was early fanned into a flame in my boyish heart. That monument covers the bones of my own kinsfolk; it was their blood which reddened the long, green grass at Lexington. It was my own name which stands chiseled on that stone; the tall Captain who marshaled his fellow farmers into stern array and spoke such brave and dangerous words as opened the war of American Independence—the last to leave the field—was my father's father. I learned to read out of his Bible, and with a musket he that day captured from the foe, I learned also another religious lesson, that "Rebellion to tyrants is obedience to God." I keep them both "Sacred to Liberty and the Rights of Mankind," to use them both "in the Sacred Cause of God and my Country."

MONUMENT AT CONCORD TO THOSE WHO FIRED THE SHOT HEARD ROUND THE WORLD.

THE SPIRIT OF LIBERTY.

By Theodore Parker, Clergyman, Author, Lecturer, Reformer.

This extract is the conclusion of the speech prepared for his own defense at his trial in the Circuit Court of the United States at Boston, Mass., April 3, 1855. The offence of Mr. Parker was the "Misdemeanor" of making a speech in Faneuil Hall against kidnapping. I was neither born nor bred to suffer the Liberty of America to be trod under the hoof of slaveholders. I drew my first breath in a little town where farmers and mechanics first unsheathed that Revolutionary sword which, after eight years of hewing, clove asunder the Gordian knot that bound America to the British yoke.

One raw morning in spring—it will be eighty years the 19th day of this month—Hancock and Adams, the Moses and

THE ORATOR.

Col. Higginson says: "The works of public speaking begin with the audience. They imply contact, they are electric, they represent a circuit, established between man and man. From the face of his audience the speaker draws partly what he says. One of the most accomplished women I ever knew used to say that she really did not know which taught us most about a person—to know everything that he had ever done, to read everything he had ever written, or the first glance at his face. There was a wonderful amount of truth in that statement. There is something in the personal contact which gives the power and the advantage to public speaking."

How to accomplish it." 40 pages—completely covers advertising—practical, clear, interesting. Beautifully bound, price \$2. Write today and learn how to get this useful work free. Lincoln Pub. Co., Philadelphia

A Boy's Presence of Mind.

Carl Gluck, Westfield, N. J., age thirteen, one day in January last exhibited wonderful presence of mind that prevented great loss of life. There was a dinner party at his home. Carl, sitting near a window, heard a shrill whistle. Looking out, he saw the train known as the Philadelphia flyer, run into another train that was standing on the track near the house. Three cars of the standing train were tossed high into the air, while the engine of the express train rammed its way under them. Flames immediately broke out. The boy ran at once to the telephone, called the police headquarters and asked that they send all the policemen they could get. He then called up fire headquarters, and the hospital, and all the doctors in Westfield as well as two at Plainfield. It is needless to say that Carl Gluck was the principal personage in Westfield that day.

Company News.

GOLDEN STATE COMPANY, No. 12, Fullerton, Cal., held its first meeting December 15, 1902. It has had its charter framed. Dues ten cents per month. The company is working to get fifteen dollars in its treasury, when it will purchase the G. A. Henty Library.—**GENERAL BRADDOCK COMPANY, No. 18, Braddock, Pa.,** held its first meeting the evening of January 30, at which time the captain presented the charter to the company. The librarian of the company is the son of the librarian of the Carnegie Free Library at Braddock.—**FLICKERTAIL COMPANY, No. 6, Devils Lake, N. D.,** was organized October 17, 1902, with a membership of five. Two new members have since been admitted making a total membership of seven at the present time. At the first meeting the following officers were elected: Harlan R. Fancher, Captain; Joseph Glerum, Vice Captain; John B. James, Secretary; Robert C. Cairns, Treasurer; Orville Duell, Librarian; Sherman McClory, Sergeant-at-Arms. Meetings are held at the homes of the members every other Friday evening from 8 to 10 o'clock. A library of boys' books by such authors as Eggleston, Henty, Jerome, Sprague, Optic and C. A. Stephens has been started and is well patronized. As yet the company has no club room of its own but hopes to have one next spring. Company dues, five cents per month.—**SETH LOW COMPANY, No. 16, Tompkinsville, Staten Island, N. Y.,** has a very comfortably furnished club room overlooking New York Bay. It is having a pennant made which will cost \$1.00. The secretary promises us a picture of the company soon.—**PHINEAS TAYLOR BARNUM COMPANY, No. 3, Bridgeport, Conn.,** is named in honor of the great showman, P. T. Barnum, whose home still stands in Bridgeport.—**ROBERT E. LEE COMPANY, No. 4, Gadsden, Ala.,** holds its meetings on Friday afternoons. At its first regular meeting Springs Montgomery was chosen Captain and Willie Adams Secretary.—**WILLIAM T. SHERMAN COMPANY, No. 24, Lancaster, O.,** is without a club room, just at present but hopes soon to have one. Dues have been changed from 25 to 15 cents per month.—**SHERIDAN COMPANY, No. 21, Chicago, Ill.,** has at this writing \$1.50 in its treasury. It has had its charter framed and has a new crokinole board, dumb-bells, a Whately exerciser, boxing gloves and punching bag, and expects to get a ping-pong set. Meetings are held every Wednesday evening. Company dues, five cents per week.—**TIMOTHY MURPHY COMPANY, No. 1, Cobleskill, N. Y.,** went for a sleigh ride on the evening of January 17 to a village about six miles distant and reports a fine time. This company will hold its AMERICAN BOY Town Meeting program on Tuesday, January 27.—**BENJAMIN HARRISON COMPANY, No. 20, Canton, O.,** holds its meetings every two weeks at the homes of the various members. The following officers were recently elected: Captain, Norville B. Griffin; Vice Captain, Robert Cordray; Secretary, Harrison Lutenhauer; Treasurer, Charles Flala; Librarian, Ernest Flala.—**WOLVERINE COMPANY, No. 8, Addison, Mich.,** has the use of a room supplied with a reading table and plenty of good literature and is getting along nicely.—**RICHMOND P. HOBSON COMPANY, No. 14, Paradise Valley, Pa.,** holds its meetings on Tuesday evenings from 8 to 10 o'clock. This company has the free use of a hall, where meetings are held. Company dues, ten cents per month, and a fine of two cents has been imposed for disorderly conduct during meetings. A debate is held every two weeks. The company expects to have a sleigh ride party some time this winter.—**LEWIS AND CLARKE COMPANY, No. 5, Baker City, Ore.,** has at this writing \$1.25 in its treasury and has a library of forty-one books. The company has a room at the home of Eugene Crosby, one of its members, where meetings are held weekly. Mrs. Stuller, a friend of the boys, has loaned them a flag.—**JACOB RIIS COMPANY, No. 40, Big Rapids, Mich.,** has fixed its dues at four cents a week, with a fine of five cents for the use of profane language. Meetings are held every Friday afternoon at 4 o'clock. This company will have a pennant four feet long and one and one-half feet wide at its widest point. Up to this time two meetings have been held and the company has forty six cents in its treasury.—**JOHN McLOUGHLIN COMPANY, No. 8, Oregon City, Ore.,** has adopted the proposed Constitution and By-Laws. Meetings are held on Thursday evenings at the school house. Company dues, five cents per month. It will have a small library. John McLoughlin, for whom the company is named, was the founder of Oregon City.—**OHIO VALLEY COMPANY, No. 28, Bellair, O.,** will carry out THE AMERICAN BOY Liberty Day program as laid down in the February number. It has secured the parish room in one of the local churches in which to hold its exercises, which will consist of readings, declamations, etc.—**GOLDEN STATE COMPANY, No. 12, Fullerton, Cal.,** holds its meetings at the home of Ford Overton, one of its members. A fine of one cent a word has been imposed for the use of profane language. All premiums for new subscriptions received by the members go to the company.—**WILL CARLETON COMPANY, No. 37, Mason, Mich.,** recently organized, held its first meeting in the High School furnace room. Until a club room can be secured meetings will be held at the homes of the various members.—**GENERAL BRADDOCK COMPANY, No. 18, Braddock, Pa.,** has fixed its dues and dues at twenty cents per month. This company has one dollar in its treasury and as soon as it has the required amount will purchase an American flag.—**WILLIAM J. SAMFORD COMPANY, No. 3, Opelika, Ala.,** sends the following report: Number of members at organization, six; number of members expelled, one; new members added since date of organization, six; present membership, eleven.—**RED STAR COMPANY, No. 12, Nappanee, Ind.,** held THE AMERICAN

The Order of The American Boy

A NATIONAL NON-SECRET SOCIETY FOR AMERICAN BOYS.
UNDER THE AUSPICES OF "THE AMERICAN BOY."

Object:—The Cultivation of Manliness in Muscle, Mind and Morals.

The object more definitely stated: To promote mutual and helpful friendships among boys; to give wider circulation to high class boy literature; to cultivate in boys physical, mental and moral courage, and develop them along social, intellectual and moral lines; to cultivate purity of language and actions; to discourage idleness, and encourage honest sport and honest work; to cherish and emulate the examples of great and good men; to inculcate lessons of patriotism and love of country; to prepare boys for good citizenship; to cultivate reverence for the founders of our country, and to stimulate boys to all worthy endeavor.

Boys desiring to Organize Companies may obtain a Pamphlet from us containing Directions. It is sent for a 2-cent stamp.

GEORGE W. STEELE COMPANY, No. 6, SWAZEE, IND.

BOY Town Meeting exercises on Friday evening, January 23, at which time it received two liberal donations.—**BUFFALO BILL COMPANY, No. 6, Stockville, Neb.,** on Friday evening, January 2, elected the following officers: Captain, Joel Ward; Vice Captain, Miss Fink; Secretary, Leslie Dobson; Treasurer, James West; Librarian, Ray Smith; Sergeant-at-Arms and Corporal, Walter Lynch. The boys feel very grateful to Mrs. Clara L. Dobson, who, the secretary writes us, has opened her home once a week for a year and a half for their meetings and has helped them in many ways.—**WILL CARLETON COMPANY, No. 37, Mason, Mich.,** has adopted the proposed Constitution and By-Laws with one slight change, namely: Article V., Section 1, reads as follows: "It shall be the duty of the Captain to assign members to duties on programs," etc., and this has been changed so as to read, "The Captain, and a member of the company appointed by him, shall assign members to duties on programs," etc. Meetings are held at the homes of the various members, and the programs as laid down in THE AMERICAN BOY are carried out as nearly as possible. At every regular meeting some member is called upon for an extemporaneous speech. Monthly dues, five cents.—**TIMOTHY MURPHY COMPANY, No. 1, Cobleskill, N. Y.,** carried out THE AMERICAN BOY Town Meeting program and reports it a great success. The captain says the visitors made some great speeches.—**WILLIAM J. SAMFORD COMPANY, No. 3, Opelika, Ala.,** is one of the flourishing companies of the Order. It has a fine library and new books are being added almost daily.—**HAMLIN GARLAND COMPANY, No. 21, Osage, Iowa,** holds its meetings on Saturday afternoons at the homes of the various members. Dues five cents per month, with a fine of two cents for using profane language or using tobacco in any form.—**PERE MARQUETTE COMPANY, No. 21, St. Ignace, Mich.,** held THE AMERICAN BOY Town Meeting exercises on January 21. Speeches were made by several of the members, and altogether the meeting was a grand success. At this meeting it was decided that all members pay their dues up to June 1, 1903. On January 27 a special meeting was held for the purpose of selecting a dozen new books to be purchased by the company. Mr. Kynock, the father of one of the members, has given the boys the use of a small house that stands in his yard and furnished it with a box stove, lamps, etc., and here meetings are held. No member is allowed to take a book from the company library excepting at regular meetings. Dues have been changed from ten to five cents per month.

LITTLE RHODY COMPANY, No. 1, Westerly, R. I., held its installation of officers the evening of February 7, after which a banquet was served.—**BENGAL TIGER COMPANY, No. 10, Lisbon, Ia.,** held its AMERICAN BOY Liberty Day program on February 20.—**BAY RIDGE COMPANY, No. 19, Brooklyn, N. Y.,** recently held a social and entertainment at the home of the captain and report a fine time. The following program was rendered: Violin solo, Herman Meyer; recitation, Albert Drew; cornet solo, Emil Meyer; recitation, Charles Von Drewsche. Then followed a magic lantern entertainment of over fifty pictures. Later refreshments were served by the mothers of the members.—**OHIO FALLS COMPANY, No. 3, Louisville, Ky.,** will hold its meetings in a stable, which has been fitted up as a club room. The first floor is used for a gymnasium, which is furnished with punching bag, trapaz, dumb-bells, etc. The second floor is occupied as a library and meeting room. Several pictures have been hung upon the walls, and altogether the club room presents quite a cheery appearance. Meetings are held regularly. Company dues, five cents per month, which goes toward a library fund.—**NEMAHA VALLEY COMPANY, No. 11, South Auburn, Neb.,** has fitted up a club room under the Carson National Bank, the room having been donated free of charge. It is furnished with a nice table, with plenty of good literature, a clock, pictures, etc., these things having been donated by Messrs. E. M. and R. C. Boyd, friends of the boys who are anxious to help them make a success of their company.—**JAMES LANE COMPANY, No. 5, Yates Center, Kas.,** held its election of officers on January 31, with the following result: Captain, Roy Ward; Vice Captain, Allen Beck; Secretary, Harry Landis; Treasurer, Russell Wainwright. This company is progressing finely. At its meeting held on February 7, three new members were taken into the club.—**LEWIS AND CLARKE COMPANY, No. 5, Baker City, Ore.,** is one of the prosperous companies of the Order. It has five games, forty-one books and a number of magazines. A fine of three cents has been imposed for disorderly conduct, and a fine of five cents for the use of profane language. Company colors are red and black. Tuesday evenings have been set apart for reading. The company has at this time \$1.20 in its treasury, having paid out 50 cents for things for the club room. Picture is shown on this page.—**LAKE SHORE COMPANY, No. 5, Madison, Wis.,** at a recent meeting elected the following officers: Bert Baker, Captain and Librarian; Copeland Harvey, Secretary and Treasurer; Bert Cramton, Vice Captain; Roy Bradford, Sergeant-at-Arms. At this meeting refreshments were served. This is

quite a musical company, two of the boys playing the piano, three the mandolin, one the fife and one the clarinet. The boys are trying to organize a football team, but up to this time have not been successful. We are promised a picture of the company in the near future.—**E. F. ACHESON COMPANY, No. 19, Washington, Pa.,** recently organized, will hold its meetings every Friday evening at the homes of the members until a club room is secured, after which time meetings will be held every other Friday evening. The officers are: Captain, George Aiken; Vice Captain, Thomas Harter; Secretary, Guy Lytle; Treasurer, William Drieherst; Librarian, Ravinond Bryant.—**FORT CONCHO COMPANY, No. 6, San Angelo, Tex.,** was unable to hold THE AMERICAN BOY Town Meeting exercises, but will carry out the program laid down for the February meeting.—**RICHARD P. BLAND COMPANY, No. 8, Kansas City, Mo.,** at a meeting held on Friday evening, February 6, elected Harley Wheeler Secretary and Treasurer and Robert McBride Librarian.—**GENERAL LAWTON COMPANY, No. 4, Emporia, Kas.,** holds its meetings weekly at the homes of the members. It has a fine baseball team and last year played thirteen games and won every game.—**JACOB RIIS COMPANY, No. 40, Big Rapids, Mich.,** will hold THE AMERICAN BOY Liberty Day exercises on February 21. This company has \$1.60 in its treasury and expects soon to have its charter framed.—**YOUNG AMERICAN COMPANY, No. 25, Plainwell, Mich.,** held its election of officers February 6, at which time the following officers were elected: Captain, Wilbur Knapp; Vice Captain, Clarence Chandler; Secretary, Carl Chandler; Treasurer, Jobe Estes; Librarian, Hart Bellinger; Athletic Captain, Fred Estes. Meetings are held on Friday evenings at the home of the Captain. Company dues, ten cents per month, with a fine of five cents for being absent from meetings without good excuse. The company will hold a social on the evening of February 10, each boy furnishing something and bringing a girl. There is a large hill near by, and on moonlight nights the boys go casting after meetings.—**ALBERT J. BEVERIDGE COMPANY, No. 5, Bicknell, Ind.,** holds its meetings at the home of Vice Captain and Librarian Freeman. On February 12, 1903, it celebrated its first anniversary, when the following officers were sworn in: Captain, Dewlynn B. Harmon; Vice Captain, Marc B. Freeman; Secretary, Bruce C. Kixmoller; Treasurer, William Lemen, Jr.; Librarian, Verne Freeman; Flag Bearer, Frank Barr. This company has Indian clubs, dumb-bells, punching bag, a football and basket ball.—**RIVER VIEW COMPANY, No. 1, Rio Vista, Cal.,** organized February 8, 1901, sends its second annual report, which shows that a decided interest is being taken by the members. During the past year many new books have been added to the library and altogether the company is a flourishing and prosperous one.—**WILLIAM J. SAMFORD COMPANY, No. 3, Opelika, Ala.,** will hold a public meeting on Friday, February 20, at which time Mr. T. D. Samford, son of the late Governor W. J. Samford, for whom the company is named, has promised to deliver an address. The company has twenty-one new volumes in its library.—**HONEST ABE COMPANY, No. 6, Springfield, Mo.,** held its semi-annual election of officers on Friday evening, February 13, at the home of Treasurer Harry Squibb, when the following officers were chosen: Hayden L. Gehrett, Captain; Will Young, Vice Captain; Harry Squibb, Secretary and Treasurer; Harry Palmer, Librarian. The company is progressing finely.—**FIGHTING LOB COMPANY, No. 16, Osceola, Ia.,** is a literary company. At every meeting a program is rendered, consisting of debates, essays and speeches by the members. Up to this time five meetings have been held and the company is getting along nicely.—**BOXER COMPANY, No. 41, Mason, Mich.,** recently organized, has fixed its dues at five cents per month.—**G. A. HENTY COMPANY, No. 1, Ebbell, Okla.,** holds its meetings at the home of Vice Captain Edwin Fleming. It has had its charter framed and has started a library. Company dues, ten cents per month.—**OLD COMFORT COMPANY, No. 33, Jackson, Mich.,** will honor the "Twelve Great Days" in this year.—**GENERAL PHILIP SHERIDAN COMPANY, No. 3, Newberg, Ore.,** has had its charter framed and has a punching bag.

(To be continued.)

LEWIS & CLARKE CO., No. 5, BAKER CITY, ORE.

Uncle Sam, the Bearer of Tidings

J. W. M.

If you could take a voyage around the earth with the flying night, so that, whenever you gazed down at the globe you would find it in darkness, you would see darting lines of light going criss-cross over it in every direction.

Where the United States lies you would see more of them than anywhere else. You would see them gliding restlessly from the Atlantic ocean to the Pacific, from the great lakes of fresh water to the Gulf of Mexico's strong brine. Glimmering lines would be visible to you where they go threading among the Rocky mountains.

North of the United States you would see some black patches where there would be no such bewildering maze of them. But even there, even in the wilderness of Alaska, you would see some.

In fact, you would see some lights flashing and hurrying along everywhere on the globe. You would see them rushing across Siberia. You would see them in Africa, some flitting along the shores of the Indian ocean, some speeding down toward the noble Cape of Good Hope, others going along the northern coast on the shores of the Mediterranean Sea. You would see them in China and the Philippines, in India, and in Turkestan. As for Europe, that continent would look to you like a great loom of flaming threads, all busily weaving.

Those lights are the railroad trains of all the world carrying the fast mail. If you will recollect your history lessons, you will remember that even in England of the old days the fast mail was the great feature of swift transportation. The old-fashioned folk who viewed a journey of one hundred miles with as much anxiety as your parents would view a trip of a thousand today, always tried to get a seat in the Mail Coach. The best roads in Europe were the great Mail Roads. And so it is today. The fastest trains, the fastest ships, the fastest horses, the fastest runners of the world are used day and night, everywhere, from Point Barrow, Alaska, to the Cape of Good Hope, to carry the mails.

Your Uncle Sam was not one of the first in the field of carrying mails. Some of the smaller countries in Europe were far ahead of him for a time. But now he is the leader of them all.

He has more postoffices and employes than any other country. He carries more mail matter. More mail is delivered to each of his sons and daughters than is the case anywhere else.

He has thirty three thousand more post-offices than Germany and fifty-five thousand more than Great Britain. He has eight thousand more employes than Germany, and Great Britain is thirty nine thousand behind him.

He has nearly three hundred and sixteen thousand more miles of mail routes than the next nearest country, Russia. He spends ten millions of dollars more a year on his mails than any other country.

But he is behind in some things still. Germany, for instance, has eight thousand more letter boxes than Uncle Sam. He ranks second in this. In the number of postoffices as compared with population, he is seventh in the list. The countries that lead him are New Zealand, Canada, South Australia, New South Wales, Victoria and Switzerland.

Uncle Sam has been making some comparisons between his postoffice business and that of other places, and he has found queer things. For instance, he has found that while the United States, Germany and Great Britain have the most postoffices in the world, the country that has the fourth place is far away in Asia. It is British India, and it ranks fourth in the number of its postoffices.

Another country that stands high in the list is Japan. It is eleventh in the list for

number of postoffices and leads such European countries as Switzerland, Spain, Portugal, Sweden, Norway, the Netherlands, Denmark, Belgium and Greece.

The land that has the smallest number of postoffices is the independent republic of the Congo. It has thirty two. In these thirty two it employs seventy seven men. Every now and then a letter carrier of the Congo postoffices is eaten by a lion or a leopard. The path of these bearers of the mail is through forests and swamps. Sometimes they must camp at night in places where the wild beasts prowl around them in the darkness.

Uncle Sam has some peculiar mail routes himself. Even in the populous Middle Atlantic States scores of his carriers have to drive, ride or climb along roads that are old Indian trails. Some of his carriers have to ride armed. He has real western rough riders, who go through defiles of the Rocky mountains on bronchos. He has Indian runners and canoe men in Alaska.

All kinds of steamboats carry his mail. They range in size from great coast liners and tramp steamships to little puffing launches. They go to islands away out of sight of the mainland of the United States. The fishermen of Nantucket, that lies thirty five miles out at sea, like a ship, have their mail delivered to them as regularly as if they dwelt near or in a big city. Men dwelling on coral islands in the Gulf of Mexico are sure of one visitor at least, and that is the mail boat. Stern-wheelers go into the beautiful dreamy bayous of the South, with a mighty, splashing that frightens alligators and herons, and deliver the United States mail in lonely marsh settlements.

Even whaling ships are used by Uncle Sam. They go far north into Behring Sea. One mail route of Uncle Sam is attended to entirely by steam whalers that sail from Seattle in Washington. These ships take letters and packages from home to men hidden away in the frozen country north of Behring Straits. The whalers and sealers in the Arctic Circle are hunted for by Uncle Sam and he tries to deliver their mail to them, though they may have been cruising for a year or more. Sometimes he will send their mail from ship to ship, until at last one will find the vessel and send the letters aboard. They may be many months old by that time, but they are none the less welcome for that, you may be sure, and they are read over and over in the dim light from oil lamps in the laboring, tempest-beaten ships.

One of Uncle Sam's mail routes in Alaska uses ships and canoes and dog teams and sleds. It is a route more than four thousand miles long and carries the mails into the far interior, where the mighty Yukon river roars in the solitudes. Four round trips are made over this route each year and each trip costs Uncle Sam \$1,495.

The letter carriers who do this work do not wear the neat uniforms that you see on the letter carriers at home. They are great, gaunt athletes, ready to swim a river full of drift ice if need be, and thinking nothing of sleeping in a blanket and a rough tent by the side of the trail with the thermometer far below zero.

The postoffice that Uncle Sam has at Point Barrow, in Alaska, is the most northern postoffice of the world. Never before was mail delivered so near the North Pole.

To Catch the Ladies.

Say to the ladies, "A man can marry any woman he pleases." After the long and indignant protest, calmly reply, "A man may marry any woman he pleases, but the trouble is to find the woman that he does please."

Boy Journalists and Printers

Youngest Editor in Illinois.

Arthur B. Hinsdell, one of the editors and owners of the Daily Evening Press at Elgin, Ill., is the youngest newspaper editor in the state of Illinois, being but seventeen years of age. His attaining to a position of this prominence by his own merit, a position which most men of maturer years would eagerly take, is surely an evidence of the pushing and enterprising nature of this modern American boy.

The Press is one of three dailies in the city of Elgin, and is a bright and flourishing paper with a large list of subscribers and advertisers. Since February 1 Arthur has owned a half interest in the concern. The young editor devotes most of his time to the advertising department, but also does proof-reading and performs the duties of a city editor; his work is as successful as that of an experienced newspaper man.

Arthur is the son of Mr. and Mrs. O. A. Hinsdell, prominent Elgin people. Beginning at an early age to sell papers on the street, he started a bank account of his own, saving enough in a few years to enable him to enter his chosen profession. He was on the staff of the High School "Mirror" for two years, and recently revived the publication of the Elgin Academy "Siftings." He has been athletic editor of the city journals for several years, as well as correspondent for Chicago dailies. Being a young man of unusual talent and ability, besides having an abundance of "git," he is bound to succeed.

ARTHUR B. HINSDSELL.

What to Write About.

In a recent article in the Atlantis, Anton F. Klinkner says: "The amateur journalist asks himself the question, 'What shall I write about?' and finds only too often that he is at a loss for a subject, and it is only necessary to read a few of his effusions to be convinced that he does not know what he is writing about."

There is an old adage that "he who writes must walk slowly." This does not mean that a writer must adopt a snail's pace, but by walking slowly enough to observe things he will soon find sufficient topics to keep his pen busy. Mr. Klinkner elsewhere says that in writing an article the author should have in mind one of three objects: To tell something, to show something, or to prove something. This is merely another way of saying that an article should have a purpose or it should not be written, and this should be kept in mind in selecting a topic to write upon.

A certain writer of note recently discussed this same subject in one of our leading magazines. In speaking of his own experience, especially in his early days when he found it sometimes difficult to select topics for articles that would sell, he said he was one day walking through the Jewish quarter of New York and became interested in noting what the people did and how they lived and conducted themselves. When he got back to his room he wrote an article which proved acceptable to one of the leading publications. This gave him the idea that whatever interested him would probably interest others, so he suggests to young writers that they train their powers of observation, and when moving around keep always on the alert.

A youngster, who was trying to tell a friend how extremely absent-minded his grandfather was, said:

"He walks about, thinking about nothing, and, when he remembers it, he then forgets that what he thought of was something entirely different from what he wanted to remember."

The friend understood.

The Young Man's Administration.

(Continued from page 176.)

with a small salary and no particular prospects for the future. However, he labored ceaselessly and was promoted until he reached his present position. He is now entrusted with the handling of much of the President's mail that the Chief Magistrate does not care to answer personally, and another of his duties is that of carrying to the Capitol the President's messages to Congress.

The career of Francis B. Loomis, the new Assistant Secretary of State, shows what can be accomplished by the young man who will keep his eyes open. Some years ago Mr. Loomis was a newspaper reporter and his work took him to Canton, Ohio, the home of the late President McKinley. During the campaign which preceded his first election to the Presidency, Mr. McKinley was so impressed by the young man's ability that when he became President he gave him an excellent post in the diplomatic and consular service. Mr. Loomis has filled the office of United States consul at St. Etienne, France, and acted as United States Minister to Portugal and Venezuela, being stationed in the latter country at a very trying time when the government of Venezuela was decidedly unfriendly to Uncle Sam.

The new Assistant Secretary of the Treasury, Robert B. Armstrong, is only thirty years of age—probably the youngest man who ever held so responsible a position. Nine years ago Mr. Armstrong having been obliged to leave college because he had no funds to continue his course, started at work doing odd jobs in a newspaper office for a salary of only eight dollars a month and board. Later he secured a better position on a paper in a larger town, and boys may be interested in knowing that he secured this better position at an increased salary because the editor discovered that he did not smoke cigarettes. Soon his ability was recognized by the editors of large city newspapers and he was offered several splendid positions in quick succession. While serving as the Chicago representative of a leading New York newspaper he became acquainted with and made a deep impression upon Mr. Shaw, now Secretary of the Treasury but at that time Governor of Iowa. When Mr. Shaw went to Washington to assume a position in President Roosevelt's Cabinet young Mr. Armstrong accompanied him as private secretary, and it was not long until he was promoted to the high position which he is now filling so acceptably.

Begin at the Bottom.

Business houses prefer, where they can, to promote their own men rather than to take in persons from the outside when they have responsible posts to be filled. The editor of "The Commercialist" asked of a few business houses and banking houses the question as to what was their practice in this regard. One of the largest banks in New York City answered: "The higher offices in this bank are filled, when vacated, by regular promotions. This is quite the general way here." The general superintendent of a great elevated railway system declared that promotions in his company were made under civil service rules. The president of a vast united railroad system said: "This company employs about 25,000 persons, and we apply civil service rules in the matter of promotion. We have no list of vacant positions for which applications from any outside source would be of slightest use. Our plan is to take young men at the bottom of the ladder, and if they are capable give them promotions as vacancies occur." A great manufacturing concern in the West replied: "As fast as vacancies occur the young men who have been with us for years, most of them having worked up from the bottom, are promoted. Our experience is that the best method is for the young men to start in at the bottom in some department, and if ability is shown it will be recognized."

It sometimes happens, however, that a man finds himself at his limit so far as advancement with his present employers is concerned. What is he then to do? A great opening for such men is in new lines of business, or new business houses in old lines, where positions must be filled from the outside if they are filled at all.

The complaints about the lack of opportunities for young men come generally from those who are not willing to begin at the bottom and work faithfully for a reasonable salary until they have demonstrated that they are capable of filling more important positions and until their employers can afford to do more for them. Those who work a few years in a place and become discouraged because they are not at the head of the business are making a serious mistake. It is better to enter a business at or near the bottom and climb all the rungs of the ladder. By this means only is thoroughness attained. Familiarity with details is what qualifies a man for the conduct of a business, and this can only be had by drudging through the details of the lower positions.

The first and best place to seek advancement is with present employers. If that way is closed through favoritism, prejudice, the small size of the business or its lack of success, then the ambitious employe should look for his future in the employ of some young and growing concern in the line of work in which his experience has made him capable.

Stamp Notes.

Three hundred dollars is the price a stamp firm fixes on a fine pair of 2c. Pan-American Inverts. The 1c variety is sold at \$17.00 to \$20.00 according to condition.

The beautiful commemorative stamp of Trinidad, issued on the four hundredth anniversary of the discovery of the island by Columbus, contains a picture of a stained glass window in a council chamber at Port of Spain, Trinidad.

The stamps of Abyssinia, uncanceled, can be purchased at a large discount from face value. A large number of the stamps of this issue were stolen, and to make them worthless for postal use, and for the protection of the remaining stamps, the government ordered the balance surcharged.

The inscription on the coupon stamps of Belgium reads: "Do not deliver on Sunday." The idea was that those who favored Sunday observance would leave the coupons attached, and their letters were not to be delivered on that day, while any one desiring immediate delivery, even if it should come on Sunday, could secure it by tearing off the coupon.

A variety of German stamps is that of the first issue, with the head of Germania, which occurs in the 25, 30, 40 and 50 pfennig. A few sheets were first printed showing the word "Reichspost" in the same size and thickness as the letters in the colored values, but this size of print turned out to be too large for the tablet accorded it, and was therefore reduced.

The Scott Stamp and Coin Co. have announced that the old international album is a thing of the past. For some time it has been apparent that at the rate new issues were coming in, the general collection, if kept up-to-date, would become unmanageably bulky. The difficulty is met by issuing the twentieth century album. The old international is closed with the nineteenth century, and for those collectors who do not add stamps of the twentieth century to their collections, the old international will fill all requirements.

In Switzerland mail is delivered free almost everywhere, and the most remote villages get their letters and papers at frequent intervals. In special cases of important resorts, the regular mail service proved insufficient, and the landlords organized a carrier service, charging a certain rate on each letter or paper either coming or going. For the convenience of the guests the regular Swiss stamps were kept on hand and sold, and consequently each letter mailed from these resorts had the regular postage, and the private postage affixed. The first of these locals was printed in 1864, and the design represents a corn flower, but the stamp contains no figure of value. In 1884 the Swiss postoffice established regular postoffices at some of the more prominent hotels, and carrier delivery for others. The use of private stamps was then prohibited.

The designs of the new 50c. \$1.00 and \$5.00 stamps of the "series of 1902" have been approved. The 50c stamp represents Jefferson looking front, slightly to the east. At the top is an ornamental scroll with the words, "Series of 1902." The upper corner portions between the form and the oval containing the picture are filled with large oak leaves, on each side, and the inscription "United States of America" is enclosed in an arch which follows the line of the oval. At the bottom of the design on either side are two large eagles standing looking outward, and their heads meet the architectural feature of the design about halfway. Directly below the bust appears the word Jefferson with the dates 1743-1825 the years of Jefferson's birth and death. In a panel below this appears the value of the stamp with the word fifty on either side in a shield. The \$1.00 stamp represents Farragut. Placed in the lower left-hand corner, holding a rifle in his hands, is a marine in full uniform, and in the opposite corner, facing the marine, is a soldier in full uniform, holding in his hands a pike-staff. The \$5.00 stamp is said to be the finest specimen in the entire series, and contains the picture of John Marshall, the great jurist. The portrait is in an oval, and the upper portion of the design is in the form of a block of stone resting on two great pillars. Into this stone at the extreme right is cut the profile of Justice, and at the extreme left the profile of Liberty, in the center of the stone on a scroll appears the inscription "1902." Both the \$1.00 and \$5.00 stamps give the date of birth and death of the subject appearing on the stamp. It is said that the entire new series will be issued to postmasters early in March. The 1, 2, 5, 8, and 13c and 10c special delivery were furnished to some of the postmasters as early as Feb. 1st.

Answers to Correspondents.

L. V. R., Chicago, Ill.: The King's head issue of Great Britain, consisting of the 1/2, 1 1/2, 2, 2 1/2, 4 and 5d and 1s, can be purchased for 10c or 12c. Any advertiser in THE AMERICAN BOY can supply you.—J. W. P., Cincinnati, Ohio: The 3c postage of 1831-55 has no additional value from being on the original cover. The stamp is catalogued at 2c and can be purchased for 1c.—V. F., Detroit, Mich.: The 1 and 2c Dominican Republic current issue can be purchased for 3c or 4c used.—L. R. D., Rusford, N. Y.: An inverted stamp is one in which the center or some other portion of the stamp is printed upside down in relation to the rest of the design. These errors occur only in stamps in which there are two printings, a portion of the design being printed at each impression. The stamp with locomotive described by you is a 2c of 1869. We do not know what the stamp is described by you as "having a picture of a potato that covers nearly all of the stamp."—R. D., Chicago, Ill.: None of the King's head issue of Great Britain have been withdrawn.—H. M., Elizabeth, N. J.: The 3c of 1858-60 and the 3c of 1869 are catalogued at 2 cents each. The 5c brown Garfield, unused, is catalogued at 50 cents unused.—R. B., Hazleton, Pa.: The stamps of the 1861-66 issue of the United States, without the grill, are catalogued as follows: 1 cent, 5 cents; 2 cent, 5 cents; 3 cent, 1 cent; 5 cent, \$3.50; 10 cent, 12 cents; 12 cent, 40 cents; 24 cent, 30 cents; 90 cent, \$3.50. These prices are for the cheapest varieties. Ten cent Confederate States of America catalogues 3 cents unused. The Carriers' stamp described catalogues \$1 unused and \$2 used. The large stamps of the Brussels Exposition, Belgium, 1 cent each for the 5 cent and 10 cent lilac brown, and the 10 cent orange brown catalogues 2 cents.—S. S., Philadelphia, Pa.: The \$20 revenue in blue and black, and the same value in orange and black are catalogued at \$15.

The Numismatic Sphinx.

P. T.: The 1829 and 1830 dimes are selling for a quarter each. 1830 half dollar, seventy five cents. There are no half dimes of 1812 or gold dollars of 1799, so you must be in error.—A quarter of 1834 sells for fifty cents. Spanish silver is very common and worth only what the banks will allow for it. 1857 111 cent silver, ten cents.—D. F. J.: (1) Silver penny of England. (2) Copper penny of Finland. (3) Columbian half dollar of 1892, seventy five cents.—C. McC.: Your coins are mostly common. You will find the prices on most of them quoted in the answers in this issue.—R. A.: (1) Ireland half penny, 1820. (2) Dutch East India Co. 1797 duit. (3) Half dollar 1835, worth seventy five cents. (4) English six-pence. (5) Half cent 1804, twenty five cents. (6) Chihuahua (Mexico) 1860, quarter real, twenty five cents.—The 1833 cent sells for ten cents at the dealers. This means, of course, a good specimen. In these columns we never quote prices on coins less than good. Your other coins are common.—G. L. B.: Your Nos. 1, 3, 6, 7, 8, 9, 10, 12 and 13 are the so-called "hard times" tokens or Jackson cents. They bring from ten to fifty cents each. No. 2 Nova Scotia, 1823 and 1832 half pennies, ten cents each. (4) Wood's half penny, 1723, fifty cents. (5) Connecticut cent of 1787, twenty five cents. (14) A common 10 centime of France.—1893 Columbian half dollar sells for sixty cents.—The half dollar of 1818 sells for eighty five cents.—The 1838 dime sells for twenty five cents at the dealers.—An 1841 O mint dime sells for twenty cents.—The quarter eagle of 1848 is worth only face value.—C. S.: Yours is a common Mexican dollar worth only face value.—A fine three dollar gold piece of 1860 sells for five dollars.—A fine 1833 dime sells for twenty five cents.—M. W.: The 8 reals Charles IV. of Spain, 1808, is worth only face value. Your other rubbing is from a common English six-pence of George III.—The 1817 half dollar sells for eighty five cents. D. C.: Your coin is one of Victor Emanuel II. of Italy (1861-1878), and is common.—W. G.: The 1818 cent sells for fifteen cents. Your Italian coin of King Humbert is common.—The 1892 Columbian half dollar sells for seventy five cents.—H. C.: Your 1870 "cinco centimos" is a common 5 centimes of Spain.—W. H.: Your coin is a common English half-penny. Your Canadian coin is also common.—1831 and 1833 half dollars sell for seventy five cents each.—Louis XVIII., 5 francs, 1819, \$1.50. Spain, Charles III., 1787, 8 reals, face value only.—B. W.: Your coin is a Spanish silver real or shilling. Though old (1789) it is very common.—The 1835 half cent is the most common of the series and brings only five cents.—We know of no one paying premiums on the 1833 V nickel.—F. B. T.: Your rubbing is from a silver Sol of Peru, and it is worth face value only.—All the gold dollars now bring a premium, selling from \$1.75 upwards.—L. R.: Your coin is a French Ecu of Louis XV., and is worth a dollar and a half.—H. H.: Your coins are all common and unless in fine condition will hardly bring a premium.—S. C. C.: Your three cent fractional currency, if in good condition, is worth a quarter.—G. B., E. T., H. R., and H. K. C.: There is no premium to speak of on your coins.—C. W. T.: Your coins of Spain and Mexico, 1781 and 1833, eight reals, are both very common.—The cent of 1890 is worth a half dollar.—H. W. B. and G. N. C.: The "flying eagle" cents of 1857 and 1858 are only worth face value.—A 1799 cent is worth \$15.00. The cents of 1838 and 1845 sell for ten cents each. All must be in good condition.—The Columbian half dollar of 1892, seventy five cents; 1893, sixty cents; Finland 1 and 5 penna, ten cents each.—No premium on the 1851 quarter eagles.—The 1829 and 1830 cents sell at ten cents each at the dealers.—A \$5.00 Confederate bill has no value now or never will in your life time. Keep it as a simple souvenir of a great epoch.

Boys and Animals

The Start With Poultry Import- ant.

No one should start with a stock of "scrubs." Thoroughbreds, though the first cost is a little greater, are vastly more economical. They always bring higher prices and the returns in every way greatly surpass those the "scrub" stock can give.

The first question that confronts the beginner is: "What breed shall I start with?" This depends wholly on what branch of the business he intends to follow—whether he is to raise for market or for eggs.

Single Comb White Leghorn.

I believe, as do many others, that "The breed that lays is the breed that pays." The Single Comb White Leghorns have long been acknowledged the greatest layers. They cannot be surpassed for egg production or beauty.

If one wishes to follow this branch of the business, he cannot do better than to invest in a foundation stock from this variety.

Then there are many things to be learned, and practically all must be learned from experience. Feeding, housing and breeding must be studied and the developments must be watched with the utmost care. Careful and accurate records must be kept, trap nests and the like playing an important part in their making. By referring to these records the novice will soon learn how to perfect his egg production.

On the other hand, if one wishes to raise for the market, there are a number of things to take into consideration.

1. He must select a bird that will mature quickly in order to realize a profit, as, of course, the longer they are kept the more expensive they become.

2. The dressed fowl should have a bright yellow skin. This is desired in all high-class markets, and meat thus colored almost always has a fine flavor, much better than the white meat of some other breeds.

3. He must select a breed that does not show pin-feathers, as they mar the color and appearance of the fowl, no matter how well it may be dressed.

4. In raising for the market the raiser should endeavor to select the best all purpose fowl. That is, one capable of a good egg production, as well as the best market qualities.

Many people consider the Barred Plymouth Rock as the best all purpose fowl. Now, here are my objections to this breed. They lack in quick growth and they show dark pin-feathers, both very important objections in the all purpose

White Wyandotte.

fowl. In selecting this breed, why not select the one, if possible (and it is possible), that comprises all the foregoing points? The White Plymouth Rock is greatly superior to the Barred, inasmuch as it does not show the dark pin-feathers, but it lacks in the quick growth. There is another breed—the White Wyandotte—which comprises all the good points named, and it is this breed that I advise the market raiser to begin with. One thing in their favor is the remarkable growth in their breast. This part fills out very rapidly, adding much to their quick growth, and making them the best broilers procurable.

The poultry quarters should be kept in the best possible condition at all times. Whitewash should be applied at least twice a year and the roosts often painted with kerosene, or something equally effective, thus keeping off all vermin.

The feed should be varied. It should be as clean as that you yourself would eat; fresh water and grit are two of the essentials.

I advise the novice to take some good and reliable poultry paper, as in these papers everything practical known to poultry science is discussed.

In conclusion, let me offer a few suggestions. After you have decided whether you are going to raise for market or eggs and which breed you are going to keep, no matter what breed it may be, do not allow yourself to start with a foundation stock of anything but the best birds procurable. Thorough-

breeds, though they may cost you a little more than at first expected, will come out far ahead of your neighbor's "scrubs."

Another thing that is very important to the novice is his knowledge of the breed he keeps. He should study carefully the characteristics, scale of points, color and shape of the thoroughbred of his variety. In this way he will know how to select thoroughbreds of this breed and will not be imposed upon. Deal with well-known, reliable breeders. Always bear in mind that if one is sure of the breeder being reliable, it is better to pay him five dollars for one setting of eggs than to pay five dollars for two settings of eggs from some unreliable breeder.

Tom—A Wonderful Dog.

W. FRANK McCLURE.

Telepathic, or mind-reading, powers are accredited to a bull terrier owned by Jack Myers, of Alliance, O. This canine has performed before Senator Foraker, James R. Garfield, and other notables, to their great astonishment, and his fame has even reached London. A number of scientific experts have witnessed his performances. Charles Marmaduke Lumley, professor of the London Psychological Institute, came to Alliance to see this dog and offered the owner \$1,200 for him.

Mr. Myers says he discovered the dog's mind-reading powers at the close of a game of solitaire. When he had finished the game he slapped the dog on the nose with one of the cards. He then stacked the cards and laid them on the table. On returning a few minutes later he was greatly surprised to find that the dog had sorted the pack and held in his mouth the same card which had been carelessly passed over his nose a short time before. Mr. Myers again placed the card in the pack and shuffled the cards and again Tom found the right card. Attorney William Roach hearing of the dog's interesting doings came in one day and put him to another and most important test. He shuffled the cards, placed them face downward, and then thought of a certain card, but told no one which one he had in mind. To his surprise the dog picked out the right card. Many others have since tried the same experiment with Tom and have been simply dumbfounded at the result.

Mr. Myers refused the offer of Professor Lumley because he believes that the dog would not live long if parted from him. Some time before he had thought some of selling him. The dog heard the conversation with the possible purchaser, who was later to telegraph Mr. Myers whether he would buy Tom or not. The dog looked dejected for two or three days, then a telegram came. Tom grabbed it from the messenger and carried it to his master. His feelings were apparently changed and he danced about the room as soon as his master had finished reading the message. The telegram brought the news that the person had decided not to buy the dog.

Editor's Note: The editor of THE AMERICAN BOY has before him letters from H. F. Harris, of the Crisis Publishing Company, East Liverpool, O., and Senator J. B. Foraker, of Washington city, each with reference to "Tom." Mr. Harris says: "I do not hesitate to say that the wonderful stories of his performances are true. The dog appears to be endowed with telepathy or a sixth sense, and seems to be capable of reading human thought." Senator Foraker

says: "I do not wonder that the dog's performances should seem incredible. I could scarcely believe what I saw. Whether it is mental telepathy or what not, it is something most remarkable."

Notes.

"H. H. H.," City of Mexico, answers M. C. Latimer, who asked in a recent number of our paper what was good for his canary's inflamed feet, by saying, "Rub them every night with vas-line." We fear the answer will be too long delayed to do any good, but it may furnish a suggestion to other boys who are having trouble with canaries.—HERMAN KISTLER, Newton Falls, O., wants to know how to make a flying pen for pigeons.—G. I. GIBBS, Beatrice, Neb., writes an interesting letter telling of an experience he had with a bird. He wants to know what kind of a bird it is that sings after dark on stormy nights in winter.—EDWARD G. FISCHER, Wheaton, Ill., sends a plan for a squirrel trap, which he says he thinks ought to work, though he cannot say that it will, for he has not tried it.—NED MORMODY, Hartford, Mich., has two large Belgian hares and two little ones and wants to know where he can sell them. He made a box trap like the one described in THE AMERICAN BOY and caught a rabbit in it the first day. Ned has a cat named "Sinut" and a sheep named "Peter," also a lamb.—EMMETT L. FRITZ, East Aurora, N. Y., is the eldest of four brothers. They have thirty six chickens, nine Belgian hares, five guinea pigs, two goldfish, a chipmunk and a lizard. They keep the lizard in the dish with the fish. He says the lizard has not been fed, nor has it eaten anything to his knowledge in three months. He and his twelve-year-old brother took the first prize in a piano playing contest in East Aurora. Emmett's prize was a gold-filled watch chain and his brother's prize was a watch. Emmett sends us some of the Roycroft work for which East Aurora is famous.—JOHN T. WILLIAMSON, Cedar Bluff, Ala., wants to know how many chickens to start in the poultry business with. This all depends upon how much ground the chicken yard covers, how much money the boy has to invest in stock, how much time he has to attend to the work, and some other considerations. Our advice would be in general to start with not more than half a dozen.—ALBERT DORRENCE, Albion, N. Y., has eight bantams, three guinea pigs and two carrier pigeons. Next season he is going to start in and raise white Leghorns.—WILLIAM H. ERWIN, Kendallville, Ind., says that when a boy starts in the bee-keeping business he ought to get a good book such as the A. B. C. of Bee Culture and study it thoroughly. Then go to a beekeeper and procure a few hives, not more than two or three colonies; indeed, one is enough to start with.—SETH J. ARNOLD, Spencerport, N. Y., wants to know what kind of chickens are best for a boy to try to raise. Opinions widely differ. When the editor was a boy he preferred black Spanish or white Leghorns.—CHARLEY ALLIS, Jr., Mattapoisett, Mass., wants to know where he can buy canary birds.—AUGUST SKYBERG, Hills, Minn., together with his brother, on March 22, 1902, bought about forty five chickens. In April he began setting hens. He had poor luck at first, for he set his hens on too many eggs, giving them about two dozen each. After that he tried with fifteen eggs to a setting and nearly all hatched. He had much trouble from the rats, but he is now getting rid of them. They have now thirty chickens, having sold last fall a lot for fifteen dollars. Their chicken house is an old shed fixed up. August goes to school and is in the eighth grade. In the last examination in geography he had a standing of 96 per cent.—J. CLARENCE HARKLEY, Novinger, Mo., wants to know something about raising pigeons. He and another boy have made a start by purchasing three pigeons. We can sell him a book, "Pigeons and All About Them," for fifty cents.—JAY M. ARMSTRONG, Lapeer, Mich., age ten, is fond of animals, and particularly of a black pointer that he owns. He says the hunters in his town say it is the best dog they know of. It will round up game, hunt mink, rabbits, and most anything in the line of animals. The boy has made a study of tracks and can tell from the track what animal made it.—JOHN T. ROSS, Hoopston, Ill., age thirteen, when nine years old received from his father two ewes, and now he is the owner of sixteen head of sheep. He also raised pigs and received \$34 for them. His father gave him a mare and colt and his grandfather gave him a calf. He now has \$38, some of which he uses for buying THE AMERICAN BOY.—H. C. LIMBACH, Waco, O., has thirty fine Plymouth Rocks, which he thinks are the best fowls out of which to make money. He clears forty to fifty dollars a summer on them. He has what he thinks is the finest maltese cat in the country. It weighs sixteen pounds.—FIRMER HORNSHER, Indianapolis, Ind., has thirty five chickens. He thinks chicken raising is a good occupation for boys who have a little money to invest. He raises barred and white Plymouth Rocks and brown Leghorn bantams. Firmer won first prize at the fair last fall with his Plymouth Rocks. He tried pigeons last year but didn't like them. His chicken coop is fourteen feet by pine feet, and in addition there is a large scratching shed which he built himself during the last spring vacation. The roosting place for his chickens in winter can be closed up tight. He has sold many of his chickens and thinks he is quite successful.

Incubators and Brooders. Aren't those that are good enough to try before paying for, worth considering? That's the kind we make. Send for free illustrated catalogue of Poultry or Incubators, or both. Royal Poultry Farm, Dept. K, Des Moines, Ia.

A COON TEAM.

27. Sample room, drug store, dry goods millinery, groceries, confectioner, tailor, doctor, dentist, butcher, photographer, telegraph, fashionable, lawyers, postoffice.

28. The Chinese read backward, also upward, as well as downward.

29. (1) L-fin, elfin. (2) E-late, elate. (3) M-pyre, empire. (4) O-bey, obey. (5) N-trust, entrust. (6) A-gain, again. (7) D-coy, decoy. (8) E-leaven, leaven. The phonetic letters spell Lemonade.

NEW TANGLES.

30. BROKEN WORDS.

Example: Separate a floor covering, and make a railway carriage and to fondle. Ans.: Carpet, car, pet. 1. Separate a small bird, and make a long, round beam and to impel with oars. 2. Separate a building for soldiers, and make to shut out and an engine of torture. 3. Separate a kind of fish, and make a possessive pronoun and an ornament. 4. Separate to conduct affairs, and make a member of the human race and a particular period of time. 5. Separate a wall for defence, and make a domestic animal and a portion. 6. Separate a division of the year, and make the ocean and a male descendant. 7. Separate a lessor of ground, and make a numeral and an emmet. 8. Separate a prison keeper, and make a conflict and a wild beast's home. 9. Separate a kind of sword, and make to carve and a young maid. 10. Separate the ending of a piece of music, and make an ichthyological organ, and a malt beverage. -Eugene M. Stewart.

31. CRYPTOGRAM.

The following patriotic motto for American boys can be read by substituting one letter of the alphabet for

Selgman, G. W. Hodgkins, Forest Burleigh, Harry Nellans, Charles Frandsen, I. Rose, Montford Chenoweth, David Stowell, Addison J. Kerr and sister, Howell Gordon, Marlon P. Stear, Ragnar Lunell, Stokeley Bloodworth, James Nelson, Myron S. Bruning and Charlie A. Hoag.

All others, whose names we refrain from publishing, will understand that their contributions fell short of our standard or that their answers were not correct, and are invited to try again.

Occupation Chess, number 11 of February, developed an extraordinary number of occupations besides those published in March, as the following list will attest: Archer, awl-maker, bat-maker, tatter, barterer, bore, borer, bulb-maker, cad, cadet, cater, caterer, cane-miller, chanter, club-maker, coach, coacher (?), colter, cube-maker, cue-maker, cure, director, dyer, embalmer, gager, hatcher, horse-walker, host, hub-maker, hut-maker, imitator, last-maker, limner, linen-merchant, lister, loiterer, lumber-er, lumber-maker, mast-maker, mat-maker, matron, mercer, osteopath, page, poacher, post, plume-maker, proctor, racer, raker, ranter, ranger, ratter, reader, rector, renter, re-seater, rider, sawyer, scater, solderer, songster, slaker, starcher, starter, staker, stoker, storer, stat-maker, talker, tamer, tenter, test-maker, tiller, timer, tither, Thatcher, tubemaker, tub-maker, tuner, usurer, wader, walker, walk-maker, watcher and waterer.

We were in error regarding the relative position of Muscatine and Keokuk in the "tenth state" as stated in March, Keokuk ranking tenth, as everyone seemed to know but your uncle.

A prize of two dollars will be given for the best list of answers to this month's Tangles received by April 20.

A prize of a new book will be given for the best lot of new and original puzzles received by April 20.

Preliminary announcement: The May issue will contain a Grand Prize Offer of a Stevens' Favorite Rifle to be given for the best original Fourth of July puzzle of any kind (illustrated puzzle preferred) received by May 20, to be published in the July number. This is fair warning to get on your thinking caps. Do not send in contributions for this contest until after you receive the May AMERICAN BOY.

another throughout by a uniform and simple rule.

MPWF ZPVS DPVDSZ HCE PCFZ IFS MBXT. -Vernor Lovett.

32. KNIGHT'S MOVE.

Starting at a certain letter and continuously following the knight's move in chess, using each letter once only, find eleven states:

Grid for Knight's Move puzzle with letters O, M, N, I, A, N, A, A, A, H, W, O, S, G, O, T, R, I, N, C, D, O, N, S, C, K, A, W, N, S, U, H, K, E, O, I, H, I, N, T, S, I, R, N, I, S, I, T, V, I, A, Y, H, M, E, E, M, O, E, A, X, W, A, O

-George Carleton Lacy, Foo Chow, China.

33. ELIMINATED VOWELS.

Supply the missing vowels and obtain a quotation from Longfellow: Lfsrllfrnst, Ndhgrvsnlttagl, Dstthrttdstrtrnth, Wsntspknfthsl. -Frank Holloway.

34. EVERYBODY'S KIN.

Example: Kin for an actor's foot. Ans.: Buskin. 1. Kin for the dining table. 2. Kin for the Autumn cornfield. 3. Kin for holding butter. 4. A clownish kin. 5. Kin for the sheepfold. 6. Kin for the wardrobe. 7. Kin to a dwarf. 8. A crockery kin. 9. A flowering kin. 10. A sharp-pointed kin. 11. Kin of the dome of the sky. 12. Chinaman's kin. -Frank C. McMillan.

35. DICKENS ACROSTIC.

The answers to the following will be found in Charles Dickens' great story, David Copperfield. Either christian name or surname is used, indiscriminately, but not both. The initials spell David's birthplace. 1. Willin'. 2. The lady who succeeded Miss Shepherd in David's affections. 3. Limble. 4. Mr. Chillip's tippie at the Gray's Inn Coffee House. 5. David's first wife. 6. Mr. Peggotty's niece. 7. Miss Dartle's christian name. 8. David's "bad angel," as Agnes calls him. 9. The name bestowed upon David by his great-aunt. 10. "Draper, Tailor, Haberdasher and Funeral Furnisher." 11. Ham's relationship to Daniel Peggotty. 12. Mrs. Micawber's given name. -Queen Zero.

36. HALF SQUARE.

1. Wingless. 2. Planing machines. 3. Idle talk. 4. Ingress. 5. Depend upon. 6. Product of mines. 7. Abbreviation of a great nation. 8. A letter from Boston. -Chas. D. Vollers.

37. WORD SQUARE.

1. A drink made from potatoes. 2. The

TRIAL LESSON IN Physical Culture

Physical culture, as taught by us, means, first of all, the development of SPLENDID VITALITY, SUPERB ENERGIES, STRONG INTERNAL ORGAN, STOMACH, HEART, LUNGS, ETC.

All this indicates masterful manly power and womanly beauty, and can be acquired by the proper culture of physical forces. Every human being can be vastly benefited by building strength in the internal vital organs. Strong arms are always useful, but every one is daily, even hourly, in need of strength of the digestive, respiratory and other vital centers. By our method you are taught how to strengthen the great vital organs. You can then keep free from disease, and cure it if already ailing. The weakest invalid, the aged, the middle-aged, the young, and even the strongest athlete can be benefited by increased internal vigor.

The Physical Culture Magazine

for 1903 is presenting a year's course in body-building that can be practiced at home without apparatus or expense. This course represents the life work of Bernarr Macfadden, Editor of PHYSICAL CULTURE and other magazines, and author of numerous books. The lessons are simple yet the most elaborate ever published.

The preparation of the matter and the illustrations of this course have cost NEARLY \$2,000.

It will contain over a hundred photographic illustrations posed by the Author, showing in detail in the plainest manner possible how every internal and external part of the body can be strengthened and developed. One trial lesson of this course and 128-page PHYSICAL CULTURE MAGAZINE, filled with beautiful illustrations, will cost you but 10 cents, stamps or coin. PHYSICAL CULTURE MAGAZINE for the year will contain nearly 1,200 pages of reading matter and about 1,000 illustrations.

A \$1,000 PRIZE is offered to the most perfectly developed man; \$1,000 PRIZE to the most beautifully and perfectly developed woman.

If you send \$1.00 it will pay for a year's subscription to Physical Culture, containing the entire course. Satisfaction Guaranteed. Money refunded without question if not satisfied after receiving first lesson. Better send the dollar, but if you want a trial lesson first, send 10c. at once. If you send \$1.00 state if you desire the course from the beginning.

weight of twelve grains. 3. A kind of tea. 4. To make dim. 5. To long. -Clyde Nickum.

Pluck and a Stone Fence.

(Continued from page 179.)

pay for such ore as we have, and then some of them can come out and make a bid on the whole lot."

"That'll be a good idea," replied the father. "Ye'd better start as soon as ye can so as to git back before dark."

An hour later Tom was on his way to town with a load of silicate taken from the fence.

On reaching Joplin he sold the ore at the rate of twelve dollars per ton, two of the buyers promising to go out to the farm on the following day and make a bid on the entire lot.

Tom brought sixteen dollars back with him which was the proceeds of the sample load of ore.

"And they are coming out to-morrow to buy all we have got," he added; "and it won't bring less than two thousand dollars. Then there is plenty more in the mines where that came from."

"Thank Heaven, we have found a way out of our trouble at last," said Mrs. Benton, and Mr. Benton sat silently puffing at his pipe while the tears of joy ran down his bearded cheeks.

Little remains to be told.

The proceeds of the sale of the silicate proved to be as great as was anticipated. The yield from the mines, though not as large as was at first expected, brought sufficient to place the Benton family in easy circumstances; and a handsome two-story residence now adorns the spot where once the little cabin stood.

Mr. Jones, the man for whom Tom had ridden to Joplin for the doctor, recovered from his illness, and having later on discovered a good prospect of silicate on his farm, sold out for a good sum to a mining company and moved to Keosau.

Nearly a year subsequent to the events detailed in this story, a stranger made his appearance at the Benton farm house. He was soon recognized as the man who had visited the place and left in such a mysterious manner over a year before.

He was warmly welcomed by the family, for it was to him, as they fully believed, that they owed their good fortune and prosperity.

He confessed to having written the letter which had afterwards played such an important part in the history of our friends. He explained by saying that he was one of a company that were investing in mining land, and it was during his tour in search of such land that he had come to the Benton place. He discovered the silicate in the fence and in the old mines, but owing to the kindness shown him by the owners, he resolved not to take advantage of their ignorance of the value of the land. It was his intention to make the secret known to the family before leaving the neighborhood, but he had been called away unexpectedly, and there was no course left but to communicate the intelligence by letter.

Thus the mystery was solved at last, and now, having given a full explanation of all questions that might vex the mind of the reader, there is nothing for me to write but

THE END.

Ivan Thurloe, of Boston, Mass., nine years old, is an expert swimmer and diver. He was paid a handsome sum by the management of the Sportsmen's show, which was recently held in Boston, for exhibition swimming and diving.

A Noble Rescue.

(Continued from page 188.)

waves hid it from view, but Jim was at the oars, and with wonderful skill he steered through the angry waters and landed, safe and sound at last, in a little cove half a mile below the falls. The enthusiasm of the people was more trying to Jim than the passage of the falls.

He was nearly suffocated by the crowd that pressed around him, and he blushed more than ever when Luke Walton took him by the hand and said, "This lad has true courage. I owe him an apology and I am going to make it right here. We all owe him an apology for thinking him capable of cowardice."

Then they went back in triumph to the village. Tom Carrol was nowhere to be seen. He had slipped away, with a troubled conscience, no doubt. Before Mr. Walton went back to the city he remembered Jim with a handsome present, and as for the villagers, this incident that had happened among them gave them all a higher and nobler idea of what true courage really was.

A Caution to Advertisers.

Advertisements sent us for insertion in THE AMERICAN BOY will hereafter be censored with even greater care than has ever before been exercised by us. No advertisement will be accepted which is at all misleading in its phraseology. For instance, where agents are wanted and work is to be done in order to secure a premium, the word "Free" will not be permitted as descriptive of the way in which the premium is given. The word "Earn" can properly replace the word "Free" and this will not be misleading. Advertisements will not be accepted which are extravagant or misleading in their description of articles advertised. For instance, we will not take an advertisement which says or implies that \$4 will buy a \$40 watch. The goods advertised must be described accurately. THE AMERICAN BOY has not had a great deal of this class of advertising, and we believe that the advertisers to whom these objections can apply and who are now represented in this paper, are reliable, but with these, as with others, the above ruling will be strictly adhered to in future. There are many advertisers who purposely try to induce readers to write to them by wording their advertisements in a misleading manner, and this has been done to such an extent in many publications that perfectly honest dealers have felt almost forced to resort to the same means of attracting trade, but our observation is that the firms which have met with the greatest measure of success are those whose advertisements do not mislead in the slightest degree; those whose advertisements are plain and straightforward statement of facts. People are tired of being offered something for nothing and of being disappointed, and the advertiser who wants business as well as he who respects his reputation will best attain his object by honest business-like methods. We desire that every man or woman who admits THE AMERICAN BOY into their home, and every boy or girl who receives it, may feel that at the hands of every advertiser in this one magazine at least they will have fair treatment. We want the reputation of the magazine to back up the advertiser, and we want the advertiser always to live up to the reputation of the magazine.

THE AMERICAN BOY

THE LEADING BOYS' PAPER OF AMERICA

Entered at the Detroit, Mich., Postoffice as second-class matter.

The American Boy is an illustrated monthly paper of 32 pages. Its subscription price is \$1.00 a year, payable in advance. Foreign subscriptions, \$1.50.

New Subscriptions can commence at any time during the year.

Payment for The American Boy when sent by mail, should be made in a Postoffice Money-Order, Bank Check, or Draft, Express Money-Order, or Registered Letter.

Silver sent through the mail is at sender's risk. Expiration. The date opposite your name on your paper shows to what time your subscription is paid.

Discontinuances. Remember that the publishers must be notified by letter when a subscriber wishes his paper stopped. All arrearages must be paid.

Returning your paper will not enable us to discontinue it, as we cannot find your name on our books unless your Postoffice address is given.

Always give the name of the Postoffice to which your paper is sent. Your name cannot be found on our books unless this is done.

Letters should be addressed and drafts made payable to The Sprague Publishing Co., Majestic Building, Detroit, Mich.

WILLIAM C. SPRAGUE, Editor.
GRIFFITH OGDEN ELLIS, Assistant Editor.

Our Next Number.

THE AMERICAN BOY for May will have as a front cover a reproduction of the photograph of "The Young Rough Rider" from among a band of boy rough riders organized in Pittsburg, Pa., and one of the interesting articles in this number will be an illustrated description of this unique organization composed of boys, each of whom owns a pony and a regular rough rider outfit. There will be a continuation in the May number of the Napoleon story, the Henty story, Fine Deeds of Brave Boys, The Jolly Boy, For a Boys' "Circus," THE ORDER OF THE AMERICAN BOY, and the various departments.

Among other interesting items will be: Simple Tricks on the Wheel; A Sand Fort and How It Was Captured and Retaken; A Night Adventure With Wolves; University of Pennsylvania Athletes; The Children of the Diplomatic Corps; How Tommy Brought His Treasure Home (an Indian story); Pure Gold, and a hundred shorter items of intense interest to boys. As usual, the paper will be illustrated with nearly one hundred pictures.

We have just bought stories from the pens of Harriet Prescott Spofford, Joel Chandler Harris, Caroline K. Herrick, Waldon Fawcett, General Charles King, and other noted story writers. These stories, with those purchased from other leading story writers for boys, such as Henty, Graydon, Lisenbee, Harbour, Ellis, Munroe, and others, warrants us in saying that THE AMERICAN BOY will maintain its place at the head of all publications for boys.

Don't miss a number. Those who allow their subscriptions to expire without renewing, expecting later to make remittance run the risk of missing something, for we print only enough copies to fill actual needs as they appear at the time we go to press.

Boys' Books, Pictures, Music.

We publish some things of special interest to boys. We offer them with confidence that they will please. Our own reputation is at stake in what we offer over our own name.

BOOKS

- THREE BOYS IN THE MOUNTAINS. A Beautifully Bound Book of Mountain Adventure. 75 cts
- ON THE FIELD OF HONOR. A Good Book Full of Tales of Boy Heroism on the Field of Battle. 75 cts

MUSIC

- THE JOLLY STUDENT. A Rollicking Student Song. 25 cts
- THE AMERICAN BOY MARCH AND TWO-STEP. Very popular. 25 cts

Any two pictures for 25 cts.; the four for 40 cts.

Address, THE SPRAGUE PUBLISHING CO.,

DETROIT, MICH.

More About Henty.

George Alfred Henty, whose last story is being published in THE AMERICAN BOY, died, as our readers know, on the morning of November 16, on board his sail yacht "Egret," in Weymouth Harbor, England. His health had not been very good for some time and he had decided to winter on board his yacht. For some years past Mr. Henty has spent at least six of the twelve months of the year on his yacht. At the time of his death he was seventy years old. Mr. Henty was educated at Westminster School and Galus College. Early in life he went to the Crimea with a department of the British army. Afterwards he was sent to Italy to arrange the hospitals of the Italian legion. Then he tried mining at home and abroad, and later attached himself to the staff of the "Standard," for which paper he wrote for some years. Then he volunteered as special correspondent for the Austro-Italian War, accompanied Garibaldi in his Tyrolean campaign, followed Lord Napier through the mountain gorges of Magdala, and Lord Wolseley through

Dear Mr. Henty,

I only returned last night from abroad. Having to my mind about your proof could not do out to me. I have at once gone through, and now return it to you.

Yours very truly
G. Allen

brush and swamp to Kumassi. Next he reported the Franco-German War, starved in Paris through the siege of the Commune, then roughed it for a time in the Pyrenees through the Carlist insurrection, and then in Asiatic Russia during the Khiva expedition. Subsequently he traveled through the mining districts in the western part of the United States, accompanied the then Prince of Wales (now King Edward VII.) on his Indian tour, and with the Turkish soldiers in the Servian War, he looked on at some desperate hand-to-hand fighting.

As a man, Mr. Henty was manly, honest and sincere, with a natural and genuine sympathy for boys, whom he understood thoroughly. His works be-

"THE EGRET."
Mr. Henty's yacht, on board of which he died.

came classics in the school libraries. His personality was exceedingly attractive; big and burly, with a patriarchal white beard and a great voice, he attracted attention wherever he went. Mr. Henty has a son, Captain Henty, in the volunteer company Royal Irish Rifles, which served in the Boer War in South Africa. We reproduce a picture of Mr. Henty taken from a photograph presented to the editor of "The Boy's Own" paper in England, together with a picture of his yacht and a facsimile letter from Mr. Henty to the editor of "The Boy's Own" paper.

SPECIAL OFFER.

To every boy who sends us the subscription of a New Subscriber to THE AMERICAN BOY during the month of April, we will give, free of charge, a picture of the late G. A. HENTY, the great story writer for boys, who died November 16 last, the picture measuring 6 x 9 inches, and printed on paper suitable for framing. This is in addition to usual premiums.

STEVENS

THERE probably never was a boy who didn't long to own a Rifle. Parents are loath to buy such articles for their boys, but if they would only select a *reliable* one such as *we make*, and then instruct them how to use it, they would find *shooting* a beneficial sport. It teaches control of nerves, steadiness, deliberation and such qualities of character invaluable in later life. In our

"FAVORITE" RIFLE at \$6.00
we offer the *most popular* rifle made. In our "Crack Shot" at \$4.00 and "Stevens-Maynard, Jr." at \$3.00 are two low priced rifles not excelled for ACCURACY. We have Shotguns from \$7.50 to \$25.00.

Nearly every Dealer in Sporting Goods can supply our FIREARMS, but if you cannot find them, don't accept a substitute, but write us and we will ship direct (Express Paid). Send for our Catalog, It's Free

A SPLENDID BOOK for BOYS

"Three Boys in the Mountains"

HANDSOMELY BOUND IN CLOTH AND ILLUSTRATED.

PRICE, 75 CENTS.

POSTPAID.

The Sprague Publishing Company,
DETROIT, MICH.

THE story of Western Adventure—clean and inspiring—that ran in

THE AMERICAN BOY

through the greater part of 1901, has been issued by THE SPRAGUE PUBLISHING COMPANY in book form. This story is the longest and best story that has yet appeared in "THE AMERICAN BOY." Its author is the editor of "THE AMERICAN BOY," under the assumed name of JOE CODY. This is sufficient to indicate that it rings true in morals, and that nothing has been allowed to enter the story that will hurt a boy, but that everything is there that will give interest and dash to the narrative. It brings in the pleasures of the hunt, the chase and the camp, and deals with Indians and animals in plains and mountains. It is a good healthy story that a parent will be glad to have in the hands of his boy.

Napoleon Bonaparte

A History Written for Boys by the Editor

CHAPTER XV.

JOSEPHINE DIVORCED—NAPOLEON MARRIES
MARIA LOUISA OF AUSTRIA—WAR WITH
RUSSIA—THE RETREAT FROM MOSCOW.

NAPOLEON was now at the head of a magnificent empire of eighty million people. But what if he should die? Josephine had borne no children to Napoleon, and the matter of an heir to the Imperial title had for some time given great concern to the Emperor. Hortense, Josephine's daughter by her first husband, had borne to her husband a son, Louis Bonaparte, who was for a time regarded as the heir to France, but the boy died of croup in infancy. It was thought, too, by some that Napoleon would adopt Eugene, Hortense's brother, but it was not to be.

There is no doubt but that, desiring a son and heir, Napoleon had for some time contemplated divorcing Josephine and marrying a princess from some one of the royal families of Europe. There is evidence that he made overtures at the Peace of Tilsit, and afterwards at the conference at Erfurt, to the Czar of Russia for the hand of the Czar's sister, and that his overtures were received coldly. There is ample proof that Napoleon loved Josephine; his letters to her were full of ardent devotion. She was easily the most brilliant woman in Europe and lent a splendor to the court of France that added immensely to its influence and renown. Napoleon was not insensible to her queenly qualities. There are historians who seek to detract from the character of Josephine and represent her as untrue to her husband, but the world has been slow to believe the stories, many of which were no doubt inspired by her enemies.

This chapter in the life of Napoleon is an exceedingly sad one. How sincere Napoleon was in his declarations that he set Josephine aside for reasons of state, we shall never know. The claim made by him, and for him by his friends, was that his love for France and his interest in her welfare was so great that he would break the dearest ties and sacrifice his own happiness to serve her interests. Josephine, while presenting to the world an appearance of unalloyed happiness as the mistress of the most splendid court in Europe, trembled at heart as she saw the dazzling heights to which her Imperial master had risen. Hints more or less full of meaning had reached her from various sources that the interests of the state demanded that Napoleon should have an heir, so that when Fouché, with studied diplomacy, presented the subject to her and asked her, for the good of France, that she allow herself to be divorced, she was not unprepared for the blow. Still, unable to believe that her loving spouse had taken this means of gaining her consent, she hurried to Napoleon and demanded whether he had authorized the proceeding of his minister. Napoleon denied it, but on her demanding that Fouché be dismissed he refused, and thus practically admitted that Fouché's procedure had not been contrary to his wishes.

After several tearful interviews Josephine accepted the inevitable. On December 15, 1809, Napoleon announced the dissolution of his marriage to his Council, and Josephine, appearing before them, consented thereto. The title of Empress was to continue with her for life, and she was to receive a pension of two million francs, to which Napoleon added a third million. The heartbroken Queen left the Tuilleries for her villa of Malmaison. It has been said that when Napoleon repudiated Josephine he repudiated Europe.

In a few weeks it was announced that Napoleon had demanded and received the hand in marriage of Maria Louisa, daughter of Francis of Austria. On March 11th, 1810, they were married by proxy in Vienna. On March 28, Napoleon met the young Archduchess, as in her carriage she was proceeding toward Paris, and, brushing aside all ceremony, pushed aside the curtains of her carriage and introduced himself to his bride. On April 2, the wedding

was repeated with great splendor in Paris. Then followed a tour of the provinces. The royal bridegroom for a time devoted himself to his bride with every mark of affection. "He made love," says one, "like a Hussar," but letters at intervals passed between him and Josephine and his visits to Malmaison were not infrequent.

While Napoleon was thus engaged in affairs of the heart, he did not forget that he still had a stupendous task before him in subduing Spain and Portugal, where the war, of which we read in the preceding chapter, was still in progress. To be sure, Joseph was on the throne propped up by 300,000 soldiers, but the greater part of the country was still in the possession of the enemy, the French holding but a few districts, and in these being shut up in their fortresses. Massena, second only to Napoleon as a general, was in command of 100,000 Frenchmen known as the Army of Portugal. With these he sought to drive the English, under the command of him who afterwards was known as the Duke of Wellington, out of the Peninsula. Opposed to Massena were 20,000 British troops and 30,000 Portuguese. Massena pushed them little by little toward Lisbon and the sea. At last Wellington halted in a strong position protecting the port of Lisbon. Massena found it impossible to advance, and for many months lay exposed on every side to the attack of the Portuguese peasants, threatened with famine from having his communications in the rear cut off and finding the country about him laid waste by the inhabitants.

At last Massena was forced to retreat. Lord Wellington started in hot pursuit until the French, crossing the Portuguese boundary, were emboldened, by the receiving of reinforcements, to return. A battle

were her own. Never had a child been ushered into the world with such a magnificent welcome nor been born to so magnificent a heritage.

Many things now conspired to unsettle France and dim the lustre of the great name of Napoleon. The alliance with Austria on his marriage to Maria Louisa was unpopular with many of the republicans who saw in it the last step toward a ruling dynasty. The putting aside of Josephine had been far from popular with another faction. The ill-success of the French armies in Spain and Portugal had brought about the suspicion that the tide of military success had turned. Fouché, who had dared, without authority from his master, to send a delegation to London to ask on what terms the English would make peace was banished. Napoleon's quarrel with the Pope had made him bitter enemies among the papal party. New prisons were built throughout France and filled with political prisoners. The press had become enslaved. Russia had taken offense at the Austrian alliance, for, should Spain and Portugal be conquered, this alliance would leave Russia as the only prize worth fighting for that still remained on the continent to whet the insatiable ambition of the French Emperor. Everywhere could be heard rumblings of an approaching storm that boded ill to the "Man of Destiny."

Napoleon at this time had at his disposal over two million men. Eight hundred thousand of them were at his immediate command ready for the field. Not counting the 300,000 that were in the Spanish Peninsula, he could bring an army of 650,000 against Alexander, should war break out. Napoleon might have come to honorable terms with him, but intoxicated by his successes he helped to widen the breach

and precipitate war. Talleyrand argued and Fouché earnestly urged the Emperor against marching upon Russia, but both felt at once of what little effect were their words. Cardinal Fesch, Napoleon's uncle, appealed to him on the ground that the war would be a Heaven-provoking crusade. The Emperor led the Cardinal to a window, and pointing upwards, said: "Do you see yonder star?" "No, sire," replied the Cardinal.

"But I see it," Napoleon answered, and the interview was at an end.

On May 16, 1812, Napoleon met the Emperor of Austria and the Kings of Prussia, Naples and other inferior countries, at Dresden, and here, amid extravagant pomp, he laid down the policy which they were to adopt in case war should break out. On June 22, negotiations between Napoleon and Alexander were brought to a close in an address by the former to the army in which he declared that they should now put an end forever to that haughty influence which Russia had exercised for fifty years over the affairs of Europe. Alexander followed with an address to his troops in which he said: "Soldiers, you fight for your religion, your liberty, and your native

land. Your Emperor is among you; and God is the enemy of the aggressor."

The right wing of Napoleon's army consisted of 30,000 Austrians commanded by Schwartzberg; the left wing of 30,000 by Macdonald. Between these was a great army of 250,000 under the command of Napoleon himself, with such lieutenants as Davoust, Ney, Junot and Victor. The cavalry was under command of Murat, King of Naples. Augereau was to remain in the rear and protect communications with France. This magnificent army occupied a base of operations fully 300 miles in extent.

The greater part of the French army, before taking its position, had been reviewed at Friedland. The Russians had 260,000 men in the field with their center at Wilna under the command of Barclay de Tolly. The plan of Alexander was to draw Napoleon on, retreating slowly toward Moscow, and thus subjecting the multitudinous army of the enemy to the infinite difficulties of a campaign far from its base of supplies and in a strange country where the rigors of winter might accomplish that which arms could not. On June 24, 1812, Napoleon crossed the Niemen, near Kowno, and the die was cast. Alexander moved back slowly as Napoleon advanced. The French reached Wilna on June 28 and found it deserted and

Napoleon Displaying to His Army a Portrait of His Son.

was fought on the fifth of May, 1811, and the French once more defeated. Massena was recalled and Marmont sent to take his place.

Wellington now had full possession of Portugal. In rapid succession he took three important fortresses. On the 21st of July, 1812, the armies of Wellington and Marmont lay facing each other near Salamanca. The following day a great battle ensued in which the French lost 7,000 men and were sent flying toward Madrid. Wellington then pushed on and soon entered the capital of Spain, King Joseph fleeing on his approach.

To go back a few months: A son was born to Napoleon and the Empress on the twentieth of March, 1811, and Napoleon taking him in his arms cried to his courtiers, "Gentlemen the king of Rome." The announcement of the birth of the child in the Royal palace was made by signal rockets, and when immediately thereafter one hundred and one guns proclaimed that the child was a boy, all Paris went into a frenzy of enthusiasm, the people rushing into the streets and squares, filling the air with shouts of "Long live the Emperor," and many shedding tears of joy. Napoleon was delirious with joy. Secretly he hastened, a little later, to show the child to Josephine, who caressed it and cried over it as if it

everything that could be of use to such a vast host destroyed; but with the foresight for which he was always distinguished, Napoleon had brought along great quantities of provisions so that his soldiers were, for the time being, at least, independent of the country around them. The moving of such an unwieldy force of men, baggage and provisions soon proved to be a matter of immense difficulty, and at the very beginning, while yet the French were at Wilna, the question of putting off the invasion for another year or pursuing it amidst the most trying conditions presented itself. At this time Alexander effected treaties with England, Spain, Sweden and Turkey, with which last named country he had been at war, and from every quarter the Russians found reinforcements and supplies of money and provisions. The enthusiasm of the Russians was tremendous. A million Russians offered themselves to their Emperor. Moscow alone offered to raise and equip 80,000 men; a Grand Duchess of Russia (whom Napoleon desired to marry) raised a regiment on her own estate; a Cossack chief promised his only daughter and 200,000 rubles to the man who should kill Napoleon.

After remaining three weeks at Wilna the French advanced with St. Petersburg as their objective point, but on meeting with effective resistance they turned toward Moscow. Engagement after engagement followed with temporary advantages to the French, the Russians retreating, burning their fields and their villages as they went, and leaving nothing to the pursuing hosts but smoking ashes. On the demand of his troops for a general engagement the Russian Commander-in-chief took up a position between Borodino and Moscow, and on September 7 the two armies stood face to face, each having ready for battle about 100,000 men, with 500 guns. Napoleon addressed his troops in his characteristic fashion, calling upon them to behave themselves so that posterity might say of each of them, "He was in that great battle beneath the walls of Moscow." The battle was a succession of charges and slaughters. It was butchery on both sides of the most horrible description. The result of that awful day was the loss on each side of nearly 50,000 men. "Death," says one historian, "was the only victor." The Russians withdrew and Napoleon pressed on. On September 14 the cry of "Moscow!" "Moscow!" arose from the ranks and Napoleon looked down from "the Hill of Salvation" on the splendid city. Murat, with his cavalry, had pushed on to the very gates, where he had received word from the Russian general that unless two hours were granted for the safe withdrawal of the Russian troops he would set fire to the city. The two hours having expired, the French entered and found the streets and buildings deserted save for the rabble. On the following midnight flames broke out, but were soon extinguished. The next night the sky was again lurid with flames bursting from every quarter. During four days the conflagration raged till but one-fifth of the ancient city remained. By the light of the flames Napoleon dictated a letter to Alexander proposing peace, but an answer never came. Instead, rumors reached him

that all Russia was gathering about him. What should he do? To remain shut up in Moscow during the approaching winter was to run the risk of his allies in middle and western Europe disregarding their pledges and throwing off their allegiance. To attempt to return at this late hour, with winter fast closing in, was to subject his heroic army to incomparable dangers. News had reached him that two divisions of his army that were advancing into Russia by other routes had suffered defeat and that his army in Spain had lost the great battle of Salamanca. Following this, Murat was defeated in an encounter under the very walls of Moscow. Napoleon, then,

with continued misfortune, and Napoleon, hearing of it, despaired of ever seeing them again, but on November 20 his despair was changed into joy by their coming up with him at Orca, where Napoleon hailed Marshal Ney as the bravest of the brave, and declared that he would have given all his treasure to be assured of his safety. Napoleon was now at the head of the whole army, which consisted of only 12,000 men, including 150 cavalry. Five hundred officers still had possession of their horses and these formed themselves into a bodyguard to the Emperor.

In the forests along the River Beresina the little army came suddenly upon 50,000 of their countrymen, who under Victor and Oudinot had entered Russia by another route. At Mololodeczno Napoleon heard news from Paris that caused him to quit the army and push on ahead; so giving the chief command to Murat, he, with five companions, set off on the long journey to Paris. On December 10 he reached Warsaw. Here, on being congratulated on his escape from dangers, he cried, "Dangers, there were none—I have beat the Russians in every battle—I live but in dangers—it is for kings of Cockaigne to sit at home at ease. My army is in a superb condition still—it will be recruited at leisure at Wilna, and I go to bring up 300,000 men more from France. I quit my army with regret, but I must watch Austria and Prussia, and I have more weight on my throne than at headquarters. The Russians will be rendered foolhardy by their successes. I shall beat them in a battle or two on the Oder and be on the Niemen again within a month."

On December 14, Napoleon and his few companions reached Dresden, and on the 18th, Paris. The retreating French, by the addition of scattering bands, numbered 40,000 when they reached Wilna. Murat had left them and Eugene Beauharnais was in command. On arriving at Wilna the broken columns found rest and enough to eat. Strong men wept with joy at the sight of a loaf of bread. But even here they were attacked by the terrible Cossacks and driven on toward the Niemen. Crossing at Kowno they were on Prussian soil, where the Russians ceased their pursuit. The grand army of nearly one-half a million men that in August assembled on the confines of Russia was now reduced to scarcely 1,000 in arms, and not over 20,000 more, broken and disabled. It is pleasing to learn that the Prussian people received these poor, travel-stained, starved veterans with compassion and allowed them to remain unmolested for a time near Konigsberg.

Thus briefly told is the story of Napoleon's disastrous campaign in Russia. The hitherto invincible conqueror had lost in it 125,000 men slain in battle, 130,000 by fatigue, hunger and cold, 200,000 taken prisoners, including forty eight generals and 3,000 regimental officers—a total loss of 450,000 men. One thousand pieces of cannon and seventy five proud eagles and standards of France remained in the enemy's hands.

(To be continued.)

A Review Day under the Empire.

quitting the ancient capital, with his whole army went to the support of Murat. No sooner had they left the city than the Russians again took possession and sent forth bodies of troops to harass the French rear. From this time calamity followed calamity. A Russian winter was on and there was lack of food. The Cossacks hung about them day and night, advancing and retreating, burning bridges and towns before them and killing the stragglers. The annals of war fail to show a more fearful chapter than that which narrates the retreat from Moscow. We can not attempt to describe it. There was no effective discipline; except in case of scattering bands and small detachments the men pursued their own way. Thousands sank by the wayside starved and frozen. It was a chain of corpses for a thousand miles. Men killed their horses, wrapped themselves in the reeking skins of these animals and drank their warm blood. The army which, when it left Moscow, mustered 300,000 men, was soon reduced to a paltry 40,000 who could be brought together. These Napoleon divided into four columns that were to follow one another at intervals of a day, Napoleon himself having command of the first division. When the two leading divisions met at Krasnoi, not much over three hundred miles in a straight line west of Moscow, they mustered a total of scarcely 15,000. Here Napoleon is reputed to have drawn his sword and declared, "I have long enough played the Emperor—I must be the General once more."

In the meantime the rear divisions were meeting

A Boy's Tool-Chest—James Buckham

EVERY boy ought to own a few tools and know how to use them. Such knowledge will be useful to him, not only while he is a boy, but increasingly so as he grows older. Many an expensive visit from the carpenter may be avoided. If a boy or man in the house has learned the use of the most common tools. And in this connection let me suggest that there is no better way for a boy to earn a little spending money than to become so handy with tools that he can make the ordinary repairs, or supply the simpler devices in a house, which would otherwise require a carpenter. And if he is not too modest to let the neighbors know of his humble skill and moderate charges, he may find plenty of profitable "tinkering" for his leisure hours.

The tools which are really necessary for every-day carpentering are neither many nor expensive. A medium-sized saw, a plane, a carpenter's square, two hammers, one large and one small, a screw-driver, a couple of gimlets, a file, a pair of compasses, a pair of pincers and of wire-nippers, a chisel, a bradawl, a bit-stock and case of bits, a drawshave, a carpenter's lead pencil, and a small iron or wooden vise that will screw on to an ordinary table, will be found sufficient for ordinary uses. All the edge tools should be of good hard steel, and, in-

stead, it will pay to buy the best of everything at the outset, as the cost will not be great, and good tools will wear and endure strains much better than cheaper ones.

In addition to his tools, a boy should purchase at the outset a small stock of the most necessary hardware supplies—nails of different sizes, screws, tacks, a spool of small brass wire, some hooks, brackets and drawer-knobs, a pot of glue, and an oil can and bottle of oil. The last-named will come in very handy when treating squeaky hinges or sticking doors.

The tool-chest itself must not be overlooked. Tools should never be left straggling about a house, or tucked at random into housekeepers' drawers. They should be kept together, with as little waste of room as possible. Nothing is so well adapted for this purpose as the old-fashioned tool-chest or tool-box. Tool-boxes, well and strongly put together, can be bought about as cheaply as they can be made, and it would save time and confusion to buy one with one's tools and supplies, and have all these latter put in their proper compartments. The whole outfit should cost less than ten dollars; and it will pay for itself in six months, if a boy is quick to learn and industrious.

The best way to learn how to do things with tools is to do them—experimentally at first, of course, and afterwards practically. Let the beginner buy a small load of half-inch boards to practice on—to saw and plane, and bore with bit and gimlet, and join with nails and screws, and mortise with the chisel, etc. He may pound his fingers to begin with, and even get a cut or two, while his work will half make him believe that he is cross-eyed. But after a few days' practice real and steady progress will be noted; and it will not be long before the young carpenter will feel ready to undertake simple jobs about the house or barn. Perhaps there will be a decayed board in the back steps that needs replacing, or mother would like a new knob on a drawer, or a weather-strip fastened to the outside door. There is usually plenty to be done about any house in the carpentering and tinkering line, and the only reason why such small jobs are neglected is because it will cost so much to get a skilled carpenter to come and do them. The boy of the household will be proud and glad to earn a fifth of what a carpenter would charge for the same service; and there is no reason why, if he has any aptitude for tools whatever, he should not be ready for practical work after he has been in training for two or three weeks.

There is generally some small room, either in the house or an outbuilding, that can be set aside as the boy's workshop. The attic of an old-fashioned house does nicely—a corner of the attic

where there is plenty of light, is enough, and may be partitioned off from the rest by a curtain of cheap material strung on a wire. It is always better to have some fixed place for keeping one's tools and materials and doing movable work. The young carpenter needs, of course, some kind of a table. The cheapest kind of a kitchen table will do, or he can make himself a bench, which would be better still. If he uses a light table, it will be necessary to clamp the legs to the floor, which any hardware dealer can tell him how to do.

The fascination of using real, serviceable tools is very great, for most boys. The fact that they can make things, and make them well, is a real revelation to them. Eye and hand rapidly become educated and trained to carefulness; the inventive faculty is stimulated; the natural desire of youth to do something useful and helpful is gratified and strengthened. It would often be the best possible investment for a parent to advance the money necessary to provide the boy with a box of tools, or make him a Christmas or birthday present of them. Besides educating the boy in one of the most permanently useful of mechanical accomplishments, it would keep him off the street and out of mischief—he ten dollars worth of moral as well as practical value. And when the boy reaches the point where he can give lessons in mechanical efficiency to his father, it makes him realize as nothing else could the value of earnestness and application in whatsoever employment of life.

Nita—A Tomboy Soldier

—THE LAST STORY WRITTEN BY THE LATE G. A. HENTY—

Sole American Rights Purchased

By THE AMERICAN BOY

Synopsis of Chapters I-IV.: Fort Darlinger, on the northwest frontier of India is occupied by three companies of a Punjabi regiment under command of Major Ackworth. To punish some of the marauding tribes which had recently made an incursion upon the natives under British rule, the major sets out from the fort with two companies, leaving his daughter Nita, and the remaining company under the command of Lieutenant Carter. Nita has been brought up in the army and her education consists mostly in being a first-class shot and a good boxer and fencer, while the usual accomplishments of a young lady have been, in her case, wholly neglected. To remedy her deficiencies her father announces that on his return she is to go to England to attend school. The actions of the natives make Nita uneasy regarding the safety of the fort, and on telling her fears to Lieutenant Carter he agrees that matters look suspicious and proceeds to make everything as secure as possible, including the planting of two barrels of gunpowder underneath a mosque situated near the gateway of the fort. During the night a strong force of natives make an attack upon the fort but are bravely repulsed by the little band of defenders. Nita takes her place in the hospital and attends the wounded. At daylight the natives give up their attack and Carter and Nita discuss the situation, which they agree is a very grave one.

The following morning the Afridi are repulsed. Nita aiding in the defense. During the day Carter explodes the barrels of gunpowder under the mosque. Nita now dresses as an officer in one of Carter's uniforms. The enemy dig under the walls and pour into the fort, and the defenders are forced to make a final stand in one of the buildings. Carter, wounded, and two others besides Nita are the only survivors of the attack and are captured. Carter is carried away in one direction and Nita in another, the latter being taken as the servant of the chief of the captors.

CHAPTER IV.—(Continued.)

"**H**ERE are some peaches," he said; "you will find them better than bread."
 "Thank you very much," Nita replied.
 "You have nothing the matter with you," the chief went on, "except that you have a big swelling at the back of your head. I suppose you were knocked down by a musket. It is fortunate for you that you were supposed to be dead at the time, for the men would not have spared you after the loss you have inflicted upon us. But when we found that you were alive their passion had died down, and I was able to show them that you might be much more useful alive than dead, you and the other three."

"Is my friend, the other officer, badly hurt?" Nita asked.

"Yes, he's badly wounded, but I think that he will recover, and also the other two." So saying, he turned and went away.

Nita felt most grateful for the peaches. She gave a couple of them to the havildar, who evidently needed them even more than she did. Then she sat down and ate her own slowly, the sweet juice cooling her parched tongue, and even the pain in her head seeming to abate somewhat. Half an hour later the tribes again set off. They ascended two steep passes and at the end of the third day halted in a small valley. There were several villages scattered about and every foot of the ground was cultivated. They were greeted with shouts of welcome by the inhabitants who flocked out, but soon cries and lamentations mingled with the cheering, from women whose husbands had not returned. These, however, soon retired to their homes to grieve in solitude while the others went on with their dances of triumph, and the tribesmen scattered to their own villages.

In the center of the valley stood a strongly fortified house, and to this the prisoners were carried. That day Nita had been strong enough to walk and the pain in her head had abated though the pressure of her cap still hurt her. The chief's wife, who walked beside her husband, glanced at the prisoners and was evidently by no means pleased at their being quartered upon her, but when the chief explained that they would both be slaves at her service she looked mollified. They were taken up to a small room in an upper story. Then she gave Nita a large jug and signified to her that she was to draw water from the stream that ran through the valley. Anxious to please the woman who was to be her mistress, she fulfilled the mission, although feeling very tired with her walk. The woman seemed more gracious when she returned with her burden. While she had been away the chief had explained to her the value of the captives, and that he should either get a large sum for restoring them to their friends or might use them to protect themselves from any troops sent against them.

"Only to think," she said, as Nita went wearily upstairs, "that that slight boy should be an officer. Why, with us it is the bravest and strongest men who are the chiefs. How can they expect to fight against us, when they are led by boys like that? I could twist him round my finger."

"The ways of the English are unaccountable," the

chief said, "he is as you say but a boy, though he and another officer, not much bigger, with only fifty men, have killed nearly three hundred of us. Not one offered to surrender and they fought to the last. These two, and two others who have gone with the Orokzais were the only ones found breathing when we examined the dead. They are strange people these men, but they are men, and these fought like lions. If they had offered to surrender we would have given them their lives, and carried them off as captives. It is a good thing to have a certain number of men in our hands for then we can always make peace with their countrymen. But it was not to be. This little garrison were determined to die and they did die. However, both their officers are in our hands. Treat them well, wife. It will pay us to do so. I rather like that fair-haired boy; he has shown himself very patient and plucky, and himself volunteered to walk instead of being carried today. I think you will find him very willing and cheerful."

"He had better be," she said, savagely. "As to his being cheerful, I care not for it one way or the other, but if he is not willing he will soon get a taste of my stick."

"I should advise you not to try it. I was in the room in the last fight and saw how steadily and straight he shot. Certainly fourteen or so of our men fell from his hands, and I would have saved him then if I could have done so, for never did I see a lad fight so stoutly. He fired as deliberately as if he were aiming at a mark. His eyes shone strangely

She . . . Very cautiously unbarred the door.

and he cheered on his men to the end. I am sure that if you struck him he is capable of doing you harm, at whatever cost to himself."

The woman muttered to herself. She was evidently impressed with her husband's warning. "Can he cook?" she said. "One of our women has died since you have been away, and I have all the work on my own shoulders."

"I don't know if he knows anything of cooking," the chief replied, "but you can teach him and he will not be long in picking it up. Now I will show you the things that I have brought you home."

The sight of the various articles of spoil completely mollified the woman. There was a large copper cooking pot and two small ones. There were some clothes that Nita recognized as belonging to Carter, a looking glass, a dozen knives and forks, and a meat chopper, all of them precious things indeed in an Afridi village. Besides this, outside there were a dozen cattle and some forty sheep, the chief share of the animals having been picked up from various villages on the way. The chief's wife was especially delighted with the mirror, and fixing it against the wall she stood admiring herself for a long time, twisting her head from side to side and grimacing with such an air of affectation that it was as much as Nita could do to refrain from breaking into a scream of laughter.

"This is all my own," she said at last, turning to the chief; "your other two wives have nothing to do with it, and are not even to look into it unless I give them permission?"

The chief nodded gravely. The other two wives had while this was going on been occupied with domestic duties and in bringing in various goods. Nita made up her mind at once that they had had a very bad time and were little better than slaves.

As the chief left the hut his wife turned to Nita. "Go and help the others," she said.

Nita understood her action though not her words, and with a shrug of her shoulders went to help the other women. Presently a large bowl of rice slightly flavored with condiment was brought in. The chief, who had returned, sat gravely down by himself to eat it. When he had finished, his head wife sat down and took her share. After she was satisfied the other women sat down together.

Nita hesitated, but she had now recovered her appetite and sat down with the others. Instead, however, of grabbing handful after handful, as did the others, she took as much as she wanted, placed it on the ground in front of her and quietly began to eat it.

The head wife laughed derisively and said something to her husband, but the chief was evidently not pleased and spoke sternly to her, and Nita guessed that she was a valuable captive, and being an officer must be fairly treated. It was, of course, all important that if a British army entered the valley the prisoners should give a good account of their treatment while captive there. The woman was evidently cowed. Afridi husbands use their sticks freely, and it was evident that although a tyrant in the house this woman stood in fear of her husband.

The chief moved across the hut, took down an earthenware plate, and placed it before Nita, who let him see by her manner that she appreciated his act of kindness. He further signified by gesture that she might regard this plate as her own and use it upon all occasions.

When the meal was over Nita assisted in tidying up the room, then went down with a large earthenware jug to the stream and brought it back full of water. She had not been ordered to do this, and the woman nodded to her more kindly than she had hitherto done, seeing that the captive was ready to make herself useful.

After this was done Nita went to her room. The darkness was now closing in. She then went to the native officer, bathed his wound, and gave him some of the food that she had put by for him.

"Don't get well sooner than you can help," she said; "the woman of the house is a vixen of the worst kind, and will set you to work the moment you are able to crawl about. Her husband is disposed to be friendly. I think I frightened the woman. Of course, she did not understand what I said, but I am sure my manner showed her that it wouldn't be safe to touch me."

Nita went down early in the morning. The mistress of the house had not yet appeared, but the two women were hard at work grinding meal. Nita went at once to their assistance. She was clumsy at the work, and her share was very inconsiderable. Still the women were grateful. She could not understand all that they said, but by the way they patted Nita on the back and shook their fists menacingly at the room where the head wife was sleeping, it was apparent that they hated her with a deadly hatred, and were heartily pleased at the stand Nita had made against her on the previous evening.

Matters went on quietly for some little time. Nita set to work to pick up the language, and as their oppressor evidently thought that she could make more use of the prisoner if she understood her language she threw no impediment in the way, and suffered Nita to chat freely with the others while they were at work. She even went so far as to admit to her husband that the prisoner was very willing to work and understood what she wanted done. Still the fact that her husband had placed Nita to some extent beyond her power galled her, and she frequently indulged in violent ejaculations and threats. She was the more furious because Nita received her upbraidings with quiet contempt and did not appear even to hear her. She would many a time have struck her, but the look Nita had given her when she first threatened to do so dwelt on her

mind, and she was convinced that did she attempt to do so "the lad" would, regardless of consequences, return the blow with interest.

CHAPTER V.

As Nita picked up the language she learned to her delight that Carter was recovering from his wounds, and that he was held a prisoner by a chief who lived about thirty miles away among the mountains; also, that his captivity was much more severe than hers, and that while she was allowed, when not engaged in the house, to wander about the village, he was held a close prisoner in the house of the chief. As soon as she learned this she became restless. It would be an easy thing for her to escape alone, but the idea possessed her that she ought to do something to free Carter, and this seemed almost an impossibility. One thing was evident—she must in the first place get an Afridi dress. This would not be difficult. Much more serious was the question how she was to subsist. It might be the work of a week or possibly of a fortnight after her own escape before she could communicate with Carter and arrange for his escape. She would, therefore, need a considerable quantity of food; also a long rope, and a disguise of some sort would be needed for Carter.

Nita began by taking heads of corn from the storehouse downstairs. These she put in a sack, which she hid in some bushes a short distance from the house. Every day she added to the store, and as it swelled she took two or three goat-milk cheeses. She hesitated a good deal whether she should take a male or female dress, but finally decided upon man's attire. She did not intend to show herself by daylight, but a casual glimpse of a female on the hillside would almost assuredly excite observation and suspicion; moreover she intended to stick to her gun, which would be altogether out of character with the dress of a woman. Three weeks were spent in her preparations, by the end of which time the sack was as heavy as she could lift. She had from the first made up her mind that it would be necessary to carry off a donkey or mountain pony, intending to sling the sack on one side of it with a skin of water on the other.

The sack was about a third full of flour, another third of meal, and the remainder was made up of cheeses, some rough clothes and the rope. She had also cut a pliant stick some four feet in length, with notches, to carry a string; for it would clearly be necessary to shoot a note, to begin with, into the window of the prisoner's room. She made three or four rough arrows, which she tied to the bow. She was now ready, but the first thing was to get hold of a pony. In order to do this she once or twice a day took a handful or two of grain to the pony belonging to one of the Afridis, and in a short time it would come eagerly to her when she called. At last all her preparations were ended, and one evening, as soon as the house was all asleep, she took her rifle and the bag of cartridges from the corner where they stood, then some of the chief's robes down from the wall and very cautiously unbarred the door, and carrying the water-skin with her, closed it behind her and started for the hiding place of the sack. Then she went to the little enclosure where the pony was fastened, and calling softly to it, it came at once to the gate, which she opened, gave it a mouthful of grain, and taking hold of its mane led it to where her goods were hidden. She placed two or three of the robes folded across its back, then, with some difficulty, fastened the sack and water-skin on to it. She followed the path leading from the village for four or five miles and then struck off in the direction of the village in which Carter was confined. She had chosen a moonlight night and made her way some miles without encountering any great difficulty. Then she came to a piece of country so rough that she was compelled to halt. At the first break of dawn she was off again and succeeded in crossing the crest of the line of hills separating the valley to the left from the next. Down this she went for some distance along places so precipitous that even the sure-footed pony had difficulty in making its way. At last she came upon a small ravine which she could see broadened out lower down. Here she lay down and slept, after giving the pony two or three handfuls of corn and fastening it to a bush.

In the afternoon she continued her journey. From the description she had heard of the village, she knew that it stood in a strong position on the hillside. When she got down to the bottom of the ravine she again secured the pony and went out into the valley. She was glad to see that water ran down it. This was a great relief to her, for although the water-skin would last her for a long time it would not suffice very long for the pony's needs. She walked on five or six miles farther and then caught sight of a village some miles ahead, which exactly answered the description she had gathered of that in which Carter was confined. Keeping along the sides of the valley and taking advantage of every spur of the hill she got to within a mile of the village, and then ascended the hill till she reached a spot a quarter of a mile to the rear of it. Here she lay down and reconnoitred the village. It differed

but little from the one she had left, and consisted of five or six fortified houses.

Its position was a strong one, as the hill in front of it sloped abruptly away. She selected a clump of scrub a mile away, and wrapping herself up in a blanket lay down to sleep, as it was already becoming dusk. In the morning she started at daybreak, spent the day with the pony, and late in the afternoon started again, and by midnight was safe in the spot she had chosen. The scrub was high enough for the pony to stand unseen, and after giving it a good feed and herself eating some of the grain and a piece of cheese she lay down till the morning. Looking round from here she saw another clump of rather larger trees in a dip half a mile behind her, and at once moved there, for here she would be able to light a fire without fear of being seen. She again started for the village, and found that on keeping to the small ravine that came down behind she could approach within three hundred yards of it without running the risk of being seen. This she did, taking advantage of every rock.

From here, Nita could see all that was going on in the village. The men had already driven out their cattle and other animals to the valley, the women moved about gossiping. One of the houses was larger than the others. This she guessed to be the abode of the chief. For hours she lay watching its upper windows and at last, to her delight, saw a khaki-clad figure come to it and stand for a time looking out. His air was listless, and as the window was at the back of the house and looked up the hill, there was but little to interest him. Now that she had ascertained his position she strolled away again and remained for the rest of the day in the wood, practicing with her bow and arrows. Then she wrote on the sheet of a pocketbook of which she had not been deprived: "Look out for me at 11 o'clock tomorrow night. I will shoot up a string, there will be a rope attached to it, strong enough to hold you, and you can slide down it.—Yours, Nita." At ten o'clock she started from her hiding place, and at eleven reached the village. The house was surrounded by a wall, but, as she hoped, the gate was unbarred. It opened quietly, and going round to the back took post as far away from the house as she could and shot the arrow on which she had fastened her little note at the window opening. At the third trial she succeeded in shooting an arrow right into the room, and then quietly withdrew. He was, she thought, certain to see it when he awoke, as the rooms were generally very small, and he would, she hoped, be certain to wake before any of the people of the village entered his room. Carefully closing the gate again behind her she made her way back to the wood and lay down and slept till morning. She passed the day in a state of feverish anxiety. Now that success seemed almost certain she was far more apprehensive of being discovered than she had been before, and she spent the day at the edge of the wood on the lookout for any approaching figure, but the day passed quietly as the others had done, and as soon as it was dark she strolled down to her lookout near the village, carrying with her her bow and arrows, and rope.

It had seemed to her that the village would never go to sleep that evening, but at last all became quiet and the last light was extinguished. Another half-hour was passed to allow the occupants of the village to settle down. Then she ventured to move, and in five minutes stood opposite Carter's window. The window was, of course, without glass, being closed only in cold weather by a blanket hanging before it. The moonlight permitted her to see a figure standing there. Four times she missed before she succeeded in shooting an arrow into the room. In a minute the string attached to it was pulled. She then attached the end of the rope to it. This was drawn up by Carter, and a minute later he slid down. As he came up to her she whispered "hush," led the way out through the gate and ascended the ravine.

Not until she was two or three hundred yards away from the village did she stop.

"My dear Miss Nita," he said, "by what miracle have you managed this?"

"There is no miracle in it," she answered; "I got away, and naturally I was not going to leave without you. I hope that you have quite recovered from your wounds."

"Quite," he said, "though just at present I seem hardly able to use my legs, for I have had no exercise except what I could get in a room eight feet square. However, I dare say that I shall recover their use again before long. Where are you taking me?"

"To a wood a mile and a half away, where there is a pony and provisions. When we get there we must discuss which way we had better go. It seems to me that it would be better to cross the river and go over the opposite hills. As far as I can make out, that is the way across to the frontier and the direction in which they will no doubt look for you, as I have no doubt they are looking for me. They would no doubt suppose that I should go that way. But I think you will know best for you have travelled about the country a good deal more than I have."

"I really don't know what to say in the way of thanks," he began after a pause.

"You will make me very angry if you thank me at all; you may admit, however, that girls can be of some good sometimes, and are not meant only to be looked at."

"I will never say anything against their courage again," the young officer said. "Now tell me how you have fared, and how you succeeded in getting away."

"I fared fairly well. The chief's wife was a haridan, but her husband rather took me under his protection, and insisted on my having fair treatment. I think he was rather uneasy as to the consequences of his attack on the fort and wished to keep in well with me. So I was fairly fed and allowed a certain amount of liberty in the village during the day. They did not seem to have any suspicion that I was likely to try to escape. They were confident, I think, that I should not be able to cross the mountains alone. Therefore I was able to collect stores, little by little. The chief's magazines were generally open during the day, and I own that I robbed them shamelessly. Then I had but to slip away after the house was asleep. I had collected a sackful of flour and other grain, and a few cheeses, for I knew that I might have to live a long time before I could discover the place where you were confined, and even if I were lucky enough to do so without much waste of time, we might have to exist a considerable time among the hills before we got to the frontier."

"But how on earth could you carry such a weight?"

"I made friends with a pony by treating him to handfuls of grain and had no difficulty in getting him to follow me; and a large skin full of water very fairly balanced the sack of provisions. I annexed two of the chief's robes and turbans and four or five blankets. So we start under good auspices. Of course I brought that rope that you came down by, and my own rifle and ammunition which were in a corner of the chief's room. I wish I could have brought a rifle for you, but there was not one handy and I was sorry that I could not get my revolver; but that fell to the share of some one else when all our goods were taken after the fight."

"Splendid, splendid! But how did you find the place where I was confined?"

"I picked up a little of the language, and learned that the chief in whose hands you were, lived about thirty miles away, nearly due west. That the village stood on a hillside and was strongly fortified, and I was fortunate enough in sighting it without much difficulty, and, lying hidden a short distance away, was not long in making you out at the window. The rest was of course easy. Now I put the command into your hands."

"No, you followed my orders when I was in command of the fort, and now you have escaped yourself and freed me, you have shown such a capacity that I certainly do not wish to interfere with your plans; but I think that what you proposed, namely, that we should cross the river and strike into the mountains is the best, for they will certainly follow me down to the frontier, and I think we should hold on there as long as we are able before trying to strike down. I have no doubt the search for us both will be very hot for the next week or ten days, but it is certain to be pursued on the downward track, as they will make sure that we have gone in that direction. The news that I also got away will not be long crossing the hills to your village, and they will have no difficulty in associating the two events together, and will think that when they catch one, that they are sure to catch the other. Is this the place where your pony is hidden?"

"Yes, I have given him a good meal, and he will be ready to start as soon as we have loaded him up. It is fortunate, indeed, that we have the moon, and shall therefore have no trouble in keeping the right direction."

In five minutes they were moving, and making their way to the river. At Nita's suggestion they kept up the river for about a mile and then struck across for the hills. By morning they were fifteen miles away in an extremely rocky and precipitous country. Here they halted for some hours, and then made their way down hill. They found that they were in fact traveling along near the end of a precipice, at whose foot a stream ran between lofty cliffs. So quickly did the hills slope down to the end of the precipice, that they could only travel with extreme caution and difficulty, and even the pony, sure-footed as it was, had difficulty in keeping its footing. At length, however, the slope became more gradual, and the ravine widened out into a valley, apparently about half a mile wide and a mile long. They chose a dip in the descent, and found when they arrived that they were completely sheltered from the view of any one passing along the valley. But that the ravine was to some extent used was evident from the fact that a few cattle were scattered about.

"I think we shall be obliged to confiscate one of these animals for our own use," Carter said; "a diet of flour and grain would be apt to pall a little even when varied by cheese, and our eventual success depends on our keeping up our strength."

(To be continued.)

Perfect Food Means Perfect Health

Perfect health means bright, sparkling eyes, a clear complexion, a sweet breath, sound white teeth, an active brain and a symmetrical body.

SHREDDED WHEAT WHOLE WHEAT BISCUIT

is a perfect food because it is complete in itself for the perfect nourishment of the whole body.

(Read that statement again.) Shredded Whole Wheat Biscuit is made in the most hygienic food laboratory in the world.

The wheat is thoroughly cooked, spun out into porous shreds and is, therefore, naturally light and short without the use of yeast, baking powders, fats

or chemicals of any kind. It is crisp and compels the teeth to perform their natural exercise. This means perfect digestion, perfect health and relief from constipation.

With the Boys

J. BICKLEY JACKSON, Philadelphia, Pa., age fifteen, says he thinks the difference between a successful man and an unsuccessful man is that the former takes advantage of his opportunities while the latter does not. WEBSTER LELAND, West Haven, Conn., wants to see an Exchange column in THE AMERICAN BOY so boys can offer "trades" with other subscribers. THE AMERICAN BOY tried this once but was so overwhelmed with matter that the department had to be discontinued. Had we printed all the exchanges offered they would have filled several pages each month, and when we did not print them the boys became impatient and thought we were not treating them fairly. HUGH T. HUCKLEY, Winona, Miss., supports himself by work done on Saturdays. He is the leader in the ninth grade of the Winona schools. PAUL McALLISTER, Millville, N. J., age thirteen, is at the head of his class in the eighth grade in school. He has fixed up a reading room in the garret of his home in which he keeps his books, papers, printing press, magic lantern, and game board. He also has a carpenter shop in the cellar. Paul makes money in his father's store by working evenings. He has taken lessons on the piano for three years, and on Lincoln's birthday played in the high school program. He has bought an eight dollar camera. Paul sends us his grades, showing that in every month, from September, 1901, to June, 1902, he averaged over 90 per cent. ROLAND RITTER, Annabel, Tenn., has moved with his parents from Chicago into the mountains of Tennessee, where he helped build a house and barn and consequently for a time was quite busy. He took with him from Chicago a team of horses and had an interesting trip in the car with them. HERBERT BROWNELL, Portsmouth, R. I., writes that he blew his left hand off some years ago by fooling with some dynamite and yet he is able to play baseball and many other things the boys play. Indeed, he was captain last year of a baseball team and also of a football team. This year he is playing on a hockey team, and although eighteen years old is playing with men five and six years older than himself. During the winter he kept books for his father. Last fall he made 350 scalloping with a sailboat, which he says he can handle as well as can a boy with two hands. He wants to be a pilot. ALBERT RAYLE, Lexington, Ga., says

cover about four acres of ground, and in some places are forty feet deep. On account of their clearness they look to be not over ten feet deep. On bright, sunny days the bottom looks as if it were covered with silver and often shows all the colors of the rainbow. He lives near a river which is full of fish, and has much sport fishing, the only thing to mar the enjoyment being the deadly moccasins which inhabit Florida. E. L. BOLLAND, Longford, S. D., lives on a farm. He has a pony, a few books and papers. He thinks every boy ought to invest some of his money in good reading matter; says it will pay better than money out at interest. CHESTER TITUS, Osage, Ia., owns twenty six books and several curiosities that he prizes very highly. ROBERT BRANNON, Moreland, Ga., won second honor in December last in his grade in school and is working for first honor this term, and we hope he will get it. BERT FENN, Tell City, Ind., is a member of a boys' club called "The American Boys' Club," composed of ten boys between the

Sketch by Moore Meigs, Detroit, Mich.

age of eleven and sixteen. Bert is secretary. Meetings are held in a building about forty by sixty feet in size, fitted up for them by the boy's father. The object of the club is general improvement and pleasure. On March 1 they had a debate, the subject being, "Resolved, That Country Life is Preferable to City Life." The affirmative won. He says they have rousing arguments. BERYL B. SHAW, Argos, Ind., tells us about the Culver Military Academy, near which he lives. The buildings and grounds, he says cover about twenty acres, the buildings including a large dining hall besides the college proper and the hotel. There are three hundred students and it is a pretty sight to watch them drilling, particularly when engaged in the cavalry drill, mounted on their beautiful horses. JAMES DURKIN, Great Bend, Kas., has made quite a record for one of his age as a piano player. JOHN J. DAVISON, Broken Bow, Neb., is very proud of his possessions, among which is a collection of curios containing a cat's skull, sea shell that he picked up in England, and birds' eggs. CECIL V. CRABB, Eminence, Ky., although but twelve years old, is studying shorthand very hard and can take dictation from his father and write letters very well, as is shown by a letter before us. TRACY L. SANBORN, Marblehead, Mass., thinks he has the largest private library of any boy in his town, having 170 books, forty eight of which are by Henty. He likes Jules Verne better than he does Henty and thinks "The Mysterious Island" is Verne's best book. He likes the works by Fenn, Ellis, Otis and Munroe. He says: "Sir Walter Scott and Conan Doyle are first rate writers. 'Ivanhoe' is good." At one time Tracy had forty two rabbits and twenty pigeons but he sold or gave them away. The pigeons, he says, were a nuisance. FRANK R. GOULDING, JR., Pensacola, Fla., is very proud of the fact that he lives on the beautiful harbor of Pensacola, sheltered by oak and pine forests. He says the Gulf of Mexico is a very beautiful sight as one looks from the life-saving station. Pensacola has a navy yard, a lighthouse and three forts. He says he supposes that northern boys think there is no ice in Florida, but that there is ice at times in the northern part of the state. RALPH E. GILHAM, Townsend, Mont., wants to know where he can get books on mineralogy. J. H. WINKERS, Savannah, Ga., has many of the Henty books and says he is very proud of the

Sketch by Clinton Henderson, Bugbee, Tex.

there is a large rock near his home, weighing about thirty tons, that is so well balanced on two pivots that it can be shaken by a gentle pressure on the top, and that there is another as large which has the exact shape of a saddle. HUGH PATTERSON, Pineville, Mo., says THE AMERICAN BOY is doing him lots of good; that it has cured him of using tobacco. He is going to buy a camera and a printing press. Hugh is eager to get an education. JOHN HARVEY, age twelve, Idaho Springs, Colo., is interested in the stamp department. He has a collection of 440 different stamps. He earns money distributing circulars. This boy writes a very neat letter. His mother adds a word in which she thanks us for the good, clean paper we are publishing for boys. She says of John that two years ago, when he was ten years old, he was thrown out of a wagon and his left leg was broken above the knee. The doctor who attended him said that he had been on battlefields and seen wounded men, but had never seen greater bravery than this little fellow showed. He was in bed six weeks and never murmured or complained. J. DALEY, Montreal, Can., says THE AMERICAN BOY is a great help to the boys of Montreal, who have no places of amusement at night excepting the theaters. ORA LANE, Ashburnham, Mass., writes that he was interested in the article in the February number about the boy who was taken from the streets of Ponce, Porto Rico, to a school in America for preparation for Harvard College. The boy, Pedro Morales, has been at Cushing Academy, in Ashburnham, for three years, and our boy correspondent says that Pedro is an enterprising boy, earning money by being an agent for the sale of several useful things. He is paying for his tuition partly in this way. Pedro is very popular and seems to be very happy. Our boy correspondent says that since Pedro came to the school others have come both from Cuba and Porto Rico. WALTER L. LYNCH, Butler, Mo., has a large collection of stamps, which he says has given him a better knowledge of foreign countries than he otherwise would have had. He is looking forward to attending the St. Louis Exposition. ADELBERT CAMPBELL, Lebanon, N. H., sends us his school record, from which we learn that he stands very high in his school work and deportment. Adelbert is treasurer of the Daniel Webster Company, No. 1, of Lebanon. BENJAMIN LAZARUS, New York City, has traveled much with his parents in Europe during the past year and taken pictures with his camera, one of which, showing a market street in Posen, Germany, he sends us. FLOYD GUINER, Anthony, Fla., lives about six miles from the famous Silver Springs, whose waters are very clear and

Sketch by an American Boy Reader.

fact that he has never read any of the "Diamond Dick" style of novels. He has recently joined a company of soldier boys under the name of the Lawton cadets. The company drills every Thursday night. G. BARROWS, Sangerville, Me., belongs to a school whose teacher last term offered a prize to the pupil that improved most in writing during the term. He won the prize. PETER HELGESON, Chicago, Ill., sends the editor some pretty pen and ink Easter greetings. STEPHEN KING writes that he lives on a farm five miles from Danville, Ky. He enjoys country life. Last year he cultivated eleven acres of corn, plowing it five times and cutting and shocking it, the corn yielding two barrels to the shock. At the close of school last term Stephen got the highest grade received by any boy in the school. HAROLD WEBSTER, Cripple Creek, Colo., age fourteen, is a member of a club that meets every Thursday evening in the Episcopal church building at Cripple Creek. There are fifteen boys in the club, and every month when THE AMERICAN BOY reaches Cripple Creek, the minister of the church reads it to the boys in the club. The admission fee of the club is twenty-five cents, and dues ten cents a month. The club goes camping every spring, climbing Pike's Peak.

Interesting pen and ink and pencil sketches have been sent in by the following: Guy C. Faurote, Niles, Mich.; John W. Rost, Canton, O.; H. W. Helms, Pioneer, O.; Claude Hope, Clinton, Mo.; Phillip Taft, Rockville, Conn.; Ray Dixon, Winnemucca, Nev.; J. Loyal Kelly, Evans City, Pa.; Mitchell Moon, Cincinnati, O.; John C. Evans, Marion, Ia.; Robert Jones, Temple, Tex.; Ernest Shaffer, Waitsburg, Wash.; Augustin Cass, Plymouth, N. H.; Ralph Hubbard, Dayton, N. Y.; William McFarland, Boston, Mass.; Fred Cook, Detroit, Mich.; Charles W. Johnson, Keota, Ia.

IN WRITING ADVERTISERS, MENTION THE AMERICAN BOY.

The American Boy Lyceum

The Choice of a Subject.

SOME of the questions suggested for debate in this department are difficult. But they are live questions, and the more difficult the better provided they can be mastered. Unless the subject calls for earnest, laborious thought, it will be unprofitable alike to speaker and hearers. Difficulty will discipline and inspire. Of course you must be interested in the subject, and when such a subject has been chosen you must begin to develop it by thought, by persistent, earnest thought. This is of the utmost importance. Think until a purpose has been evolved and a plan formed. Then you will be prepared to read, for you will know just what you want, just what will enable you to develop your plan, to illustrate and enforce your argument. Richter has given a rule of so much value that I will quote it. If it clings in your memory it will be worth more than everything else in this paragraph: "Never read without having first thought yourself hungry."

How to Read.

Having your plan clearly thought out, you are prepared to read. Be sure to have a pencil and notebook at hand. Read dictionaries and encyclopedias. Read books and magazines and newspapers. Read various and even opposing views of the question. And always note the points you will make, the illustrations you will use, the probable arguments of your opponent that you will answer. Do not depend upon your memory; when you see anything clearly, write it down in your notebook. Your original plan may be modified somewhat by your reading; it will, no doubt, be enlarged, but it will be yours as a result of the thought you gave it before beginning your reading. Here is another rule by Richter, which is as good as the one already given: "Never write till you have read yourself full."

A Word From the Editor.

The editor will be glad to make THE AMERICAN BOY LYCEUM a means of communication between those interested in this line of work. Report news items about that debate or prize-speaking contest. A prize of a book of selections will be given to the one sending in the best oratorical selection for a prize-speaking contest during the month of May. Fresh selections from recent orations will be given the preference. Address Editor of "Lyceum," care of THE AMERICAN BOY, Detroit, Mich.

BUILT OVER

Food That Rebuilt a Man's Body and Built It Right.

By food alone, with a knowledge of what food to use, disease can be warded off and health maintained, also many even chronic diseases can be cured. It is manifestly best and safest to depend upon food to cure rather than too much drugging.

A case in point will illustrate. A well known man of Reading, Pa., Treas. of a certain club there, says: "I have never written a testimonial letter, but I have been using Grape-Nuts about a year and have recovered my health, and feel that I would like to write you about it for the case is extraordinary."

"For five years I was a sufferer from a dreadful condition of the bowels; the trouble was most obscure." Here follows a detailed description and the condition certainly was distressing enough (details can be given by mail).

"Nothing in the way of treatment of drugs benefited me in the least and an operation was seriously considered. In May, 1901, I commenced using Grape-Nuts as a food and with no idea that it would in any way help my condition. In two or three weeks time I noticed an improvement and there was a steady gain from that time on until now I am practically well. I don't know how to explain the healing value of the food, but for some reason, although it has taken nearly a year, I have recovered my health and the change is entirely attributable to Grape-Nuts food, for I long ago quit medicine. I eat only Grape-Nuts for breakfast and luncheon, but at my night dinner I have an assorted meal." Name furnished by Postum Co., Battle Creek, Mich.

Some More Live Subjects for Debate.

Resolved, That trusts are likely to promote the welfare of society; that United States Senators should be elected by a direct vote of the people; that reconstruction on the basis of negro suffrage was an unwise policy; that socialism is menacing the best interests of the United States; that Canada should be annexed to the United States; that the United States should not have entered upon its recent policy of expansion; that the government of England is superior in form and operation to that of the United States; that the Monroe Doctrine should be defended at all hazards; that eight hours should constitute a day's labor; that capital punishment should be abolished; that trades unions tend to promote the best interests of the workman.

High School Debates.

The class of 1905 in the Easthampton, Mass., High School organized a "Debating Club" in the fall term, and have had a debate as a class exercise in English every two or three weeks. A chairman and judges were chosen from the class, and the work carried on under the general charge of the teacher of English, who gave credit to each one for work in that department. Great interest was shown and most of the class spoke when the question was open to the house. Those who were appointed as disputants uniformly prepared themselves carefully. The following questions have been discussed:

Resolved, That the advantages of city life are greater than those of the country; that the study of Latin and Greek is a waste of time; that public opinion affects the newspapers more than the newspapers effect public opinion; that the duty of a policeman in a large city is more hazardous than that of a fireman; that Napoleon was a greater general than Washington; that the Chinese laborer should be excluded from the United States; that manual training should be given as much attention in the schools as study.

Oratorical Selections.

The editor of this department knows how difficult it is to find fresh, vigorous selections for prize speaking contests and other occasions. A timely selection will be given each month in this place. Some of those planned for future months have never been published in any book of selections. They are made with the consent of the authors, with special reference to completeness, unity, freshness and virility. It is hoped that this feature will be of great value to the readers of THE AMERICAN BOY.

The Method of Arrangement.

There are two methods of arranging the matter of an argument. By the inductive or analytic method one proceeds from the particular facts to the general laws or principles, from the complex to the simple, from effect to cause. By the deductive or synthetic method, the thought is directed from laws to facts, from cause to effect, from condition to conclusion. A plan written by the inductive method would be the reverse of one by the deductive method, with the exception of the introduction and conclusion. Here is an outline of a debate by the deductive method:

RESOLVED, THAT NEW ENGLAND IS DESTINED TO DECREASE IN IMPORTANCE.

Introduction: A sketch of the important part New England has played in the history of the country.

Outline.

- Her population is declining as compared with that of other parts of the country.
 - Her most enterprising citizens are removing to the west and south.
 - The foreign immigrants to New England are inferior to those of other parts of the country.
 - The Scandinavians (desirable) settle in the west almost wholly.
 - The Germans (desirable also) settle largely in the middle western and southern states.
 - The least desirable immigrants settle largely in New England.
 - Her industries are decreasing in relative importance.
 - Agriculture is declining in New England and gaining in the west and south.
 - The commerce of New England is declining, while that of New York and the Pacific states is increasing.
 - Manufacturing enterprises formerly confined to New England are being established in the south and west.
 - The great money interests that are being developed are mostly outside of New England.
- New England is losing her pre-eminence in education.
 - Great universities like Cornell, Princeton, Chicago, Leland Stanford, Jr., are rivaling Harvard and Yale.
 - Western states are doing more for popular education.
 - They are expending more for Normal schools.

- They are expending more for common schools.
 - They are demanding a superior grade of teachers.
- IV. New England is losing her moral and religious pre-eminence.
- Churches are going to decay in New England, while they are being built in the west.
 - The greater relative number of divorces shows that home life in New England is less sacred than in other parts of the country.
- Conclusion: Recapitulation of the argument.

Boy Journalists and Printers

THE KANSAS BOY is a little four-page paper which makes its bow to the public with the issue of January 1, 1903. It is published by Elmer R. and Wilbert Hart, R. F. D., No. 3, Liberty, Kansas. "The Boy" makes a good start editorially, but the editors were a little careless in printing their fourth page. This issue gives promise of many good issues for the future, and we wish "The Boy" success.—THE PENNANT is the name of an amateur monthly issued by the Pennant Publishing Company, 453 East Forty First street, Chicago. Lee B. Chase, fourteen years old, is the editor. Paul Crissey is foreman; Howard O. Shedd, secretary-treasurer; Charles Zekind, advertising manager. The Pennant is published "By boys, for boys," the subject of yachting being its specialty. The January issue is the first. It consists of twelve pages and a nice cover. In sending us this copy for review the editor apologizes for its appearance on the ground that they only use a 4x6 press. For an amateur publication it certainly does not call for any apology, for it is an unusually handsome publication. Slovenly, slipshod work in the printing is no more excusable than in the editorial work, and the boy who is willing to bring out anything less than the very best that his facilities can produce has some characteristics that will result in his failure, no matter what he undertakes to do. But we do not expect so much art in an amateur publication as we do in a professional publication, for amateurs have not the same facilities, and consequently a particularly neat publication is entitled to notice and credit. The editor of The Pennant, however, has not been quite

ANTHONY E. WILLIS.

President National Amateur Press Association.

We present a portrait of Anthony E. Willis, Brooklyn, N. Y., President of the National Amateur Press Association, the oldest Amateur Press Association in the world. Mr. Willis is 23 years of age and the author of three novels, two of which have met with considerable success, and of six plays. He is a lawyer and popular in New York social circles. He edits and publishes "Fiction," a fine amateur magazine.

so careful in his proofreading as he should have been, though even there the work is above the average. The contents of the paper are exceptionally good.—THE HIGH SCHOOL REPORTER is issued by the students of the high school at Hudson, N. Y. It is now in its third volume. It is a well edited school magazine, and, from the number of its advertisements, we judge it has the support of the merchants of the town, or else Donald M. Power is an exceptionally good advertising solicitor. James C. Van de Carr is the editor; A. Louise Power, the assistant editor, and Charles M. Morrison the subscription manager.—

Do YOU Want A Better Position?

The indorsements and photographs that we have published in the various magazines, during the past year, promptly convinced many that we could train them for advancement. For the few who still doubt that we can enable them to better their positions and increase their salaries we have compiled, at a great expense, the 48-page booklet illustrated below.

This gives the names, addresses, and advancement of over a thousand I. C. S. students whom we have placed on the road to progress and prosperity. Among these you will find the names and addresses of many in your locality with whom you can confer. To those inquiring now it will be sent free. Our Courses cost from \$10 up. Terms easy. No books to buy. Every student of the I. C. S. is entitled to the assistance of the Students' Aid Department in securing advancement or a new position. Start TODAY to rise!

Fill Out and Send in the Coupon NOW!

International Correspondence Schools, Box 1278, Scranton, Pa.

Please send me your booklet, "1001 Stories of Success," and explain how I can qualify for the position before which I have marked X:

Boys in Games and Sport

A Mathematical Rhyme.

(Answer to puzzle on page 177, April number.)

When Jimmie 4d was twelve years old
He showed no tendency 2 work;
His father, kind, 4bore 2 scold,
Till Jim, he saw, would be a shirk.

"See here, my boy," said he 1 day,
As Jim a hearty breakfast 8,
"I lder who the bills would pay,
If no 1 worked from morn till 18.

"Your 4tune will not come unless
You strive, and 1-5— told you once
I've told you fifty times, success
Will ne'er att0d the lazy dunce.

"So quicken up your g8, my lad;
Be4 they pass you in the race;
Xhibit character; be glad
It's not 2 18 2 take your place."

The "Tut" Language.

George Yowell, Crisp, Tex., sends us what he calls the "Tut" alphabet. He says the boys can soon learn it and have lots of fun with it. A stands for A; bub for B; cut for C; dud for D; E for E; fuf for F; gug for G; huh for H; I for I; juh for J; kuk for K; lul for L; mum for M; nun for N; oh for O; pup for P; Q for Q; rur for R; sus for S; tut for T; U for U; vuy for V; wuw for W; X for X; yack for Y; zub for Z. The word "cap," spelled in the "Tut" language, would be "cut-a-pup."

Do As I Do.

Ask for one of the company to offer to do as you do with a saucer. You fill two saucers with water, first covering the bottom of one with soot unbeknown to the company. Stand the victim opposite you, giving him the saucer that has the soot on the bottom and keeping the clean one for yourself. Tell him now to

Simple Tricks on the Wheel.

OSCAR PERRY ROBERTS.

To mount a wheel while it is standing, take a position at the right side of the wheel with the rear pedal almost at its lowest point. Turn the left-hand handle bar with the left hand till the front wheel is at right angles with the back wheel. Grasp the tire of the front wheel in the right hand about ten inches from the fork arch. Place the right foot on the pedal, leaning the wheel away from you. Slowly lift your weight from the ground, not attempting to get into the saddle until you have got your equilibrium, which you will do by moving the front wheel back and forth with the right hand, always retaining your hold on the tire. Practice for some time balancing this way before you attempt to reach the saddle. When in the saddle suddenly whirl the front wheel around with the right hand and ride away. Dismount by reversing the operation just described.

To crawl through the frame, start with the pedals on a horizontal line. Begin the same as in mounting, only in place of getting into the seat, put the left foot through the frame and rest it on a spoke in the front wheel. Then sit down on the crank hanger-bars and push the head and shoulders through the frame, changing the position of the hands to suit the necessity of the case. Now carefully change the right foot from the pedal to a spoke on the right side of the wheel corresponding to the one that your left foot rests on. You will not find it difficult to maintain your balance. Now remove the left foot from its resting place and put it on the left pedal. Raise yourself and gain the saddle.

Another trick is to mount on a standstill, ride a short distance, lay the wheel down flat, pick it up, mount again, ride off, and dismount on a standstill, without touching the ground yourself during the whole time. Mount as described, ride a short distance, dismount to the

being Harry Wright and George Wright, known to all old-time baseball men, who received \$1,500 each. The New York American League Club for 1902 paid in salaries \$70,000. Keeler, of that club, got practically as much money as the ten members of the Red Stockings received in 1869.

The Hoop and the Egg.

Procure an egg and a hoop of wood or iron and inform the company that when you have placed the egg on the floor they will be unable to break it with the hoop without bending the hoop. Perform the trick by placing the egg in the corner of the room close to the wall. There the egg will be secure, and the hoop cannot reach it without its being bent.

Telling a Number by Signs.

Two persons must be in league to perform this trick, one of whom volunteers to leave the room and on his return guess any number that has been agreed upon during his absence. On returning to the room he goes round to some of the people present and places his fingers in a solemn manner upon their jaw bones and appears to be deeply calculating and thinking. On coming to his confederate the latter presses his teeth together and this causes the muscles of his jaws to work, and the number of times he does this will signify the number chosen. All the boy who is doing the trick will have to do will be to count the "nudges" the jaws make.

President Roosevelt's Idea of Honesty.

Mr. Roosevelt's ideas of honesty are well illustrated in the following story. It was during the time he conducted a cattle ranch in Wyoming. Riding about his ranch one day he noticed a maverick from a neighbor's ranch. A maverick is a beast which has not been branded. One of his cowboys began to tumble the maverick over, preparatory to branding it, when the following colloquy occurred:
Roosevelt—What are you doing?
Rustler—O, I am just rustling.
Roosevelt—Are you going to put my brand on that maverick?
Rustler—Yes.
Roosevelt—You go up to the ranch-house and get your time tonight. I don't want to have anything to do with you. If you will steal for me you will steal from me.—Chicago Tribune.

Drum-Beating Extraordinary.

Probably the most remarkable drummer who ever lived was Jean Henri, the famous tambour-major of the Emperor Napoleon.
One of his feats was to play on fifteen differently-toned drums at the same time in so soft and harmonious a manner that, instead of the deafening uproar that might have been expected, the effect was that of a novel and complete instrument.
Another trick of his was to throw twenty-eight drumsticks into the air in all directions and then to catch them in a peculiar manner under his arms and between his legs.
Of his playing it is said that he passed from one drum to the other with such wonderful quickness that the eyes of the spectators could hardly follow the movements of his hands and body.

Mr. Harry de Windt, in his 19,000-mile journey from Paris to New York overland, traveled 11,263 miles in Siberia, employing 800 horses, 900 deer, and 113 dogs. Of the dogs, 110 died. Mr. de Windt's party had to undergo great hardships through intense cold, lack of food, and hostility of the natives. They had an adventurous journey across block ice in the Behring Strait; for seven hours jumping from floe to floe of moving ice, until at last they were rescued by some Eskimo in a boat. "For all the gold in Alaska," says Mr. de Windt, "I would not do the journey again."

U. S. A. LIQUID PISTOL

Nickel-plated
5 inches long
Pat'd

Guaranteed.
Will stop the most vicious dog (or man) without permanent injury.

Fires and recharges by pulling trigger. Loads from any liquid. No cartridges required. Over 20 shots in one loading. Valuable to bicyclists, unescorted ladies, cashiers, homes, etc. All dealers, or by mail, 50c.

fix his eyes intently upon you and do exactly as you do. Then dip your finger in the water, rub it on the bottom of your saucer and then all over your face. The victim does the same and covers his face with soot, and, like many other jokes, no harm is done as the soot easily washes off.

The Mysterious Ball.

Whittle a large cork into the form of a ball about an inch in diameter. Take a long human hair (your sister's will do) and form a loop in it about one and one-half inches long, affixing the ends to the ball with a little wax, or, better still, by forcing the ends into the cork. Pass the forefinger of your right hand through the hair loop, letting the ball lie on the palm when you show it. Place your left hand over the right and at the same time separate the forefinger from the second of your right hand. Quickly push the ball with the thumb of the right hand between the open fingers. The ball falls at the back of the hand, which you keep in such position that you cannot see the ball hanging behind. Remove the left hand closed as if it contained the ball. Then open the hand and show it empty. To make the ball return, you throw up your hand as if catching it in the air. In doing so, with a quick jerk you throw the ball over the back of the hand and into the palm.

The Flying Thimble.

Show a thimble on the forefinger of the right hand. Lay the finger with the thimble on the palm of your left hand, which you close instantly. Now withdraw the finger minus the thimble. Every one believes that it is in the left hand, but it isn't. The fact is, you do not place the thimble in the left hand at all, but in the act of laying the forefinger of the right hand on the left you quickly bend the finger and leave the thimble secreted between the ball of your thumb and the root of the forefinger—only placing the bare finger in the left hand. This you instantly close, and then withdraw the forefinger. Reversing the movement, you can draw the thimble from your pocket.

Big Salaries Earned by Baseball Players.

A new York paper says that John Chesbro, the star pitcher of the National Baseball League last year, and who will this coming summer play with the New York American League Club, will receive a salary of \$8,000, which is the highest salary paid on the baseball diamond. He is to pitch not more than twice a week. If he pitches on an average of two games a week he will receive \$333.33 a game. Averaging six balls, including fouls, for each batsman, with thirty six of them at the plate in nine innings, he will receive \$1.85 every time he throws a ball to the catcher. The old-time pitchers used to pitch every day, but in those days the box was only fifty feet away from the plate. Among the great pitchers of early days were Radbourne, who won the championship in the National League for Providence, R. I.; Clarkson, who, in 1889, pitched nearly every day for Boston; McGinnity, who, at the close of the season in 1900, pitched every day for the Brooklyn, and came to be known as the Iron man. The result on such pitchers was that they lasted only a few seasons.

As showing the difference between salaries now and years ago, note that the salary list of the famous Cincinnati Red Stockings in 1869 was a total of \$10,600, the highest paid players on the nine

The Boy Photographer

Moonlight Effects.

Although there is a particular shade of carbon tissue on the market that for moonlight effects leaves little to be desired, it is not every worker who is prepared to turn out carbon prints. The ferro-prussiate or blue print process does not exactly fill the requirements. I saw some bromide prints the other day that, without actual side-by-side comparison, I should say were even more pleasing than the same prints made in carbon. The method by which they were produced is as follows: The bromide prints, which should be rather light, are toned to almost a bright red in a bath composed of

Uranium nitrate	40 gr.
Potassium ferricyanide	40 gr.
Acetic acid	2 dr.
Water	16 oz.

and then immersed in a weak solution of iron perchloride. The change to a bluish green at once takes place.—Western Camera Notes.

Evolution of the Camera.

It is well to know the humble beginnings of the camera. The name itself comes from the Latin—camera obscura, meaning dark chamber. In fact the first camera was just a dark room. Make a very small hole in the wall of your room, and a small reverse image of what is outside will be seen on the wall inside. Some time, many years ago, a person with a more enquiring mind than the average, discovered that the image was much brighter when the light came through a convex lens. Gradually improvements began to be made, and from a big room with a pin hole in its side has evolved the elegant box of the twentieth century, with its rapid lenses and all the conveniences—and botherations—incident to much thought having been expended on the subject.

The first portable camera was made, it is said, by Giambattista della Porta, of Padua, in 1569. Of course it was a very clumsy affair, for in those days there were

A RELIC OF THE OLDEN TIMES.

Second Prize: M. H. Tardy, Birmingham, Ala.

no dry plates, and when one wanted to get outdoor views it was necessary to take a dark room along, in order to coat the plate and make the exposure before the emulsion dried. In fact the advent of the dry plate, not so many years ago, made it possible to give the art the popularity it has now attained.

It was in 1854 that a certain Captain Fowkes introduced the bellows body, suggested to him by the then popular, accordion, and he had the "gumption" to see that such a body was as applicable to cameras as to musical instruments. It was square in form, however, the tapering idea having been evolved later.

So now we have front and back beds, double sliding rack and pinion adjustments, reversible backs, automatic focusing screens, vertical and horizontal swings, brilliant finders, wide angle and long focus lenses, telescopic bellowses, and a score of other improvements that give the owners delightful surprises for many months after an "up-to-date" camera has been secured. And all the while it is well to remember the humble beginnings of the camera.

THE AMERICAN BOY offers twelve prizes of Two Dollars each for the best Amateur Photograph received during the twelve months in the year, one prize for each month, also a second prize each month of one dollar, for the next best photograph, the competition to be based upon the originality of the subject and the perfection of the photograph. The contest is open to subscribers only. Photographs will be returned if stamps are sent for the purpose. All photographs entered in the contest and not prize winners will be subject to our use unless otherwise directed by the sender, and fifty cents will be paid for each photograph that may be used, the prize photographs in any event to be our own, without further payment than the payment of the prizes. Write on the back of the photograph its title, with a description of the picture, and the full name and address of the contestant, who in every case must be the artist who took the picture.

A Hot Weather Trouble.

A London, England, photographic journal warns its readers against too prolonged washing of plates in hot weather. Sometimes on a plate will appear a clear central spot with radiating lines. It is said to be due to a microbe which never misses the opportunity of propagation in gelatin which has been washed for a long time. Prolonged washing also gives rise to a peculiar pitting of the gelatin, which may be due to local solution. In either case the negative is injured if not absolutely spoiled. Remember, also, that the hot weather, by warming the developer, accelerates it, so that it is necessary to use developer somewhat weaker than normal.

Photographs for Half-Tones.

THE AMERICAN BOY has many times been asked what kind of photographic prints make the best half-tone pictures. The following is from the Caxton Caveat, and if the directions are followed, the photographer will have a good looking print, anyway, even if, because of the subject, it is not available for reproduction in these pages:

Good half-tones largely depend on the photograph or copy furnished. If it is bad, the plate will be bad, also. The engraver may do his best, but he can improve but little on the original, unless expensive painting or touching up of the photograph, or hand-tooling of the plate is contemplated. Even then the results are not what they would be if the copy was first-class. Care should be used in selecting photographs. Have them well mounted and finished. See that the detail is sharp and distinct, and that they don't contain solid blotches of color. Yet contrasts between principal objects and background are essential to keep the cuts from appearing flat. As far as possible, photographs should be selected in a black purple tone. Remember, where large photographs are sent the engraver to be reduced into small cuts, that in the reduction much of the detail will be lost. Beware of photographs printed on tinted paper or those that are spotted or faded from age. Some colors photograph much stronger than they appear. A brown or yellow tint or spot on a photograph that is scarcely apparent to the eye will badly deface a plate when completed.

MEAL TIME DRINKS

Should Be Selected to Suit the Health As Well As the Taste.

When the coffee toper, ill from coffee drinking, finally leaves off coffee the battle is only half won. Most people require some hot drink at meal time and they also need the rebuilding agent to build up what coffee has destroyed. Postum is the rebuilder, the other half of the battle.

Some people stop coffee and drink hot water, but find this a thin, unpalatable diet, with no rebuilding properties. It is much easier to break away from coffee by serving strong, hot, well boiled Postum in its place. A prominent wholesale grocer of Faribault, Minn., says: "For a long time I was nervous and could not digest my food. I went to a doctor who prescribed a tonic and told me to leave off coffee and drink hot water."

"I did so for a time and got some relief, but did not get entirely well, so I lost patience and said: 'Oh, well, coffee isn't the cause of my troubles' and went back to drinking it. I became worse than ever. Then Postum was prescribed. It was not made right at first and for two mornings I could hardly drink it."

"Then I had it boiled full fifteen minutes and used good cream and I had a most charming beverage."

"I fairly got fat on the food drink and my friends asked me what had happened I was so well. I was set right and cured when Postum was made right."

"I know other men here who use Postum, among others the Cashier of the Security Bank and a well known clergyman."

"My firm sells a lot of Postum and I am certainly at your service, for Postum cured me of stomach trouble." Name given by Postum Co., Battle Creek, Mich.

Advantages of Paper Negatives.

Paper for negative purpose is made by several makers, and is upon the market. For large work it possesses quite a number of advantages over both glass and celluloid. The slight grain which the paper gives to the print from it is anything but a drawback in a large size, the softening of the image to which it gives rise being in most cases a distinct improvement, especially when the printing process is platinum or carbon. One great advantage which the paper negative presents is the ease with which it can be retouched and worked up with pencil, brush or stump. Fine work, spotting, etc., can be done on the gelatine surface, while toning down or holding back is best accomplished with the help of the stump on the paper side. The advice is often given to oil such negatives before printing. By giving them a coating of vaseline, well rubbed in and afterward blotted off as thoroughly as possible by means of blotting paper and a warm iron, the time of printing can be very greatly reduced, and at the same time the apparent grain is reduced also. In most cases, however, there is no advantage whatever in oiling the paper, and there is, on the other hand, the drawback of an extra operation, of the greasy nature of the result, and of the fact that if the negatives are stored away the oil will be found to disappear from them in patches in the course of time, necessitating a further oiling before the negatives can be again printed from.—Photography.

ADVERTISE IN THE AMERICAN BOY IT PAYS

A NIGHT ADVENTURE WITH WOLVES

BY
E. A. BRININSTOOL.

WERE you ever placed in a position where each particular hair on your head stood up like the quills of a punched porcupine, and the shivers went chasing up and down your back in mad confusion? Have you ever laid awake nights and recalled with a thrill the one time in your existence when you would not have given a nickel for your chances of escaping with your life? I was placed in such a position just once.

It was one winter night in 1876, while I was visiting an uncle in northern Minnesota. I had just come from a hard pull at my books in college, somewhat run down in health, and the fresh, crisp air of the north was most invigorating to me after my close confinement for so many months.

My uncle's family consisted of three grown-up daughters and one son, Jack, who was three years my junior. He was a remarkably bright young fellow—a born athlete, a fine shot, and stood unrivaled in that country as a skater. A large river ran within a hundred yards of my uncle's house, which afforded us an excellent opportunity to indulge in this exhilarating exercise. The country was alive with game, and as both shooting and skating were two of my particular weaknesses, I soon found my health rapidly improving from the vigorous outdoor exercise.

On moonlight nights it was a favorite pastime with us to take a spin on our skates up the frozen river a few miles. These little trips were the most pleasant experiences that I now recall. With the river a perfect glare of ice, and the keen, frosty atmosphere just sharp enough to send the blood bounding through my veins, it was no wonder that I regretted the approaching time when I must return to college and resume my studies.

On one of these beautiful nights, about a week prior to my departure, when the ice was at its best, we left the house directly after supper for one more glorious trip. Jack's dog, a huge animal of a mixed breed, seemed anxious to accompany us. He whined dolefully when Jack tied him inside the woodshed, but the ice was too glary for "Bingo," and we knew it would simply tire him out, as we contemplated going farther up the river than usual to get some branches of a vine on which grew a beautiful red berry. Jack's sisters were going to give me a "send-off" before I left, and wanted the vines and berries to decorate the house with. Jack knew of only one spot where this winter vine grew, and it was several miles up the river.

As we left the house my uncle called out:

"Now, boys, be careful to-night. You remember Baptiste said the wolves are getting bothersome over in the Meeker district, and you are liable to run across a pack by going toward that section. Keep your eyes open."

We both laughed. Baptiste was a French-Canadian trapper who came regularly into the settlement with his packs of furs to sell to the traders. That morning he had stopped for a brief rest and chat, and during the conversation had remarked that he had heard wolves howling down the river in the Meeker district. We knew wolves occasionally ventured down in the neighborhood of uncle Wallace's, and the previous year they had grown so bold that it was not safe to venture down the river very far after dark, but as no reports of their depredations had been heard this season the matter had been given little thought.

"Hadn't you better take your guns, boys?" asked aunt Mary anxiously, as we wrapped our mufflers about our necks and pulled our caps down over our ears.

"Oh, we can't enjoy it if we have to lug our guns along. You people are too scary. Old Baptiste

always makes a mountain out of a mole-hill," exclaimed Jack.

"It's just as well to be a little cautious, anyway," remarked uncle Wallace. "Strap on your revolvers, anyway."

Jack grumbled at what he thought was undue precaution, but we slipped our six-shooters into their holsters and buckled them around our waists outside our coats.

"You can come to our rescue if you hear us whooping and making a Fourth of July disturbance," observed Jack, with good-natured sarcasm in his tones, as we said good-by.

It was a perfect night. The moon shone down on the frozen river, gleaming and sparkling, and giving it the appearance of a long, bright band of silver. A more beautiful night for skaters could not have been ordered. The weather was intensely cold, but we were warmly dressed and knew we should not suffer on that account.

We sat down on the river bank and fastened on our skates—long, narrow, wooden-topped ones of the "rocker" pattern, which strapped on instead of clamping. "Club" skates at that time had not made their appearance.

As we were thus occupied a mournful howl from old Bingo was wafted to our ears.

"Wonder if we hadn't better let him go?" queried Jack.

"I wouldn't," I answered. "We don't want to be bothered with him. He couldn't keep up with us and would get tuckered out before we were half way there."

"Howl away then, Bingo," laughed my cousin, circling out toward the middle of the river. I dashed after him, and soon the dog's wails were left in the distance.

On we sped over the glimmering ice, at a pace which made the steel ring merrily beneath our strokes and the sharp winter air whistle past our ears. Occasionally we let out a warwhoop, just to hear our voices echo and re-echo through the still clearness of the night. Sometimes we skated in shore, just at the edge of the great forest, which was picturesque with moonlit loveliness; the trees with their shimmering coating of frost sparkling like millions of diamonds. Occasionally we could hear some tree far back in the woods, snap and crack under the biting atmosphere, as Jack Frost drove his mysterious wedge into it.

Rapidly we cut through space, and must have gone some three miles on our journey, when, coming to an old log which projected through the ice, about a hundred yards from shore, we stopped for a short breathing spell.

We sat there possibly ten minutes, my cousin facing me. I was in a position where I could see the dense forest behind him. As we were chatting and discussing our trip I suddenly observed a movement just at the edge of the woods, and then, in the bright moonlight, I saw a large animal emerge stealthily out from behind a large log and sneak down toward the bank of the river.

"By Jove, Jack, there's Bingo!" I exclaimed, jumping to my feet and pointing toward the animal. "How could he have gotten out of the house? See how he sneaks along, just as though he was ashamed of being seen."

My cousin faced quickly about with an exclamation of alarm, and before he could reply, the animal stopped short in its track, sat down on its haunches, threw back its head and uttered a prolonged howl—"Ou-oo-oo-oo! Ou-oo-oo-oo!" It was a howl which sent a thrill through me such as I had never before felt—a sound which started in with a low rumble and increased in density until it seemed that there were half a dozen animals instead of but one.

"Wolves!" gasped Jack, starting to his feet. "Hark! Do you hear that answer?"

Far back in the deep recesses of the mighty forest came an answering howl—low, almost indistinct, but in tones of sufficient depth and meaning to warn us that the call had been heard and the pack was gathering at the summons.

Mute, at the awful predicament in which I saw we were placed, I turned to my cousin.

"Quick!" exclaimed Jack in a low tone. "Look to your skates. Are the straps good and tight?"

I nodded a reply, and my cousin dashed directly ahead toward the middle of the river. I was instantly at his heels. A nearer and more savage howl echoed on the still atmosphere, and, as we sped onward at lightning speed, I glanced back, while a snapping and smashing in the underbrush and an eager yelp, told us that the brutes were hot on the trail.

"Keep well in the middle of the river where the ice is smoothest!" shouted Jack, and in a few hurried words he explained that by reason of the formation of the wolves' feet they were unable to turn quickly on the glassy surface, and that our only hope of escape was in making quick dashes to one side when the wolves caught up with us and attempted to spring.

On we flew, bending low and putting our whole energy into every stroke. The wind fairly screamed in our faces and brought tears to our eyes, so rapidly did we skim over the frozen surface, while, above all, we could hear the patter, patter, patter of swift-flying feet and the yelps and whines of the savage brutes.

It was, indeed, a race for life! What if we were to trip upon a stick? What if a strap should break? We would be torn to pieces quicker than you could speak the words. A thousand thoughts flashed through my mind, and my whole life seemed to pass in review before me like a vast panorama.

On, on, with that horrible yelping in our ears. We could hear the claws of the brutes cutting the ice with startling clearness. I glanced back over my shoulder, and my hair fairly stood on end, as I counted one, two, three, four, six, eight of the blood-thirsty animals not a hundred feet behind! Suddenly my hand touched the butt of my revolver.

"Jack!" I screamed. "The guns—can't we stand 'em off with our revolvers?"

"On!" shouted my cousin. "We haven't but six cartridges apiece. We must save 'em for the last stand!"

The last stand! Would there be a last stand? Must we be torn to pieces by these savage brutes? The thought was maddening. We bent every energy, but the wolves gained steadily. They doubtless saw there was no escape for us, as they redoubled their yelps and seemed to increase their speed. My legs almost tottered under me at the terrible strain I was compelled to put forth to keep up with my cousin. I could fairly hear their panting, now, and seemed to feel the hot breath of the fierce animals in my face. Again I glanced back. The leader of the pack was not twenty feet away.

"Pull your gun!" panted Jack, "and dash to the left. I'll go to the right. Let the wolves go between us, and then give it to 'em as they slide past. Make your shot count!"

Hardly had he finished speaking before there was a horrible snarl at my heels, and I dashed sharply to the left, narrowly escaping being hurled to the ice, as the foremost wolf, with a piece of my trousers' leg between his teeth, slid growling past me.

True to our expectations the wolves were unable to check their speed. The maddened brutes slid by on their haunches, vainly trying to stop their onward speed. Their eyes shone like coals of fire; their savage jaws snapped together like steel traps,

and their dripping tongues were lolling from their mouths, forming a picture which has often, in my sleep, aroused me with the cold, clammy sweat breaking from every pore in my body.

Bang! Jack's revolver spoke sharply on the frosty air. The ball struck the ice and went ricocheting across the glassy surface. I fired almost instantly with better results. There was a sharp howl of pain which told me that the bullet had not been wasted, and as we dashed ahead the wounded animal made a desperate attempt to follow the others, but dropped yelping on the ice.

The rest of the pack stopped as their comrade fell, and instantly there was a scene which baffles description. We did not pause to see it, but the savage snarls and howls which floated down the river told us as plain as sight could tell that the pack were making short work of their wounded companion. We could hear their awful snarls as we forged ahead, being thus enabled by our maneuver to gain several hundred feet.

"That's the stuff!" shouted Jack. "Don't waste a single shot. Our only hope is in wounding an animal every time."

On we went at the top of our speed, but we were not long alone. As soon as the wolves had disposed of their wounded comrade their whines and howls

of rage again told us that they were once more hot on our trail, now with renewed enthusiasm after a taste of blood.

Patter, patter, patter! Again the brutes were at our heels, and once more we dashed aside as the wolves lunged forward savagely. Bang! Bang! Two snots we fired as the animals slid past us. Neither shot look effect. Neither Jack nor myself were expert with a revolver, and it was only luck and chance when we made a telling shot.

"We must make the folks hear in some way," gasped Jack, as again we struggled forward as fast as we could spin. "There's the big leaning oak, half a mile ahead. When we pass that we must yell like wild Indians."

I nodded. My breath was beginning to come hard, and the very blood was boiling in my veins. Could we make the leaning oak? Again that awful snarl rang in my ears, and as we once more turned sharply and fired, two of our pursuers dropped with loud howls to the ice.

Again the pack stopped. This time they had a double portion to dispose of. The leaning oak was but five hundred yards away when they again caught up with us. Another quick turn, and two more shots. One wolf was laid out, and we spurred ahead, passing the oak and yelling at the top of our voices. It

seemed as if we made noise enough to have been heard five miles. The wolves also redoubled their exertions, and were once more at our heels just as the light, which Aunt Mary had left in the window for our benefit, threw its welcome beams in our faces out across the ice.

"Stand fast!" yelled Jack. "They'll hear us! Let 'em have the rest of the bullets!"

We had three shots apiece left in our revolvers, but at the first fire the door of the house was flung open and two figures came bounding down to the river bank.

Bang! Bang! went their rifles, mingled with the sharper crack of our revolvers. Three more of the wolves dropped in their tracks, while the remainder turned and fled up the river, followed by a fusillade of shots.

"How you like um, anyhow?" grimly exclaimed old Baptiste, as we fairly fell into their arms.

"I reckon you boys won't go skatin' after dark any more," remarked my uncle, as they almost carried us to the house.

We didn't. One experience of that kind was enough for us, and to this day I never look at a pair of skates without shuddering, as I recall that thrilling race for life on that moonlight night down the frozen river.

Fencing at the University of Pennsylvania

In the estimation of the foreign critic who has looked upon our sports from a European viewpoint, we are entirely too strenuous in the matter of athletic competitions. When the American college boy has proudly exhibited the tangled heap of perspiring humanity on the football field to a visitor from Germany, the Teuton has snarled in derision and raved of the sword duels of his own student days, when more blood would be shed in five minutes than the American devotees of football offer up to the god of that game in an entire afternoon. The British university graduate says we worship brawn rather than skill and do not favor the sports of gentlemen. To the American boy's retort that the cultivation of muscle is more desirable than the training of the eye and hand, the English boy returns answer that American athletes, rowing men, and what not, have failed to reach that point of excellence where foreign competitors in international contests fear them. The answer is unanswerable. Something is lacking in our method of training athletes, and the students of the University of Pennsylvania, who prize their reputation in the world of sports as highly as do those of any of the leading institutions of learning, believe they have made a step in the right direction by adding fencing to the athletic curriculum.

Already there has developed a great deal of enthusiasm over the new sport of swordsmanship. Three evenings a week have been set apart in the gymnasium of the university to the practice of fencing. An instructor, Lieutenant I. Terrone, formerly an officer in the Italian navy, has been engaged to teach the boys the art of thrusting and parrying, and the fencing team is to be a regular feature of future programs of sports at the college, or meets with rival institutions.

Fencing is distinctly a gentleman's game. Swordsmanship has always been a refined form of athletic competition. All the European universities have their regular championship meetings for this form of exercise. No variety of athletic sport calls for more skill, strength or activity. None is more spectacular. In watching a contest of well-matched swordsmen the spectator needs no knowledge of the game to enable him to see and appreciate the fine points. From start to finish the fencers must throw their entire energies into the bout. One moment strength is opposed to suppleness; the next, suppleness to strength. The attacker of one minute is the attacked of the next. The wrist must be of steel to continually turn the foil to parry and thrust. The eye must never for a moment leave the elusive blade of the opponent. The muscles are one instant held rigid, the next relaxed. Forward and back the fencers move, while the thin blades glide in and out of the guard, and lightning-like plays are made with the foils, lunges so swiftly done that it seems to the onlooker no eye can

U. OF P. FENCING TEAM PRACTICING FOR INTERNATIONAL MEET.

follow them and no wrist be made to move quickly enough to ward off a touch. Nothing is prettier than to watch two youths who are masters of their weapons engage in a bout with the foils.

It needed only one evening's exhibition in the gymnasium of the University of Pennsylvania to make the students enthusiastic devotees of the sword. The initial step was taken by Knipe, an old graduate of Cornell, who is taking the medical course at the Philadelphia college. Knipe is a skilled swordsman. After seeing him fence the students speedily decided to organize a fencing team, and the following day the team consisted of Friday, Castner, Schellenberg, Katzenshine, Braum, Pound, Leyemel, Fleisher, Dukes, Wilson, Scott, Rhoades, Mendenhall, Ludes, Latimer, Hoopes, Haupt and Corson. All these men have since become clever fencers.

At first it was difficult to find an instructor who could be relied upon to coach the students successfully. There are two systems of fencing, the Italian and the French. They differ so that it is necessary to learn one or the other, but which is the better has never been satisfactorily decided. Knipe, who was made captain of the University of Pennsylvania fencing team, had been taught the French method. But no French instructor could be had, and perforce the Italian swordsman was engaged. Swordsmanship originated in Spain and the two schools of Italy and Spain date from the time when travelers from the Peninsula introduced fencing into France, and the Spanish Bourbons made sword exercises popular in Italy, after the conquest of Sicily. The Italians have not changed the style much since then, using still the long foil with bell-like guard that resembles the old Spanish rapier, while the French have modified the weapon so that it is lighter and more supple than the Italian blade.

Having decided that the Italian instructor would do, the students went to work with vim and enthusiasm to conquer the art of scientific fencing. At first the gymnasium of the university was a scene of wild and misguided efforts that almost drove the instructor to despair. It is difficult to convince a beginner that scientific swordsmanship is not like cutting daisies with a walking stick or trimming blossoms off a hedge with the top joint of a fishing rod. The novice with the foil cannot be made to understand that he must keep as much as possible in one position, using the wrist to direct the movements of the foil, moving the forearm seldom and above all avoid slashing and stabbing, which is not sword play of the rapier variety. "Lunge wix ze point," repeated the Italian instructor with monotonous regularity. Lieutenant Terrone, by the way, speaks English with a French accent. "Lunge wix ze point. Ze point here." By slow degrees the students

were taught to lunge scientifically, and then were pitted against each other, while the instructor looked on and suppressed any tendency to wildness, which is one of the worst faults of the inexperienced fencer, and one that presages certain defeat when an opponent who can keep cool is encountered.

With very little preliminary training the University of Pennsylvania boys met the West Point fencers. The cadets beat, but certainly did not disgrace their opponents. The outcome of this and other meets with experienced fencers has increased the enthusiasm of the red and blue swordsmen and enhanced the popularity of this most knightly of sports with the collegians.

Recently one of the rowing men, a young giant, who looked with disdain on the refined game of fencing, was induced to put on the mask and gauntlet for a bout with one of the swordsmen. In ten minutes, despite his training, the rowing man was forced to cry "enough" and throw off the mask to wipe his dripping face. Any boy who thinks fencing a lady-like exercise should try it with a swordsman of even moderate skill. He will find that boxing is child's play in comparison.

The Two Fire Demons

A startling exhibition has recently been given in Paris by two young Americans, whom the people there call the "Two Fire Demons." So remarkable was this exhibition that a well-known scientific paper became interested in it, and its investigation has resulted in the discovery of the secret.

One of the most startling feats performed by the young men was to stand on the stage, in full view of the audience, and without any apparatus in sight, cause long and brilliant flames to dart from the tips of their fingers, and from their mouths, lasting at least half a minute. No one could discover how the feat was done, though every chance was given to the audience to do so.

Here is the explanation: Dressed throughout in brilliant red, the men stood on a carpeted box, which was ostensibly intended to raise them up in full view, but really to contain the half-chemical, half-mechanical device by which they produced the results. This box concealed two rubber bags containing illuminating gas, and compressed by weights. To the heel of each man's right shoe was attached a contrivance terminating in a spout. This spout was the point of entrance for the gas.

Attached to the spout was a slender tube of vulcanized rubber, which, being of the same red color as the costume of the performer, was not seen by the audience. The tube was carried up the leg and the back, and inside both sleeves, next to the skin. At the wrist the tube was connected with a still smaller tube, very flexible, and of the color of flesh, and this ran along the palm of the hand, terminating at the tip of the forefinger in an opening under the nail. A similar small tube ran along the neck and under the chin as far as the lips.

To make a connection between the small tube on his body and the one that ran up from the gas bag in the box beneath him, the performer had only to place his heel carefully on a certain spot in the carpet. Thus the gas was made to flow into the small tube, and as it poured out of the opening at his finger tip or at his lips, as the case might be, he ignited it by a spark from an electrical machine concealed in his clothing.

So the "Two Fire Demons" turned out to be nothing but clever tricksters, after all.

PURE GOLD
Z. IRENE DAVIS.

SO YOU have a place!" enviously exclaimed the leader of a group of newsboys during the lull that followed the rush of the sale of papers. All eyes were turned upon the quiet, earnest boy to whom this question was addressed. "Yes," he answered simply. "I begin tomorrow morning."

"Good for you," chorused the group in sincere sympathy. They had each tried to help William to obtain steady employment ever since the sad news came that "The Kentucky" was wrecked, and its captain, William's father, was among the missing, for the boy must now earn his own way and help his mother and invalid sister, also.

"Where do you work?" asked Sandy, with his customary abruptness. At McIntyre's Hardware store," he replied with a degree of importance. "P-o-o-h," was the scornful rejoinder. "Every lad of us has tried it there. I'll just give you two days," said the leader with a knowing wink at the others. "It's too bad," they chimed in with real sympathy, "but we'll all do our best to help you at the end of that time."

William presented himself the following morning at the general office of McIntyre's Hardware store. His task was assigned to him in the basement. A large chest containing a medley of screws, knobs, rings, keys, hinges, etc., stood open before him.

"These," said the overseer briefly, "were thrown here as you see them at the time of the fire. Sort and place them in the proper boxes and set the chest in order. You have two days in which to do it. If it is not completed in that time we have no further use for you."

The boy's heart sank as he contemplated what was expected of him. He understood now why the boys had laughed, and he was about to say to the overseer that there was no use in trying, but found himself standing alone.

William was a sturdy, manly young boy of eleven, quick enough to sell more papers than many of his older companions. Perhaps he could succeed here also where they had failed. Finally the thought of his mother nerved him, and he resolved to do his best. When he made that resolve, something was sure to follow. Accordingly he went to work. The first thing that came to hand was a set of chisels. All the chisels of this brand were selected and then the proper box searched for in which they were to be deposited in order. There were many tools of which he did not know the names, and he wasted much time in trying to discover just where they belonged. He did not despair, however, but faithfully kept on until noon. He worked a little later than the other workmen and then hurried home to relate the new experience to his mother.

An appetizing meal was awaiting the young breadwinner, and the gentle look on his sweet-faced sister made him forget for a time the bruises on his hands from the rapid handling of the cutlery. He returned a little before the required hour, first asking his mother to keep supper until dark.

"But, William, dear," she gently remonstrated, after readily granting the promise, "unless you are more careful of your hands, they will be unfit for work tomorrow. Buy a pair of buckskin gloves. They will more than repay you."

He ran all the way to the store and, after fitting himself with gloves, hastened to work. By evening, although he had made quite good progress, he found that he was not nearly half through. It was a discouraged, disheartened boy that took his way home that night. "Not half through," he groaned, "and just one day more. If I fall here, I am out all around."

The home hearth gave forth a cheery blaze and the lamp burned brightly on the neatly-laid table. As he joined the newsboys in the rush with papers that night, there was a general condoling with him by his comrades, which would have excited his mirth if he had not been so irritable.

"Half through?" asked the leader. "No, not quite," replied William, growing ashamed of himself, "but I'll be more used to it tomorrow."

The light had scarcely penetrated the room where McIntyre's chest of tools had worsened a dozen boys when the new errand boy took his place. He went about it deftly with a determined look, and by noon the filled boxes were rising in orderly prominence around him; he encouraged himself occasionally with a look of profound satisfaction at their growing tiers. He did not stop for luncheon, so interested had he become in his search for the bottom of the huge box. The hours went by very swiftly. Suddenly his face brightened. There among some brass heads lay a twenty dollar gold piece. "It isn't mine,"

flashed through the mind of the boy. "But there was nothing said about money. Better keep it," argued something within him. Whatever his conclusions were, the coin lay safe in his vest pocket and once more he fell to work. All at once a glad look came into his eyes. "The end!" he exclaimed half aloud, and just as the last key clinked under its cover he glanced up and there stood the overseer looking at him.

"Come with me to the office," said Mr. McIntyre with a pleased expression beaming from his countenance. After they were seated William drew the gold piece to sight and gave it to him with its little story. That "something within him," after a fierce struggle, had been conquered.

"I knew the money was there," said his employer kindly. Now I know I can trust you. You are the boy we want, and we will keep you just as long as you want to stay, and raise your wages from time to time. Your father was always my friend. Take this gold piece to your mother," and he placed it in the boy's hand, as a compliment to the boy that's "pure gold."

Maxims for Boys
N. C. Usher, in "The Brigade"
(London)

There are some common-place sayings I would like to print up in fine, large letters in every workshop and factory and office. I will tell you some of them. They were impressed on my mind in very early years by an old nurse, and they have influenced me all my life.

One of these maxims is, "Whatever is worth doing at all is worth doing well." It is sad to see the half-hearted way in which some boys go about their business; it makes one long to take the tools out of their hands and do the work for them. Then there are others, who only think of getting done, without caring how; their work is scamped and unsatisfactory. They forget the Master's words, "He that is faithful in the least is faithful also in much." Since there is nothing too small to be done to the glory of God, surely we should not think it too much trouble to do our work in such a manner as to gain His approval.

My second maxim is, "Never put off till tomorrow what you can do today." There is no time like the present; therefore, when you are told to do a thing, if possible, do it at once. Further than this, when you know a thing should be done, do not wait till you are obliged to do it. It is a sure sign of a good workman that he tries to be beforehand with his work, and such an one will certainly be valued. Never put away your tools dirty, intending to clean them by-and-by; do not sweep the dust into a corner to be taken away tomorrow; do not leave those bills to be delivered this evening if you ought to take them in the morning. "Whatever thy hand findeth to do, do it," and do it at once.

Another of my old nurse's mottoes was, "Civility costs us nothing and gains us much," and this she emphasized by a little narrative that made an impression

on my mind. The story related how a young girl, who had helped an unknown invalid gentleman to regain a stick he had dropped, was afterwards surprised to find that this gentleman had left a large sum of money in his will in recognition of her civility. Now I cannot promise that anything of this kind will happen to you, but of this I am sure: If you sow gentle words and kindly actions, you shall reap the same; if you are considerate to those with whom you come in contact, they will consider you.

One more of these sayings, of which experience has taught me the value, is, "Do not believe half you hear and not all you see;" young people are often so ready to jump to conclusions; they put two and two together, and make the whole fit in with their own ideas, and then speak of it as fact. You may catch a stray word here, a snatch of conversation there; you may see an action that confirms your suspicions, and after all,

PHIL HEXOM, DECORAH, IA.
From a pencil sketch drawn by himself.

you may be quite wrong in what you think. Be very careful in forming an opinion and never be ready to judge others by hasty conclusions.

Yet there is another which I cannot leave out, "Take care of the pence, and the pounds will take care of themselves." Every lad in a good situation, and earning fair wages, should lay by a little against a rainy day; so many fritter away their pence on novelettes, sweets, tobacco, and other rubbish, and then, when out of work, or overtaken by sickness, they have nothing to fall back upon. I would advise every lad to have an account in the savings bank. It is a very simple matter either to put your money in or take it out. You can put in as little as a shilling at a time. Still, while advising you to save, lads, I would not wish you to be mean; and, remember, no one was ever yet rich, who was not rich towards God.

Can Do It If He Will Try.

A young man writes us from Illinois, wanting to know whether it is possible for him to work his own way through one of our agricultural colleges. It is if he is made of the right sort of stuff, and it has to be pretty good stuff. Most of these colleges are so managed that all the work a student is able or willing to do upon the college farm is given him at a liberal rate of compensation. A young man should get together a fair outfit of clothes and not less than \$100, however, before tackling this job, for he could hardly expect to do justice to his studies and spare more time for labor than would suffice to pay for his board and incidental expenses. Then if he should be sick his nest egg would come handy. An education thus dug out by hard knocks, self-denial and perseverance is always worth more to the boy than when absorbed at the expense of sight drafts upon the governor at home. A course of study attempted on these lines means no luxuries, mighty little athletics, no girl business and quite likely celluloid collars and ten dollar dress and Sunday suit. Moses put in forty years at this sort of work in the wilderness to fit him to lead his people, and any young man who wants to be somebody and do something can afford to play the Moses act for three years. The very best training for a young man is to want a whole lot of things real bad and not be able to get them. Then after awhile he will learn to want something worth having and will go for it and get it.—Exchange.

The Tallest Hotel.

New York is about to put up the tallest hotel in the world. This reminds us of a joke that appeared recently in "Smart Set."

Clerk—Michael, are you about through moving those trunks?

Porter, Yis, Sorr; in a few minutes.

Clerk—Well, when you have finished stretch the life net over the front pavement. Mrs. Smith has just telephoned from the top floor that her husband has fallen out of the window.

LIEUT.-GENERAL MILES.
Drawn by Phil Hexom, Decorah, Ia. Age 18.

JOE JOLLY BOY

(BEGUN IN APRIL.)

IN WHICH HE TELLS OF THE CANNIBALS AND HIS NARROW ESCAPE.

I had heard the fishermen say that somewhere in the China Sea was an island inhabited by cannibals, and that many fishermen whose boats had been blown far out to sea by storms had been captured and eaten by these islanders. The stories had not frightened me, as I knew the cannibals never approached the shore, and that there was no fear of my ever meeting them. The wind held steady for me on the night I saw the mermaid, and, though I had to manage the boat, I caught a few winks of sleep now and then. If I had not been born jolly I should have felt very lonely out upon the wide sea by myself and darkness all around, but as it was I sang and whistled and laughed, as on the previous night, and the hours slipped away and daylight finally came.

As I had seen no canoes on the shore I felt safe when I was half a mile from the beach, but lo! three boats came paddling after me as I looked around.

They had been concealed in the bushes farther down the shore. There were six natives in each craft, and they were determined to capture me. I held my boat before the wind, that she might go at her best speed, but I soon saw that the canoes were gaining on me.

If I had laughed before, I did not do any laughing now. I knew that if I was captured I should be roasted and devoured by those terrible looking men. My boat went through the water pretty fast, but the canoes sped faster, and when I was a mile and a half from shore I could have thrown a stone over the nearest craft. I had no weapons of any sort, but even if I had had a rifle or spear I should have been helpless to fight so many enemies.

I was saved in a strange way. As the canoes came on, and as the first one would have been up to me in five minutes more, some sort of a creature rose up out of the sea and clutched the craft and dragged it under. I cannot tell you what it looked like, as my face was turned the other way. I heard yells and shouts from the cannibals, followed by a great splashing in the water, and when I looked around the canoe was gone and two or three savages were swimming toward the other craft.

Whatever it was that had come to my rescue, it so terrified the savages that the two other canoes immediately put back and made all haste to reach the shore, and I was molested no more.

I could see other people also—men, women and children—on the beach, and they kept shouting and shaking their fists at me as long as I was in sight. It was a good two hours before I felt like laughing over my adventure, and perhaps I did not laugh very heartily then.

In my next, if you will read it, you will learn of my arrival in Jolly Land and the curious manner in which I discovered the right island.

IN WHICH HE TELLS OF HIS ARRIVAL IN JOLLY LAND.

For many days and nights after I sailed away from the cannibal island I did not meet with any adventures worth telling. The weather was fine and the wind fair, and I sailed on night and day with only one stop. On the sixth day I saw another island, and as I could see no people about I made a landing to get some fresh fruit. All that I had brought with me had begun to decay.

I found many trees loaded with fruit, and also plenty of fresh water, and, though I walked about for two hours, I did not find even the tracks of men. The only living things on the island, as far as I could make out, were rats, and they were there in plenty. They were much afraid of me at first, and scampered off whenever I raised my hand or shouted, but after a little time they grew so bold and appeared in such numbers that I verily believe they would have attacked me had I not loaded up with my fruit and hastened away. They were the largest rats I ever saw, and their long, sharp teeth would have inflicted painful wounds.

On the tenth night after my escape from the cannibals the wind was so steady that I made my sail fast and slept most of the night. I was asleep when daylight came, but soon after that was awakened by sounds of laughter.

There were the voices of men, women and children, and I never heard such hearty laughter before. I sprang up in wonder, and lo! I had reached another island. In fact, I was sailing right ashore, and more than two hundred people were on the beach waiting to receive me. Before I had time to handle my sail the boat ran upon the sands, and I was surrounded immediately.

Of all the people I ever had seen, these

were the queerest. I was only a boy ten years old, you will remember, but I soon saw that I was much taller and heavier than any of the full-grown men, while the boys and girls of ten or twelve years of age were hardly two feet tall.

I had heard my parents talk of giants and pigmies, and I knew that these little people must belong to the latter class. Every last one of them, from the oldest to youngest, was red-haired. I may say that I did not see a gray-haired person during my stay on the island, nor did any faces have wrinkles.

Another curious thing about the people was that all had blue eyes, and their eyesight was so good that they could see three times as far as I could. Their noses turned up at the end, and their mouths were large, and they had double teeth in front.

Their thumbs were as long as their fingers, and, though they were little people, they had wonderful strength.

For the first five minutes after I came ashore the people did nothing but laugh and skip around and clap their hands. If I had any fears of them at first I soon got over it. The laughing finally ceased, and a man stepped forth from the crowd and said to me:

"Welcome to our shore, oh, giant. You shall have food and wine and all you desire, and in return we ask that you do not harm any of us."

It made me laugh to hear him speak of me as a giant, when I was only a small boy, and as I laughed they all laughed with me. I was much surprised to find that they spoke my language, and that I could understand all that was said, and standing up in my boat I answered:

"My good friends, you need not fear me. I am in search of an island called Jolly Land. Will you tell me if this is the one?"

"It is—it is!" they shouted, as they danced around.

"Well, I am Joe Jolly Boy, and I have come to visit you and have good times. I see that you are very merry people. I am that way, too. I am always ready to laugh, and it is seldom that I am sorrowful. Are there any more of you than what I see here?"

"There are two thousand of us in all," replied the man who had spoken before, "and if you will go with us we will conduct you to our city, which is a mile away."

I held out my hand to him that he might assist me, but he did not take it. Instead of that he stepped back and about twenty men came forward and seized my boat and upset it and spilled me out on the ground.

I remembered what the soldier said about things being upside down in Jolly Land, and I laughed as I arose and brushed off my clothes, and the whole crowd laughed with me.

In my next I will tell you of the pigmy city, and what strange things I saw from day to day as I tarried on the island.

(To be continued.)

Some sort of a creature rose up out of the sea, clutched the craft and dragged it under.

Scarcely had the darkness begun to fade away when an island loomed up in front of me. It was covered with trees, and near its center was a very high hill. It was almost high enough to be called a mountain.

I could not tell whether I had arrived at the island of Jolly Land, or whether this was some other island. Never once did the thought come to me that it might be the place where the cannibals lived. I sailed in close to shore looking for a good spot to land, and, though I kept a good lookout, I saw no people. I thought it was so early in the morning that none of them were yet awake, and coming to a sandy beach I ran my boat ashore and got out to look around.

The ground was covered with green grass, and there were many trees bearing wild fruit. A stream of cold water ran down to the sea just where I landed, and when I had taken a drink and eaten some of the fruit I felt so good that I began to sing and laugh. If I had only known what danger lurked there I should have been as quiet as a mouse.

It wasn't more than five minutes after I began to laugh when I saw a dozen naked savages dodging around in a grove not far away. Each one was armed with a club, and as I stood there staring at them they brandished their weapons and uttered such shouts that my hair stood on end.

Knowing them to be enemies, and suspecting they might be the cannibals of whom I had heard, I ran to my boat and jumped in and pushed off. The men were almost upon me as I left the shore, and I saw that they were as black as negroes and as fierce as tigers. They danced about and yelled like Indians, and I put up my sail in a hurry and headed out to sea.

A Bird Petition Drawn by Hon. George F. Hoar, Senior Senator from Massachusetts

To the Great and General Court of the Commonwealth of Massachusetts: We, the song-birds of Massachusetts and their playfellows, make this our humble petition:

We know more about you than you think we do. We know how good you are. We have hopped about the roofs and looked in at the windows of the houses you have built for poor and sick and hungry people and little lame and deaf and blind children. We have built our nests in the trees and sung many a song as we flew about the gardens and parks you have made so beautiful for your own children, especially your poor children, to play in.

Every year we fly a great way over the country, keeping all the time where the sun is bright and warm; and we know that whenever you do anything, other people all over the great land between the seas and the great lakes find it out, and pretty soon will try to do the same thing. We know; we know. We are Americans just as you are. Some of us, like some of you, came from across the great sea, but most of the birds like us have lived here a long while; and birds like us welcomed your

fathers when they came here many years ago. Our fathers and mothers have always done their best to please your fathers and mothers.

Now we have a sad story to tell you. Thoughtless or bad people are trying to destroy us. They kill us because our feathers are beautiful. Even pretty and sweet girls, who we should think would be our best friends, kill our brothers and children so that they may wear their plumage on their hats. Sometimes people kill us from mere wantonness. Cruel boys destroy our nests and steal our eggs and our young ones. People with guns and snares lie in wait to kill us, as if the place for a bird were not in the sky, alive, but in a shop window or under a glass case. If this goes on much longer, all your song birds will be gone. Already, we are told, in some other countries that used to be full of birds, they are almost gone. Even the nightingales are being killed in Italy.

Now we humbly pray that you will stop all this, and will save us from this sad fate. You have already made a law that no one shall kill a harmless song bird or destroy our nests or our eggs. Will you please to make another that no one shall wear our feathers, so that no one

will kill us to get them? We want them all ourselves. Your pretty girls are pretty enough without them. We are told that it is as easy for you to do it as for Blackbird to whistle.

If you will, we know how to pay you a hundred times over. We will teach your children to keep themselves clean and neat. We will show them how to live together in peace and love and to agree as we do in our nests. We will build pretty houses which you will like to see. We will play about your gardens and flower beds—ourselves like flowers on wings—without any cost to you. We will destroy the wicked insects and worms that spoil your cherries and currants and plums and apples and roses. We will give you our best songs and make the spring more beautiful and the summer sweeter to you. Every June morning when you go out into the field, Oriole and Blackbird and Bobolink will fly after you and make the day more delightful to you; and when you go home tired at sundown, Vesper Sparrow will tell you how grateful we are. When you sit on your porch after dark, Fife Bird and Hermit Thrush and Wood Thrush will sing to you; and even Whip-poor-will will cheer up a little. We know where we are safe. In a little while all the birds will come to live in Massachusetts again, and everybody who loves music will like to make a summer home with you.

Is Great Sport When You Have a Good Rifle

For every description of small game and target practice the superb 22 Caliber HAMILTON RIFLE is supreme. It is well made, strong, durable, and weighs only two pounds. Our New Model No. 19

is as perfect a 22 caliber rifle as it is possible to make, and for accuracy in shooting its equal is yet to be met with. The Price is Only \$2.00. Your dealer probably keeps it, but if he doesn't, send us the \$2.00 and we will forward gun, express prepaid.

Write for Illustrated Circular.

The Hamilton Rifle Co., Box 10, PLYMOUTH, MICH.

10 DAYS FREE TRIAL. We will send any bicycle to any address with the understanding and agreement that you can give it 10 DAYS' FREE TRIAL and if you do not find it easier running, handsomer, stronger, better finished and equipped, more up to date and higher grade than any bicycle you can buy elsewhere at \$5.00 to \$15.00 more money, you can return it to us at our expense and you will not be out one cent. \$10.95 Buys our new HIGH GRADE 1903 NEWTON BICYCLE, which we guarantee stronger, easier riding, better equipped; better frame, wheels, hubs and bearings than you can get in any other bicycle for less than \$20.00. OUR 1903 NEWTON BICYCLE is priced at about ONE-HALF the lowest price asked by others. For Free Bicycle Catalogue, hundreds of price surprises in bicycles and supplies, our Free Trial and Guarantee Proposition and our Most Astonishing Offer, cut this ad. out and mail to SEARS, ROEBUCK & CO., CHICAGO

The Rienco Electric Motor. The RIENCO motor is of an entirely new design. It will run at high speed with one cell of almost any kind of battery. It is one of our "HALF-DOLLAR" specialties and lowest priced motor on the market. Full instructions with each motor. Price 50c. Postage and packing 15c. Ithaca Electric Novelty Co. ITHACA, NEW YORK.

A SURE CURE FOR CATARRH. 25 Cents a Bottle by all Druggists.

BRASS BAND. Instruments, Drums, Uniforms, Lyon & Healy 'Own-Make' Instruments are preferred by Thomas Orchestra, Bands, Brass, Mascagni, etc. Lowest prices. Big Catalog; 1000 Illustrations; mailed free; it gives instructions for amateur bands. LYON & HEALY, 25 Adams St., Chicago.

STAMMERING PAY WHEN CURED. Not a cent in advance. We have so much confidence in our method that we make this great offer to every person afflicted with defective speech. Send for our free book which explains everything and tells how to get our complete treatment FREE. Private instruction. Fully reliable. Special rates in May and June. DR. F. A. HOWE, 111 S. Main St., Brighton, Ill.

Here You Are Boys! SPOON INK. An assortment of four colors, Black, Green, Red and Violet. Ink for home and school use. Stir spoon in one ounce of water, and you have a bottle of first-class ink; four colors, only 10 cents, by mail anywhere in the U. S., postpaid. Alvin Mfg. Co., 127 W. North Ave., Chicago, Ill.

MONEY TO BURN! Over \$2,000 in im' (Confederate money and our Roy's Magazine 3 mo., for dime. Send for a pack and show the boys what a wad you carry. Friendship, Jr., Dep. H. (Chil), N. Y.

BEEBE VIOLINS

Deep, mellow, soulful carrying tone. Unexcelled for artistic beauty. Send stamp for valuable booklet, "How to Judge Violins." BYRON E. BEEBE, Box E, Franklin Park, Ill.

SHORTLY before the outbreak of the Revolutionary war a great mass meeting was held in New York to protest against the oppressive action of the British ministry. At that meeting there appeared upon the platform a stripling of seventeen, spare and small of stature, and looking even more youthful than he was.

To the astonishment of the assembled people, this boy stepped forward and addressed the meeting in a speech of such eloquence, force and logic that the next morning his name was upon every lip in New York and his fame spread rapidly throughout the colonies.

He was Alexander Hamilton, then a student at Columbia College. His name already was well known in the British West Indies, on one island of which he was born. At the age of fifteen he had written for a newspaper in St. Christopher an account of a tropical hurricane which had devastated the island. When it was found that the article had been written by a little boy everybody was amazed. On inquiry it was found that three years before, at the age of twelve, the boy had taken entire charge of the large business of his employer, Mr. Kruger, during the absence of that gentleman in New York and that he had conducted it successfully.

At once young Hamilton became a celebrity in the islands and wealthy planters contributed to a fund to send him to New York for a college education. There, at the age of seventeen, he took his place prominently among American patriots by his speech at the mass meeting.

Shortly after Hamilton's great speech, able and well-written pamphlets taking the side of the British against the Americans, began to be circulated throughout the colonies. They were signed "A Westchester Farmer" and as many people in this country were still undecided as to whether British oppression should be resisted or not, the pamphlets had an effect on the public which the patriots much regretted.

Many persons rushed into print to answer the arguments of the "Farmer."

Alexander Hamilton.

but of all the answers only one was so good as to attract universal attention.

This one called forth another pamphlet from the "Farmer," and that pamphlet provoked another answer from the same source as the first.

These answers to the "Farmer" were signed "A Sincere Friend of America," and were hailed with delight by the friends of liberty, both in this country and in England.

They were so brilliant that folk thought they had been written by some learned man of wide experience in the affairs of government. Some thought John Jay had written them and some thought William Livingstone—both prominent men at the time.

The answers showed that the writer

was thoroughly familiar with the principles of government and with the British Constitution. He seemed to know all about foreign governments and what they would be likely to do if America revolted. Also there was shown in the answers a surprising knowledge of military affairs.

At last it was discovered that the answers had been written by the same "marvelous boy"—as they began to call Hamilton—who had made the great speech at the New York mass meeting.

Professor Tyler says of these answers of Hamilton: "This beardless philosopher, this statesman not yet out of school, this military strategist not yet rid of his roundabout, exhibits a range and precision of knowledge, a ripeness of judgment, a serenity, a justice, a massiveness both of thought and style which is almost incredible in one so young."

The first answer was written when Hamilton was seventeen and the second a few days after his eighteenth birthday. When the Revolutionary war began Hamilton became a captain of artillery at the age of nineteen.

He took part in the Battle of Long Island and distinguished himself by covering the American retreat. The boy captain also distinguished himself at the battles of Trenton and Princeton, and on one occasion, when the American army was retiring across the Raritan river in New Jersey, Hamilton with his battery held in check the British who, under Lord Cornwallis, were closely pursuing Washington's army, until all the Americans were safely across.

Finally, at the age of twenty, Hamilton became aide-de-camp and private secretary to Washington. As, after that, he can no longer be considered a boy, we there take leave of him. He was as brilliant and successful as a man as he had been as a boy, and his name is one of the great ones in American history. He was killed by Aaron Burr in a duel fought on the shore of the North river, just north of Hoboken. Many tens of thousands of persons pass the monument over his grave every day. It stands close to the railing on the south side of Trinity Churchyard, New York.

ISAAC PITMAN.
(The Inventor of Phonography.)

TWENTIETH CENTURY REVISION

ment with Isaac Pitman Union Square, N. Y.

LESSON IX.—Vocalization of Pl and Pr; Prefixes and Suffixes.

Concerning the vocalization of the *pl* and *pr* series of consonants, it is remarked on page 36 of the "Teacher" that a dot vowel may be expressed between the two letters of one of the initial hook characters (*pr, pl, A, &c.*) by writing a small circle—smaller than circle *s*—BEFORE the consonant for a long vowel, and AFTER the consonant for a short one: thus, second-place long vowel, *pl* chairman, second-place short vowel, *pl* German.

In other words, either of the three long vowels, *ah, eh, ee*, may be expressed between the two letters (the consonant and the hook), before or above for a long vowel and after or below for a short vowel: thus, Long *pl* careless; Short, *pl* calcium. But, although this arrangement—namely, that of writing the circle before or above the consonant for a long vowel, and after or below for a short vowel—should be adhered to wherever possible, it sometimes happens that the position of the consonant renders it inconvenient to observe this rule, and in such cases the circle may be written on either side for either a long or a short vowel. The dash or stroke vowels, *aw, oh, oo*, may be written through the consonant as: *pl* court; *pl* curt. A diphthong between the two consonants is expressed thus: *pl* soldier.

In compounds where an initial hook or circle would interfere with the expression of a first-place vowel or diphthong between the two consonants, the sign for either may be used at the beginning of the hooked consonant, as: *pl* dormouse; *pl* child. So, too, when a FINAL hook or circle would interfere with a vowel or diphthong, the sign may be placed at the end of the word, thus: *pl* figures. It is seldom neces-

sary to mark an unaccented vowel in a double consonant of the *pl* and *pr* series; the syllables *per, pel, kel, &c.*, speaking for themselves. The *pl* and *pr* series of double consonants should be kept, generally, for such words as contain no vowel between the two consonants, or only an obscure one, thus: *pl* pray, *pl* apple; but *pl* peer, *pl* pole, &c., should be written thus.

Outlines that require this special method of vocalization seldom occur, the ordinary practice being departed from only occasionally for the purpose of obtaining more convenient forms; nevertheless, the principle must be well understood; for the learner should not only know that a word is written in this or that way, but he should also thoroughly understand the principles upon which accurate outlines are formed.

The following words illustrate the use of the prefix *com* or *com* and the suffixes *ing* or *ings* (see "Teacher," page 37): *pl* compared, *pl* con-cert, *pl* com-fort-ing, *pl* com-pat-ing, *pl* build-ings.

Work for this month to the end of Exercise 62.

"Jack."

A year or more ago, as the foreman of one of the iron works of this city was crossing the yard one day he espied a little skip of a boy, seemingly not over eleven years old, seated on a big fly-wheel and chewing the end of bitter reflection.

"Who are you?"
"I'm Jack."
"What are you doing here?"
"Resting."
"What do you want?"
"A job."
Those were the inquiries and answers,

The boy was pale-faced and ragged, but in his steel-blue eyes the foreman saw game. And, too, the idea of a waif like him setting out to battle the world touched a tender chord in the heart of the man who had boys of his own, and he set Jack at work in the yard.

No one thought the boy would stay a week, and so no one cared to ask where he came from or who he was. But he stuck. He was hard-working and faithful, and as the weeks went by he gained friends. One day he walked up to the foreman and said:

"I want to learn the trade."
"You? Ha! ha! ha! Why, Jack, you are not big enough to handle a cold chisel."
"I can whip any 'prentice boy in the shop!" was the earnest declaration.
"Just hear him! Why any of the lot could turn you wrong side out! When you get big enough to whip the smallest one you come to me for a job."
At noon that day Jack walked up to the biggest apprentice boy in the shop and said:

"Come out doors."
"What do you want?"
"I'm going to lick you!"
"What for?"
"Because I want a chance to learn the trade."
The two went out, and in sight of twenty witnesses little Jack won a victory. At one o'clock he touched his cap to the foreman and said:

"I've licked your biggest 'prentice and want to go to work!"
Ten minutes later he had become a machinist's apprentice, and if you go in there today you will find him with greasy hands, oily face and a head full of business ideas. Jack carries the keys to the drawers where the steam-gauges, safty-valves and other trimmings are kept, and he knows the use of every tool, the working of every piece of machinery, and there is a constant call for Jack here and Jack there. Before he is twenty he will be a finished machinist, and before he is twenty five he will be foreman of some great shop. He is quiet, earnest, respectful and observing. What he does is well done. What he is told he never forgets.

And here in Detroit are hundreds of boys who complain that there is no chance for them, even when backed by money and influence. They wait and wait and whine and complain, and leave it to waifs like little Jack to call up the game in their souls and walk boldly into a great manufacturing works and say: "I'm here—I want a job!"—Detroit Free Press.

We suppose there are many of our readers who can tell what word in the English language is always spelled wrong.

A man recently said that he had an office boy who was slow but sure, and explained that he was slow to learn and sure to forget.

An Awful Battle.

The first picture on the left shows the raising of the flag on a sand fort built by some boys in Minneapolis. Large sewer pipes were used for cannon. The middle picture shows the boys in the act of recapturing the fort after it had been taken from them by the girls. The girls look very peaceable, and it doesn't seem as if it would be very hard to make the capture. The picture on the right is the most interesting one of all. The reproduction doesn't do it credit. The fort has been recaptured, though many of the brave soldiers have been killed. Two nurses of the Red Cross Society are looking after the wounded. —Photographs by Ralph Hoffman, Minneapolis, Minn.

For a Boys' "Circus" J. C. BEARD BEGUN IN MARCH—MORE TRICKS NEXT MONTH

THE CIRCUS TRICK MULE.

It is said that a mule will be good for more than a year just to get one fair swing of his heels at some unsuspecting man.

The circus mule shown in the illustration is never good for any period like a year. This is because he gets plenty of chances to kick without the necessity of pretending to be other than he is, the most vicious and untrustworthy animal in the ring.

The several clowns who attend upon the trick mule sometimes make very tempting offers to any spectator who will ride the animal; but I have never heard of any one who enriched himself by the experiment. If you can imagine an animal beside which a bucking bronco is like a tame lamb, then you will have a fair idea of the character of a circus trick mule.

He knows just when to buck and just how to buck and when a mule knows that, there is not a man in the world who knows just how to stay on the beast's back.

A team of two sturdy boys can make themselves into a trick mule without very much trouble. The team must procure two sticks. Each stick should be about five inches long, three inches wide and one inch thick (see the side pieces in the diagram connected by the dotted line B).

The side pieces are connected by two broad strips of canvas (see A and A' of the diagram).

In the center of each piece of canvas is a hole through which the team put their heads.

The two pieces of wood will be allowed to hang one on each side of the performers, under their arms. This gives the framework on which to build the back of the mule. A couple of pillows or one bolster bound over this framework will give the mule somewhere near his proper shape.

The head of the mule is made somewhat on the principle of a rag doll. It is nothing more or less than a bag stuffed with bits of paper, excelsior or any other material which happens to be handy.

The hair on the mule's forehead and along his neck can be made by sewing on bits of ordinary cotton. But if it can be obtained some horsehair from an old mattress is better.

The mule's ears can be made of cardboard stiffened with thin strips of wood.

Diagram.

Fasten these to the head at different angles.

With every move of the mule the ears will flop about in the most ridiculous manner.

The eyes, which should be very large with the eyeballs down in one corner, can be painted on a piece of paper; then cut out and pasted in place.

The tail is a light cane with a bunch of horsehair or cotton tied at the end. The bridle of the mule can be made of ordinary straps or even pieces of rope. In real life the bridle of the everyday mule is usually patched until at least half of it is rope or string.

A rug or curtain can be thrown over the mule's back to hide the pillow and the side pieces.

A partition is sewed across the bag which forms the mule's head in the place indicated by the dotted lines in the diagram. The mule's head is slipped over

the head of the first boy and pinned about his shoulders.

Eye holes are cut in the neck, as indicated, so that the boy may see where he is going.

The tail is held in the hand of the second boy. No saddle is needed; but if some brightly colored bit of cloth is thrown over the mule's back it will give somewhat the idea of a circus.

The boys who take the role of the mule's legs will wear long black or gray stockings and short, tight trousers. The trousers must, if possible, be the same color as the stockings.

The success of a trick mule depends a great deal upon his attendants, and whether or not they play their part well. They must be very nervous every time

The mule is on.

their pet makes a sudden move and they must show a strong dislike to the idea of either riding him or getting behind him.

When the clowns desire the mule to do one of his tricks, such as jumping a hurdle, etc., they will entreat him to perform the trick. They will implore him not to make them ridiculous in the eyes of the audience by refusing, and they will offer him all sorts of bribes.

When they name something which pleases the mule's fancy, he does the trick, or at least tries to do it.

The clown must keep assuring the spectators that the mule is quite harmless, "as gentle as a lamb," etc., and they will stick to this, even after the mule has given very visible evidence that he is no such thing.

THE CLOWN ON ROLLER SKATES.

A few years ago boys considered a roller skate with wooden rollers and wooden foot rest, fastened on with straps, a very proper sort of contrivance.

When the half clamp and the whole clamp skates and composition roller were introduced they met immediate approval and were adopted by every enthusiastic skater as soon as he could save money enough to buy them.

The latest idea of substituting two wheels on each skate in place of the original number, four, is being endorsed rapidly by boys and it is now only a matter of a short time before the one-wheeled skate of the clown will be offered to the boy public.

If boys will exercise a little ingenuity and follow the directions given in this article they can manufacture one-wheeled skates without waiting for the shopkeepers to get hold of the idea.

Get two wheels, each of which should be nearly as possible the same size, about one foot in diameter. Metal wheels will answer better than wooden ones. Cut from oak, hickory or some other tough wood a piece such as shown in Figure 1. The dimensions of this piece will depend upon the size of the wheel to which it is to be attached. It should be four inches longer than one-half the diameter of the wheel. Cut a second piece such as shown in Figure 2. The widest part of this stick should be seven inches longer than half the diameter of the wheel. The narrow part of the stick

Diagram showing necessary parts for roller skate wheels.

should be one foot long. Fasten a bracket-shaped piece of wood to Figure 2 as shown in Figure 4. Fasten a second bracket-shaped piece of wood to the top of Figure 1. Fasten Figure 1 and Figure 2 together by nailing or screwing a piece of wood (as shown in "A," Figure 3) across the brackets. The piece of wood "A" in Figure 3 must be wide enough to allow the wheel, which is indicated by the black circle, to pass freely between Figure 1 and Figure 2 after they are fastened together. A foot rest, such as shown in Figure 6, must now be fastened to the lower part of Figure 2. The back of Figure 6 is intended to represent the lower part of Figure 2. Figure 6 is made by fastening a brace, such as the one shown in Figure 5, on each side of Figure 2 and then fasten a piece of wood across them. Figure 3 shows the outside of the skate. The foot rest is to be fastened on the inside of the skate—that is, the side toward the skates. Fasten straps to Figure 6 and Figure 3 as indicated in the diagrams. Both foot rests, the one for the right foot and the one for the left foot, must be exactly the same height from the ground. Fasten the wheels in position by running a bolt through both sides of Figure 3 (see "B," Figure 3, showing the head of the bolt). The bolt serves as an axle for the wheel. It is much more difficult to skate with a clown's one-wheeled contrivance than it is with the ordinary

Clown on their skates.

skate; but when the art is once learned it will be found that many feats can be accomplished which are well nigh impossible on the four or two-wheeled rollers. I have never seen the one-wheeled skates used outside of a rink and I cannot say whether or not in the matter of mere speed they are equal to the common skate. It would be an interesting experiment to try, but in the matter of graceful fancy skating, as I have mentioned, the one-wheeled clown skate is without an equal.

In a school for colored children there was a little boy who would persist in saying "have went."

The teacher kept him in one night and said: "Now, while I am out of the room you may write 'have gone' fifty times."

When the teacher came back he looked at the boy's paper, and there was, "have gone fifty times." On the other side was written, "I have went home."

LONDON PARIS DRESDEN SYDNEY

A Handful of Tricks Without Apparatus.

Here are a few very simple yet very clever tricks which will afford you considerable amusement with your friends. They will help to pass an hour very pleasantly at an evening party, and, what is best about them, there is no apparatus whatever necessary. You have all that is required in the ten fingers of your two hands.

There are always odd moments at all gatherings when there seems to be a lull in the entertainment, and anyone who can suggest something at such a time, to get over the gap, is hailed with delight.

First of all, hold the hand out flat, as seen in Figure 1, and separate the fingers as shown. Looks easy, doesn't it? So it is, comparatively, but it may take a few trials on your part to do it, and the chances are that nine out of ten whom you ask to do it will not be able. The third and little fingers have an exasperating way of keeping apart.

When you have got your friends interested in that you can go one better, and ask them to do what is shown in Figure 2. Practice this a number of times, so that you can get the correct position. What you must do is to press the first and third finger tips together and then try and pass the second finger through the opening without moving the finger tips that touch.

This is a tantalizer, and you had better follow it with one that seems ever so much simpler, though in reality it is not. Hold the hand up flat, as seen in Figure 3, and bend the little finger so that the first joint is, as shown in the photograph, flat.

It is surprising how little control one has over their fingers. Of course, if you have practiced somewhat, you will have the advantage of your friends, whom you will tease with your cleverness, and they will wonder at the suppleness of your fingers and the stiffness of their own. It is not necessary that you be able to do them, however, to get quite a lot of fun out of it, so long as you remember how the trick is to be done, and can indicate it sufficiently to get them interested.

The fourth trick is a terror. Close the hand with the index finger extended, then bend only the first joint as shown in the photograph. It is at the second joint that the difficulty will be found, as indicated by the finger above it. This persists in bending up as the first joint is bent down. Yet there are some people with such control over their fingers that they can bend any joint at will.

The fifth trick is the most ingenious of all. Put the tips of the thumbs and the tips of the first, third and little fingers together, and the second fingers bend and press together at the middle joint. Then part the thumbs and little fingers and see if you can separate the third fingers without disturbing the bent second fingers. Not many can do this, simple as it looks, for the fingers stick as though they were cemented.

New Century Rifle

Boys' Books Reviewed

TOM WINSTONE—"Wide Awake," by Martha James. This is a book for boys, about boys; not impossible boys, but real, genuine boys. Tom Winstone, the hero, is a boy whom the reader will be delighted to know, as he can pitch in and work, run and win races and do a kindly action with the same downrightness and honesty of purpose. Of course, there are other boys described who are lazy and whose characters do not stand very high, but altogether the book is well worth reading. Illustrations by W. Herbert Dunton. 734 pp., with picture cover. Price, 80 cents net. Lee & Shepard, publishers.

UNDER SCOTT IN MEXICO, by Captain Ralph Banehill, author of "For the Liberty of Texas," "A Sailor Boy With Dewey," etc. This is the third volume of the "Mexican War Series" by the same author, each volume, however, forming a complete story in itself. Boys will be delighted with this stirring story of the war with Mexico. The author writes with a correctness as to events that gives the reader a knowledge of the history and geography of the places mentioned as well as to rouse his veneration for the bravery and patriotism of the gallant men who fought and bled under the renowned Generals Taylor and Scott. The book is handsomely illustrated by J. J. Mora and contains 287 pages in colored cover. Price, \$1.00 net. Dana, Estes & Co., publishers.

TRAVELLER TALES OF THE PAN-AMERICAN COUNTRIES. Educational Travel Series, by Hozekiah Butterworth. The name of Butterworth stands among boys as a synonym for good, wholesome, pleasant and entertaining reading. In the present volume the author tells his readers about what he himself saw in his journeys through South American countries and the West Indies, and pictures the lands that will be directly or indirectly connected with the Panama Canal. The book also contains many of the legends, history and folklore stories of these countries. As quite a number of the words in these stories will be unfamiliar to the reader, the author has appended a glossary which will be found valuable. There are also many engravings and pictures, adding still more to the educational value of the work. We are sure the boys who get hold of this book will find it most enjoyable as well as highly instructive. 299 pps. Good paper and clear type, with picture cover. Price \$1.50 net. Dana, Estes & Co., publishers.

JACKANAPES, by Juliana Horatio Ewing. We cordially recommend this book to every American boy and girl. No reader will be able to withstand its humor or its pathos. In Jackanapes we have the portrait of a manly, loving, self-sacrificing youth. All the characters are faithfully drawn. The whole tone of the story is inspiring and pure, such as will encourage the boys to true manliness. 71 pages. Price, 50 cents. Dana, Estes & Co.

PLAY AWAY! A Story of the Boston Fire Department, by Willis Boyd Allen. Next to being a sailor, perhaps the highest ambition of a healthy, natural boy is to be a fire fiddler, and so this is a book which will delight its readers. It tells of a country boy, Tom Sherwin, who comes to Boston and wins name and fame as a member of the Boston Fire Brigade. The danger to life and limb as well as the pluck and heroism of the gallant boys who fight the flames are told in fitting language. The management, system and discipline of a large city fire brigade are also incidentally shown. Illustrated by L. J. Bridgman. 171 pages. Strong linen cover. Price, 75 cents net. Dana, Estes & Co.

THE VOYAGE OF THE CHARLEMAGNE, by William O. Stoddard. This is a book which will please the boy who loves the curious and the mysterious. Tom Lane, his sister and Professor Stoutenberg, who is a veritable magician, take a voyage in the Charlemagne, the largest ship afloat, propelled only by electricity. Most strange experiences are theirs. With electric searchlights they look into the depths of the ocean and see many uncanny looking monsters. They are caught in cyclones and waterspouts, and meet with a school of whales, fog banks and great icebergs. These disappear by the magic of electricity, and many other things happen too numerous for mention here. Mr. Stoddard has written an excellent book. Mystery, excitement, discovery and instruction mark every page. It is a Jules Verne work with more wholesome elements. Illustrations by J. W. Kennedy. 285 pages, good paper, clear type and nicely bound. Price \$1.00. Dana, Estes & Co.

A STRUGGLE FOR A FORTUNE, by Harry Castlemon. Mr. Castlemon has written with graphic pen a most interesting story of Nat Wood's struggle for possession of the fortune which had been buried by old Mr. Nickerson. The enemies he had to contend with and his ingenuity and resourcefulness in circumventing and finally overcoming them and obtaining his fortune will give the reader enough excitement. The fault we find is that in many of the statements made by Nat there is an

evasiveness which nearly borders on untruthfulness; but, perhaps, the author will say that the exigencies of the various occasions required it, and the end justified the means used. Illustrated by W. H. Fry. 298 pages, with ornamental cover. Price \$1.00. The Saalfeld Publishing Co.

DOCTOR ROBIN, by Harriet A. Cheever, is a bright story of bird life and will be very pleasant reading for the younger boys and girls. Doctor Robin, who is supposed to tell the story, is very interesting. He tells of the many cures he effects and the surgical operations he performs upon bird patients, and gives good advice to "people" and children as to their treatment of birds. The young folks will be delighted with the Baltimore Oriole, who, like many "people," was proud of his gay plumage, and through his vanity and curiosity was made captive, but afterward rescued by Dr. Robin and other friends. The boys and girls will love the birds better after reading this book and be ready to welcome their little friends who are this month winning their way north from the warm southland. Illustrations by Etheldred B. Barry. 100 pages. Price, 40 cents net. Dana, Estes & Co.

YOUNG EXPLORERS OF THE ISTHMUS, by Edward Stratemeyer. This is the third volume in the Pan-American Series, and will be heartily welcomed by the fortunate readers of "Lost On the Orinoco," and "The Young Volcano Explorers." In the present volume Professor Strong and his pupils leave the West Indies for Central America, landing at Greytown, in the Republic of Nicaragua. Naturally they are much interested in the Isthmian canal, and, starting from Greytown on muleback they visit many interesting places and have quite a number of adventures, humorous and otherwise. After visiting ancient Granada, they sail along the coast of Lake Nicaragua, ultimately arriving at Rivas, near where the western end of the Nicaraguan canal was proposed to be built. Journeying into Costa Rica, the party visit the sights and interesting places in that republic. They then sail from Limon to Aspinwall, investigate the Panama Canal route and wind up by a trip across the Isthmus to Panama. It is a splendid book, that will not only amuse and interest the reader, but will supply him with most valuable instruction and information upon subjects which every young American, who takes pride in his country and what pertains to it, ought to know. 300 pages. Ornamental cover. Price \$1.00 net. Lee & Shepard.

To our readers who enjoy good, wholesome literature, we would advise them to look over the "Boys' Books Reviewed" columns each month. Books may be purchased from us.

How Tommy Brought His Treasure Home—J. Olivier Curwood

TOMMY dug his toes into the desert sand, and whistled doubtfully. The fiery little "heat devils" were dancing in a dizzying way between him and the distant mountains, and his respect for Arizona grew as he thought of all the mysterious things he had heard were hidden behind that purple range. There were vast treasures there, lost silver mines, and whole canons of undiscovered gold. If he had not been sure of it he certainly would not have left home two days before, with the vow that he would never return until he brought back a treasure with him. Tommy had planned everything with the greatest precision. His parents had moved to Arizona from a big eastern city less than a month before, and long before they had all boarded the emigrant train that brought them into the far west he had made up his mind what he would do. As soon as he had seen his family comfortably and safely settled on the ranch they were going to take up, he would seek adventures among the redskins, and hunt for gold. Of course there was lots of gold, and the Indians were bloodthirsty, for Tommy had learned all that in stories.

With boyish simplicity Tommy was sitting squarely in the red-hot sun while he might have sought the shade among the rocks. But he was thinking, and thinking deeply. His ragged straw hat was tilted low over his freckled face, while aslant it a long black feather he had stolen from his mother's bonnet shook as he alternately turned his eyes in one direction and then in another across the desert. Around his waist was tied a red scarf, which back in the city he had used for winter wear, and stuck in it and held there by a cord was his mother's formidable-looking bread knife. On the other side was a horse-pistol a foot long, and across his knees lay a small, single-barreled shotgun, with the breech and a half of the barrel tightly bound with stout string.

"I dunno," he meditated, glancing back over his shoulder again; "I've come that fur, 'n' I don't 'spect this desert is wider 'n that, but I wisht I had a drink 'fore I tackled it!"

The stretch over which the boy had tramped during the night lay out white and blistering hot behind him. Its edge many miles farther away than were the mountains ahead. As he looked, his eyes travelled in another direction, and suddenly brightened.

"Je-roosalem!" He gripped his gun and dodged behind the rock on which he had been sitting. Coming up along the edge of the barren foothill, not a quarter of a mile away, was a dense cloud of dust. His first thought was that his father had succeeded in striking his trail and was in pursuit, but the fact that the approaching horsemen were coming from a different direction than that in which his home lay struck him as queer. His next thought was Indians. He knew that Arizona was full of them, and that they were the worst Indians for fight on the American continent. His romantic youth had never been educated to the fact that the warpath had been only a memory for many years, and if they WERE Indians, which he half hoped, he reasoned they were hostiles from the manner in which they sneaked along the edge of the hills. He had hardly gained breath from his first surprise when the horsemen swerved into the rock-strewn gully below him, not half a dozen rods away. From behind his rock he watched them as they passed—three fierce, desperate looking young Apache bucks!

For a moment the boy grasped his gun hard. Here was the opportunity for which he had prayed in his boyish dreams ever since he could remember. He knew that by actual count there were eighteen little homemade slugs in that weapon, and if by any chance the redskins happened to get in line where he could—the thought of it made him tremble. Slowly and very deliberately he pulled back the hammer and drew bead on the passing horsemen. But where were they going? As his eye shot along the blue steel of the barrel it caught the distant purple haze of the mountains. The little "heat-devils" dancing out on the desert seemed doing some sort of pantomime to him—telling him not to shoot, to wait.

"Wonder what they're goin' out THERE for!" he soliloquized. He fell back in a limp heap as one of the Indians turned to look over his shoulder.

The Apaches were now out of range. It was lucky for both Tommy and the Indians, for the boy's excitement was steadily growing. One of the horsemen had dismounted, and in a very mysterious way was examining the sand along the edge of the desert, while his companions kept on in the direction of the mountains. Suddenly he seemed to find something, following it a little distance, then with a low whoop that sent the blood thrilling through Tommy's veins leaped astride his horse and galloped swiftly after the others.

"War whoop!" commented Tommy. His eyes were big and bright with a new knowledge. There was something very mysterious in the wind, and the cause of it all lay over behind those blue mountains!

From behind the rocks Tommy watched the Apaches slowly disappear, until even

the cloud of dust they stirred up was lost to view. Then he sprang down through the boulders, and put his feet swiftly in the hot desert sand. His thirst was forgotten. If he had ever been tired or hungry he did not know it now. With his eyes alternately glued upon the fresh trail and the mountains ahead he trudged mile after mile across the desert. After a while he untied his long horse-pistol and carried it in his hand because it chafed him. And all this time the belief was constantly growing in him that there was some great secret behind this mysterious trip of the Indians.

The sun was still hot when he reached the first range of hills. But now, when he rested, there was shade to lie in. Fearful every moment that he would lose the precious trail among the rocks, Tommy's intervals of rest were short. Suddenly rounding one of the hills he came in full view of a little valley at his feet not larger than a city lot, and in the heart of it was a pool of sparkling water, the grass around it trampled by the hoofs of horses and moccasined feet. For a full ten minutes Tommy sat beside it, drinking now and then, until he was so full he could drink no more. Then his tired feet again took up the trail. Mile after mile he followed it like a dog, until it seemed he was in the heart of the highest mountains.

From the spoor of one of the horses Tommy reasoned that the Indians had passed not more than half an hour before. Probably they had rested a long time at the pool. Every step the boy now took was a cautious one. He slipped from rock to rock like a shadow. Remembering the warnings he had read in books of adventure he kept his gun cocked ready for instant use. How great and mysterious the mountains were! Looking up from the canon he could see them towering up almost out of

sight. Then he came to a point where he looked the other way—down—until it made him dizzy. Half crouching along the narrow trail he followed it until it unexpectedly terminated in a broad, smooth slope that inclined to a sand-choked little valley below him, with the gaunt, black mountains frowning down upon it in the last rays of the afternoon sun.

And in the center of it, rolling lazily in the heavy dust, were the three magnificent horses the Apaches had ridden across the desert!

Tired and hungry as he was, Tommy's heart leaped with exultation. Wedging himself in between two boulders he began making a careful survey of the valley, but from end to end of it he could see no signs of the Indians. Though the black walls of the mountains came down and shut in the miniature desert like a cup, with no place of concealment anywhere along it, the Apaches had disappeared as mysteriously as if they had been lifted up into the sky. As the sun gradually sank lower behind the craggy peaks Tommy studied every foot of the way beneath him until his eyes grew so tired that he laid his head back on one of the rocks to rest them. When he looked up again the Apache horses were on their feet, and trailing one after another in single file almost directly toward him. Scarcely restraining a cry of surprise Tommy suddenly bethought him that a small part of the desert directly under him had been out of his view all of the time, and that there only a few feet away, he would probably find the Indians. This thought had hardly come to him when the three horses huddled together, and across the intervening strip of sand stalked one of the young bucks, half bent under the weight of three or four buckskin bags he was carrying on his shoulders.

"Tha—that's it!" half sobbed Tommy. His great excitement made his voice quaver even when he whispered to himself. This was what had brought the redskins on their mysterious journey across the desert! What was in those buckskin bags? Tommy was sure he

THE KEYSTONE WATCH CASE CO., Philadelphia

knew. O, if he was only sure of himself with the big horse-pistol! He could bring down one of them with the gun, but he had not much confidence in his ability with the other weapon. As he planned excitedly how to get possession of the bags, the other two Indians appeared laden as their companion, and with him proceeded to tie their loads across the shoulders of the horses. From where he was hidden Tommy could see that they were partly filled with some very heavy stuff, like pebbles, and in one of the bags he could see bunches standing out as big as his fist. As silently and as mysteriously as they had come the Apaches mounted and rode up the

canon, holding their rifles in front of them, and guiding their horses with their knees.

In an instant Tommy was scudding down among the rocks. Sure enough, directly under his hiding place the sand was filled with the imprints of moccasined feet, which led back into a narrow fissure in the face of the mountain, which was growing black and gloomy as night came. With his heart thumping excitedly against his ribs Tommy stole deeper into the fissure, until his eyes caught the glow of a few burning embers in a fire that had been built at its side. Here the Indians had toasted some meat, and much to the boy's delight a few good-sized scraps of it were lying on a rock. Devouring them ravenously as he proceeded with his search, Tommy soon paused on the edge of what in the darkness looked like a chasm. From somewhere beyond that, Tommy reasoned, had come the treasure.

Once more slipping back into the valley the boy struck the return trail of the Indians. This time he paid no attention to the hoofprints of the horses, for he was confident that the party would spend the night at the pool. There, in some way or other, he would secure possession of the buckskin bags. Just how he would do it Tommy had not quite decided. It was a clear, starlit night, and much to the boy's satisfaction the full moon soon came up to light him on his way. He did not hurry, for whatever his plans were, they would work better if the Indians were asleep. Mile after mile he trudged on, until at last he once more caught the glimmer of the pool, as it shone out brightly in the moonlight.

Foot by foot Tommy crept nearer. He could make out the three horses grazing a little way from the water, and on the side of a knoll between them and the pool a small fire was just dying out. At the edge of the water Tommy halted a moment for a drink, then slunk like an animal through the grass around to the farther side of the knoll, crept up it and cautiously peered over. The moon was

The Hero of Prudence Island

William Pendleton
Chipman, D. D.

CHAPTER I.

LOVELY Prudence or as the Indians called it, Chibacuweise, that small island which emerges from the placid waters of the Narragansett Bay, just north of its more pretentious neighbor, the Conanicut, and between Pappasquash Neck on the east, and the North Kingstown shore on the west.

It has long been famous for its farming, grazing and fishing, and no one who now visits its quiet shores, or who enters its pleasant and prosperous dwellings, would scarcely think of its hard fate during the Revolutionary War.

But while the British held Newport and the bay, the inhabitants of Prudence were forced to flee to the mainland, and their farms, fruits, trees, and dwellings were the repeated spoil of the enemy.

Here also in the middle of January, 1776, was fought a two days' battle, wherein the routed "minutemen" of the first day, by the timely arrival of reinforcements from the main shore towns of Warren and Bristol on the second morning, repulsed the British forces, and after three hours of hard fighting drove them back to their ships with heavy loss.

The immediate cause of this attack lay in the fact that for some months the little island had been made a picket station for the Rhode Island forces. There a full company of minutemen had been quartered; from there row galleys patrolled the bay; and there a night guard was constantly kept.

The vigilance and boldness displayed by this little band of home defenders had largely checked the depredations of the British, and hence there naturally arose a determination on their part to break up the outpost.

With this object in view, therefore, twelve British vessels, under the command of Captain James Wallace, appeared off the island early on the January morning already alluded to, and notwithstanding the most strenuous efforts of the pickets to prevent it, succeeded in landing a force of two hundred and fifty men.

Then began a struggle, hotly contested on both sides, for the supremacy, and which lasted the greater part of the day. The Americans, outnumbered more than two to one, took refuge behind walls and buildings, and in fact anything that offered the slightest protection, and poured in an irregular fire upon their opponents.

But superiority of numbers and the better discipline of the British soldiers overbalanced the protected positions and consummate bravery of the home guards, and slowly they were driven back before the steady fire of the enemy.

Several times, at the command of their officers, did the minutemen bravely rally, and charge down upon the steadily advancing forces of the enemy, but each time they were completely routed.

During the prolonged contest also, to the intense chagrin of the Americans, the seven buildings they had occupied as temporary barracks were burned to the ground, and an hundred sheep, "still remaining on the island for their subsistence," as the old colonial records quaintly put it, were driven off to the boats, and sent on board the vessels of war.

Towards the middle of the afternoon the retreating pickets found themselves well over towards the east side of the island, and not far from the point where the lighthouse now stands.

A large, two-story, stoutly built, log building was still standing upon the height, and for some distance around there was only an open field.

The sorely pressed and weary men were not slow to see the advantage of this elevated and protected position, could it once be gained; and, at a word from their commander, they rushed up the hill, and into the structure, not, however, without leaving several of their comrades dead and wounded on the grassy slope.

After barricading the doors, they ran to the windows on the first floor, and began to pour a steady fire into their assailants, who were gradually advancing in a semicircle, and replying vigorously.

Only sixty two of the original hundred of the minutemen had reached the house, including three officers, a corporal, a sergeant and the captain. Among this number was a mere lad, Herbert Hathaway by name, not much over sixteen years old, and who was so small he scarcely appeared to be fourteen.

Like nearly every American boy of that period he was familiar with the use of the rifle, and when his home at Warwick, on the adjacent main shore, was plundered and burned by the British, he had promptly offered himself for the home defense, and was as promptly accepted. For it was a time when neither stature nor age was counted in the soldier, but when every fencible person in the State was called out upon duty.

Though small in stature, with red hair and freck-

led face, and pale, almost colorless eyes, and far from prepossessing in appearance, Herbert Hathaway had a heart of courage, and it was on his heroism that not only the issue of the battle, but the very fate of his comrades was destined largely to hang.

The American captain, a tall old fellow, lean and severe, with grizzly hair and beard, was directing the defense from a window at the front of the house, shouting out his orders like pistol shots, and with no sign of emotion in his hard face.

The lad, who was a little pale, but firm on his legs, finding the other windows fully occupied by his comrades, hastily drew a table up to the window beside the captain, clambered up on it and coolly fired away above the officer's head, at the bunch of redcoats he saw approaching through the field.

The captain noticed him with a grim smile, and perhaps marked him even then for the hazardous undertaking to which he soon called him.

The building was situated on the very summit of the hill, and on the north side, where the slope was most abrupt, had but one small window, high up, which looked out from the garret; consequently the British did not threaten the house from that side, and the height was clear: their fire was directed only at the front and the two sides.

But it was a terrible fire, a storm of leaden bullets, which on the outside shattered the windows and splintered the walls, and on the inside smashed partitions, furniture, and door-posts, filling the air with dust and splinters, hissing, rebounding, crashing into everything with a noise fit to drive one mad.

From time to time one of the soldiers who were firing from the windows fell back on the floor, and was dragged to one side. Some walked frantically up and down the room, pressing their hands to their wounds. In the hallway there was already one dead

"Lads," he cried, "You all did bravely; but here is the hero of the island!"

man, with a ball through his forehead. The semicircle of the enemy kept closing in.

All at once, the captain, who until then was impassable, was seen to show signs of uneasiness, and to stride out of the room, calling the corporal to follow him.

About five minutes afterward the latter came running back and called "Herbert Hathaway!" The boy ran after him up a rude wooden staircase, and entered an empty garret, where he found the captain leaning against the window, with a bedcord on the floor at his feet.

The officer turned as the lad approached, and, looking with his cold, grayish eyes into those of the youngster, abruptly asked:

"Do you know how to handle a boat, Herbert?"

"Yes, sir," he promptly replied. "And you have courage and discretion?"

The boy's pale eyes lighted up.

"Haven't I done my duty today, captain?" he asked, with a touch of pride in his tones.

A smile played for a moment about the stern mouth of the captain.

"Look down there," he then said, pushing the lad to the window.

"Around yonder point, near that clump of tall oaks, is a skiff and oars. Over yonder across the bay you see the roofs of Bristol. Two companies of our men are stationed there, and two more at War-

ren, just beyond. Catch hold of this rope, slide down from the window, run along the shore to that point, get into the boat, and pull the best you know how for the mainland, and tell the first man you meet our situation.

"No other boat is on this side of the island, and if you keep that clump of trees between yourself and the redcoats, you can make half the distance across the bay before you are discovered. We can hold out here until reinforcements come, if you hurry. Leave your gun here, but take my pistol with you."

The boy laid down his weapon, and put the pistol the officer handed him into his jacket pocket; the corporal threw out the rope, and grasped one end of it with both hands; the captain helped the boy pass backward through the window.

"Take care," he said, "remember the safety of your comrades depends upon you."

"Never fear, Captain, I shall bring the reinforcements," replied the lad firmly, swinging himself out.

"Stoop as much as possible while running for the oaks," directed the captain, helping the corporal to hold the rope.

"Yes, sir."

"God help you!"

In a few seconds Herbert was on the ground; the corporal drew up the rope and disappeared, but the captain remained at the window and watched the lad flying down the slope.

He was already hoping he had succeeded in escaping unobserved, when five or six little clouds of dust, which rose from the ground both before and behind the youth, warned him that the British soldiers had discovered his flight, and were firing at him from the top of the hill.

But the lad, who had already reached the shore, continued to run along it at a break-neck speed. Then there was a second volley from the soldiers, and the boy fell.

"Killed!" exclaimed the watching captain, striking his fist savagely against the window sill. But he had hardly uttered the word, when he saw Herbert rise to his feet.

"Ah! only a fall after all," muttered the captain, and breathed freely again; for the lad if hurt did not show it, and ran as fast as ever.

A half dozen of the redcoats were now speeding after the boy, firing as they ran. But Herbert distanced them, and when they reached the point, he had already shoved off the skiff, seized the oars, and was several rods from the shore.

The captain gave an exclamation of triumph, but he continued to follow the lad anxiously with his eyes, because the soldiers were still firing at him.

The boat was almost out of reach of the guns, when the boy suddenly dropped one of the oars, and al-

lowed it to float away from him. It was evident that he had been wounded, for his left arm was hanging powerless at his side.

"He's hit!" exclaimed the captain, and he shudderingly watched all the lad's movements.

If he did not reach the main shore and secure immediate relief, either all the home guards would be killed, or he would have to surrender and become a prisoner with them.

But even though the lad was hurt it was soon evident that he was still able to act; for he immediately changed his seat to the stern of the boat, and with his remaining oar sculled the light craft swiftly out of the reach of the whistling bullets.

A thankful sigh escaped the captain, and he was about to return to his men, when his eye caught sight of a boat rounding the sandy point. It was a British yawl, manned by a coxswain and six sailors, and they were pulling directly for the boy.

CHAPTER II.

Again the captain watched anxiously. He even encouraged the lad, and spoke to him, as though he could hear. He measured continually, with his keen eyes, the distance between the boats.

Meanwhile, he heard the whistling and whirring of the bullets in the rooms below, the shouts of the men, the groans of the wounded, and the crashing of boards and the splintering of logs.

Pittsburg "Rough Riders."

The "Rough Riders," as they are termed, are by no means confined to the plains of the West. In the suburbs of Pittsburg is a band which is frequently called out to withstand the attacks of Indians and perform other daring exploits which have attracted considerable attention to its really remarkable horsemanship. It is comprised of boys whose ages range between eight and twelve years. They have all of the regulation equipment, including rawhide whips, the soft hat, the top boots and the "shooting irons" as well as the necessary lasso. They have broken their ponies so that the little animals will execute various kinds of evolutions as readily as the average broncho and sometimes will be as obstinate.

As there are no Indians in the suburbs of Pittsburg, where the rough riders reside, they have induced some of their comrades to put on the war paint and feathers. A big box on one of the vacant lots has been turned into a fort and this is defended by the whites from the attack of the Apaches and other tribes until the brave garrison is rescued by the troop of rough riders who swoop down upon the redskins and generally put them to flight, although some of the scrimmages are extremely exciting and many powder cartridges are emptied before the enemy is conquered. The front page illustration shows one of the officers of the rough riders with his complete equipment, and the accompanying pictures show a platoon with an Indian prisoner, and a fort garrison.

"Pull, Herbert, pull!" he cried, following with his eyes the distant boy.

So yet there was a long space between the boats, and the short winter afternoon was fast drawing to a close. Night would soon fall, and the lad might yet escape.

The sergeant now hurried up almost out of breath, to say that the enemy had ceased their fire, and were waving a white flag as a summons to surrender.

"Don't answer just yet," the captain cried, without removing his eyes from the boats.

They were a long distance off shore, and the boy was still a good piece ahead of his pursuers. Then the darkness settled down over the water, and the officer could see them no more.

A decisive refusal was now given by the intrepid captain to the summons to surrender, but by mutual agreement all hostilities were suspended for the night.

The hours were long and anxious ones to the Americans. A strict watch was kept to detect the slightest movement on the part of the enemy. The wounded were cared for as well as possible under the circumstances. Fortunately the well of the house had been so dug that its opening was at the rear of the huge kitchen, and though the besieged men were absolutely without food, there was an abundance of cool water for all—no light boon to the thirsty and stricken men.

With the first show of light an increased force of the British advanced upon the house, evidently intending to carry it by storm. The assault was, however, bravely met by the grizzly captain and his men, and then the battle recommenced with a fury thus far unequalled. The attacking and the attacked fought with a coolness and heroism, born in the one instance of determination, in the other of desperation.

In the midst of the engagement, the captain left his men and ascended to the garret, where he looked anxiously out of the little window, and off over the waters of the bay.

If Herbert had escaped the enemy, and reached the main shore, it was time the reinforcements were in sight.

One hurried glance brought the captain's heart into his throat. Almost at the island were several large flat boats loaded with troops. A few minutes more and they would be at the house.

He flew down the stairs; it was raining bullets; the rooms were encumbered with the wounded, some of whom reeled around like drunken men, catching at the furniture; walls and floors were spattered with blood; corpses lay across the doors; the sergeant's arm had been broken by a ball; everything was a whirl of smoke and dust.

"Hurrah!" shouted the captain; "stick to your posts, men! Reinforcements are coming! Courage for a while longer!"

The British had drawn nearer yet; their con-

torted faces loomed up through the smoke; above the rattle of the muskets rose their savage cries, insultingly demanding surrender and threatening immediate slaughter.

Occasionally a soldier, terror stricken, withdrew from the window only to be driven back by the redoubtable captain. But the defenders' fire was slackening, their faces showed discouragement; it was impossible to prolong the resistance.

Suddenly the firing of the enemy ceased, and a thundering voice shouted:

"Surrender!"

"Never!" called the captain from the window, and the firing began again, steadier and fiercer on both sides.

More soldiers fell; already more than one window was without defenders; the crisis was at hand.

"They'll not reach us in time!" muttered the stalwart captain between his teeth in a broken voice; then he ran furiously about, twisting his sword in his clenched hand, resolved to fight to the end, rather than yield to the enemy.

The sergeant at this moment, rushed down from the garret, crying in a loud voice:

"Our friends are here!"

"They are here," repeated the captain, with a shout of joy.

At this shout, all unhurt, wounded men and officers, rushed to the windows with a tremendous cheer; and once more the resistance grew fierce.

A moment later, signs of uncertainty and a beginning of disorder were noticeable in the enemy. Immediately, in great haste, the captain formed a small company downstairs ready to make a sally. Then the captain flew upstairs again.

He had scarcely arrived there, when he heard a hurried tread accompanied by a formidable hurrah, and from the window he saw advancing at a quick run through the smoke, two companies of minutemen, who poured as they ran a deadly fire into the already wavering ranks of the British.

The captain placed himself at the head of his little troop, and rushed out of the doors with an answering cheer; the enemy faltered, became disordered, and then fell back.

The ground of the previous day was gone over again, but the retreating force then had become the advancing force now. The victory was not a sudden one, however.

The British soldiers fought bravely, contesting every circle of ground, and the sun was high in the heavens before they had been driven back to their boats, and abandoned the island, leaving their wounded and their dead behind.

As the British ships spread their sails, and slowly went down the bay, they as a parting acknowledgment of their defeat, sent several cannon shot screaming above the heads of the victorious Americans. But the victors, thankful to have them depart on almost any terms, only answered with three defiant cheers.

"Where is Herbert Hathaway?" the grizzly cap-

tain asked of the commander of the reinforcements, looking anxiously over the squad of men halting near him.

"We left the brave boy in the doctor's care at Bristol," the officer addressed replied; "though severely wounded he delivered your message before midnight, and in less than two hours I'd collected my men and was on my way to your rescue."

"I'm sorry the lad was hurt," remarked the old captain grimly, "but to send him for you was our only hope of driving off the rascally Britishers. You came none too soon."

As rapidly as possible arrangements were completed for the transfer of the wounded to the mainland, where a church had been turned into a temporary hospital; and thither a few days later Captain Baker came to see how his men were faring.

The church was full of injured soldiers, reclining on two rows of beds stretched upon the floor; two doctors and various assistants were anxiously going and coming, and stifled cries and groans were heard.

On entering, the captain paused a moment at the door, and looked about him. Just then he heard a faint voice close by calling him:

"Captain!"

He turned around, it was Herbert Hathaway; he was stretched upon a trestle bed, covered up to the chest by a coarse blanket, with his arms outside, the left one in a sling. He was pale and thin, and pinched from suffering, but his light eyes sparkled at the sight of his commander.

"Are you here?" the captain asked in astonished but kind tones. "Well, Herbert, you did your duty."

"I did the best I could, sir," answered the boy modestly.

"Even though you were wounded," remarked the officer, nodding at the bandaged arm.

"What else should I have done?" asked the lad proudly. "I had to run like a deer, for they saw me immediately, and sent their balls skipping after me. But I reached the boat and was making good time off shore, when they winged me. One can do much, however, with a single arm, and I sculled the craft out of reach of the bullets in no time.

"Then that pesky yawl came after me, and until darkness fell I was at my wits' end to keep out of its way. But by changing my course repeatedly I escaped, and reached the shore about midnight. I was so stiff and cold I couldn't crawl, but fortunately my cries attracted the attention of a guard to whom I delivered your message.

"It was a hard pull though, captain, I was dying with thirst, and kept thinking I shouldn't reach the shore. I was afraid, too, you wouldn't be able to hold the house until morning. They tell me, however, captain, that the reinforcements got there in time, and you drove off the redcoats. I'm satisfied."

"Well, I'll see you again, lad. I'm going to look around on the other boys now, and find out how they fare."

D & M BASEMAN'S Gloves.

Buckskin, Horsehide, etc.
We make the only genuine Buckskin Baseman's Glove made in the United States. Every ball-player ought to try the "D & M" goods. They're not too expensive, but they wear like iron.

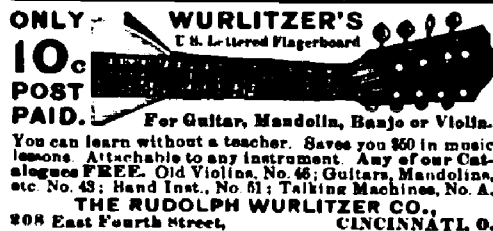

Ask Dealers for the "D & M." Our Illustrated Catalogue is ready. Send for it.
Draper & Maynard Co., Plymouth, N. H.

ANY BOY CAN GET THIS MOTOR by selling the Handy Match Scratcher, most attractive novelty we have yet put out, which everyone wants at sight. By selling these you can earn in a few hours any of the following:

- The Hustler Motor, Hustler Motor parts, Medical Battery, Electric Battery Lamp, Electrical Units for Boys, Door Bell, 2 1/2 inches.

Send 10c for sample Scratcher. Show it and take orders for enough to get a prize. Then send for Scratchers and we send you the prize at once.
C. & T. ELECTRIC CO.
202 W. Fayette Street, SYRACUSE, N. Y.

ONLY 10c POST PAID. **WURLITZER'S** C. K. Lettered Fingerboard

For Guitar, Mandolin, Banjo or Viola.
You can learn without a teacher. Save you \$50 in music lessons. Attachable to any instrument. Any of our Catalogues FREE. Old Violins, No. 46; Guitars, Mandoline, etc. No. 43; Hand Inst., No. 51; Talking Machines, No. A.
THE RUDOLPH WURLITZER CO.,
208 East Fourth Street, CINCINNATI, O.

FIVE TOOLS IN ONE **A 12-Year Old Boy**

A LABOR SAVER.
can do more and better work, either in the field or garden, with this **HAND CULTIVATOR** than three men can do with common hoes. Plows, hoes, cultivator, atride or between rows. If no agent in your town send \$1.25 for sample delivered and terms to agts. Ulrich Mfg. Co., 7 River St., Rock Falls, Ill.

I Will Tell You How To be quickly and permanently cured, I cured myself after suffering 20 years.

STAMMERERS
Write for my book of Information, FREE. To be sent to you by the COLUMBIA CHEMICAL COMPANY, No. 42 West Larned Street, DETROIT, MICH.

BOYS, EARN A PUNCHING BAG or Football. Send your full name and address and we will tell you how. It's a snap for you. **HOWARD SUPPLY HOUSE,** Department A, 463 State Street, CHICAGO.

BOYS AND GIRLS, READ THIS!

The University of Pennsylvania's Crack Athletes.
The University of Pennsylvania will pin her faith in the intercollegiate relay games this season on four men whose pictures are printed on this page: Captain A. C. Bowen, the two mile runner; Terry, the half miler; Baird, the wonderful little pole vaulter; and Amsler, the hurdler and sprinter. The last named is the speedy little fellow who astonished the athletic world recently by compelling the world's record holder, Arthur Duffey, of Georgetown, to acknowledge defeat. The men met in the semi-final heat of the forty-yard open event at the indoor meet held by Company I, of the First Regiment of Pennsylvania. Amsler won by a narrow margin from the feet-footed champion of the running path.

Cardinal Wolsey's Bridge

FRED MYRON COLBY

Thomas Wolsey, butcher and grazier in the good old town of Ipswich, England, was in a fret. Something had evidently gone wrong with the portly and substantial citizen. His fair, good-natured English face was flushed, and his gestures were rather more violent and abrupt than those he ordinarily indulged in.

"I tell thee, Joan, wife, it is all thy fault that the boy has such high notions," he was saying. "I never put these ideas into his head, I'll be bound. What good will all this learning do him, I should like to know?"

"He means to study and be a priest."

"What, our boy Tom to be an ecclesiastic! What, then, will become of the business in which his grandfather got money, and I, following in his good steps, have become the wealthiest citizen in the borough?"

With Thomas Wolsey, Sr., the acquisition of wealth was the sole object of life. He could not imagine any other purpose of existence, and it grieved and angered him that his only son did not accept the same opinion.

"I tell thee," he continued, "it is all folly for the lad to give up the most flourishing business in Ipswich for the sake of being a student at Oxford. All the learning in popedom and heathenness to boot wouldn't atone for that."

"But learning will put him in the way of becoming a great man," urged Mistress Joan.

"Out on thee for a dullard; who ever heard of a butcher's son becoming a person of distinction?"

Before Mistress Joan could make any response to this, a young lad who had been intently perusing a Latin book by the hearth, came forward. He had a bright intellectual face, and his lithe figure had all the grace of a youthful Apollo.

"I know, sir," he said, with kindling cheeks, "of a swineherd who became a pope."

The elder Wolsey responded by an incredulous grunt.

"And that swineherd, sir, was Nicholas Breakspere, afterwards Pope Adrian the Fourth, the only Englishman that ever sat in St. Peter's chair."

"And do you think to ever be pope?" inquired the butcher, scornfully.

"Perhaps I may be a cardinal," replied the boy.

"Ha! ha! thou speakest of what can never be, son Thomas."

"But if he reach not so high an eminence he may be a bishop," interposed Joan, whose maternal breast beat proudly for her hopeful son. "Hast never heard the proverb, 'He who reacheth after a gown of gold shall scarcely fall of getting one of the sleeves?'"

"It is easy to talk of dignities and honors, but it is another thing to obtain them. However, I do not choose to balk your whim. The boy may go to Oxford, but first I have a choice bit of pastime for him. I wish him to go with Nicholas and Giles and Dick to buy beeves off the Southwold marshes. Then let the simpleton enter Magdalen College if he still persists in such foolishness."

"Thou wilt not feel so chafed when I take up my bachelor's degree," observed

young Wolsey, "and thou wilt have to wait but two years for that."

"And dost thou think a boy of twelve years will win a bachelor's degree in two years at Oxenford? Why, thou wilt be but fourteen then."

"Anywise thou shalt see it, mine honored father," cried the youth impulsively.

"The day I hear the news thy mother shall have the finest baron of beef in my shambles to roast for dinner; now, wife, remember that," said the butcher. "And now to bed, for the journey on the morrow will be one to tire thy young limbs."

Young Wolsey could sleep but little that night at the thought of entering Oxford, and he awoke early to prepare himself for the journey his father desired him to make. He rode the butcher's best mare, Nicholas, his father's hired man, was mounted on a black nag, and the two stout serving men, Giles and Dick, trudged along on foot.

"Don't let either monk or trader play aught of their tricks on ye, lads," cautioned the elder Wolsey at parting, "and, son Thomas, if ye want to tarry with the monks of Blitheborough, and look over their musty books on your return, ye can do so. You'll have a pleasant country to ride through, and the forty miles won't seem long to ye, I'll warrant."

It was fine April weather, and the quartette journeyed pleasantly along. The horses' pace was not swift, for fifteen years of service before a butcher's cart had tamed what mettle they ever possessed, and the two pedestrians easily kept up with them.

The country was new to the boy, and it lay fresh and beautiful in the spring sunlight. Massive castles embowered in their ancestral groves, and grim monasteries were seen at intervals along the way. From the leads over the south aisle he obtained a fine view of Southwold, Walberswick, and the ancient city of Dunwicks, which the remembered was the capital of the East Angles in the days of the heptarchy.

The journey was a pleasant one to the butcher's son, and he almost regretted when the curfew bell of St. Peter's, at Wangford, told him that they had arrived at their destination.

The following day was spent in making bargains with the monks of Holy Rood chapel and the graziers of Rigdon, in which the cautious, calculating Nicholas served his master to good end. A drove of twenty four fat beeves was purchased, and the price paid out in gold and silver pieces from the gypsy that hung at Thomas Wolsey's girdle.

The night was spent in quaffing mead with the jolly monks, and early in the morning the cattle were driven from the convent yard. A new route was shown them by which to return home, and as this promised to lead by the abbey of Blitheborough, and, moreover, was somewhat nearer, young Wolsey eagerly embraced the plan of going that way. The Blithe, a dark, brackish stream, lay in their path, but this, the monks assured them, could be easily forded.

This they did not find so easy after all. It had rained the night before, and the river was swollen to such a degree that the elder drover hesitated to drive his

nag into the current. But Wolsey, with the impetuous assurance of a boy, urged his mare forward. The terrific foundering of the beast soon unseated him, and the drovers on the shore, seeing the peril of their master's son, called out to him to swim back.

"For the love of St. Margaret, master Thomas," screeched Nicholas, "do not attempt to reach the other bank! You will be drowned! You will be drowned!"

For a time it seemed as if it would be so; for, though the lad was a good swimmer in his native streams of the Orwell and the Gipping, he found it more difficult to sustain himself in the dark, muddy tide in which he was immersed.

His companions, without attempting to aid him, continued their cries, and had it not been for a wood ranger on the opposite shore, who had seen the accident and rushed forward with a long pole which he reached to the almost exhausted youth, there had been no Cardinal Wolsey in English history.

Once on dry land again, however, he cleaned the ooze from his mouth and eyes and cried to his father's servants to turn back with the cattle, and hurry on as fast as they could to Ipswich.

"And what shall we say to thy father about the gray mare?" asked Nicholas, who, now that the lad was safe, felt rather uncomfortable about the thought of his master's anger at the loss of a favorite beast.

"Concoct what story it pleases thee, good Nicholas," answered young Thomas; "and, moreover, tell him that his son will tarry tonight with the learned monks of Blitheborough, whose abbey I see rising across the fens."

"But if the good master should be angry, what shall we do?" persisted the anxious drover. "It was not our fault that the gray mare was lost."

"Nor was it mine," returned the lad. "But tarry not there, ye poltroons, unless ye choose to wait until I am a cardinal, when I will have a bridge built over the muddy river at this same place so that other travelers shall not incur the peril that I have just undergone."

"Would that you were one now," young master," said Nicholas; "it might happily benefit us," and, laughing pleasantly, the drovers turned their bullocks' faces toward Wangford, while Wolsey urged his steps toward Blitheborough abbey.

What followed there we will not relate; nor shall we have aught to say of the progressive steps by which our hero attained to the eminence to which his ambition tempted him to aspire. Suffice it to say that by diligence and energy he rose to be the greatest man in England save one, and that he was not forgetful of his promise made on the bank of the Blithe, but caused to be erected a costly structure across the dangerous ford, which, even to this day, is called the "Cardinal's Bridge."

History does not tell us how the worthy butcher bore the loss of his valuable mare, but it does tell us of the grand entertainment that he gave his friends when, at the age of fourteen, his promising son came home wearing the bachelor's gown he had won at Oxford.

A boy complained because, as he said, his parents wouldn't agree upon one thing: His mother wouldn't let him stand on his head, and his father was constantly grumbling because he wore his shoes out so fast.

AT THE age of four Tommy Weldon had resolved to be a motorman. For this early selection of a career his surroundings were mainly responsible. He lived in the suburbs of a city with which everything connected by means of an electric railroad; and there was not an hour of the day or night when he could not hear the hum of the trolley cars and the clang of the bell which the motorman pounded with his foot. It always made Tommy catch his breath to watch the masterful way in which he brought the big, thundering car to a stop at the cross-walk with a slight twist of one handle and a lightning turn of the other. The brakes would creak and the great vehicle would groan and protest; but in the end it always yielded to its master on the front platform. The motorman had none of the petty, commercial annoyances of the conductor. He was not bothered to make change or ring up fares or help women and girls on and off the car or answer questions. Like the pilot of a ship he stood calmly at his post, cooled in summer with breezes of his own, and in winter snugly wrapped in a great bearskin coat.

Of course, I do not mean to say that Tommy realized all these things at the age of four. To understand a trolley car requires study. But long before he knew what made the car go he saw that the motorman was in full control. When he grew older he rode to and from school on the cars and learned more about them. In summer when open cars were put on the road he sat on the front platform and talked with the motorman. Before he was ten years old he knew every motorman on the line and before he was twelve there was very little about a trolley car that he could not explain to you. He had even been to the powerhouse at the end of the line and seen the big dynamos which grind out electricity as a cider press does cider. He had seen the inside of the motor under the floor of the car and learned how the current was fed to it through the long-armed trolley from the wire overhead, and how it turned the wheels. He had watched the men at work on the track and found that they laid underground a copper wire—"bond wire" it was called—on which the electricity after running along the feed wire returned to the powerhouse and "completed the circuit." These facts with many others he learned from his friends, the motormen; and his fondness for airing his knowledge gained for him at school the name of "Trolley-Car Tommy." The men on the road, with whom he was a favorite, soon picked up the title; and he took it as one of distinction.

Considering this special knowledge and his ambition, it is not surprising that when Tommy's father died and he was obliged to leave school and work to help his mother, the occupation of motorman was the first that occurred to him. He was fifteen years old and strong, and for the past two years had been perfectly confident of his ability to run a car from one end of the line to the other as well as any man he knew. Several times on clear stretches in the outskirts of the city one of his friends had allowed him to have full control of the car, standing close beside him. It is true, yet touching neither brake nor lever. If the motorman had been seen doing this by one of the company's inspectors he would have received his discharge.

The motorman knew this although Tommy didn't, and the latter thought it a hardship that he had been cautioned to keep his exploit secret.

So one day he marched into the office of the superintendent and stated what he wanted. The superintendent was a large man; even when he sat at his desk his head was level with Tommy's. The boy expected that he would be questioned about his experience and put to some practical test. He knew that motormen were carefully trained, with an old employe to stand behind them on the platform for several days after they were first given charge of a car; but he considered such training more than equalled by his experience. Therefore he was not a little disappointed when the superintendent did not examine him. He merely smiled in a tolerant way as he said, "No, my boy, you're not old or strong enough. Come here in about five years and perhaps I can do something for you." Then he became absorbed in his writing, and Tommy felt that he had to go. He would have liked to argue the matter; but he did not dare.

Jim Newhouse, one of his warmest friends, was motorman of the car he rode home on; but although from force of habit he took the seat on the front platform his feelings forbade any attempt at conversation. He was crushed by the superintendent's words. Five years! If he lived to be a hundred he would never be better qualified than he was at that moment.

Nevertheless his humiliation did not

prevent him from looking up with half-hearted interest when Jim was called back to help the conductor with an obstinate switch. There was no switchman at this corner and as soon as one car passed it was the conductor's duty to run back and fix the switch ready for the next car, which turned in the opposite direction. This time, evidently, something was the matter, for after poking at the rail with his iron rod for several minutes the conductor had shouted for the motorman to come and help. Ordinarily Tommy would have been on the spot where he could get a close view of such operations, but today his sense of interest was so blunted that he remained unmoved while his two friends worked over the refractory switch.

As he sat thus buried in sombre meditation, suddenly the car started with a jerk that nearly threw him from the platform. He picked himself up wondering who was the green motorman that turned on the current so recklessly; but on looking around he found to his amazement that he was the only person on the platform. The car was whizzing down the street gaining headway with each revolution of the wheels, with Jim Newhouse and the conductor yards behind in a fruitless race to catch it. Instantly Tommy realized what had happened: Through some fault of the machinery the power had been turned on full head; he had heard of such accidents before. To shut off the current was his first thought; and without stopping to rub his bruises he sprang for the controlling lever. It was not there. Then he remembered that when a motorman leaves his car he takes the controller with him. The one he was looking for was now being waved frantically in the hand of Jim Newhouse every moment farther in the distance. But the brake was there, and grasping it in both hands Tommy turned the handle until his strength gave out. The iron shoes screamed as they came in contact with the buzzing wheels and a trail of sparks was left along the tracks; but the speed was hardly affected. Against the irresistible power which turned the wheels, brakes were of little use. Tommy knew enough about electric motors to understand this, and for the first time he became worried.

Several passengers had been thrown entirely out of the car when it started and the rest had been pitched over the backs of the seats. A chorus of screams and shouts was borne to the boy's ears; and glancing back he saw a man jump from the running board and go rolling over and over on the pavingstones, while others looked as though they were going to follow. The car was racing at terrific speed, rocking and sea-sawing madly and threatening to leave the track at every jump. Looking ahead he saw that it was approaching the sharp curve at the end of the avenue, and he realized that it would never get around at that speed. For a moment he felt the temptation to jump, as he pictured the car off the track and crashing into the curb. It was only for a moment, however. He was the only experienced person aboard. What would Jim and the others say if he deserted those men and women? The only thing left was to stop the car somehow before it reached that corner.

Then for the first time he remembered the trolley and began skillfully swinging himself along the running board to the rear platform. As in most systems where the overhead feed-wire is used, the trolley was a long metal arm attached to the car roof with a strong spring which kept the little grooved wheel at the upper end pressed against the wire. A rope fastened to this and extending down to the rear platform enabled the conductor to shift the trolley as he wished. By this rope Tommy intended to pull the trolley from the wire and cut off the power from the motor—a simple operation.

But when he reached the platform one look told him that this means of stopping the car had also been taken from him. Someone had acted upon this idea before but in his frantic haste, evidently had broken the rope. At any rate there lay the rope on the floor while the trolley rode high overhead, snapping out sparks as it fed to the grinding motor under his feet the current which was driving the car to its destruction. The curve was only a block away now. Tommy knew that the trolley must be disconnected from the wire and that only one way of doing it remained. Without hesitation he leaped upon the dashboard and seizing the edge of the overhanging roof climbed on top of the car. The sloping roof teetered up and down so that he could scarcely keep his footing; but two leaps brought him to the trolley arm, and grasping it as high as he could reach he bore down with all his weight and then pushed it slightly to one side so that when he let it spring back it stuck straight up in the air, its wheel spinning uselessly two feet above the wire. The effect upon the speed of the car was directly noticeable. The hard-set brakes ground on the wheels to some purpose now; and with creaks and groans the car ran slower and slower until it came to a stop just at the beginning of the curve.

Meanwhile Tommy Weldon sat on the roof calmly dangling his legs over the

"True as the needle to the pole"

side; and there the frightened passengers found him when they poured from the car, glad to set their feet on solid ground. It was not until Jim Newhouse arrived, red-faced and panting from his run, that he condescended to slide down and receive the thanks and praises showered upon him at close range. The men patted him on the shoulder and some of the women kissed him and called him a brave "little" boy; but he valued big Jim Newhouse's hearty hand clasp and grunt, "much obliged, old man," most of all. Jim treated him like an equal.

It did not take the experienced employes long to repair the machinery; and the car continued its trip with Tommy at his old post on the front platform talking and laughing with Jim, not a trace of his old disappointment remaining. Opposite his house they stopped and the passengers gave a cheer that brought his mother to the window to see Jim and the conductor escort her boy up the front steps with considerable ceremony.

That afternoon Tommy sat in the kitchen telling his mother all about it, when in walked the big superintendent. He was the same man Tommy had interviewed in the morning, yet his manner was decidedly different. His voice was not so crisp nor his look so keen nor his movements so impatient.

"Is this Mr. Thomas Weldon?" he inquired.

"Yes, sir," answered Tommy. "Why you're the young man who was in my office this morning asking for a place as motorman," exclaimed the superintendent with sudden recognition.

"Yes, Sir," said Tommy again; "can I have the place after all?"

The superintendent gave no direct answer to this question; but after he had the story of the runaway car from the boy's own lips he led him on to tell of his ambitions and why it was necessary that he should work at all instead of attending school. Then he told Tommy things about an electric railroad that he had never dreamed of before. He spoke of the officers and managers, for whom the motorman and conductors and inspectors worked like so many accurate machines. In short he gave the boy his first view of the operation of a great street car system; and as Tommy listened he understood that there were more fortunate men, and men with a greater work to do, than those who guided single cars from the front platform.

"Thomas," said the superintendent, "some day you want to be in charge of many motormen; but before that there are many things to learn. Do you want to learn them?"

"Yes," cried the boy, eagerly, "if you will give me a chance."

"The chance," replied the superintendent, "will be waiting for you at my office to-morrow morning if you will come; and as long after as you care for it."

But one thing still bothered Tommy, and as the superintendent started to leave he mentioned it. "How about Jim," he asked; "you haven't discharged him, have you?"

"Who's Jim?"

"Don't you know Jim Newhouse, the motorman on No. 102? It wasn't his fault, you know, that the car ran away."

"Is he a friend of yours?"

"Yes, sir; one of my very best friends."

"Very well," said the superintendent, "he will not be discharged; and perhaps after you are in the office we can manage to get him promoted; only don't let him know about it."

"Thank you, sir," said Tommy, perfectly happy.

American Boy Artists.

Never has the editor been favored with so many drawings done by boys as within the past thirty days. Nearly one hundred drawings have reached his desk, many of which are very good and show decided talent. Many boys will be disappointed in not seeing their pictures reproduced in these pages, but we cannot find space for them. They give the editor much pleasure, and the time spent on them by the boys is not wasted. They have his thanks, if nothing else.

BOYS

THE BEST OFFER EVER MADE.

Send your name and address and we will mail you 36 pieces of ART JEWELRY to suit at only 10 cts. each—no trash. Every boy you offer it to will purchase one or more pieces at sight. When sold send us the \$2.50 and we will send you promptly by Express LEAGUE BASEBALL OUTFIT FREE containing 9 Baseball Caps, 9 Baseball Belts, 1 Baseball, 1 Thrower's Glove, 1 Catcher's Mitt, 1 Catcher's Wire Mask, 1 Book Complete Base Ball Rules. Here is a chance to get a complete outfit without costing you a penny. Jim dandy goods and latest league pattern. This outfit would cost you at least \$3.00 in any store that handles sporting goods.

Form a Baseball Club

Get nine boys in your locality and organize a baseball club for the summer. Let each boy earn his share in this large outfit by selling four pieces of jewelry. This will take but a few minutes of each boy's time, and will be a source of enjoyment for the whole summer season. We will guarantee you honorable treatment and shall expect you to treat us the same. Such an offer as we make you has never been made before by any reliable concern. Your credit is good with us, and we trust you for the jewelry until you have sold it. Write to-day. Address us this way:

STANDARD JEWELRY CO.

Dept. 5, BOSTON, MASS.

\$1.50 Wrist Bags!

A NEW AND VERY STYLISH

NUMBER IN Wrist Bags

is the one pictured here; made of genuine walrus and seal—colors Grey, Tan, Brown and Black—nickel gilt and gun metal trimmings—lined with moire silk—has separate inside pocket. Guaranteed to be genuine \$1.50 value; our price for either 5, 5 1/2 or 6 inch size.

\$1.10

Pardridge & Blackwell

133, 135, 137, 139 Woodward ave. 2, 4, 6, 8, 10 Michigan ave. DETROIT, MICH.

Sent anywhere, prepaid, on receipt of price. Order Wrist Bag No. 77A and state size and color wanted. Our Spring and Summer Catalog of General Merchandise mailed free to all who write for it.

BOYS AND GIRLS I will give you a pretty BRACELET with real lock and key, or pearl handle KNIFE, two blades, as a present, if you will sell 12 pretty Scarf Pins at 10c each. Send no money, only your name, till goods are sold. Dresser, Manfr., Lewiston, Maine.

THERE are many interesting young people in the circle of families of what is known as official life at the national capital—that is the households where husbands and fathers hold high positions under the government or in public life—but doubtless the most interesting junior citizens at Washington are to be found in what is known as the Diplomatic Corps. This is made up of the representatives which the various monarchs and governments in all parts of the world send to Washington to look after their interests in this country and to assist in adjusting any differences which may arise between Uncle Sam and their respective nations. The junior members of the diplomatic families are of especial interest to American boys from the fact that they, one and all, come from far off climes and in the aggregate constitute a sort of world's congress of young people representing every part of the globe.

A large proportion of the young foreigners temporarily residing at our seat of government have come from our sister republics in Central and South America. As every boy who has studied geography knows there are a large number of these small republics on the lower part of the continent and every one of them is particular to send a representative or Minister, as he is called, to Washington for the reason that each of these smaller countries regards the United States as a protecting big brother. Some of the representatives who come to Washington from Asia and other far off parts of the world do not bring their families with them, but practically all the visitors from Central and South America are accompanied by their children, and in most instances they have large families.

The Peruvian Minister, Senor Calderon, for instance, has a household of ten lively boys and girls. Of this number seven are his own children and the three others are boys whom he has brought to the United States in order that they may be educated in American schools. All of these young people from Peru have the dark olive complexions and dark hair and eyes characteristic of their race. The whole circle, from the youngest to the eldest, speak French, Spanish, German and English as easily as does an American boy his native tongue. Then, too, each of the ten is a musician and they have selected different instruments and practiced together until they are now able to form a full orchestra.

The Minister from Costa Rica, in Central America, Senor Don Joaquin Bernardo Calvo, has six children, three boys and three girls, who have lived in the United States for several years past and have grown very fond of the sports and pastimes in which their Yankee playmates take delight. The family of the envoy from Guatemala, also in Central America, comprises five lively young people, all but one of whom regularly attend school in Washington. Senor Don Fernando Guachalla, the Minister from Bolivia, in South America, has ten children, but as yet only a few of them have been permitted to join their father here. However, he expects to bring the remainder of his household to Washington in the near

future. The Minister from Brazil, who by a strange coincidence bears the name of Brasil, has two very attractive little daughters. These girls, unlike their playmates from the other countries of South America, speak Portuguese. All the other youngsters from this part of the world have Spanish as their native tongue.

One of the most prominent boys in Washington is Wu Chao Chu, the son of Wu Ting Fang, the famous Chinaman who served so long as Minister of the Chinese government at Washington and who has only lately returned to his home in the Far East. Of course Wu Chao Chu is not strictly speaking in the diplomatic circle now, but he may still be classed among the notable juvenile visitors from other lands. This lad from the Celestial Empire is a rather plucky boy who is anxious to make his own way in the world, as may be imagined from the fact that when his father and mother returned home he, of his own accord, suggested that he be allowed to remain here to complete his education. He attends the high school regularly, being a member of the military company connected with the institution, but he also devotes three hours a day to his Chinese studies so that it can be seen that he is kept very busy. When at school Wu Chao Chu wears regular American dress, but when he returns home in the evening he dons the Chinese costume.

There are three other children at the Chinese legation in Washington, in addition to a baby which will, however, shortly return to China, its parents having been ordered to return to their native land. The three youngsters first mentioned are the children of Mr. and Mrs. Yung Kwai. Yung Kwai is a Chinaman whose duty it is to translate into Chinese the letters received at the legation, and his wife is an American woman whom he married after coming to the United States. The baby before mentioned was born in this country on the Fourth of July and the almond-eyed little tot was given the name of Washington Shen Tung in honor of the city where he was born.

Two boys who bear as little resemblance to American lads as any youngsters to be found in Washington are Osman Sureya and Ali Haidas, the black-eyed little sons of Chekib Bey, the Minister from Turkey. The man who is stationed at Washington to represent the Sultan is a widower and his two sons are looked after by their grandmother. There is a third boy connected with the Turkish legation, the son of Sidky Bey, who acts as Secretary or assistant to the Minister. There are no Japanese boys under sixteen years of age at the Mikado's "branch office" in Washington, although the Japanese Minister has as proteges several young men who are in this country receiving their education. There is, however, a little Japanese girl in this household—the sister of the First Secretary of the Legation. She is about twelve years of age and has only come to America within the past few months. Like all the children from far off lands, however, she wears American costumes whenever she appears upon the streets. The only exception to this rule

occurred last year, when three Chinese girls visited China's representative at Washington. They invariably appeared in the long silken robes familiar to all persons who have seen Chinese pictures.

Many of the children of the Diplomatic Corps manifest marvelous cleverness in acquiring the English language. Take for instance, the case of the three daughters of Senor Don Martin Garcia Merou, the Minister from the Argentine Republic. These little girls are aged respectively thirteen, eleven and eight years. When they first came to this country they mastered the English language in less than a year, speaking it more fluently than either their father or mother. Among the newcomers in the Diplomatic circle are the two sons of Sir Michael Herbert, Great Britain's Ambassador at the American seat of government. One of these lads had the honor of being allowed to act as a page at the coronation of King Edward, and both of them have displayed a marvelous faculty for forming the acquaintance of a large number of American playmates. Other newcomers include the two daughters of Senor Quesada, the Minister from the new republic of Cuba.

Baron Moncheus, the Minister from Belgium, has three daughters who now make their home in Washington, and there are four young people in the household of Senor Don Joaquin Walker-Martinez, the new envoy from Chili in South America. From the little republic of Haiti, in the West Indies, come two healthy looking boys with swarthy complexions and crisp hair. Just at present there are no children in the household at the Korean Legation, but until a short time ago a young lad from this little known Oriental country was included in Washington's cosmopolitan population, and his flowing garments of silk and satin made him a very conspicuous character whenever he appeared on the streets.

In addition to the tiny Chinese baby mentioned above two other children in the Diplomatic colony are named for the city which is now their temporary home. The older of these is Alfonso Washington Pezet, only child of the first Secretary of the Peruvian Legation. This lad, who is fourteen years of age, speaks English and French as well as Spanish. The son of the First Secretary of the Mexican Embassy was christened George Godoy, but inasmuch as he was born on the anniversary of Washington's birthday, twelve years ago, he has announced his intention to add Washington as a middle name.

How Schley

ROBERT N.

Saved Greely

REEVES

THE whole civilized world is acquainted with the bravery of Admiral Schley at the battle of Santiago, but most people have forgotten, or perhaps never knew of his heroic rescue, some twenty years ago, of the gallant Arctic explorer, Lieutenant A. W. Greely.

In 1881 the United States Government, as its part in a plan formulated in 1880 by the International Geographical Congress held at Berne, Switzerland, sent an expedition to the Arctic regions for the purpose of establishing there a United States signal station. This expedition, known as the Lady Franklin Bay Expedition, and consisting of twenty-four men under the command of Lieutenant Greely, left St. Johns, Newfoundland, July 7, 1881, and six weeks later arrived at an extreme northern point on the eastern coast of North America, where this continent is separated from Greenland only by a narrow channel. Here Greely established a signal station and made preparations for a permanent camp. It was the intention of the government that Greely should remain at this point for two years, and the instructions given him stated that relief ships, bringing additional supplies, would be dispatched to the station in 1882 and 1883.

On August 25th, 1881, Greely sent his last dispatch to the Chief Signal Officer at Washington saying that his party was all well, and that he intended to take the sledges and dogs and start still farther North. Three weeks later the Proteus, the ship which had taken the expedition North, returned to St. Johns, leaving Greely and his party, prisoners in the frozen fields of the Arctic zone, shut out from all communication with the civilized world.

The following summer, in accordance with the government's agreement with Greely, the first relief ship, the Neptune, sailed from St. Johns for the Greely station. But that vessel was hardly out a month when its progress was effectually stopped by the solid pack ice of Smith Sound, and after many days of unsuccessful effort to find a passage through the ice to the waters beyond, it gave up the attempt, and in the latter part of September of the same year returned without any tidings of Greely. The officials at Washington, while disappointed at the failure of this first relief expedition, did not feel alarmed for the safety of Greely as it was known that he had taken with him provisions enough to last at least a year longer. Preparations, however, were at once begun for a second relief expedition, and in June, 1883, two vessels, the Yantic and the Proteus, were dispatched northward, the commanders of each being impressed by the government with the absolute necessity of reaching Greely that year.

The uncertainty and peril of Arctic navigation is shown by the sad fate of the Proteus. This was the same ship which had, in 1881, so successfully carried the expedition to its station. But although a staunch vessel of oak, sheathed in iron-wood, it was out only five weeks when it was caught in the heavy ice of Kane Sea and its strong sides crushed in like egg-

From photograph taken in 1884 at time of Third Relief Expedition.

shells. The crew, fortunate enough to escape, were picked up by the Yantic and brought back to the United States.

The anxiety at Washington and the excitement throughout the country became intense when the news came that the second relief expedition had failed. A new expedition was suggested at once; but as it was then the time of year when the coldest weather in the Arctic regions begins, and continual darkness sets in, it was thought best, after repeated consultations with experienced navigators and Arctic explorers, to postpone another expedition until the following summer, and thus prevent the possibility of a third relief expedition finding itself in as bad and perhaps a worse plight than Greely.

The country, however, was in suspense and Greely was not forgotten. Congress immediately passed an appropriation necessary for fitting out another relief expedition, and offered further a reward of twenty five thousand dollars for Greely's rescue.

A third relief expedition being thus assured, the Secretary of the Navy appointed Winfield S. Schley commander, and directed him to proceed at once to the coast of Greenland and find, or at least ascertain the fate of Greely. Under Schley's direction three vessels, the Thetis, Bear and Alert, specially designed for Arctic services, were quickly gotten ready. With a combined crew of one hundred and ten men the three vessels, early in the month of May, 1884, departed for the Arctic regions.

No one can estimate the perils and tediousness of an Arctic voyage. The prime requisites of an Arctic voyager are always patience and courage. That Schley and his men possessed these two indispensable qualities is shown by the tenacity with which they pushed northward along the frozen coast of Greenland. Progress, however, was comparatively easy until the ice of Melville Bay was encountered. Here a great battle between man and nature was begun. There were many days when the ships were unable to move in any direction on account of the density of the ice. Progress, if made at all, could be made only by the ships ramming the ice with their ironclad prows. To do this the ships would back a little, put on full steam and then strike the ice ahead with an ominous crash. If a square blow was given the vessels would sometimes run their length, but there was always the danger of also going to the bottom. Once when attempting to ram the ice the bow of Schley's ship, the Thetis, was driven into a narrow crack, the ice at the same time closing in about the sides and stern of the ship and holding it like a huge vise. This in Arctic parlance is called a nip and often results in disaster. It was a nip that sent the Proteus to the bottom of Kane Sea. In this alarming predicament Schley and his men waited anxiously for hours, not knowing at what moment the Thetis would be ground to pieces. But in the Arctic regions it is the unexpected that happens. By one of those strange freaks of wind or current the ice moved off and the Thetis, released from her bondage, by dint of ramming succeeded in making its way into an open body of water beyond. Here, however, new and almost impassable barriers soon presented themselves. Vast, unbroken fields of ice, the accumulations of years, in some places twenty, thirty and fifty feet in thickness, were encountered. This meant days of anxious, tedious watching and waiting. At such times Commander Schley, telescope in hand, mounted the rope ladder that led to the crow's nest, a little barrel-shaped

house fastened to the mainmast by stout iron bands, at an elevation of over one hundred feet above the deck. A stuffy and uncomfortable place it was, but from it Schley had a range of vision of from ten to fifteen miles, and it was to his watchfulness and quickness in detecting sudden movements of the ice and seizing opportunities for advance that in no small measure contributed to the success of the third relief expedition. After twenty eight days of battling with the ice of Melville Bay Schley pushed on into an open sea known as the North Water. Through this he made good speed and soon drew near to Littleton Island, where Greely was supposed to have established one of his temporary stations. A systematic search of all the neighboring capes and islands was at once begun. The Bear was sent on to Cary Island, while the Thetis visited Conical Rock, Cape Parry and other points along the coast. On Sunday, June 22, a cairn or mound on the top of Brevoort Island was sighted. It was the first evidence of human life that the expedition had seen for many days and instantly every man became excited at the discovery. Schley at once ordered Lieutenant Taunt of the Thetis to take a party of men and explore the island, while another officer, Ensign Harlow, was dispatched on a similar mission to Stalknecht Island. Half an hour after the searching parties had left, cheers were heard above the roaring of the wind and crunching of the ice, coming from the direction of Brevoort Island. In a few minutes one of Lieutenant Taunt's men was seen running at full speed over the ice toward the Thetis. Pale with excitement he clambered up the side of the ship and thrust a bundle of papers into Schley's hands, exclaiming at the same time that Greely was at Cape Sabine. The news was instantly signaled to the Bear, and a general recall of all men sounded by three long blasts from the whistles of the Thetis. The officers of both ships soon gathered about the little table in the wardroom of the Thetis and the records left behind by Greely in the cairn on Brevoort Island were read aloud. As the papers were hurriedly gone over those present were horrified to learn that the latest date borne by any of them was one dated October 21, 1883. This paper stated that Greely was encamped near Cape Sabine and had only a few weeks' rations left. As eight months had elapsed since the paper was written, Schley and his fellow officers were certain that Greely and his party had starved to death while watching and waiting for a relief expedition. Whether dead or alive, no time was to be lost in reaching the camp. A storm had been raging all day, and the wind was blowing terrifically, but in such a way as to leave a free passage through the ice to the shore. Schley at once ordered the steam launch lowered and a party under Lieutenant Colwell, who had been one of the crew of the ill-fated Proteus, was directed to go to the place mentioned in the records as the site of the Greely camp.

(Continued on Page 226.)

ADMIRAL WINFIELD SCOTT SCHLEY.

LIEUTENANT A. W. GREELY.

BOYS DO YOU WANT TO BE A CAPTAIN?

We are adding to the pleasures of BOYS by starting RIFLE CLUBS all over the country by GIVING AWAY WITHOUT MONEY Uniforms, Rifles and Rules for Drill so that even each little village may have a boys' militia of its own to take part in all its celebrations, adding pleasure or dignity to Memorial Day, 4th of July, Washington, Lincoln, Garfield and McKinley birthdays, and all public ceremonies, besides having a rousing good time among themselves.

Our Free Offer is not confined to any location, but is open to ALL BOYS, giving each community an opportunity to SUPPORT and develop patriotism and respect for our flag. Write to-day for RULES OF DRILL SENT FREE the same day your letter is received. We also tell you how easily and quickly you can get, WITHOUT MONEY, a complete uniform including rifle, sash, cap, belt, and service red stockings. HOME MAGAZINE CO., Dept. 306, Washington, D. C.

STATE DINING ROOM IN THE WHITE HOUSE.

Photo copyright 1907. R. L. Dunn.

Where President Roosevelt Entertains.

THEODORA CUNNINGHAM

When President Washington and his friend, Thomas Jefferson, in 1792, approved the designs of the architect, Hoban, for an executive mansion, the room set aside as the "state dining room" was considered ample for any possible emergency. But cabinet and state dinners have long ago outgrown it. When the White House renovations were begun last summer a stairway and a part of a brick partition were torn away, and the size of the room nearly doubled by including this space, and now, with a capacity for seating seventy eight persons at a horseshoe-shaped table, it will answer the purpose a while longer.

At a large dinner, when a table of this shape is required, President Roosevelt sits at the center of the curved side, with his back to the middle door.

With its panels and carvings in old English oak, its tapestry hangings on the walls and tapestry-covered furniture, it makes one think of a hall in an old castle, but the objects which hold the boys' attention are several stuffed animal heads hung upon the walls. President Roosevelt must take especial delight in these ornaments, and one of them, the head of a large moose, hanging over the middle door, is particularly dear to him because it was sent as a present by the citizens of Nome, Alaska. Perhaps the bear heads on either side remind him of the bears he did not get in Mississippi.

Opposite this moose head, over the mantel, is another, and in either panel between the mantel and the windows hangs the head of a Rocky Mountain goat with its curved horns.

While the boys are looking at these, the attention of their mothers is occupied with the quaint sideboards, one large and two smaller ones, with their gilt back-rails; each one resting upon the outspread wings of our American eagle, carved in wood.

The doors are of the original colonial pattern seen throughout this floor of the White House, and are beautiful specimens of household decorations of a past century, with their quaint inlays and silver knobs.

The polished table shown in the picture is the one from which the President's family and their guests ate their Thanksgiving dinner.

Settled by Admiral Dewey.

A certain Sunday school teacher found it difficult to convince some of the boys of her class that total abstinence was the wise policy. They insisted that many great men drank liquors, and cited the fact that Admiral Dewey gave his men liquor during the battle of Manila Bay. To settle this matter finally, the teacher wrote the Admiral, stating her case, and asking for the facts. The letter received in reply is important as forever settling the question involved, and we lay it before our readers in full:

"Dear Madam: I am very glad to have an opportunity of correcting the impression which you say prevails among your Sabbath school scholars, that the men on my fleet were given liquor every twenty minutes during the battle of Manila Bay. As a matter of fact, every participant, from myself down, fought the battle of Manila Bay on coffee alone. The United States laws forbid the taking of liquor aboard ship except for medical uses, and we had no liquor that we could have given the men, even had it been desired to do so.

Respectfully, "GEORGE DEWEY."

Sayings of Late P. D. Armour.

Pithy sayings were characteristic of the conversation and letters of the late Phillip D. Armour. Impressed with their value, his office associates recorded many of them, and the appended ones are a few of a number published exclusively in the September issue of Success. That magazine gives them as valuable suggestions to young men from a master in the art of business management.

Good men are not cheap. Capital can do nothing without brains to direct it.

An American boy counts one, long before his time to vote.

Give the young man a chance; this is the country of the young.

We can't help the past, but we can look out for the future.

Hope is pretty poor security to go to a bank to borrow money on.

A "sit-down" method won't do a minute in this age of aggressiveness.

There is nothing else on earth so annoying as procrastination in decisions.

A man does not necessarily have to be a lawyer to have good hard sense.

An indiscreet man usually lives to see the folly of his ways; and, if he doesn't, his children do.

A man should always be close to the situation, know what he is doing, and not take anything for granted.

There is one element that is worth its weight in gold, and that is loyalty. It will cover a multitude of weaknesses.

It is an easy matter to handle even congested controversies, where the spirit of the parties is right and honest.

The trouble with a great many men is, they don't appreciate their predicament until they get into the quicksand.

When you are striving to do that which is right, be courteous and nice in every way, but don't get "turned down."

The man who wants to marry happily should pick out a good mother and marry one of her daughters; anyone will do.

Do you suppose that, with an engine like this, I could afford to put anything into the boiler that would make the machinery run wild?

It is all right, in some cases, to bank on a man's pedigree; but, in most men, there is something a great deal deeper than this matter of genealogy.

I will always risk a man if he is in the dark and knows it, but I haven't much use for a man who is groping around in the dark and doesn't know it.

How Tommy Brought His Treasure Home.

(Continued from Page 217.)

slipping down squarely upon the three sleeping Apaches, and beside each the boy caught the glint of the moonlight playing on the steel barrels of their guns. The next instant a daring plan popped into his head. If he could once get possession of those guns he would have the Indians at his mercy. Cautiously sliding down into the shadow of the knoll he began worming himself warily in the direction of the weapons. One by one he successfully drew them out of the reach of the sleeping Apaches, and then carried them back and laid them beside his own weapon. He wanted to shout and whoop like a young Indian himself, but he was not quite ready. Pulling a lot of stout cord from one of his pockets he cut it into even lengths, and then with just his head and shoulders showing above the hillock he drew a bead on the unsuspecting redskins. Then he took in a deep breath. It was the biggest breath that Tommy Samson had ever drawn in all his life, for he had determined it was going to take just one yell to awaken the figures at his feet. When it came even the horses back of

him started in affright, and the three Apaches leaped to their feet as if they had received a charge of fine shot.

"Hy, there—throw up yer hands!" shouted Tommy.

In the curious light of the moon Tommy presented a grotesque figure on the top of the knoll. His gun gleamed down on a dangerous level, and probably thinking they were being held up by a desperate horse thief the Indians complied without so much as a grunt. Their surprise at seeing their weapons gone was complete.

"That's good 'nough!" complimented Tommy. "Now see 'ere, Reddy, you take these strings an' tie the others tighter'n a knot 'r I'll scalp y' with the hull eighteen slugs! Understand?"

He tossed the strings down among the Indians. His voice was wonderfully boyish, and trembled as he issued his orders, but evidently the Indians were not accustomed to dealing with boys behind guns in that country, and the words were hardly out of his mouth before one of the young bucks picked up a handful of the strings and set to work on his companions.

"Do it good 'n tight an' I won't hurt you!" encouraged Tommy, keeping his cheek tightly glued to the stock of his gun. "I just want what's in them bags, not you!" Evidently his English was understood, for the Indian tying his companions straightened in astonishment, then bent to his work again with a lot of guttural that was so much Greek to the young adventurer.

"Now, go git the horses, an' be sure to put the bags on 'em," commanded the boy, when two of the three Apaches lay helpless on the ground.

As silently as a specter the young Apache stalked out into the moonlight, carefully guided by the glint of Tommy's gun, and in two or three minutes had everything in marching order, with the precious bags tied across the horses' shoulders.

"Git up," ordered Tommy, "an' start that critter o' your'n across the desert. If you go to run I'll plunk you!"

Once his prisoner was astride his mount Tommy descended the knoll and after considerable clambering, during which he kept a sharp eye on the Apache, mounted one of the captive horses, with the Indian and the other mount in line ahead of him. Then the journey once more began through the foothills and across the desert. From his point of vantage Tommy guided the procession by giving directions to his prisoner, who used his knees in place of a bridle, and the other two horses followed in the trail of the leader. For hours a steady march was kept up across the desert. The second range of hills was passed, and just as the clear night began giving way to dawn the desert began gradually to disappear into the green verdance of a rolling plain. It was not far beyond that both Tommy and the Indian deserted the buildings along the creek bottom that marked the Samson ranch.

"That's my home, Reddy," informed Tommy. For the first time the young Apache turned and looked back at him. As he took in the small freckled face under the ragged straw hat, the boyish legs dangling on the horse's sides, and more than all, the triumphant grin transfixing Tommy's face, he stopped his mount and stared in open-mouthed astonishment, until his captor brought him to his senses again by pointing his gun at him.

"Well, if there ain't Dad and a hull passel of others comin' out!" exclaimed the boy, more to himself than to the Indian. "Bet they've been hunting f'r me f'r a plumb day and night!"

From the directions of the buildings half a dozen men, a woman, Tommy's two sisters, and any number of dogs, were flying across the prairie toward them, their astonishment showing in their actions even before they came within speaking distance.

"What in thunder, Tom—?"

"THEM, Dad!" Tommy pointed laconically at the bags.

Impelled by the air of mystery with which Tommy clouded his remark, one of the men cut a bag loose and in a trice had dumped out upon the ground a pile of dirty, gray lumps. The boy's heart gave a tremendous throb of disappointment. That was not gold! O, what a mistake he had made! One of the men was sticking his tongue against a lump.

"By ginger, it's salt!" he yelled.

A dozen hands were testing it in an instant. Salt! As worthless as dirt, thought Tommy. But what ailed the men?

"Tom—Tom—Tom, where'd y' git it?" beseeched his father.

"Found a mine of it," replied the boy. It seemed as though his heart was breaking with disappointment.

"A mine!" One of the men leaped into the air and kicked his heels together with a yell. "Great Jehosefat, y've ben the makin' o' the country, Tommy! Think on't! A hunder thousand head o' cattle on this range, an' salt costin' six dollars a bar! Whoop!"

And that is how Tommy brought his treasure home. For many years the Indians had secretly brought their salt from the mountains across the desert, while the ranches for miles around had to tote their supply from a great distance, and pay exorbitant prices for it at that. So it turned out that Tommy's reckless adventure, and his capture of three perfectly harmless Reservation Indians brought about the greatest boon the country ever had, for the deposit of salt was a large one, so large, in fact, that were all the Indians and white men in Arizona to get their salt from it, it would still last a lifetime.

EARN PRINTING PRESS

Advertisement for a printing press. Text: 'BOYS here's a chance for you to get a fine press free and to make money by printing cards, circulars, etc., for other people. We will give you this press with outfit of type, ink, matts, etc., absolutely without a cent of cost to you if you will mail 50 packages of "Cryin' Victim" perfume at 10c each. STAMPS, COINS AND CURIOS

Counterfeits. The Numismatic Sphinx.

A dealer in counterfeit stamps has been sending his circulars to collectors, and readers of THE AMERICAN BOY should exercise care in purchasing alleged rare stamps for a mere trifle. These stamps are usually advertised as "reprints" or "facsimiles" and not as counterfeits. They are not reprints in a great majority of cases but counterfeits. One of the packets advertised is 100 varieties of Confederates for 10 cents. The stamps in this packet are all unused, but very poorly printed and would deceive very few collectors, the impressions in many cases being less distinct than the illustrations in the catalogues and albums. As a general rule a set of rare stamps catalogued at several dollars but sold for a few cents may be set down as counterfeits. The editor of this department would like to have information in any cases where counterfeit stamps are sold to readers of THE AMERICAN BOY as genuine stamps.

G. H. Y.: (1) Your 1863 is a common Civil War token. (2) is a British Colonial quarter dollar struck for use in Canada in 1822. It sells for half a dollar at the dealers.—H. V. H.: The 1811, 1812 and 1824 half dollars are worth eighty five cents each with the dealer. Your others face value only.—A. C.: The \$2.00 State Bank of New Brunswick is very common and can be readily obtained for a few cents each. Yours, being not dated, never was placed in circulation.—D. M. R., H. I., Z. H. A., W. K., E. D. and A. B.: Your coins have no premium to mention. J. B. McF.: The 1813, 1822 and 1827 half dollars bring from seventy five to eighty five cents each at the dealers. Your Spanish silver has no premium.—The 5 franc pieces of Charles X. and Louis Philippe of France, if in fine condition, bring \$1.50 each at the dealers.—Coins that are holed or worn so that the inscription cannot be readily made out, as a general thing are of no value and do not command premiums.—There is no premium on the 1869 nickel five cent pieces or the 1853 quarters or half dollars that have the arrow point each side the date.—A fine 1875 three dollar gold piece sells for \$5.00. This date was only struck at the Philadelphia mint and 82,326 were struck. Your other coins are common.—J. R. W.: The 1851 silver three cent pieces are common, and unless fine, bring no premium. We have no particular knowledge of buttons, and consequently cannot assist you in the interesting specimens you have found.—The 1804, 1809 and 1828 half cents sell for twenty five, fifteen and fifteen cents each respectively. The 1802, 1804 and 1809 cents, thirty five cents, \$7.50 and one dollar each. They must be in good condition. We know of no small cents for 1851, 1852, 1853, 1854 and 1855.—Your rubbing is from a XXX shilling piece of James II. of England. It was struck in Ireland after the king had been driven from the throne. It is money of "necessity," the metal being brass obtained from old cannon, church bells, etc. You will notice that it bears the month of issue as well as the year, May, 1690.—There are no recent regular issues of our mints that bring a premium, with the single exception of the 1894 S. dime. All other issues of the past twenty five years have been in such large quantities that they are common. This applies to all our coinage, except the gold.—R. L. H. sends us quite a number of rubbings of nice coins for a collection, but most of them are common. Among them is a Japanese oval tempo and round current five sen in silver; Chinese cash and Kwang-tung cash piece. Others are from Hongkong, New Foundland, Switzerland, etc., etc. Canadian paper money T. M., G. G. S., F. F. T., H. C. B., L. C., is worth face value in Detroit.—M. W. G., G. B., C. R. C., O. C., C. R. and A. R.: There are no premiums on your coins.—J. A.: The value of the cents you mention depends altogether upon their condition. If poor or fair they are worth only face value. If good to fine, then they will bring from five to ten cents each. If unrecirculated, you can add 100 per cent to their face value and readily get it, for in this condition the cents are eagerly sought after. These remarks will apply to all the cents issued between 1816 and 1857. Your rubbing is from a common Canadian token for half-penny.—R. L. D'Arcy: The gold dollars of any date now bring a premium, none selling less than \$1.75.—Clarence Reynolds: Your rubbing is from a shilling of George III. of England. It is worth a half dollar.—John A. Cole: The United States did not issue any silver dollars in 1807, so we are at a loss to understand just what you want.—Alva P. Lawrence: There is no premium on the U. S. silver coins of 1853 with arrow heads each side the date.—J. W. Parker: Your rubbing is from a common Belgian 2 cent piece.—A. I. Kizer: The Bank of Upper Canada half penny of 1850 is very common.—Wayne Seeley: Your coins are all very common and hardly command a premium.—Arthur E. Twohey: There is not much demand among collectors for the 2 1/2 and 5 dollar gold pieces, and few of them you would be likely to run across would bring a premium.—Rex Bryan: There is no premium on the nickel three cent piece of 1871. The silver three cent piece of same date, if fine, sells for half a dollar.—D. E. B.: A good half dollar of 1839 sells for seventy five cents. George III. of England did not issue any copper pennies.—Wm. C. Westcott: There is no premium on the dollars of 1893, CC mint. 677,000 of them were issued at that mint.—C. F. A.: The cent of 1894 is worth just one cent and no more.—Willie Davis: The 1868 nickel five cent piece is worth only face value.—L. L. G.: Your coin is a common Spanish silver piece. The old date (1774) does not make it any the more valuable.—Bruce Carpenter: Your 1812 half penny we presume to be Canadian, as none were struck in England of this date. It is common.—Jack Stevens: The cent of 1819 sells for ten cents. Connecticut cents of 1787, if in good condition, sell at twenty five cents each.—L. A. White: The gold dollar of 1849 sells at \$2.—Arthur S. Trafford: The 1890 half cent sells for fifteen cents. Jay E. French: It is impossible from your description to locate or give value on your gold coin.—Bracy Turnbaugh: Such lists as you inquire for are issued by dealers in coin. Write to some of them. The 1894 half dollar is not scarce. It is nonsense to imagine them worth \$200 each when over seven and a quarter million of them were issued

Answers to Correspondents.

A. B. W., South McAlester, I. T.: The stamp you describe is from Sweden.—L. B., Vicksburg, Miss.: The Louisiana Law stamp you describe is worth about 5 cents. They are not common or very well known, as but few collect them.—F. T., South Ottumwa, Ill.: Send your stamp to the Scott Stamp and Coin Co., 18 East Twenty Third street, New York, and enclose return postage and registration.—S. C., West Lebanon, Ind.: The 10c Bill of Lading is catalogued at 6c. The 3c Proprietary catalogues 20c.—D. M., Hillsdale, Iowa: The stamp belongs to the issue printed to commemorate the Omaha Exposition and is not rare. It catalogues 1c.—M. F. J., Waycross, Ga.: There are several check lists of pre-cancelled stamps, but we know of no list pricing all the varieties. Many collectors collect them. Write to D. W. Osgood, South Fork, Colorado, for lists.—S. T., Elgin, Ill.: Any advertiser in THE AMERICAN BOY can sell you a set of the King's head issue of Great Britain. The set, including the 6d, can be purchased for 4 or 5 cents.—E. G., Monticito, Cal.: From the inscription on your stamp we think it is a local stamp from Hungary, although it may be a revenue.—A. H., Abilene, Kansas: Your stamps are worth about 10 cents.—G. W. C., Wheeling, W. Va.: The stamp you enclose is a newspaper stamp of Austria issued from 1853 to 1857. They are very common.—H. T., Northville, Mich.: The 2c Pan-American are worth about 10c per 100.—C. H. B., Truro, N. S.: See answer to S. T., Elgin, Ill.—L. H. F., Hermon, N. Y.: The surcharge on the stamps of India signifies, "On Her Majesty's Service." The stamp is used on official correspondence.—O. G. L., Ashley, Ohio: We cannot tell what your old revenue stamps are worth without knowing the inscription in the circle under the picture of Washington.—M. C. S., West Swaney, N. H.: The 5c brown starfield catalogues 2c. There is no 2c yellow Jackson postage stamp.—Collector, Philadelphia: The letters in the corners of the old stamps of Great Britain are known as plate numbers and designate the position of the die when the dies are made up for printing.—M. DeW., Horlock, Kansas: We cannot tell you the value of the envelope stamps unless they are sent for examination with return postage. There is no charge for examination. There are many varieties of nearly the same design.—Stamp Co., Pontiac, Ill.: The stamp is a German local.—S. H., Stamford, Conn.: Your stamp is a Mexican revenue.—P. M., Twillingate, Newfoundland: The unused 1/2 Great Britain described are catalogued at 2c each. We cannot tell the value of the British Guiana without a fuller description. The stamp you describe was printed in blue but not in green. The 3c Newfoundland surcharge is not catalogued used. The surcharged Canada on the 3c numeral issue can be purchased for 1c.—R. A. W., Salem, N. Y.: The 2c red Confederate stamp is catalogued at 25c unused. The value of the Metropolitan stamp depends on the denomination. The R. C. & W. stamp is catalogued at \$2.50. The Hop Bitters stamp catalogues 4 cents. We are unable to place the other stamps from your description. Kindly send fuller description of the stamps, or the stamps for examination.—R. W. L., Orient, N. Y.: The 2c Jackson, black, catalogues 5c; 6c blue locomotive, 2 cents; 2c rose, 1 cent; 15c orange Webster, 50 cents used.—R. K. B., Hazleton, Pa.: The stamps of Russia surcharged for China catalogue 38 cents for a complete set unused.—S. A. C., Methuen, Mass.: A set of Columbian stamps from 1 to 10c can be purchased for 18 to 20c. The 15c is catalogued at 25c and the 3c is catalogued at 35c.—W. M. B., Marion, Kas.: The 5 pence Samoa, of which you enclose drawing, is catalogued at 50c if printed in vermilion, and 2c if printed in carmine red.—S. C., West Lebanon, Indiana.—The red Jackson can be purchased for 1 cent. Jefferson's picture is on the 10-cent of 1870 issue. The 1 and 2-cent Columbians are very cheap and can be purchased for 10 cents and 5 cents per 100, respectively. Revenues of the Civil War bring higher prices if unused, although not priced in that condition in the Standard catalogue. The 2-cent brown and 2-cent green are scarcely worth saving, as dealers pay very little for them. You might possibly get 25 cents per 1,000 for them. Dealers pay from 5 to 8 cents per 100 for 2-cent Omahas and about 15 cents per 100 for 1-cent Omahas.—P. R., National City, Cal.—The 1/2 and 1-penny King's head of Great Britain used, can be purchased for 1 cent. The stamp you send illustration of is a Russian local. A die variety is where there is a very slight difference in the stamp from the first design issued and used. The 25-cent orange on unwatermarked paper is catalogued at 35 cents, and on watermarked paper at 10 cents, both used.—H. A., Chicago, Ill.—The 4-cent Alsace and Lorraine catalogues 60 cents unused and \$3.50 with the inverted net work unused. The stamps have been reprinted, and all reprints have the inverted network. The "P" of Postes is 2 1/2 mm from the border in the reprints and 3 mm in the originals; the word Postes measures 12 1/4 to 13 mm on the reprints and 11 to 12 1/4 mm on the originals.

A Rare Stamp.

There was recently sold in London at public auction a Roumania-Moldavia 1864 issue 81 Paris, blue on blue, unused, with nearly full gum and large margins. After lively competition it was knocked down for one thousand, one hundred dollars.

How Schley Saved Greely

(CONTINUED FROM PAGE 223.)

Leaving the Thetis behind to pick up Ensign Harlow and his men, who were still exploring Stalknecht Island, Schley boarded the Bear and that ship followed in the track of the steam launch.

It was half-past eight in the evening when the little ironclad launch rounded Cape Sabine and made its way into the cove beyond. The storm was driving the wind furiously through the openings in the land ridges, chilling the men to the very marrow as they eagerly scanned the rocky promontory ahead, trying to discover some signs of a camp. Suddenly, through the dull gray light, so familiar to Arctic explorers, there was plainly seen on the top of a little ridge some fifty yards above the land level, the figure of a man struggling against the wind. Instantly one of the men in the launch grasped a signal flag and waved it. The figure on the rocks stooped, picked up something, which afterwards turned out to be an old shirt nailed to an oar, and waved it feebly in reply. Then he slowly and cautiously descended the steep and rocky ridge and came toward the boat. Twice he sank exhausted and twice he arose and struggled forward against the wind. As the launch struck the island Lieutenant Colwell leaped out upon the ice and ran toward the stranger, whose hollow cheeks, wild eyes and disheveled hair painfully indicated his intense sufferings.

"How many left and where are they?" asked Colwell, quickly. The man stared at him a moment and then replied in a thick and mumbling voice: "In the tent, over the hill. Then he muttered half to himself, "The tent is down." To every question asked him the man answered with a monosyllable or repeated sadly the words: "The tent is down—the tent is down." Placing the man, who was Sergeant Long, in the boat Colwell hurried off toward the tent. In the meantime Commander Schley and several officers and men started for the shore in the launch, which had returned to the Bear, bringing the haggard form of Long.

The storm had increased and the sea was running heavy, making the rock-bound coast doubly dangerous, but Schley and the men in the launch reached the shore safely without experiencing anything more serious than a severe drenching. Hastily gathering up the blankets and cans of beef tea, crackers and milk which they had brought with them, they pressed forward over the ice in the direction of Greely's camp. As they drew near the huge "tepk," or wig-wam tent, that sheltered Greely, and which had been partly blown down by the storm, the sight of valuable barometers, chronometers and other instruments strewn about the tent amongst the dirt, ice, rocks and other debris of months, told them at a glance that Greely and his party had reached a state where everything, not food and fuel, had ceased to have a value. The sight, however, that met their eyes as they entered the tent was one of unspeakable horror. On the inside of the tent near an opening, with fixed eyes and open mouth, lay the motionless form of a man who,

to all appearances, was dead. Near him lay another poor fellow without hands or feet, and whose only means of feeding himself was by a spoon which some companion had fastened to the stump of his right arm. In the center of the tent were seated two men who were pouring something out into a tin can while over in a corner of the tent, on hands and knees, a little man with matted beard, crawled curiously forward. On his head was a bright red skull cap and about him was wrapped a soiled and tattered dressing gown. His crouching position, his matted beard, and staring eyes, half hid behind a pair of spectacles, would have given him a comical appearance under different circumstances. But it was no time for the ludicrous. It was a tragedy, not comedy that Schley and his fellow officers looked upon.

"Who are you?" asked one of the party. The man in the tattered gown made no answer. A look of amazement came over his face as he gazed at his rescuers.

"That's the major," spoke up one of the men in the center of the room. "Is that you, Greely?" asked Lieutenant Colwell as he extended his hand toward the man, who was struggling to stand erect.

"Yes," said Greely in a weak, broken voice, hesitating and muttering between his words:

"Yes—seven of us left—here we are—dying—like men?"

Then he fell back, exhausted by the excitement and his effort to speak coherently.

There was not a particle of food of any kind in the tent, except three cans of a foul-smelling and repulsive looking jelly which the seven survivors had made by boiling up strips of sealskin cut from their cast-off clothing, and upon this stuff alone they had subsisted for two whole days prior to the arrival of Commander Schley.

A fire was quickly built and pots of milk and tea were set to boiling. Schley signaled the Thetis, which had come in sight, to send her surgeon to the island with stretchers, blankets and men. While these were arriving the rescuers turned their attention to the wants of the survivors. Restoratives were applied to Private Maurice Connelly, of the Greely expedition, who seemed like one dead, and he soon began to show some signs of life. Next to Connelly, Lieutenant Greely and Sergeant Elison were the weakest in the party. Elison was in a pitiful condition. His feet and arms had been frozen off in an attempt made seven months previous, when the thermometer was forty degrees below zero, to secure some beef which had been left in 1875 about thirty five miles from camp, at Cape Isabella, by an English expedition under command of Captain Nares.

Greely, Connelly and Elison were carefully wrapped in blankets and placed on stretchers. Then began the task of feeding the men. It was the most trying ordeal the rescuers had yet experienced. The survivors had long before ceased to feel the violent pangs of hunger; but as they sipped the beef tea and munched slowly and deliberately at the crackers

the craving desire for food came back with all its awful force. Those wrapped in blankets held up their pinched faces and piteously begged for more food, while those not so weak, dropped to their knees, and holding out their hands sought first by begging and then by abuse to obtain a few more mouthfuls. Even Greely, when forced to give up a can of the boiled sealskin which he had in some way artfully concealed about his person, broke down and cried like a child, declaring that he and his men had a right to eat what was their own. But Commander Schley, acting under the advice of the surgeons, turned a deaf ear to all their entreaties, and gave orders that they be carried at once on stretchers to the boats. On reaching the boats a fresh difficulty was encountered. The wind coming over the ice in furious blasts, drove the water in sheets before it, dashing it over the rails of the boats at every lunge; and no amount of care could prevent both rescuers and survivors from being wet to the skin before they were able to board the ships.

On a little slope some fifty yards from the tent Commander Schley had noticed the rude graves of some twelve or fifteen of the members of the Greely expedition, who had perished from starvation. After the wants of the living had been attended to, Schley turned his attention to the dead. The bodies were all carefully disinterred and placed on board the ships. Then the clothing, sleeping-bags, note-books, guns, scientific instruments, and every scrap and relic pertaining to the expedition were carefully gathered up. It was long after midnight when this work was accomplished and the launch returned to the Thetis, bearing the last vestiges of the ill-fated Lady Franklin Bay Expedition.

The return voyage was saddened by the death of Sergeant Elison, who, unable to survive the shock of two surgical operations, died July 8, at Disko Harbor, leaving of the original twenty five members of the expedition but six survivors, an awful record of Arctic death and suffering.

On the afternoon of August 2, 1884, the Thetis, Bear and Alert, with flags at half mast, steamed into the harbor at Portsmouth, New Hampshire, with their freight of living and dead. The North Atlantic Squadron was there to greet the relief ships, and a grand ovation was extended to officers and crews by the people of Portsmouth, the Secretary of the Navy being present to congratulate Commander Schley for the prompt and daring manner in which he had effected the rescue of Greely.

A Lesson From Lincoln.

It is human nature to take it easy when we can, and with most people big bank accounts will paralyze effort and destroy ambition. Who can tell what would have been the effect on our national history had Abraham Lincoln been born in luxury, surrounded with great libraries, free to the multiform advantages of schools, colleges and universities and manifold opportunities for culture that wealth bestows? Who shall say whether the absence of all incentive to effort might not have smothered such a genius?

What wealthy, city-bred youth of today, glutted with opportunities for acquiring knowledge, can feel that hunger for books, that thirst for knowledge that spurred Lincoln to scour the wilderness for many miles to borrow the coveted "Life of Washington," which he had heard that someone in the neighborhood owned?

What young lawyer of our day goes to a law school or library with such a keen appetite, with such a yearning for legal knowledge, as this youth had when he actually walked forty four miles to borrow Blackstone's "Commentaries"?

Where is the student in college or university today who experiences that satisfaction, that sense of conquest, which thrilled Lincoln while lying on the floor of his log cabin working out arithmetical problems on a wooden shovel by the light of a wood fire, or enthusiastically devouring the contents of a borrowed book, as if his eyes would never rest on its pages again?

On reading Lincoln's Gettysburg speech and his second inaugural address foreign readers exclaimed, "Whence got this man his style, seeing he knows nothing of literature?" Well might they exclaim, but their astonishment would have been still greater had they known that those eloquent utterances that thrilled the nation's heart had fallen from the lips of one who in his youth had access to but four books—the Bible, "Pilgrims Progress," Weems' "Life of Washington" and Burns' poems.—Exchange.

Can You Pronounce It?

Lannfaupwllguynyggogerychwyendro-bwlllindavalllogogog is the name of a parish on the Anglesea side of the Menai bridge, Wales, England, which is the only name in everyday use without any break or pause. The natives call the place Llan fair, but as there are other Llan fairs in Wales, some description has to be added to postal addresses, that to Llan fair being pwllgwynnyll. More commonly the whole is written Llan fair P. G. The meaning of this long name is as follows: "The Church of St. Mary in a hollow of white hazel near the rapid whirlpool and to St. Disillods Church near to a red cave."

"Beat 'em all"
"King" and "Prince" Air Rifles
A choice of names—no difference in merit.

Made in the factory where the first Air-Gun was born. The perfected achievement of the inventor of the air rifle. The handiest, the handiest, the strongest, the most accurate shooting air rifles in the world. Gun like guns which never dismount. Genuine steel barrel; rounded walnut stock with pistol grip and trigger guard; handsomely nickel-plated and polished, all parts interchangeable; shoots B. B. drop shot or darts. Both single shot and repeaters. Just what the boys and girls require. Full of fun without danger.

The "King" or "Prince" Single Shot Air Rifle \$1.00
The "King" or "Prince" Repeating Air Rifle \$1.25
The "Queen" Take Down Single Shot Air Rifle \$2.00
This is the finest Air Rifle made. Comes packed in fancy boxes, 4 inches wide, 14 inches long.

The "Chicago" Single Shot Air Rifle \$1.00
The first and only breech loading Air Rifle made in the world.

Your dealer can supply you, if he will not ORDER DIRECT. Sent prepaid on receipt of price.

For 25 we send tent 10 ft. high and 100 sq. ft. floor space. Send for booklet. McFeely & Gordon, 549 Lake St., Chicago.

Copyright 1908, by Waldon Fawcett.

RUDOLPH FORSTER.

Newly appointed an Assistant Secretary to President Roosevelt.

Another young man has just attained by his own unaided efforts a prominent position in public life at the national capital. The latest energetic young American to forge to the front is Rudolph Forster, who has just been appointed Assistant Secretary to the President of the United States. Mr. Forster was born in the city of Washington in 1872 and is consequently only thirty one years of age. He was educated in the public schools of the capital and later graduated from the Columbian University. In 1894 he entered the government service as a clerk in the U. S. Commission of Fish and Fisheries and three years later was detailed for duty at the White House. His ability was speedily recognized and in 1900 he was promoted to the post of executive clerk to the President. When William Loeb, Jr., was recently made Secretary to the President it gave an opportunity for Mr. Forster to be advanced to his present responsible place as one of the two Assistant Secretaries to the President.

The Great American Boy Army

FOR MANLINESS IN MUSCLE, MIND AND MORALS

Every Energetic American Boy should be a Member of "The Order of The American Boy."

GOLD NUGGET COMPANY, No. 5, CRIPPLE CREEK, COLO.

The Order of The American Boy

A NATIONAL NON-SECRET SOCIETY FOR AMERICAN BOYS. UNDER THE AUSPICES OF "THE AMERICAN BOY."

Object:—The Cultivation of Manliness in Muscle, Mind and Morals.

The object more definitely stated: To promote mutual and helpful friendships among boys; to give wider circulation to high class boy literature; to cultivate in boys physical, mental and moral courage, and develop them along social, intellectual and moral lines; to cultivate purity of language and actions; to discourage idleness, and encourage honest sport and honest work; to cherish and emulate the examples of great and good men; to inculcate lessons of patriotism and love of country; to prepare boys for good citizenship; to cultivate reverence for the founders of our country, and to stimulate boys to all worthy endeavor.

Boys desiring to Organize Companies may obtain a Pamphlet from us containing Directions. It is sent for a 2-cent stamp.

dumb-bells and Indian clubs. This company is interested in stamp and curio collecting, and has a number of games.—JACOB RIIS COMPANY, No. 40, Big Rapids, Mich., recently organized, will have a debating society and an athletic club, and expects to give parties occasionally. Dues ten cents per month. The captain writes that the boys are very proud of their charter.—KANAWHA COMPANY, No. 4, Charleston, W. Va., holds its meetings on Friday of each week. Company dues, ten cents per month, payable at the first meeting in each month. A fine of one cent has been imposed on members not paying dues at first meeting in each month, and a fine of two cents for disorderly conduct during meetings.—FORT JENKINS COMPANY, No. 15, West Pittston, Pa., holds its meetings every two weeks. Dues five cents, payable at each meeting. It has over forty volumes in its library and the assistant librarian writes that it expects soon to have nearly seventy five volumes. This company will hold special exercises on AMERICAN BOY Liberty Day. It has organized a basketball team.—OLIVET COMPANY, No. 13, Olivet, Mich., holds its meetings once a month. Dues five cents per month. This company held the AMERICAN BOY Liberty Day exercises on February 21, and the treasurer writes that it went off very nicely. He says the boys spend some very pleasant evenings together and that the company is progressing finely in every way.—GENERAL ULYSSES S. GRANT COMPANY, No. 14, Indianapolis, Ind., has a basketball team and will have a baseball team a little later.—GOPHER ATHLETIC COMPANY, No. 6, Winona, Minn., recently elected the following officers: Captain, Randolph H. Smith; Secretary, W. P. Tearse, Jr.; Treasurer, Wilton Swain.—HENRY CLAY COMPANY, No. 3, Lawrenceburg, Ky., holds its meetings every second and fourth Friday in each month at the office of W. P. Marsh, who is the company's counsel and helps the boys in every way possible. The captain writes that the boys are very much interested in the work and says they hope

soon to have a large company.—BEAR FLAG COMPANY, No. 14, Calistoga, Cal., has a fine club room at the home of Vice Captain Leslie Weeks. Meetings are held every two weeks. Dues five cents per month. It has a punching bag and will work for other athletic goods as premiums. The following are the officers of the company: Captain, Bert Hutchison; Vice Captain, Leslie Weeks; Secretary, Leslie Crouch; Treasurer, Howard Butler; Librarian, Ralph Hutchison; Assistant Librarian, Walter Butler; Sergeant-at-Arms, Dan Kelly.—OCEAN VIEW COMPANY, No. 15, San Pedro, Cal., chose its name because it has such a fine view of the Pacific Ocean. It has a nice club room upstairs in Harry Weaver's home and meetings are held on Friday evenings at seven o'clock, when, after transacting what business there is or hand, the boys play ping-pong, crokinole, checkers, chess, and read books and magazines, of which they have a great many. The company is saving up money for a gymnasium. It has adopted a resolution to the effect that it will try the best it can to help the American boy cause along.—CAVALIER COMPANY, No. 12, Oakfield, Wis., has had its charter framed. The secretary promises us a picture of the company soon.—STAR OF THE WEST COMPANY, No. 4, Elgin, Ore., sends the following report for January and February: Number of members taken in since January 1, 1903, one; number of members up to March 1, 1903, ten; money taken in since January 1, 1903, \$2.50; money spent, \$1.25 (for library books). The company has at present sixteen good books in its library.—ETHAN ALLEN COMPANY, No. 2, Brattleboro, Vt., holds its meetings on the first Saturday in each month. It has a fine library. The following are its officers: Captain, Robert Kenney; Treasurer, Howard Brown; Secretary, Stewart Brown; Librarian, Roy Monroe.—GOLDEN GATE COMPANY, No. 16, Alameda, Cal., is an athletic company, but will also devote some time to debating and other things. In about two months the company will have a nice boat house, with

Eight Great Days.

THE ORDER OF THE AMERICAN BOY will celebrate by special program the following eight great days during the remainder of this year:

May 23—AMERICAN BOY TREE PLANTING; June 20—AMERICAN BOY FAIR; July 4—AMERICAN BOY INDEPENDENCE DAY; August 22—AMERICAN BOY CAMP FIRE AND CORN ROAST; September 19—AMERICAN BOY FIELD DAY; October 31—AMERICAN BOY HALLOWEEN; November 28—AMERICAN BOY CONGRESS; December 19—AMERICAN BOY ANNUAL BANQUET, PUBLIC MEETING AND ADDRESS. Every member, whether an individual or Company member, will look forward to these days as red letter days for 1903.

three rooms and a porch in which to hold its meetings.—THOMAS EDISON COMPANY, No. 42, Albion, Mich., holds its meetings every other Wednesday. Company dues, fifteen cents per month.—GOLD NUGGET COMPANY, No. 5, Cripple Creek, Colo., holds its meetings on Friday evenings of each week. Dues have been fixed at twenty five cents per month, and this money will be used to buy good books and athletic goods.—W. TAYLOR COMPANY, No. 26, Louisville, O., expects to occupy its new club room in the Kagey Block on March 1. It is a fine room, equipped with steam heat, gas, etc. On the evening of February 6 this company held a minstrel entertainment and old-time social, which was a great success, the total receipts being \$28. The company has two sets of boxing gloves and a punching bag, and as soon as it gets located in its new room will have a library. On the evening of February 22 the company marched in a body to the Progressive church where a young people's rally was being held. The captain writes: "The pastor, in his sermon, spoke very kindly of use and encouraged us in every respect. He used our motto frequently in his sermon." He promises us a picture of the drum corps and also a picture of the new company club room.—THOMAS B. REED COMPANY, No. 6, Auburn, Me., has had its charter framed and hung up in the club room.—CHIEF GOOUTHUNDER COMPANY, No. 4, Redwood Falls, Minn., held its election of officers on February 3, with the following result: Captain, Forest King; Secretary, Henry Morgan; Treasurer, Ralph Kumm; Librarian, Glen Gold. On that evening the club held a mock trial. Meetings every two weeks at the homes of the members, and a literary program is rendered at each meeting.—GRANT COMPANY, No. 26, Grant, Ia., holds its meetings at the home of the treasurer. Dues, one cent a week, with fines limited to two cents.—WILLIAM BARRETT TRAVIS COMPANY, No. 12, Tyler, Tex., has moved its club room and is now nicely situated. This company is interested in baseball, and on March 21 played the Tyler Hat team with a score of 39 to 28 in favor of the O. A. B.'s. GENERAL FRANCIS MARION COMPANY, No. 37, Coldling, O., has adopted the proposed constitution and by-laws. It has organized itself into a correspondence club, and its main object for the present will be to get acquainted with other companies of the order. Meetings once a month during the summer. Dues, twenty five cents per month.—GOPHER ATHLETIC COMPANY, No. 6, Winona, Minn., is interested in athletics and physical culture. It has a fine baseball and track team, and has physical culture exercises every Thursday afternoon.—RAY STATE COMPANY, No. 7, Springfield, Mass., holds its meetings on the first and third Fridays in each month from 7 to 9 p. m., in a room in the Y. M. C. A. building. The room is a large one, furnished with two desks, a fireplace, tables and chairs, and on meeting nights the boys play games, have refreshments and a good time generally. The captain promises us a picture of his company.—G. A. HENRY COMPANY, No. 1, Enid, Okla., is fortunate in having a boy printer in the company who prints letterheads and envelopes for the members.—BENGAL TIGER COMPANY, No. 10, Lisbon, Ia., held THE AMERICAN BOY Liberty Day program on February 29 at the home of Private Merrill Ringer. The house was prettily decorated with flags, bunting, etc. Addresses were given by Professor Ogden and Editor A. M. Floyd, and the visitors took up a collection for the boys. The company has at this time \$4.50 in its treasury. The boys wear blue caps with white letters on them. This company hopes soon to have a club room, with a fine gymnasium, library, etc.—SUSQUEHANNA COMPANY, No. 17, Muncy, Pa., holds its meetings at the home of the captain every Thursday. It expects to have a fine baseball team this season.—WHITE OWL COMPANY, No. 16, Danville, Ind., is progressing finely. It has a club room and has had its charter framed, and the treasurer says the boys are very proud of it.—ETHAN ALLEN COMPANY, No. 2, Brattleboro, Vt., held its first meeting on March 7, and reports a fine time. It will have its charter framed.—HENRY M. TELLER COMPANY, No. 9, Denver, Colo., recently organized, is one of the prosperous companies of the order. It has a small company paper which is printed on the typewriter. The captain writes that the boys are very proud of the badges and charter and will have the latter framed. At present they are practicing for a track team.

Company News.

SHICKHACK CO., No. 1, Chandlerville, Ill., recently elected the following officers: Capt., Jean Scott; Secretary and Treasurer, Harry Thelgrate; Sergeant-at-Arms, Willie C. Schaad. The Sergeant-at-Arms suggests that the members of the Order have uniforms, with gun or sword, and would like to hear from other companies on this subject.—GOPHER ATHLETIC COMPANY, No. 6, Winona, Minn., has two rooms, one of which is furnished with a bookcase containing about fifty books, eight chairs, a cozy corner, center table, folding table for games, and the walls are decorated with pictures. In the other room are five pair of dumb-bells and five pair of Indian clubs, a punching bag, rowing machine, chest weights, a Whitley exerciser and a pair of boxing gloves. It also has a curlo cabinet, and has had its charter framed. This company has a baseball team and a basketball team. The baseball team has met with great success, and the boys are practicing basketball and have arranged for three games in the near future.—NETH LOW COMPANY, No. 16, Tempeville, N. Y., holds its meetings on Friday evenings. It has erected a fine club house and is having a pennant made, as a friend recently presented the company with a flag pole.—GENERAL ULYSSES S. GRANT COMPANY, No. 14, Indianapolis, Ind., is getting along nicely. It holds its meetings on Friday evenings at the homes of the members, and has been making a study of the lives of the presidents of the United States, taking up one at each meeting until it has about completed them. This company will have a strong baseball team this season and a fine gymnasium. It has at this writing about \$1.50 in its treasury.—GRIZZLY BEAR COMPANY, No. 36, Youngstown, O., has a fine club room and a library of eighty books, magazines and papers. It also has a small gymnasium, which is furnished with punching bag, a Whitley exerciser, fencing outfit,

CHINTIMINI COMPANY, No. 7, CORVALLIS, ORE.

Notice.

All names of new members should be sent in by the captain. Any member can send in a subscription, but if the new subscriber is to be a member of the company the captain should notify us to that effect.

Boys in the Home, Church and School

A Successful Boy.

Arthur Schade, Baraboo, Wis., age twelve, is at the head of his class in school, his average grades for some time past being 90 per cent.

ARTHUR SCHADE.

scription to THE AMERICAN BOY out of his own money. Arthur is fond of the violin and expects soon to earn enough money to buy one.

Plan of Pupil Government.

The government of schools by and through the pupils themselves has lately been receiving much attention and encouragement from thinking educators.

First, because it is becoming more apparent that the old monarchical form of school government is falling to educate properly for the duties of civic life, and

Secondly, because the successful experiments carried on in the John Crerar Grammar School and the Hyde Park High School, and other schools of Chicago seem to offer a practical way of solving the question in both the elementary and secondary schools.

The system in operation in the John Crerar School of Chicago was devised by Principal John T. Ray of that school. It has been in operation in his school of about eight hundred pupils for three years, and its adoption by many other large schools of Chicago and elsewhere has been followed.

It is said that about 50,000 children in various parts of the United States are now being successfully governed under this plan.

Because of the simplicity and directness of the plan it has been found to be of practical utility in the elementary schools

where the masses of our children are educated. For this reason it has attracted the attention of educators specially.

To answer the many inquiries coming from pupils and teachers Mr. Ray has printed a little booklet containing the Rules for Pupil-Co-operation, with suggestions for the introduction of the "Citizen and Tribune Plan," which will be sent by him to the boys and girls of THE AMERICAN BOY on receipt of a two cent stamp.

The following outline of the plan is taken from the little booklet:

1. On the first Monday of each school month, a girl and a boy Tribune shall be elected by ballot in each room above the second grade. (Second and first grades appointed.)

2. (a) The Tribunes are the official spokesmen of the room. To them all complaints or reports of misconduct shall be made by pupils, and from them the teacher shall first seek any information pertaining to order or discipline.

(b) The Tribunes shall receive all complaints, and investigate, caution, advise and warn pupils as to their conduct, settling disputes and protecting the rights of the individual and of the school against wrong-doers, if possible.

(c) The Tribune shall report misconduct to the teacher only after a pupil has been warned. The teacher shall deprive the offender of privileges until he goes to the Tribune and makes proper pledges of future right conduct, when the Tribune will ask to have the offender's privileges restored.

3. Pupils are expected not only to do right themselves, but to actively assist in influencing other pupils to right conduct, by personal influence and warning, or by reporting misconduct to the Tribune of the room to which the offender belongs.

4. (a) Citizens may be appointed from each room after the third week in each term to the number of one-half or more of the membership, two-thirds elected by the pupils of the room, and one-third, and all further additions to be appointed by the teacher.

(b) The Citizens shall be elected or appointed from those who excel in personal good conduct, and particularly in assisting in the general good government of the school.

(c) The Citizens are expected to take the same active interest at all times, as the teachers do, in securing good order and right conduct about the school. They are to be accorded all possible liberties about the school the same as teachers. They may enter the front door at any time; may leave the room when necessary, or may sit in the reading rooms before or after school.

(d) Citizens shall have the right to vote on all matters pertaining to the general welfare of the school, and from their number, shall be appointed all committees of inquiry, etc.

5. (a) Tribunes or Citizens may be removed by the teacher or principal at any time for misconduct or lack of attention to Citizen's or Tribune's duties.

(b) Teachers may appoint additional citizens at any time for general good conduct or for special praiseworthy acts.

6. The Tribunes and Citizens shall be designated by the wearing of a pin or badge.

7. The Tribunes of the school shall constitute a school council who may advise with the principal, when called upon, in suggesting regulations for the general order of the school. They may appoint Marshals or other officers with the approval of the principal.

A pretty and impressive installation ceremony is used every month in installing the Tribunes and new Citizens. We give the pledge to the "Flag and School," and the "Tribune" and "Citizens" pledge:

All--We pledge allegiance to the flag (saluting flag), and the Republic for which it stands. One nation, indivisible, with liberty and justice for all. We pledge allegiance to good citizenship in all schools, that we may be the better fitted for citizenship in the republic, whose government is "Of the people, by the people, and for the people."

First Tribune--(To the pupils)--As Tribune I promise to do my duties to the best of my ability, and I appeal to you to give me all the aid you can. Let us be ever thoughtful of the welfare of others and of our school. Let us be habitually faithful in study, courteous in behavior, and honest in all things.

Second Tribune--(To the pupils)--As Tribune I promise to perform my duties to the best of my ability. You can aid me greatly by protecting the school from harmful conduct. Abstain from such conduct yourselves. Frown upon such conduct in others and be brave and firm in rebuking it. In protecting the school, we are also protecting ourselves.

Citizens--As Citizens of this school we pledge that we will at all times try to do right ourselves and to influence others to do right. We will faithfully assist the teachers and Tribunes in securing good order and right conduct in the school. The principal or teacher then formally invests the Tribunes and Citizens with the pins that are the badges of their offices, with appropriate words of advice.

The installation ceremony is then concluded by the school rising and singing, to the tune of America, the following stanza:

All honor we will pay To heroes who each day Are brave and true: Each duty do with care, Keep from all things unfair, Honor the badge you wear-- Red, white and blue.

A Young Telegraph Operator.

JERRY SINCLAIR.

At the freight house in Decatur, Ill., is a young telegraph operator eleven years old, Jerry Sinclair by name. He handles the telegraph key like a veteran operator, and furthermore, he does the local billing, takes care of the "freight received" book, and does other work about the freight office. Not long ago he went to Terre Haute (Ind.) to take the railroad examination on the book of rules, and the men who did the examining were astounded to see how much he had stowed away in his little brain. He is now regularly on the pay roll. Instead of loafing about the station as many a boy is in the habit of doing, he studied the Morse alphabet, did errands for the operator, and, before anybody knew it, had picked up the business.

Main Building, Armour Institute of Technology

CORRESPONDENCE COURSES IN ENGINEERING

Electrical, Mechanical, Civil, Locomotive, Stationary, Marine and Sanitary Engineering; Architecture, Navigation, Refrigeration, Mechanical and Perspective Drawing, Sheet Metal Work, Telegraphy and Telephony, Textile Manufacturing--also 40 Short Engineering Courses.

Sample of Working Pistols. Send for 10 stamps and receive \$8. A. W. SCOTT, COHOKS, N. Y.

BOYS MONEY EASILY
sample. Write for information. Israel Bidaman Co., New York.

Boy Money Makers and Money Savers

Notes.

MAYNARD KING, Union Tex., laid his subscription with money earned by picking cotton. —HARRY DEMENT, Parkersburg, W. Va., earned the Prager prize of thirty dollars in gold given to the best male pupil in the public schools. One of the thirty dollars he invested in a subscription to THE AMERICAN BOY. —CYRUS W. SIMMONS, age seventeen, Wichita Falls, Tex., says that for a long time his mother had been the support of the family and that until he was fourteen years old he didn't realize that he ought to be doing something himself. Then he went to work in a restaurant at \$1.50 a week, and afterwards got \$2.00, and finally \$3.50. He began with the simplest work and in a short time was left in charge of the business every night. He now earns enough to buy his clothes and his school books and has something to give his mother with which to help support his sister and three brothers. He earned last summer \$75.00. Cyrus is in the ninth grade in school and at the head of his class. —E. W. SUMMERS, Sumpter, Ore., goes to school every day and yet succeeds in netting fifteen dollars a month acting as messenger boy mornings and evenings, sweeping out and dusting an office and building fires. —GLENN WELLMAN, Boulder, Colo., makes \$1.25 a week selling papers. —W. KURILE, Montreal, Can., got a job in a bowling alley putting up pins and rakes \$3.50 a week. —LELAND ROBINSON, Cawker City, Kans., goes to school and after school makes egg cases for one of the grocery stores in town. He also works in the store on Saturdays, clearing \$1.50 a week. —HOWARD ZINSER, Oregon City, Ore., earned the dollar for his subscription by selling eggs from his own chickens, which he says number twelve. He is also earning money carrying ninety papers every morning. He rises at six, starts the fire and goes out and attends to his horse and feeds his chickens before breakfast. —RAYMOND COLEY, age twelve, Chisholm, Tex., has been picking cotton and earned \$25. He lives in the smallest county of the largest state in the United States. Its name is Rockwall, the name being taken from an old rock wall found by the early settlers. —J. S. RIMMER, Thrift, Miss., works for his father during vacations and has laid by \$25, which he has out at 10 per cent interest. —CARL KIDDER, Petersburg, Ind., says that his hens lay the eggs that bring the money that pays for THE AMERICAN BOY. —VICTOR KING, Huntville, Kans., tells an interesting story of how fifteen cents grew into \$25. Two of his playmates were moving away from his town and they gave him fifteen cents as a keepsake. His mother suggested that he invest it and see how much he could make with it in ten years. He bought a setting of eggs with the fifteen cents, and traded the chickens for a small pig worth one dollar. He fattened the pig and sold it with a net profit of five dollars. With the money he bought a calf which he sold later at \$15. Then he bought four cases of eggs at twelve cents a dozen and sold them with a profit of five dollars. With the money he had gotten together he bought two calves, which are now about a year old and are worth \$25. He thinks if boys would begin early enough and save and invest their money they would make enough to pay for their education. —JOHNNIE SMITH, Point Arena, Cal., last spring bought six calves and two pigs. The calves he sold for \$32, and the pigs for \$18. He has now \$52 in the bank, with which next egg he expects to make a fortune. —ANTHONY GILFOIL, Providence, R. I., earned the money to pay for his subscription to THE AMERICAN BOY by selling papers. —SOLON RHODES, Azusa, Cal., promised to tell us how he succeeded with his farming. He writes that he didn't have very good success, but he is going to plant another crop this year. His potatoes failed because he couldn't get water for them. He says his experience has taught him much that he will put to good use in the future. He had about nineteen dollars left after paying all expenses. He only had an acre of ground. With the nineteen dollars he paid for a scholarship in stationary engineering and has some money left. —SABIN ELDER, Flemington, Mo., says he started in at work in a store at eight dollars a month. He had two raises in salary and now gets fourteen dollars, and is assistant postmaster. Out of this modest salary he has put fifty dollars in the bank. —HERBERT RHODE, Minneapolis, Minn., earned his subscription dollar chopping wood for a neighbor. He made a contract to chop wood and carry enough into the house each afternoon to last twenty four hours. For doing this he gets fifty cents a week, and has twenty dollars in the bank. He has been able to pay car fare to and from school on cold days, buy all his school supplies, and subscribe for THE AMERICAN BOY. —HAROLD WEBSTER, Cripple Creek, Colo., has been saving money for two years and has one hundred dollars in the bank, twenty seven dollars at interest drawing one per cent a month, and twelve dollars in mining stocks. This is very good for a fourteen year old boy. —JOHN L. REID, Eureka, Kas., made forty dollars last summer working in a store. —CHARLES ROACH, Lisbon, Ia., has bought all his own school books excepting one since he started in school, and has bought nearly all of his own clothes. He is only thirteen years of age and works in a printing office when out of school. He has fifteen dollars in bank. —CHAS. WELLS, Galva, Ill., works in a store nights and mornings and on a farm in the summer. He has saved \$72.50, which he has in the bank. —CARL BARTLETT, Brooklyn, N. Y., carries papers after school hours. This pays his school expenses, amounting to from fifty cents to a dollar a week. He is saving up money for a new suit of clothes and overcoat, as he says he doesn't like to be of much expense to his parents. —RALPH WERNE, Chicago, Ill., earns five dollars a month taking care of his father's horse. —A twelve-year-old Overton (Pa.) boy, who does not sign his name, writes that he has earned enough money to buy a bicycle for himself. This coming summer he is going to work in a creamery, getting eight dollars a month and board. He receives nine dollars a year for attending church.

reaching the roots of the grass. Do not remove the cuttings of the grass during warm weather. On a weak sward, or one much exposed to the sunshine, the constant removal of the cuttings impoverishes the soil, and if the grass be kept short the light clippings will scarcely be observable an hour or two after the lawn is mowed. Nothing enhances the beauty of a lawn so much as shapely cut line edgings. The constant use of the shears, and the occasional cutting of the edges with a small, sharp spade or an edging iron, will be found necessary. Keep the curves of the edges and the straight lines true. Weeds, of course, should be immediately removed as soon as they appear, as they propagate themselves rapidly. Go over the lawn frequently with a sharp old knife and a little common salt or lawn sand, pouring a little of the latter into a hole made by the cutting out of the weed. Plantains may be killed by pouring a little of the lawn sand or a lump of salt on the center of the plant.

The Kind of Boys Wanted.

In one issue of the Chicago Tribune recently there appeared ten "want" advertisements specifying the kind of a boy wanted, and these are the expressions used: "Steady," "experienced," "neat," "bright," "active," "polite," "good handwriting," "with references," "energetic," "good," "good character," "well bred," "earnest," "means to get on." Some one or more of these was used in every advertisement.

The Healthful Yield of Wood and Field

Herbs, roots, bark and berries—known for generations as Nature's most efficacious tonics and blood purifiers—enter into the preparation of

Hires Rootbeer

In addition to its medicinal qualities, it is also the most delightful temperance beverage known—the most cooling and refreshing. A package makes five gallons. Sold everywhere, or by mail for 25c. Beware of imitations.

CHARLES E. HIRES CO., Malvern, Pa.

Our New Policy

WITH REFERENCE TO

SUBSCRIPTIONS

BEGINNING with the issuance of this number of THE AMERICAN BOY, subscriptions will be discontinued as they expire UNLESS RE-NEWED. Renewal slips are inserted in the last number to which the subscriber is entitled, calling attention to the fact that his subscription has expired. Renewals should be prompt so that no numbers may be missed. Subscribers can, by watching the expiration date on their address label, renew early and thus be sure of getting all the numbers as issued.

We want Boys like these

ANY boy who is willing to work after school hours on Friday and on Saturday can earn as much money as he wants. If he will write to us we will not only tell him how to do it but put him in the way of doing it. We want boys in every town to sell

The Saturday Evening Post

Hundreds of boys all over the country are making many dollars weekly in this work. Some are making \$10.00 to \$15.00 a week regularly. No money required to begin. We furnish the first week's supply free. You can start next week if you write now.

\$225 IN EXTRA CASH PRIZES will be distributed next month among boys who sell five or more copies weekly

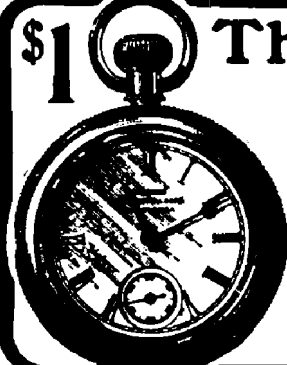

If you will try it, write and we will send next week's supply and everything necessary to start at once, including a booklet showing photographs and describing methods of our most successful boy agents.

The Curtis Publishing Company, 415 Arch St., Phila., Pa.

About Taking Care of Lawns

Thousands of American boys, either for their parents or for others, have the care of lawns. Here are some practical hints that may be put to good service this coming summer. Watering the lawn in dry weather, unless done daily and well distributed in a light spray, produces a hard crust of earth, which prevents the dew from

\$1 The Great Boy's Watch

To be satisfactory and practical for a boy, a watch must first be an accurate time keeper like his father's, else it cannot have his confidence; then it must be able to stand the hard knocks he will give it in his playing and romps, without injuring or affecting its accuracy; lastly it must be handsome in appearance and durable, or he cannot take pride in it or enjoy it long.

There is just one watch in the world answering all these qualifications and its price puts it within reach of every boy. It is the

INGERSOLL DOLLAR WATCH

It is not a boy's watch alone, but is ideal for many men who require accurate time and give a watch rough usage. Positively guaranteed to keep good time for 1 year. Sold at 50,000 stores, probably one in your town, or sent postpaid by us for \$1.00.

Robt. H. Ingersoll & Bro., Dept. 84, 51 Maiden Lane, New York, N. Y.

Boys and Animals

JOHN E. JOHNSON, Kensington, Conn., wants to correspond with boys who are interested in Jucks and Belgian hares.—LEVI TURNER, Plymouth, Ind., is raising pigeons and chickens. Last year he had Belgian hares and at first didn't have much of a success. He has five Buff Pekin bantams, and is also the proud owner of a goat.—CARL WASSERMANN, Fremont, O., lives on a farm and likes it. He is raising Belgian hares and chickens.—HUGH PATTERSON, Pineville, Mo., answers the boy who wanted to know where he could get Texas ponies. "They can be had here and they are as 'pretty as peaches.'"—JOHN W. STEUBE, Columbus, O., sends us a picture of his dog "Joe," who has a record in harness of 3:30 a mile and weighs 63½ pounds. He is a black English coach dog of good breeding. The picture is too dark to bear reproduction.—C. D. HATTON, Andover, O., gives us a motto for poultry raisers, Beware of the rat. Last summer he had a flock of forty three Barred Plymouth Rock chicks and in less than two weeks all but twenty six had fallen prey to rats. He sold six at one dollar apiece and has the remainder, which he says he intends to keep.—J. H. GREEN, Clayton, Neb., may be able to give information to the boy who recently wrote us that he wanted to buy ferrets.—ALBERT HARGREAVES, Abilene, Kans., is the proud owner of a calf, two colts, two dogs, two guns, and \$35 in money.—GEORGE WEBB, Jumbo, Ky., sends us a photograph of himself with a calf that he owns which has five legs. The photograph is not distinct enough to warrant its reproduction.

caterpillar which awakens from its winter sleep is a red-furred creature with bands of black around the body. Every warm winter day these caterpillars get restless and emerge from their hiding places. There are several species of common butterflies which come forth in winter and flit around. They hibernate under roofs and hollow trees, and their slumber is broken every time the temperature increases. They are the first spring insects to appear in numbers, coming forth to sip the nectar from the March flowers. During the winter season they require no food.

The most interesting of the insects are those which lay their eggs in holes in the trees and on twigs in the fall, and then crawl away to die, having performed their mission in life. These insects multiply by the millions.

Eggs can be found anywhere and everywhere at this time of year. It is only necessary to go forth into the woods, park, or orchard and make close examinations of trees, twigs, weeds, rocks, stones and logs. Some of the insects, however, are more cautious than others, and they bore deep holes through the bark of trees, and sometimes an inch into the hard center of the wood itself. At the bottom of these holes they deposit their eggs and then close up the opening with a glue-like substance which will shed the water. Thus no moisture can reach the eggs, nor can the cold or creeping enemies find them. The woodpecker is an exception. With its long, powerful bill this bird hops around and around a tree, and feeds on the eggs of the insects, destroying in each 24 hours hundreds of thousands of them. These birds thus perform a good work for the forests that can hardly be measured in dollars and cents.

The woods and fields are frequently full of cocoons and chrysalids at this season of the year, holding the young of another summer's crop of butterflies, worms and caterpillars. The silken covering of the cocoons keeps out all moisture and cold and inside the creature thrives in comfort and solitary happiness.

BOYS BUILD YOUR OWN BOATS

Full particulars HOW TO BUILD A 15 ft. CANOE, nicely printed and illustrated, sent upon receipt of 15c; also Yachts and Boats of every description designed and built. Address

ST. JOSEPH BOAT MFG. CO. St. Joseph, Michigan.

How to Train Dogs.

Dogs, like boys, possess different degrees of intelligence, some learning more easily than others; some are adapted to one thing and others to another thing, and so on. Firmness, patience and persistence are necessary in the teacher. Don't begin to teach your dog and then stop for a time but keep at it till he has learned what you want him to learn. Use the same word or sign of command every time. There should be a judicious use of praise and punishment.

Jumping comes natural to a dog. You can teach him to jump by putting him in a corner and holding a stick so that he cannot get out of the corner without jumping over it. Start with the barrier a few

MISS AMY E. GIBBS, NORWALK, OHIO.

Some Strange Facts.

The wings of the house-fly vibrate 335 times a second; those of the honey bee 440.—There are over ten million people in Italy who cannot read or write.—The great bulk of chalk is composed of eight different species of tiny shells.—All the cork used in the world in a year weighs a little over 1,000 tons. The bamboo has been known to grow two feet in twenty four hours.—Alaska has paid for its cost to the government twenty times over.—It takes about three seconds for a message to go from one end of the Atlantic cable to the other.—Every square mile of sea is estimated to contain some 120,000,000 fish.

The Hero of Prudence Island.

(Continued from Page 229.)

"The sergeant is over there by the pulpit," said Herbert, trying to raise himself and point across the church; but the next moment he fell back from sheer exhaustion.

"What! as weak as that!" exclaimed Captain Baker, looking at him attentively; "you must have lost a good deal of blood."

"Lost much blood," answered Herbert with a faint smile; "you would have thought so had you seen it pour out of my side. Look!" and with a jerk from his well hand, he threw off the blanket.

The captain gave a cry of horror. The lad had a huge bandage wrapped about his body, and it was completely saturated with blood.

Just then a surgeon passed.

"Ah! Captain Baker, good morning," he said; then nodding towards the boy, he continued:

"It's no wonder you held out the other day, if your men had half the grit of that lad. Do you know a ball passed clean through him when he fell there on the sand, but he reached the boat ahead of his pursuers, nevertheless. Then the redcoats hit him a second time, breaking his left arm just below the shoulder.

"He lied like a loon, and the inflammation had set into both wounds before he reached the shore. I thought for a day or two we shouldn't save him; but he'll pull through now. He comes of good stock, captain," and he hurried away.

The rough officer looked kindly, almost affectionately, down into the face of the blushing lad, while drawing the blanket over him again; then laying one hand on the boy's brow, he turned to his stricken men:

"Lads," he cried, "you all did bravely and I'm proud of you every one; but here is the hero of the Island."

Then the wounded and suffering man gave a hearty cheer.

Herbert slowly recovered, and with his company rendered valuable service for his country until the war closed. He then returned to his native town, where he became an honored and useful citizen. Indeed he was so well known in his own State, and his heroic achievement at the battle of Prudence Island was so often talked of, there are those living today who will, notwithstanding the fictitious name I have given the lad, readily solve his identity, and can tell you the real name of the young hero whose story I have here told.

How Insects Survive the Winter.

(Adapted from New York Times.)

All insects which hibernate select some shaded place. Even the eggs and cocoons of insects are attached to trees or buildings on the shady side. There the sun cannot reach them. They would suffer as much as the hibernating creatures from the alternate action of sun and frost. While bugs and beetles merely crawl under logs, leaf mold and stones to hibernate, the grubs and earthworms crawl down into the earth and hide there below the frost line. They do not emerge from their underground home until spring has thoroughly set in, its warmth reaching down even as far as their subterranean hiding place. The ants follow the grubs and worms, and furnish winter quarters for themselves and their larvae deep down in the ground. But the ants frequently wake from their sleep in midwinter and busy themselves with their treasures. Their larvae are placed in the lowest galleries of their homes, and it is necessary for them to keep an eye carefully on these. They must be fed and kept warm. So through the warm days of midwinter the ants will bring their larvae up to the surface of the ground to enjoy the warm rays of the sun, and toward night take them back again to the deep galleries.

The spiders are only half hibernating creatures. They do sleep a good deal through the very cold weather, but they are easily disturbed in their slumbers and awaken with all their faculties alert. They do not bury themselves in the ground, except the trap-door spider, which merely weaves a silken covering inside of its underground home and lives there in winter as well as in summer.

In the winter time the trap-door spider will often approach the mouth of its home and sun itself in the entrance. The ordinary field spiders begin to spin their winter protection in early autumn, and by the time cold weather comes they have made a house of silk for themselves which is impervious to rain and cold. Inside of this silk covering there is perfect comfort, and the spider proceeds to sleep away the long, dull, dreary days.

To most people the caterpillars seem too sensitive and tender to appear abroad in winter, but if one goes forth in the woods and fields on warm winter days, he may not only find a few caterpillars about, but an occasional butterfly. The most common

Address all communications for this department, Uncle Tangles, care American Boy, Detroit, Mich. Rules to be observed: Write in ink and on but one side of the paper. Sign your name to every page. Write your address in full on one page. Send answers with all new puzzles to be printed. Send original puzzles only. We cannot reply personally to letters.

Virgil S. Schory, Waynesburg, Ohio, wins the prize for best original geographical puzzle received by March 20. Ralph W. Westcott, Maywood, Ill., wins the prize for the best list of answers to March Tangles. He alone of those who answered all correctly noted that "Dives" is not "mentioned in scripture."

New Tangles of especial excellence were received from Kenneth Trainer, Frank M. Field, Edward Langdon Fernald, J. Eustace Guest, Nels W. Kindgren and F. L. Sawyer.

Acceptable Tangles were also received from the following: Arthur Holch, Walter Klein, Clement Barnes, F. E. Thomson, Chase Johnson, Sherman Spurrier, Lot W. Armin, Forest C. Dana, Walter Schneider, Walter Scott Hastings, Will Buckridge, Vernon Lovett, Albert F. Brennan, Richard G. Curtis, Frank Holloway, A. E. Wilson, Lanele Dunn, W. F. Downing, Jr., Jesse L. Haugh, A. Rambeau, Jr., Robt. D. MacMurdy, Royal J. Wilson, John M. Sandel, Vattel Daniel, Harry Christopher, Roy Curtindall, Russell G. Davidson, Lemuel C. Cook, Holman Peart, Robert Raymer, Credon McGann.

Thirty five others, whose names we withhold, sent in contributions that we cannot use.

Correct answers to all the March Tangles arrived from Henvis Roessler, Gordon Andrews, George H. Stanbery, Wm. A. Spaulding, Jr., H. L. Busch, Sarah Gilles, H. Cordis Carter, Erval J. Newcomer, Donald Yarnall, C. Roland Kerbaugh, Arthur Crouch, Kenneth Trainer, Frank M. Field and Edward Langdon Fernald.

Thirteen others answered a part of the March Tangles correctly.

GRAND PRIZE OFFER.

A Stevens Favorite Rifle will be given for the best original Fourth of July puzzle of any kind (illustrated puzzle preferred) received by May 20. Announcement of the award will appear in the July number.

An interesting new book will be given for the best list of answers to the May Tangles received by May 20.

In "Bible Arithmetic," Tangle Number 42, in this issue, and in similar puzzles, it is not sufficient to give the final answer only (which in this case is Isaac's age), without showing in detail the steps which lead to it, and the actual figures and mathematical process throughout.

Every month there are many Tangles who by their success in answering our difficult puzzles and in making very excellent new ones are entitled both to prizes and to much praise. But that all the deserving ones should be thus rewarded is impossible. I am watching with interest the work of all my boys and girls in their friendly rivalry from month to month and take delight in noting their persistence and steady improvement. I want you to feel and know that your hard work is appreciated by your Uncle, even though he doesn't take up valuable space here to say so every time he feels like it.

Answers to April Tangles.

30. (1) Sparrow, spar, row. (2) Barrack, bar, rack. (3) Herring, her, ring. (4) Manage, man, age. (5) Rampart, ram, part. (6) Season, sea, son. (7) Tent, ten, ant. (8) Warden, war, den. (9) Cutlass, cut, lass. (10) Finale, fin, ale.

31. The letter of the alphabet preceding the one employed is to be substituted in every case, A for B, etc. The patriotic motto thus reads: "Love your country and obey her laws."

32. Start at the M in the lower left corner, the following eleven States will appear in order: Michigan, Texas, Kansas, New York, Iowa, Ohio, Maine, Vermont, Utah, Idaho, Wisconsin.

33. Life is real, life is earnest, And the grave is not its goal; Dust thou art, to dust returneth, Was not spoken of the soul.

34. (1) Napkin, (2) Pumpkin, (3) Firkin, (4) Bumpkin, (5) Lambkin, (6) Jerkin, (7) Mankin, (8) Pipkin, (9) Catkin, (10) Rodkin, (11) Welkin, (12) Pekin.

NEW TANGLES.

CENTRAL ACROSTIC.

The central illustration is to be used in turn as the first syllable of the eight words whose remaining syllables are depicted in the surrounding pictures. These eight words entire, placed with a certain one at the top and the rest in continuous order, will spell by their central letters the name of a great historical character.

-The Gopher.

39. GEOGRAPHICAL DIAGONALS.

1. Upper left square: A lake in Asia; a capital city in South America; a city in northern Europe; a cape on the west coast of U. S.; an eastern city of U. S.; a South American city. Diagonal 1 to 2, a Malayan island.

Upper right square: A lake in New York; the largest town of Funchal; a city in South Dakota; a territory of U. S.; an African lake; a city on Lake Huron. Diagonal 4 to 5, a city in southern Europe.

Central Square: 2 to 3, a city of western Europe; a South American cape; a European country; a New England city; a New England city; a city of Ohio. Diagonal 2 to 6, a state of U. S.

Lower Left Square: 8 to 7, a sea of Europe; a mountain in western Asia; a city of Colorado; a river of Ohio; a river of South Carolina; a city of western Europe. Diagonal 8 to 9, a city of Germany.

Lower Right Square: 6. A city of New England; a city of India; a capital city in U. S.; an island south of Asia; an island on the Atlantic coast of U. S.; a river of Texas. Diagonal 6 to x, a city of Italy.

40. STUDENTS' ENIGMA.

My whole has 18 letters, and is a help to students. 5-16-3-16-7-9 10-15-15 is the place where the Pilgrims in Canterbury Tales assembled.

4-13-17 8-16-12-18-7-16-15-2 is a knight in Spencer's Faerie Queene.

7-14-3 17-14-18 is the title and hero of one of Sir Walter Scott's novels.

14-3-6-17-14-15 is king of the fairies.

15-16-15-11-13 is a character in "Oliver Twist."

1-6-10-17-9 4-13-8-12-2-7-4 is the name of three witches in Macbeth.

-Edward Langdon Fernald.

41. PICTORIAL ACROSTIC.

The pictures are to be interpreted by words of uniform length. Their initials spell the name of a holiday (observed in some states) which originated with former governor J. Sterling Morton, of Nebraska.

-Sherman Spurrier.

42. BIBLE ARITHMETIC.

Multiply the number of chapters in Jeremiah by the number of chapters in

100 RICH PREMIUMS TO CHOOSE FROM

THE AMERICAN BOY

THE LEADING BOYS' PAPER OF AMERICA

Entered at the Detroit, Mich., Postoffice as second-class matter.

The American Boy is an illustrated monthly paper of 32 pages. Its subscription price is \$1.00 a year, payable in advance. Foreign subscriptions, \$1.50.

New Subscriptions can commence at any time during the year.

Payment for The American Boy when sent by mail, should be made in a Postoffice Money-Order, Bank Check, or Draft, Express Money-Order, or Registered Letter.

Silver sent through the mail is at sender's risk. Expiration. The date opposite your name on your paper shows to what time your subscription is paid.

Discontinuances. Remember that the publishers must be notified by letter when a subscriber wishes his paper stopped. All arrearages must be paid.

Returning your paper will not enable us to discontinue it, as we cannot find your name on our books unless your Postoffice address is given.

Always give the name of the Postoffice to which your paper is sent. Your name cannot be found on our books unless this is done.

Letters should be addressed and drafts made payable to The Sprague Publishing Co., Majestic Building, Detroit, Mich.

WILLIAM C. SPRAGUE, EDITOR.
GRIFFITH OGDEN ELLIS, ASSISTANT EDITOR.

NOTICE

The Publishers of THE AMERICAN BOY will pay \$3.00 each for Photographs, which in their judgment are suitable for reproduction as front cover designs for this paper. The photograph should not be less than three inches across and four and a half inches up and down. Clear, well toned, well defined pictures of live interest to boys are solicited.

The Rhodes Scholarships.

Dr. G. R. Parkin, the commissioner who is charged with the distribution of the Cecil Rhodes scholarships in the colonies and in the United States, has returned from England. Dr. Parkin spent several weeks at Oxford arranging details connected with the scholarships. He says: "There are some two hundred scholarships to be distributed in the states and colonies. I have been at Oxford for several weeks trying to get the wishes of the Oxford authorities on the manner of distribution. There are twenty one colleges at Oxford and each wants such scholarships as are awarded it to come under its own peculiar rules of entrance and so forth. Some prefer to have post-graduates and others undergraduate scholarships. For the next year I shall be kept busy visiting and consulting with the leading educators of the states and colonies as to the best methods of selecting candidates for the various scholarships which are allotted to their several districts. Each of these scholarships carries with it \$1,500 a year for three years, and it is an interesting question just what class of men are going to apply for them. As the first beneficiaries will go to Oxford in the fall of 1904, the final awards will be made early in that year."

Mistress of the Seas.

Few people are aware that Britain's mistress-ship of the seas is more than an assertion, and that it is acknowledged by every nation. On entering a foreign port marine etiquette requires a man-of-war to salute the national flag by dipping its own, and in return the host lowers its flag. But no foreign ship dips the Union Jack until the foreigner first dips his colors. In all seas, both home and foreign, Britain claims to be saluted first, and this homage is rendered by every nation as the tribute to her sovereignty.—Tit-Bits.

Napoleon Bonaparte

A History Written for Boys by the Editor

CHAPTER XVI.

THE PRUSSIAN CAMPAIGN.

WITHIN a few weeks after Napoleon's return to Paris from his disastrous campaign in Russia, he found himself ready for the field again with 350,000 men. Nothing more clearly indicates the heroic national spirit of France and the power of the name of Napoleon than does this seemingly incredible statement, particularly when it is remembered that there was scarcely a family in all France that had not lost a member in the Russian campaign. The rigorous winter of Russia had effected what armies could not do—it had defeated Napoleon, but more than this it had given birth to the hope among the enemies of the Emperor that his star was at last on the descending and that a suitable time had come for a final and successful effort to overthrow him. The people of Prussia burned with the desire to revenge themselves upon the victor of Jena, and on the 31st of January, 1813, Frederick William called the nation to arms, with the result that the people rose as one man. Women contributed their jewelry and plate to be melted into money, while England poured in her gold. The Emperor of Russia hastened to support the Prussians, and on the 15th of March Alexander and Frederick William met at Breslau, where Alexander, noting the tears that rushed down the cheeks of the Prussian Emperor, cried, "Wipe them; they are the last that Napoleon shall ever cause you to shed."

The command of the Prussian troops was given to Blucher, a dissipated old man but a catapult in battle, who hated the names of France and Napoleon with his whole soul, and when now again permitted to draw his sword, after a period of retirement, swore never to sheath it again until the revenge of Prussia was complete.

Lord Wellington, with a great and victorious army, was steadily pushing the French out of Spain, so that Napoleon found himself, in the spring of 1813, between three great armies led by the ablest captains that ever drew sword against him. Quitting Paris, he reached, on April 18, the banks of the Saale, where he was joined by Eugene Beauharnais and the garrison that had been left at Magdeburg. Here 200,000 men were ready for action, with 200,000 more left as a reserve on the Rhine. Frederick and Alexander, with an immense army almost equal to that of Napoleon's, were at Dresden. Nearly half of the Russian forces yet remained east of the Vistula. Frederick William desired to push on to Leipsic, and Napoleon, seeking to intercept the plan and strike a blow before the Russian army could concentrate its two great divisions, pushed east and, on the 1st of May, met the enemy at Lutzen. Here a battle was fought which resulted in a retreat of the allies to Dresden and finally across the Elbe to Bautzen. Marshal Ney now turned with a portion of the French army toward Berlin, hoping to draw the allied armies away from Bautzen to the defense of the Prussian capital. The attempt was a failure, however, as Frederick William's purpose was to draw Napoleon into the mountains. Napoleon at once moved on Bautzen, reaching there May 21, and found the enemy on the farther bank of the river Spree, surrounded by fortified heights. Crossing the river in the face of the enemy the French took up their quarters in the town. The next day a fearful battle ensued resulting in the withdrawal of the French and the advance of Napoleon to Breslau. The Emperor of Austria now offered to mediate between the contending forces, and an armistice was agreed upon to begin the first of June, Napoleon returning to Dresden.

Napoleon was now urged on all sides to make a treaty of peace that would end the war and leave him in undisputed possession of France. The arguments used were many and powerful. There was an unsettled feeling at home. Austria gave every appearance of preparing for war; should she join the allies there could be little doubt of the outcome. Wellington was universally successful in Spain, having driven the French into the Pyrenees. Nearly all of Napoleon's advisers in the field and at home urged him to accede to reasonable terms proposed by Austria, saying that should he withdraw into France he could strengthen his army and behind the river Rhine and the Pyrenees bid defiance to the world. Instead of taking this advice he declared, "Ten lost battles would not sink me lower than you would have me place myself by my own voluntary act," and announced to his advisers that he did not wish for any plans of theirs, but did wish their service in the execution of his. On August 10, the armistice ended with nothing accomplished by the peace negotiators, and Austria allied herself at once with Russia and Prussia.

MARIA LOUISA,
Second wife of the Emperor Napoleon.

Napoleon now had 250,000 men, 100,000 of whom were at Buntzlau, 50,000 at Zittau, 20,000 at Pirna, 60,000 at Leipsic, and 25,000 at his side at Dresden. One hundred and twenty thousand Austrians and 80,000 Russians and Prussians, under command of the Austrian General Schwartzberg, had their headquarters at Prague. Eighty thousand Russians and Prussians, commanded by Blucher, lay before Breslau. The Crown Prince of Sweden was at Berlin with an army of 90,000. The commanders of the three allied armies agreed that wherever the French should attack, the part of the army attacked should withdraw, the idea being to tempt Napoleon to leave Dresden, where was located the French magazines, at the mercy of some other division of the army and permit the throwing of a large body of the allied troops between the French and the Rhine. Blucher, with his division at Breslau, began the movement by attacking the French at Buntzlau. Napoleon quitted Dresden and hastened with the Imperial Guard to the relief. Blucher, in accordance with the general plan, retreated, Napoleon pursuing. At once the division of the enemy at Prague made a rush for Dresden, driving before them the French at Pirna. The attack on Dresden was made on August 26, before Napoleon could return to assist in its defence, but during the day the Imperial Guard made their appearance, crossing the bridge over the Elbe and bearing with them Napoleon, who, as Hoffman, a German writer, says, "carried the eye of a tyrant and the voice of a lion as he urged on his breathless and eager soldiers." An attack was made at once but night came on and the two armies remained in the presence of each other till the following morning, when the battle was renewed in a storm of wind and rain. In but a few hours 200,000 men gathered about the French Emperor and flung themselves upon the allied troops, causing them to retreat with a loss of 15,000 to 20,000 prisoners and twenty six cannon, and the ablest of their leaders. Among those of the enemy who were slain was Moreau, who had at one time fought under Napoleon. Shot in both legs, he continued to smoke a cigar while they were amputated, and died shortly after.

Napoleon himself now retired to Dresden while his soldiers continued the pursuit of the enemy, but they went too far, for on the morning of August 30 they found themselves surrounded by Prussian troops that appeared suddenly in the rear, and after a disastrous battle surrendered to the number of 8,000 men, with all their arms and many eagles, the remainder of the army scattering among the hills. When news of this loss reached Napoleon at Dresden it found him sick and weary, for not only had this misfortune befallen him but others. As soon as he had retired from the pursuit of Blucher, that general turned and swept back over the field, winning a complete victory on the 26th of August, causing a loss to the French of 15,000 men and one hundred guns. Other divisions of the French army had also suffered defeat, notably in an action at Dennewitz on September 7, in which the

French lost 10,000 prisoners and forty six guns. At length the two divisions of the allied armies, namely, the one comprising 90,000 men about Berlin and the other under Blucher, joined on the west bank of the Elbe and it became manifest that Dresden must be given up by the French and Leipsic taken as the base of operations. Here the Emperor could number 136,000 men, while the allies mustered not less than 230,000. Scarcely had Napoleon reached Leipsic on the 15th of October than the enemy appeared under the command of their General-in-Chief Schwartzberg, who had with him the Emperors Alexander and Frederick William. A battle began on October 16, lasting till nightfall, with slight advantage to the allied armies.

It was now evident to Napoleon that he must retreat from Leipsic, but before doing so he made an effort to obtain peace through the Emperor of Austria, promising to give up Poland, Holland, Spain, Italy, and all Germany under certain conditions, but the offer was too late. Austria, Germany, Prussia and Russia had sworn to make no treaty so long as a French soldier remained on the eastern side of the Rhine. Napoleon, receiving no answer to his proposal, began the retreat with his 100,000 men. They set out at midnight of October 18, over two bridges, one of which was a temporary structure and broke down before daylight. Napoleon had ordered that the remaining bridge be blown up if the advances of the enemy should make it necessary, and the officer to whom the duty had been entrusted, determining that the time had come, set fire to his train and blew up the bridge, cutting off the escape of 25,000 Frenchmen who laid down their arms within the city. Napoleon lost in killed, wounded and prisoners at Leipsic over 50,000 men.

The retreat to France was a bitter and sorrowful one. A halt was made at Erfurt, but Napoleon, learning that his enemies were attempting to place themselves between the Rhine and his flying columns, pushed on. On the morning of October 30, the French met a body of Austro-Bavarians at Hanau, where, with a loss of 6,000 of his men, Napoleon killed or wounded 10,000 of the enemy and took 4,000 prisoners. The number of prisoners would have been greater had it not been for a patriotic miller who suddenly let the water into his mill stream and separated the French cavalry from some German infantry whom they were driving before them. At length the remnants of the French army crossed the Rhine and the Emperor, leaving them, reached Paris in person on November 9. When the Austrians and Prussians reached the Rhine in their pursuit, so great was their affection for the stream that they knelt upon its banks and shouted, "The Rhine! The Rhine!"

CHAPTER XVII.

FRANCE INVADED—NAPOLEON OVERTHROWN AND DEPOSED.

The name of Napoleon had now ceased to be a terror, and even at home there were those who dared breathe a suspicion that its glory was about to set. Now misfortune followed misfortune with startling rapidity. The chapter of Napoleon's fall is shorter than that of his rise. By the campaign just concluded he had lost Germany, Hanover, Brunswick, Hesse. The Federation of the Rhine was dissolved. Denmark allied herself with his enemies. The Prince of Orange returning from England became again ruler of Holland. The Austrians had sent an army into Italy and defeated Eugene Beauharnais. All Italy was rising against him. Not a single French soldier remained in Spain to withstand the powerful arm of Wellington. His four most powerful enemies, England, Russia, Prussia and Austria, were massing themselves on his eastern borders preparing to invade the sacred territory of France. Not only this, but the royalists of France were again becoming active and mustering about their leaders. The radical republicans, too, who had witnessed with dismay Napoleon's usurpation of power also looked upon his misfortunes with delight. His ablest leaders and counselors whom he had repeatedly insulted, now, when it appeared that his influence was about to depart, prepared to take a hand in his overthrow. "Ere I crossed the Rhine," said Napoleon at St. Helena afterwards, "I felt the reins slipping from my hands."

The allied powers now issued a proclamation declaring that it was for the interest of Europe that France should continue to be a powerful state and expressing their willingness to concede to her greater territory than her kings had ever claimed—the boundaries, namely, of the Rhine, the Alps, and the Pyrenees. But the indomitable spirit of Napoleon was not yet crushed. He issued ringing calls for more men, set the arsenals at work making guns, doubled the taxes, and put into every branch of the national

service that prodigious energy which he more than any man that has ever lived possessed. The Legislative Assembly refusing to do his bidding he dissolved it. When his friends ventured to suggest that an honorable peace could be made that would leave him with a greater territory than that of which even Louis XIV had boasted, he cried, "Shame on you! Wellington has entered the South. The Russians menace the Northern frontier, the Prussians, Austrians and Bavarians the Eastern. Shame! Wellington is in France and we have not risen en masse to drive him back. All my allies have deserted—the Bavarian has betrayed me. No peace till we have burned Munich. I demand a levy of 300,000 men—with this and what I already have I shall see a million in arms. I will form a camp of 100,000 at Bordeaux; another at Mentz; a third at Lyons. But I must have grown men—these boys serve only to encumber the hospitals and the roadsides. Abandon Holland! Sooner yield it back to the sea! Senators, an impulse must be given—All must march—You are fathers of families—the heads of the nation—you must set the example. Peace! I hear of nothing but peace, when all around should echo to the cry of war."

He issued peremptory orders everywhere. He executed whole bands of soldiers guilty of endeavoring to escape. Musicians paraded the streets singing ballads in honor of the Emperor. Talleyrand said, "It is the beginning of the end."

Napoleon dismissed the venerable Pope of Rome who had been his prisoner at Fontainebleau, hoping that this might produce a good effect in Italy, but already Napoleon's brother-in-law, Murat, had withdrawn from his alliance with the Emperor and thrown in his fortunes with Austria. He also released Ferdinand of Spain, urging upon him to return to his kingdom and, expelling the English, to re-establish his relations with France, whereupon Ferdinand re-entered Spain to the great joy of his subjects.

On December 20, Schwartzberg, at the head of a great army, crossed the Rhine between Basle and Schaffhausen into Switzerland, which was then neutral territory, and advancing through that territory unopposed soon showed himself before the gates of Dijon. On January 1, 1814, the army under Blucher crossed the river between Rastadt and Coblenz. A little later the army of the North, under Wittgenstein and Bulow, crossed the frontier of the Netherlands. Wellington had already crossed the Pyrenees. Thus 300,000 men, making up four mighty armies, had invaded the soil of France. The news carried terror into every fireside. Nearer and nearer the hosts swept on to Paris, conquering everything before them. On January 23, Napoleon summoned the officers of the National Guard to his palace. Nine hundred of them appeared before him. With him as he stood in this notable presence were the Empress and the little King of Rome, the latter being carried in the arms of Countess Montesquiou. "Gentlemen," said Napoleon, "France is invaded. I go to put myself at the head of my troops, and with God's help and their valor I hope soon to drive the enemy beyond the frontier; but if they should approach the capital, I confide to the National Guard the Empress and the King of Rome—my wife and my child."

On January 24, Napoleon reviewed the troops in the court-yard at the Tuilleries, and on the next morning left his capital, appointing the Empress as regent and placing his brother Joseph at the head of her Council. At midnight he arrived at Chalons and immediately resolved to attack Blucher, who was then in the neighborhood. Blucher stationed himself at Brienne—the town where Napoleon received his military education. Napoleon appeared at Brienne with 70,000 men on the 29th. In the fight that followed Brienne was burnt to the ground and Blucher retired a little farther up the Aube. Napoleon said afterward at St. Helena that during the charge at Brienne he recognized a tree under which, when a boy, he used to sit and read the Jerusalem Delivered of Tasso.

On February 1, Blucher attacked the French and defeated them taking 4,000 prisoners and seventy-three guns. Napoleon then struck across the country to Troyes. There he learned that Blucher was advancing toward Paris. It was now winter and the roads were in fearful condition, but Napoleon set off with the main body of his army to cut off the enemy's advance. A part of Blucher's force was met and beaten, and Blucher, advancing rapidly with the main body of his troops, found himself suddenly in the presence of vastly superior numbers. All day he sustained the charges of the French and at last was forced to retreat. In five days Napoleon had been three times successful, and the hearts of the soldiers were encouraged to believe that fortune would yet favor them in the end. A column of 4,000 Prussian prisoners, with a large number of guns and standards, were sent into Paris, and the people again cried, "Vive Napoleon!" Another division of the allied armies, however, had reached as near the capital as Fontainebleau. Napoleon instantly committed to others the care of watching Blucher and marched with the main body on Meaux, where, on the fifteenth of February, 20,000 men joined him, commanded by Grouchy.

Napoleon now sent a letter to the Emperor of Austria once more endeavoring to win him away from the enemies of France. Francis replied that on no account could he abandon the alliance, but urged Napoleon to make concessions ere it was too late and save himself and his house from ruin. Again he was urged on all sides that, while he was fortunate in holding in check one of the allied armies, others were successful and approaching the capital by rapid marches. His answer was that he had sworn at his coronation to preserve the territory of the republic entire and that he could not sign the treaties proposed without violating his oath.

It is impossible for us in our limited space to follow the rapid movements of Napoleon in his desperate efforts to extricate himself from his difficulties. In these days the genius of the man shone with startling brilliancy. The fact that he was obstinate and perfidious cannot weaken the admiration that we must have for his undaunted courage and his marvelous resolution and powers of invention. On the 26th of March, 1814, the roaring of the enemy's cannon could be heard by the inhabitants of Paris. On the 27th Joseph Bonaparte held a review, and that same evening the allied army passed the Marne. At three on the morning of the 28th they took Meaux, and the roads into Paris were filled with the terrified population fleeing to the capital, "With," says one, "their aged, infirm, children, cats, dogs, live stock, corn, hay, and household goods of every description."

On March 29, the Empress, with her son and many members of the Council of State, with seven hundred soldiers and fifteen wagons laden with plate and coin from the palace, set off for Blois. Joseph Bonaparte issued a proclamation calling on the citizens to defend the city and encouraging them to believe that Napoleon, who was following on the rear of the enemy, would meet and overpower them under the walls of the capital. On March 30 the allies fought and won the final battle, and Alexander and Frederick immediately declared that they would spare the city provided the regular troops would evacuate it. Shortly after four in the afternoon the cannon were turned on the city itself and shot and shell began to spread destruction within its walls. At five o'clock the city capitulated, Joseph Bonaparte himself having set off at one o'clock on a good horse for Blois.

Napoleon reached Troyes on the night of the 29th. On the 30th his friends endeavored to convince him that the fate of Paris was no longer a question and advised him to cease the pursuit and form a junction with another division of the army. He, however, continued to advance, refusing all counsel. In a post-chaise he drove on before his army at full speed with hardly an attendant. At one point he mounted on horseback and galloped without a pause into Fontainebleau late in the night. There he ordered a carriage, and taking two officers with him drove on towards Paris. But a few miles from the city he learned from a body of French cavalry that Paris had been given up. Even then he refused to halt. Jumping from his carriage he asked question after question, calling for this general and that, asking where were the enemy, where his wife and his boy. Again he entered his carriage and ordered it driven with all speed to Paris. "Come," said he, "we must to Paris—Nothing goes right when I am away—They

do nothing but blunder—They should have held out longer. * * * This comes of employing fools and cowards."

It was urged upon him that to go to Paris was to rush on to death or captivity, and it was not until within a mile of the city that he was induced to abandon his design. Then, with perfect composure, he turned and drove back to Fontainebleau. At noon of March 31 the first of the allied troops began to enter the city. They made a splendid showing, 50,000 troops, and in their midst the Czar of Russia and the King of Prussia, with a great crowd of princes, ambassadors and generals, filled the crowd with wonder and delight, and shouts arose on all sides, "Vive l'empereur Alexander!—Vive le roi de Prusse!" while here and there arose the cry, "Vive Louis XVIII!"
